Regional offices were established in the department to relieve the central staff of an enormous volume of administrative work. The hunting and angling public come in contact with the department through the regional offices, which are located at Redding, Sacramento, San Francisco, Fresno, and Los Angeles. These offices provide staff familiar with problems of the locality and co-ordinate with a headquarters group responsible for state-wide planning and research. Through decentralization, local supervisors of the various functions are located in the field where they can take action based on intimate knowledge and fieldwork.

Program and Performance

In general the regional program, in addition to a headquarters function, includes inland fisheries, game management, and wildlife protection. The activities of the inland fisheries operations are concentrated on hatcheries, stream improvement, fisheries investigation, and local water development problems. The activities of the game management program in the field include all phases of research, applied research, and management of big game and upland game. Field operation of the patrol is under the wildlife protection function. This latter function also supervises hunter safety programs, educational programs, and many field maintenance responsibilities. Direct costs of regional operations by function, excluding employees' retirement, are as follows:

	Actual 1959-60	Estimated 1960-61	Proposed 1961-62
Headquarters	$569,914	$613,660	$626,445

EXPENDITURE DETAIL BY PROJECT—Continued

PHEASANT INVESTIGATION AND MANAGEMENT

This project provides for a detailed study of the life history of the ring-necked pheasant, and the gathering of data pertinent to the management of the species and setting of proper seasons and bag limits. Development of practical habitat improvement procedures is also provided. Detailed projects include:

Investigations—trap, band and fluoroscope birds to measure hunting pressure and population turnover; analyze and interpret data; and make investigations on habitat improvement ----- 50%

Management—train regional personnel in data gathering; take statewide pheasant censuses and formulate recommendations on seasons and bag limits; check hunting programs; and prepare special reports on pheasant management ----- 50%

WATERFOWL INVESTIGATION AND MANAGEMENT

This project provides for detailed surveys and evaluation of waterfowl migration, breeding areas, and wintering areas. Compiled data is utilized for efficient management of waterfowl. The development of practical techniques for marshlands management for waterfowl use is also a goal. Included in this project are:

Investigations—trap, band and fluoroscope birds to establish migration patterns and determine local production of waterfowl; establish methods of growing natural foods and increasing waterfowl use of marsh areas; analyze data and write reports of investigations ----- 62%

Management—make periodic censuses on breeding areas and wintering grounds to determine population changes; make reports on status of waterfowl populations for Pacific Flyway Committee as the basis for recommending seasons and bag limits to the Fish and Wildlife Service; and make bag check on annual game take and make recommendations to waterfowl management area managers as to marshlands management procedures ----- 38%

UPLAND GAME INVESTIGATION AND MANAGEMENT

Under this project statewide surveys are conducted to determine the distribution, numbers and habitat needs of the various upland game bird species pertinent to setting proper seasons and bag limits and for other management purposes. Project activities include:

Investigations—complete reports on dove investigations; establish practical techniques of surveying upland game populations; evaluate habitat improvement practices; evaluate results of planting exotic species and make experimental plantings of exotic species ----- 70%

Management—train regional personnel in gathering data on upland game; formulate recommendations on seasons and bag limits; advise regions on habitat improvement needs of upland game; trap and plant partridges and evaluate results; and prepare special reports on request ----- 30%

STREAM AND LAKE IMPROVEMENT

The purpose of this statewide project is to increase the yield of sport fishes through the restoration and improvement of habitat, as well as the development of access. During the 1961-62 fiscal year it is estimated that the program will receive the following emphasis:

Habitat improvement by removal of barriers to migrating fish	40%
Construction of stream and lake improvement devices	5%
Habitat improvement by control of undesirable fish species and aquatic plants	50%
Improvement and maintenance of existing structures	5%

STUDY OF CATFISH FISHERY

During this project's initial period of operation, from November 15, 1951 to June 30, 1956, several long-term tagging experiments were begun to obtain measures of survival, harvest rates, and migration patterns of the State's most important catfish populations. Because tagging studies of this nature require several years of tag returns in order to secure adequate data, it was decided to terminate the project pending the return of sufficient tags. During the 1959-60 fiscal year it appeared that the return of tags was adequate so the project was reactivated for a 5-month period from February 1, 1960 to June 30, 1960 in order to analyze and prepare for publications the results of these tagging studies.

SACRAMENTO-SAN JOAQUIN RIVER SALMON AND STEELHEAD STUDY

The purpose of this project was to collect facts necessary for the management of the salmon and steelhead of the Sacramento-San Joaquin River system. Data were collected and reports prepared on the following activities: (1) The results of stocking yearling steelhead in the Sacramento River system. (2) The evaluation of losses of salmon and steelhead in unscreened irrigation diversions. (3) Evaluation of the success of the introduction of silver salmon into the Sacramento River system. Some time was also spent each year assisting with the annual king salmon spawning survey. This project terminated at the end of the 1959-60 fiscal year.

TROUT MANAGEMENT STUDY

This project is expected to be completed during the 1961-62 fiscal year. It is aimed toward the completion of experiments designed to show which species, size, and strains of trout are best suited for lakes of the type found in the Lakes Basin Recreation Area of Sierra County. During the 1961-62 fiscal year it is estimated that this project will receive the following emphasis:

Field tests to determine survival, growth and general suitability of different strains of brown trout, rainbow trout and eastern brook trout	20%
Analysis of data and preparation of final reports on the work of this project	80%

STURGEON AND STRIPED BASS STUDY

The main purpose of this project is to follow trends in the State's important striped bass fishery in order to provide adequate regulation of the take. All investigational work and virtually all striped bass and sturgeon management functions, aside from patrol, fall within the scope of this project. During the 1961-62 fiscal year it is estimated that the various phases of the project will receive the following emphasis:

Tagging study to determine angler harvest, mortality rates, and migrational patterns of striped bass	20%
Creel census to obtain measurements of angler success, composition of the catch and total catch during each of the major striped bass fishing seasons. These data are needed to provide a background that will facilitate evaluating the status of the population in future years	20%
Carrying out and analyzing the annual tow net survey of striped bass in order to obtain an index of spawning success	20%
Analysis of striped bass party boat catch record to determine angler success and abundance	10%
Striped bass food habit studies	15%
Other miscellaneous striped bass studies	10%
Miscellaneous work on sturgeon	5%

COASTAL STREAMS ANADROMOUS TROUT AND SALMON STUDY

The purpose of this study is to determine the most effective means of maintaining and increasing runs of salmon and steelhead in coastal streams. During the 1961-62 fiscal year it is estimated that the different phases of the project will receive the following emphasis:

Evaluation of the results of stocking yearling steelhead and silver salmon in coastal streams	50%
Obtaining the basic facts necessary for sound regulation of the salmon and steelhead fishing on coastal streams. This includes determination of the time of downstream migration of yearling fish, sizes and abundance of juvenile fish at different times of the year, and angling pressures on the streams	20%
Evaluation of the effects of logging activities on the anadromous trout and salmon fisheries of the north-coastal area	10%
Investigation of stream flow and gravel requirements for the successful spawning of salmon and steelhead	5%
Participation in the annual salmon and steelhead spawning inventories in north-coastal streams	15%

OTHER CURRENT EXPENSES	No. of positions 59-60 (Filled)	60-61 (Auth.)	61-62 (Auth.)	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

NORTHERN CALIFORNIA MARINE SPORT FISH SURVEY

The purpose of this project was to determine angler use, make estimates of total catch and compare the relative importance of the different sport fish species taken by ocean anglers in the area from Point Concepcion to the Oregon border. Different sport fisheries were studied such as that done from party boats, skiffs, piers, shore and skin diving. Comparisons were also made of the importance of the species landed in the sport and commercial catches in order to determine the interfishery competition. This project is being terminated on June 30, 1961, and will be replaced by the Blue Rockfish Management Study.

EXPENDITURE DETAIL BY PROJECT—Continued

WARMWATER FORAGE STUDY

The purpose of this project was to test the introduction of new warmwater forage organisms. Primary emphasis was placed on an evaluation of results from the introduction of threadfin shad into Southern California waters. This project terminated June 30, 1960. Future work with warmwater forage species is included in the new project entitled "Experimental Management of Warmwater Reservoirs."

BARRACUDA AND WHITE SEA BASS MANAGEMENT STUDY

The purpose of this study is to obtain data on the abundance, distribution, range and life history of these two important marine sport fishes in order to institute proper management practices. During the 1961-62 fiscal year it is estimated that the program will receive the following emphasis:

Analysis of tag recoveries to determine movement, rate of exploitation, and distribution of barracuda and white sea bass 10%

Biological studies including age, and rate of growth, maturity and fecundity, food habits and racial studies 60%

Maintenance and analysis of catch statistics on both species 5%

Collection and analysis of oceanographic data in order to evaluate these data with respect to barracuda and white sea bass 5%

Sampling the sport and commercial catches to learn their age and size composition, and to obtain material for biological studies 20%

OCEAN FISH HABITAT DEVELOPMENT

The purpose of this study is to increase the yield of marine sport fishes through the development, testing, and application of methods for the restoration and improvement of their environment.

During the 1961-62 fiscal year it is estimated that the program will receive the following emphasis:

Installation and evaluation of devices to increase and concentrate marine sport fishes in order to improve the angler harvest. Scuttled ships, boats, old car bodies, rock, concrete rubble, and other objects or material will be used to create artificial fishing banks. This also includes an evaluation of the effect of offshore oilwell drilling on marine life 80%

Establish new kelp beds on artificial fishing banks and on existing apparently suitable areas where kelp beds are absent 10%

Miscellaneous development work including obtaining of access areas, introduction and transplantation of fishes and related work 10%

EXPERIMENTAL MANAGEMENT OF WARMWATER FLUCTUATING RESERVOIRS

The objectives of this project are to develop and evaluate effective management techniques that will maintain good fishing in new warmwater impoundments, such as Lake Berryessa, Folsom Lake, and Nacimiento Reservoir; and raise production and/or yields of game fishes in older reservoirs such as Millerton Lake. Typical warmwater reservoirs will be used as test waters. Some of the experimental management techniques that may be used include: (1) Introduction of new game fish species. (2) Introduction of forage organisms. (3) Manipulation of existing fish population by partial chemical treatment or other means. (4) Fertilization. (5) Different angling regulations. (6) Introduction of brush shelters or other devices to concentrate fish. (7) Application of any new techniques discovered during the course of the project that would appear to hold promise in increasing production or the yield of warmwater fishes such as black bass, catfish, crappie and sunfish.

BLUE ROCKFISH MANAGEMENT STUDY

The Dingell-Johnson Project F12R, Northern California Marine Sport Fish Survey project which terminates June 30, 1961, revealed that about one-half of the annual party boat and skiff catch from Bodega Bay to Avila is made up of one species—the Blue Rockfish. In view of the overall importance of this species and the fact that so very little is known of its life history, this project is being started to provide the necessary information for proper management. During the 1961-62 fiscal year, it is estimated that the different phases of the project will receive the following emphasis:

Biological studies including rate of growth, spawning seasons, spawning areas, food habits, and age compositions of the population or populations	20%
Tagging and analysis of tag recoveries to determine migration patterns and rate of exploitation	20%
Sampling the sport catch to determine angler success and to collect material for biological studies	40%
Maintenance and analysis of catch statistics on blue rockfish and other bottomfish, including the important ling cod in the key fishing areas of Bodega Bay, Princeton, Santa Cruz, Morro Bay and Avila	20%

GENERAL ANALYSIS

Objectives

Objectives of the Marine Research Committee are the development of commercial fisheries of the Pacific Ocean and of marine products susceptible to being made available to the people of this State.

Program and Performance

Research projects are selected by the 9-member committee which includes 5 members actively engaged in the sardine industry, at least 1 representative of organized sportsmen's groups, and at least 1 representative of organized labor.

Research is financed from a privilege tax of 5 cents per 100 pounds of sardines, Pacific and jack mackerel, squid, herring and anchovies. Under provisions of Section 8046, Fish and Game Code, the privilege tax will expire December 31, 1961.

Carrying out of research projects selected by the committee is accomplished by contracting with other public and private agencies. The principal agencies whose services are utilized are the United States Fish and Wildlife Service, Scripps Institute of Oceanography and the Department of Fish and Game.

Principal research and investigations sponsored by the committee have concerned the Pacific Sardine Fishery which declined to a very low ebb in 1947-48. It was during this period the Marine Research Committee was formed by the Legislature. The committee has devoted a major share of its revenue to sardine investigations in an effort to restore this fishery.

In addition to sardine research, the committee sponsors research and investigations of mackerel, anchovy, herring and related species; studies of oceanographic factors, including food habits, relating to the life history of these fish; and assesses the abundance and distribution of the various species.

The budget proposed for 1961-62 continues these investigations and research projects at a level commensurate with available funds.

Staff assistance to the committee is provided by contract with the Department of Fish and Game.

GENERAL ANALYSIS

Objectives

Under provisions of the Wildlife Conservation Law of 1947 the board is authorized to acquire, restore, and maintain in a high state of productivity areas which can successfully sustain wildlife and provide adequate and suitable recreation for the people of the State. To accomplish this end the board may study and investigate suggested programs.

Program and Performance

The board is composed of the Director of Finance, the Director of Fish and Game and the President of the Fish and Game Commission. The board is advised by a joint interim investigating committee consisting of 3 Members of the Senate and 3 Members of the Assembly. Annually $750,000 is transferred to the Wildlife Restoration Fund from license fees collected for conducting horse races. The board is charged with the administration of this fund.

Through its staff the board conducts necessary investigations and studies to determine the areas within the State most essential and suitable for wildlife production and preservation and which will provide recreational advantages.

As a result of such studies the board determines which lands or rights in lands or water should be acquired by the State to effectuate the wildlife conservation and recreation program. After acquisition and completion of such development and facilities as are necessary for the purpose for which the lands were acquired, the areas are managed and maintained by the Department of Fish and Game. The department is authorized to contract with other public agencies for such construction, management or maintenance.

GENERAL ANALYSIS

Objectives

The principal functions of this division are to provide office facilities and staff services for the director; provide accounting, personnel, budgetary, administrative analyses, and property services to the divisions of the department and other related agencies under contract; and co-ordinate the department's conservation education program.

Program and Performance

Conservation, development, and utilization of the State's primary natural assets in the fields of forest, mineral, soil, and recreational resources comprise the program of the department.

This division of the department, in addition to providing administrative and office services, assists the director through exercise of the review function with regard to departmental budgetary, fiscal, and personnel operations, and provides consultative and advisory services on operating and financial matters for the several divisions of the department, and the State Water Pollution Control Board. Cost of the services furnished by the Division of Administrative Services is distributed and charged to the special fund divisions of the department and other agencies on a pro rata basis. The 1961-62 Budget proposes financing the Division of Beaches and Parks program from the General Fund. In previous years the division's program was supported from the State Beach and Park Fund. This change reduces the Division of Administrative Services reimbursements from special funds in excess of $200,000.

The abolishment of a junior-intermediate clerk position resulting from the conversion of the department's property accounting records to tabulating machine operation is reflected in this budget. This is the second position abolished and will complete the initial staff adjustments for this operation. The equipment and improvement records have been converted and the land records will be converted during the current fiscal year.

GENERAL ANALYSIS

Objectives

The State Park System has 3 essential objectives. They are to acquire and develop those recreation areas that are of statewide importance, to preserve for public enjoyment and education outstanding scenic areas of the State, and to acquire, restore and preserve significant historic sites and buildings.

Program and Performance

The State Park System is administered by the Division of Beaches and Parks as a part of the Department of Natural Resources. Administrative responsibility for the program is in the Director of the Department of Natural Resources; however general policies established by the State Park Commission provide guidance to the director and the chief of the division in the administration, protection, and development of the State Park System. The commission consists of 7 members appointed by the Governor with the advice and consent of the Senate for 4-year staggered terms.

Major efforts of the division for the past several years have been on an extensive acquisition and development program established in 1956 and 1957. This program of acquisition and development as well as the continuing operation of the division has been financed primarily from tidelands oil revenues. This financing source does not provide sufficient funds to continue the full scope of the state park program. To meet the serious problem created by associating an expanding program with a relatively fixed financing source, this budget provides for the funding of the state park program from the General Fund as supplemented by the revenue earned from service fees and concessions.

In further recognition of the continuing pressure on the State's recreational resources, this budget provides for the initial phase of a completely revitalized 5-year program for new acquisitions and development. The details of this program will be found in the Capital Outlay section.

The support budget proposed for the 1961-62 fiscal year provides personnel, equipment, and operating funds for increased workload of the division. The acquisition of new areas requiring protection and operation, and increased public use and attendance at existing parks, beaches, and historical monuments account for the principal budget increases. Examples of areas being developed and placed in operation include McGrath Beach (Ventura County), Ocean Beach (San Diego County), Thornton Beach (San Mateo County), and Woodson Bridge (Tehama County). Detail of the various program changes are reported elsewhere in the budget detail; however attention is called to the addition of the reservation system at the Hearst San Simeon State Historical Monument, and to the Squaw Valley State Park program where provision is made for maintenance and custody of the area in support of a master concession agreement which has been negotiated. The program at Squaw Valley State Park for 1961-62 anticipates the Division of Beaches and Parks assuming direct responsibility for fire protection in the park. In the past this service was performed under contract by the Division of Forestry.

ADMINISTRATION

Program and Performance

The administration program includes staff and funds for operations of the State Park Commission; the chief of the division; and provides for divisional business management activities.

During the current year a reservation system was initiated at Hearst San Simeon State Historical Monument. The headquarters staffing for this reservation system is proposed for continuation and shown as proposed new positions in the 1961-62 fiscal year.

TECHNICAL SERVICES

Program and Performance

Under the supervision of a deputy chief this function includes the history and conservation education unit; forestry services; the acquisition section which negotiates for beach and park properties; and the development section which plans and supervises the construction of public use facilities in state parks.

Provisions of Chapter 2164, Statutes of 1959, call for investigations, studies, surveys, and generalized plans of proposed acquisitions or developments prior to appropriation of funds for the project. Staffing to accomplish these continuing responsibilities, as well as the preparation of a completely revitalized 5-year beach and park program for new acquisitions and development, was provided in the Budget Act of 1960. This staffing was assigned to 3 regional planning offices located in Goleta, Monterey and Sacramento. In addition a strengthening of the central review function in the headquarters office was budgeted.

At the time staffing was provided for these regional planning teams, 3 positions (an associate landscape architect, a junior-assistant landscape architect, and a drafting aid II) were considered in the core staffing. The specific positions referred to were to terminate work on the Redwood Highway relocation study as of June 30, 1961. These positions are now budgeted for continuation as a part of the regular planning function.

Also provided are 2 intermediate stenographer-clerks (1 each for the Monterey regional office and Goleta regional office). Each regional office is headed by a senior landscape architect who supervises a team of engineers, 2 teams of landscape architects, and a team of advance planners. These offices are experiencing difficulty in meeting the workload with the single clerical position provided in each office. The Sacramento regional office, being physically situated near headquarters office, is able to obtain clerical manpower from that source.

The position of recreation planner II is proposed to continue the co-ordination of the statewide riding and hiking trail program from support funds. This position has been supported from a special appropriation which will expire June 30, 1961.

The graphic artist is proposed to assist in meeting backlog currently experienced in the division's exhibit program and in connection with the development of the 5-year master plan.

---

[a] The following positions were provided by administrative action to permit the establishment of a reservation system at Hearst San Simeon State Park: 1 senior typist-clerk, 1 junior-intermediate stenographer-clerk, and 0.7 man-years of temporary help. These positions are proposed as new in the 1961-62 fiscal year program.

MAINTENANCE AND OPERATION—DISTRICT HEADQUARTERS

Program and Performance

For administrative and operational purposes the State is divided into 6 districts under the general direction of a deputy chief. Each district is directly supervised by a district superintendent (state park ranger VI) who is responsible for the operation and maintenance of state park facilities in his district for the beneficial use of the public. All matters pertaining to the staffing and operations of park units are administered and coordinated through the district headquarters. Districts are assisted in the historical and conservation fields and with the acquisition of property by divisional staff headquartered in Sacramento.

In the reorganization of the development planning function set forth in the Budget Act of 1960, 3 positions (consisting of an architect, engineer and a drafting aid or delineator) were assigned to each district headquarters to do planning on maintenance and repair projects. In addition each district office was provided with a state park ranger V to act as liaison between the district headquarters office and the regional planning office.

MAINTENANCE AND OPERATION—FIELD SERVICES

Program and Performance

Field services includes the park unit supervisors, park ranger and park attendant staffs, and the various specialized technicians needed for continuing operation and maintenance of the State Park System. Types of facilities provided include ocean beaches, lakes and reservoirs, inland and mountain parks, historical monuments, and roadside rests.

The following additional positions with related operating expenses and equipment are proposed for the 1961-62 fiscal year to provide operating personnel necessary to staff new and existing State park units and facilities:

1. Positions proposed for opening and operating new or enlarged units:
   a. Ocean Beach—1 state park ranger III, 2 state park ranger I, 3 state park attendant, 20 man-months seasonal park aid, 1 lifeguard supervisor, and 25 man-months seasonal lifeguard.
   b. McGrath Beach—1 state park ranger II, 1 state park ranger I, 2 state park attendant, 24 man-months seasonal park aid, 6 man-months seasonal lifeguard supervisor, and 24 man-months seasonal lifeguard.
   c. Woodson Bridge—1 state park ranger II, 1 state park ranger I, 6 man-months seasonal park aid.
   d. Thornton Beach—1 state park ranger I, 1 state park attendant, 6 man-months seasonal park aid.

2. Staffing for existing areas on the basis of workload and completed facilities:
   a. State park attendant—1 each at Patrick's Point and Angel Island and 2 at Folsom Lake.
   b. Historical monument guide—1 each at Jack London Home and Columbia State Historical Monument.
   c. Intermediate typist-clerk—1 each at Patrick's Point and Hearst San Simeon State Historical Monument.
   d. Lifeguard supervisor—1 at Carpinteria Beach.
   e. Seasonal park aid—6 man-months each at Patrick's Point, Benicia Beach, and Calaveras Big Trees.

The permanent position of lifeguard supervisor proposed at Carpinteria Beach is in lieu of 12 man-months of seasonal lifeguard supervisor which latter position is proposed to be abolished.

SQUAW VALLEY

Program and Performance

During the 1960-61 fiscal year a concession agreement was signed. Under terms of this agreement the State will provide custodial and maintenance services and utilities (with the exception of power). The Division of Forestry will provide fire protection in the valley until June 30, 1961, at which time the Division of Beaches and Parks will assume responsibility. The 1961-62 Budget contains fire fighting personnel and equipment to provide basic fire protection to the area. The personnel provided will form the nucleus of the fire fighting team and will be augmented by park personnel assigned to the area.

GENERAL ANALYSIS

Objectives

The primary mission of the Division of Forestry is the protection of over 39,000,000 acres of state and private lands having statewide interest with regard to timber production, rangelands, recreational uses, and watershed values. The various land management programs include the prevention and suppression of fires; the administration and enforcement of forest practice rules; forestry advisory services; range improvement programs; production of nursery stock for public planting, windbreaks, soil erosion control and reforestation purposes; management of state forests; control of white pine blister rust and forest insect infestations in co-operation with federal agencies and private owners; and co-operation with the Federal Government on forest surveys.

The division directly provides fire protection for approximately 30,000,000 acres of state-owned and private lands. Under a contract arrangement with the United States Forest Service, 5,000,000 acres are protected, and 4,000,000 acres are protected through contracts with 6 counties. In addition to the fire protection provided for lands of statewide interest, the division protects about 6,000,000 acres of rural agricultural land under contracts providing for reimbursement of costs from 25 counties.

Program and Performance

The critical problems in the management and protection of California's wild land areas have been brought about by the pressures of a continually growing population. The use of wild land areas for permanent and summer homesites and for recreational purposes has increased greatly during the past few years. Along with the increased use of these lands, the values for timber and rangelands and for watershed purposes have also increased with the demands of a growing population. Because of these expanding uses and pressures, the division has instituted a program of continuous review of its basic fire plan to provide personnel, equipment and facilities planned to meet statewide needs. This new planning program is the successor to the "1956 Fire Plan" which plan was implemented in the 1957-58 Budget when approximately $2,000,000 was added to the division's budget to provide one-fourth of the additional personnel and equipment needed as established by the plan. Since the division was in the middle of the fire season when the additional funds became available on July 1, 1957, the full program increase could not be put into effect at that time as the

---

[a] Federal grants received under the Clarke-McNary Act are deposited in the General Fund and appropriated therefrom for the support of the Division of Forestry by the Budget Act. As federal funds these amounts are excluded from the overall budget totals. These funds are provided to assist in the protection of forest and watershed lands of national interest and to assist in the nursery and service forestry program.

Department of Natural Resources

DIVISION OF FORESTRY—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS—Continued

Program and Performance—Continued

movement of personnel to new assignments would have seriously affected the striking ability of fire control forces. Major moves to implement the program were, therefore, made at the close of the fire season. Further additions to the staff and facilities have been provided in subsequent budgets.

As a part of the continuing conservation camp program, 2 new 80-man camps are scheduled for activation in 1961-62. As of July 1, 1961, it is estimated that 1,860 Department of Corrections inmates and 345 Youth Authority wards will occupy 26 permanent camps, 3 mobile camps and 3 spike camps.

The 1961-62 budget proposes recognition of certain deficiencies in forestry fire suppression employees' working conditions. The largest item of recognition is the reduction of the work week during the declared fire season from 120 hours to 104 hours. This proposed change will provide for 1 additional night off each week for fire control employees on "stand-by" duty. Such a change will allow the employee to spend 3 nights and 2 days with his family. A limited amount of recreational equipment is also provided.

Several of the division programs which affect the national interest are reimbursed under grants from the Federal Government. Under terms of the Clarke-McNary Act, the State will receive approximately $1,148,000 during 1960-61 and $1,108,160 during 1961-62 for fire protection on timberlands and primary watershed areas. These payments include recognition of forestation of denuded or understocked timberlands.

ADMINISTRATION

Program and Performance

The function of administration includes the office of the State Forester and the following staff functions: fire control; business management; engineering and conservation camps; training; fire prevention education; operation of the Davis warehouse and equipment repair shop; administration of the state nursery; and forest, range, and watershed management. The prime objectives are to develop operating policies, rules and regulations in accordance with forest and fire laws and administrative procedures of the State. In addition, technical assistance is provided to the field forces in the specialized staff fields.

The fire control section co-ordinates the statewide fire fighting forces both within the division and with other fire control organizations. In addition, they assume staff responsibility for equipment development and maintenance, communications, fire plan development and statistics, and forest fire research. Program increase in 1960-61 established a Meteorologist II position to work with the application of fire weather data by the field forces and a Forestry Equipment Engineer to supervise the equipment utilization and maintenance in the Conservation Camp Program.

The business management section is responsible for the budget development, fiscal control, procurement agreements, and personnel matters. The section also supervises the activities of the Davis warehouse and shops.

The engineering and conservation camps section prepares administrative and fire control maps for the division's area of responsibility. In addition, they prepare construction plans and give guidance and supervision to the capital outlay and maintenance program. The section also co-ordinates the activities of the Forestry Conservation Camp Program and develops standards for construction and maintenance of roads, firebreaks, and telephone services.

The training section is responsible for the co-ordination of 2 training centers and the development of other in-service training programs.

The fire prevention education section co-ordinates the fire prevention program with other co-operating governmental agencies, industrial firms and citizen groups. It is also responsible for the law enforcement program of the division involving both civil and criminal cases.

In the field of education the division utilizes all major types of public contacts, including television, radio, and motion pictures. Motion picture films for television and other educational media have been developed including television spot announcements providing different fire prevention messages and others for motion picture theater use. These films are distributed to theaters and television stations throughout the State.

The forest and range management section includes the forest management unit which is divided into 3 functions consisting of management of state forests, forest practice, and service forestry, and deals primarily with the programs concerning the management of the timber resources on private land within the State of California. The prime objective is to assist private landowners in attaining sustained yield forest management programs and to return to full production those timber producing lands that are presently understocked or devoid of timber.

The division is responsible for the administration of 8 state forests. Three of these forests are of sufficient size to be managed as demonstration units to illustrate proper sustained yield, forest management techniques, and to be utilized in forest management research. In the orderly conversion of these managed forests from old growth to sustained yield second growth stands, the State presently realizes annual revenue in excess of $450,000 from timber sales.

The function of forest practice administers the forest practice rules which govern logging practices on privately owned timberlands.

The function of service forestry provides technical advice to small timberland ownerships throughout the State, in an effort to teach the owners proper management techniques. The service foresters provide technical assistance for the federal co-operative programs concerned with the Soil Bank and the Agricultural Conservation Program. Due to the interest in the federal co-operative programs and the realization of the true worth of the timber on small ownerships, the division is receiving an ever-increasing number of requests for assistance from private owners.

Range improvement personnel are responsible for providing technical assistance to private landowners in the conversion of brushlands to more productive range types in order to increase the carrying capacity of the California rangelands.

Range improvement technicians advise private landowners regarding the most effective and economical methods to apply in converting brushlands. They also supply information concerning the adaptability of the various soil types for rangeland conversion and the recommended species of forage plants to be sown to achieve the most effective sustained results.

Demonstration ranges are maintained in co-operation with private landowners to study and demonstrate the effects of conversion by mechanical means, chemical sprays, controlled use of fire, and various combinations of these methods.

In co-operation with regular fire control forces, continuing experiments are being conducted to provide an adequate and economical method of attaining a satisfactory burn during the relatively nonhazardous periods of the year.

Emergency revegetation projects to prevent serious erosion and flood damage on critical watersheds that have been denuded by fire are also carried out under this function. These reseeding projects are financed on a matching fund basis by the State and private landowners or local political subdivisions concerned.

The state nursery program provides for operation of a nursery located near Davis and for 3 branch nurseries located at forestry conservation camps. The nurseries provide stock for public planting, windbreaks, soil control, and reforestation purposes.

The 1961-62 Budget for administration provides an additional 10 man-months of temporary help to handle increased workload primarily of a clerical nature in all sections. Funds are also provided for the State's share in the anticipated cost of further expansion of the statewide microwave networks. Federal matching funds are available as a part of the civil defense program.

FOREST PROTECTION—DISTRICT HEADQUARTERS

Program and Performance

The Division of Forestry is divided into 6 administrative districts with activities in each district co-ordinated through district headquarters under the direction of a deputy state forester. Besides providing general direction for all forestry activities, the district headquarters provides services of specialists in forest fire prevention, law enforcement, forest management, range and watershed management, engineering, construction, and automotive maintenance.

The forest ranger units receive direction and guidance in all activities from the district deputy state forester. His staff and ranger unit programs are developed and administered from this headquarters. The various specialists assist the ranger units in providing an efficient and effective program operation.

A position of assistant forest technician assigned to the range improvement program in the central Sierra district is discontinued effective January 1, 1961. This change reflects a shift of program supervision from the district to the ranger unit. In addition 1.7 man-years of forest fire fighter assigned to range improvement suppression crews has been deleted in the 1960-61 fiscal year. This represents a reduction in the size of the suppression crew assigned the range improvement program amounting to 4 man-months in each of 5 crews.

FOREST PROTECTION—FIELD SERVICES

Program and Performance

The Field Services function provides for the operation of fire suppression stations, forest fire lookouts and ranger unit headquarters offices. The prime objective is to provide adequately staffed, trained suppression crews and related equipment to make prompt and efficient initial attack on forest, brush, and range fires in order to provide "basic fire protection." The field units are designed to provide a flexible organization to develop the required manpower and equipment needs to deal with large campaign fires in line with the concept of "basic fire protection."

The 30 ranger units in the division operate 230 fire suppression stations, 79 lookouts and utilize 35 patrolmen for the protection of over 31,000,000 acres of state lands, private lands and intermingled federal lands under the division's direct protection responsibility. Related equipment includes fire trucks, bulldozers and transports. These units are integrated into the division's radio network to provide for prompt dispatch to and direction on fires.

The 1960-61 and 1961-62 budgets provide an operational Initial Air Attack Program throughout the State. This program allows the division to contract for observation planes, aerial tankers to drop fire retardant material, and helicopters to assist the initial attack forces in making prompt effective attack in order to control fires while they are small.

Administrative personnel and key fire control personnel are hired on a yearlong basis. Fire fighters, cooks at suppression stations, lookouts, and a portion of the forest fire truck drivers are hired during the declared fire seasons. Crews are brought to peak strength as the fire season progresses in its intensity and are reduced as weather conditions become more favorable in the fall.

Department of Natural Resources

DIVISION OF FORESTRY—Continued

FOREST PROTECTION—FIELD SERVICES—Continued

Program and Performance—Continued

Ranger unit administrative personnel and patrolmen are actively engaged in fire prevention within their respective units. The program of fire prevention stresses both group contacts and on-the-ground contacts with individual landowners and forest users, in an effort to reduce the increasing numbers of man-caused fires as the population increases and constantly heavier use is made of our wild land areas.

The division is placing increasing emphasis on law enforcement, particularly in the field of civil action. Field administrative personnel supply the basic information for fire cost reimbursement claims that are processed through the Attorney General's Office for collection.

In addition, field administrative personnel are active in all programs of the division in forest and range management. One of the major activities in the timbered region is the inspection of logging operations to report compliance with the Forest Practice Act and to continue to develop active timber operator participation in fire prevention and suppression in his area of operation.

The 1961-62 Budget provides a 15 percent increase in fire group personnel to permit reduction of the length of the workweek for fire control employees on a "standby" duty status from the present 120-hour workweek to a 104-hour workweek. As a further part of the fire suppression working conditions program, the budget proposes acquisition of additional recreational equipment for use during off-duty hours while the employee is on a "standby" status.

[a] The reduction of 7 man-years represents the transfer of responsibility for fire protection at Squaw Valley State Park from the Division of Forestry to the Division of Beaches and Parks.

Department of Natural Resources

DIVISION OF FORESTRY—Continued

FORESTRY CONSERVATION CAMPS

Program and Performance

The conservation camps are operated in co-operation with the Department of Corrections and the Department of the Youth Authority. The Division of Forestry is responsible for determining the need for a camp in a given area and for the construction of such camps. Under existing agreements the division is responsible for the work program and the supervision of the inmates during the working day. In addition to the work program, the camps provide added manpower for forest protection and fire suppression work.

As of July 1, 1961, it is estimated that 1,860 Department of Corrections inmates and 345 Youth Authority wards will occupy 26 permanent camps, 3 mobile camps and 3 spike camps. The 1961-62 fiscal year will see two new camps activated with a strength of 80 men each: Deadwood in Siskiyou County and the Men's Colony Camp in San Luis Obispo County. Both camps will house Department of Corrections inmates. During the budget year 22 positions will be added to provide staffing for these new facilities.

AGRICULTURAL FIRE PROTECTION

Program and Performance

The Division of Forestry contracts with certain counties to provide fire protection for local rural agricultural areas known as Zone 3 lands. The State is reimbursed for these expenditures.

	59-60 (Filled)	60-61 (Auth.)	61-62 (Auth.)				
WATERSHED PROTECTION BY CO-OPERATING COUNTIES							
The counties listed below receive payments from the State for the prevention and suppression of fires in areas of state responsibility. Payments are based on the level of service which the Division of Forestry provides for similar areas directly protected. The increased payments are computed on the level of service proposed for state-protected areas for the 1961-62 fiscal year.							
Kern County				$315,902	$329,175	$388,111	
Los Angeles County				425,626	448,889	529,362	
Marin County				100,407	104,288	123,054	
San Mateo County				98,224	100,589	118,687	
Santa Barbara County				151,599	159,956	187,901	
Ventura County				156,262	165,312	194,428	
Totals, Watershed Protection by Co-operating Counties				$1,248,020	$1,308,209	$1,541,543	$233,334 (17.8%)
PRIVATE LAND PROTECTION BY UNITED STATES FOREST SERVICE							
For payment to the United States Forest Service for protection of state and private lands based upon acreages of state responsibility land inside and adjacent to national forests offset by national forest land protected by the Division of Forestry. The increased payment proposed for 1961-62 is to support a fire crew organization which will provide a level of fire protection equivalent to that provided for state lands directly protected by the division.							
Protection of state-responsibility lands by United States Forest Service				$991,654	$1,038,990	$1,227,599	
Less: Administrative costs in support program				—10,476	—10,837	—11,600	
Contract with United States Forest Service				$981,178	$1,028,153	$1,215,999	$187,846 (18.3%)
WHITE PINE BLISTER RUST CONTROL							
Payments to United States Department of Agriculture to match federal expenditure for the control of white pine blister rust disease. Current expenditure level is maintained to provide for a maintenance type operation with a minimum of new area being treated				$94,547	$94,866	$94,866	
EMERGENCY FIRE SUPPRESSION AND DETECTION							
Additional manpower and equipment for detection and suppression of forest fires in emergency situations beyond the ability of the regular crews are provided by this item. Because of the unusual severity of the current fire season, additional funds amounting to $410,000 have been provided from the general emergency fund.							
SALARIES AND WAGES							
Temporary help				$79,104	$65,000	$65,000

FOREST INSECT CONTROL

This program provides for the control of forest insect infestation, principally pine beetles, on state and private forest lands. State expenditures on private lands are on a cash or labor matching basis under rules established by the State Board of Forestry in accordance with Section 4455 of the Public Resources Code. The budgeted amount has been provided for the past several years and is proposed for 1961-62.

Arrowhead-Crestline zone of infestation				$7,500	$7,800	$7,800
San Jacinto zone of infestation				9,000	9,000	9,000
Hat Creek zone of infestation				3,116	–	–
Kings Canyon-Sequoia zone of infestation				224	–	–
Miami-Bass Lake zone of infestation				291	–	–
Corte Madera zone of infestation				207	–	–
Wrightwood zone of infestation				3,000	–	–
Rental of equipment				690	–	–
Unallocated				–	8,200	8,200
REIMBURSEMENTS						
From landowners in lieu of service				*—8,900*	*—5,000*	*—5,000*
Totals, Forest Insect Control				$15,128	$20,000	$20,000

WILD LAND VEGETATION AND SOIL MAPPING

The University of California and California Forest and Range Experiment Station of the United States Department of Agriculture co-operate in mapping vegetation and soil types in wild land areas as recommended by the State Board of Forestry. The program was initiated under Chapter 1875, Statutes of 1953. The equivalent program level is continued for the 1961-62 fiscal year.

Contract With:						
United States Department of Agriculture				$90,404	$89,976	$89,976
University of California				19,841	20,605	20,605
Totals, Wild Land Vegetation and Soil Mapping				$110,245	$110,581	$110,581

WATERSHED RESEARCH

Payments to United States Department of Agriculture to supplement federal appropriations for the California Forest and Range Experiment Station of the United States Department of Agriculture in order to maintain the continuity of rainfall and stream flow records for the San Dimas Experimental Station, and to publish results of research of value in watershed management in California. Continuation of the program is proposed for 1961-62.

Allotment to United States Department of Agriculture for watershed research				$24,000	$23,472	$23,472

FOREST AND FIRE RESEARCH

A program of basic research, field studies, and investigations with respect to the prevention and control of forest and brush fires; reforestation of burned-over land and nonproducing lands; and other resource areas related to activities under the division's jurisdiction are provided in this item. In addition, Section 6816.3 of the Public Resources Code, makes an annual appropriation of $100,000 from the State Lands Act Fund to the Division of Forestry for a research program.

The major portions of the research projects are contracted to the Pacific Southwest Experiment Station and to the University of California where research specialists conduct the studies. This has the twofold advantage of having specialists in the specific field conducting the program and often the program is expanded or integrated with similar research through the use of Federal or University funds.

The Forest and Fire Research Committee of the State Board of Forestry attempts to integrate all research being done by governmental agencies and private companies in order to avoid the duplication of effort and to foster the exchange of information and combining of research efforts.

GENERAL ANALYSIS

Objectives

The primary objective of this division is to serve and assist the State's mineral industries in discovering, developing, and utilizing the abundant mineral resources found within the State. As required by law, the division also maintains and operates a mineral museum, laboratory, and library in San Francisco and licenses purchasers of gold and silver.

Program and Performance

As the means of accomplishing its objectives the division encourages and makes special studies of the mineral resources and mineral industries of the State. The results of these studies are published for distribution to libraries and for sale to the public. Typical geological and mineralogical specimens are collected and displayed, and with its library and laboratory the agency serves as an information bureau for the mining industry and the public.

The budget proposed for general operations in the 1961-62 fiscal year provides a typist-clerk to maintain a depository and distribution center for topographic maps and aerial photographs. The budget also proposes elimination of a position of guard and janitor. The terms of the new lease for space provide that the lessor will furnish this custodial manpower.

The mineral research and field study function consists of a program of research and field studies on mineral utilization, beneficiation of ores, geologic mapping, mineral commodities, petrography and mineralogy, and mining methods and problems. An item of major increase in 1961-62 is the rise in the cost of space rental, brought about by the modernization of space at the headquarters office.

GENERAL ANALYSIS

Objectives

Supervision of locating, drilling, use or maintenance, and abandonment of all oil and gas wells to prevent waste and damage to the oil and gas deposits, to prevent contamination of fresh water sources penetrated by the gas or oil wells, and to further the maximum recovery of oil and gas are the primary responsibilities of this division.

The division also has the responsibility of supervising the formation and operation of repressuring operations for the purpose of arresting or ameliorating subsidence of land overlying oil and gas deposits when such lands are in danger of inundation by the sea.

Program and Performance

Under the direction of the State Oil and Gas Supervisor, the division is organized into six districts, each supervised by an oil and gas engineer. The general duties consist of: (1) field inspections of oil and gas wells during drilling and abandonment operations to see that operations are properly performed as required by the law; (2) passing upon proposals to do all kinds of work upon wells; (3) determining whether or not proposed locations for new wells meet the spacing requirements; (4) preparing maps and cross-sections to determine underground conditions in oil and gas fields; (5) maintaining surface maps showing locations of wells; (6) collecting data relating to wells and their production; (7) passing upon repressuring proposals for secondary oil recovery or subsidence arrestment purposes and supervising these projects; (8) passing upon proposals for underground oil field waste water disposal; (9) answering inquiries from the public; (10) preparing and writing reports for publication describing structure and history of oil and gas fields and related subjects; (11) advising oil and gas operators as to drilling procedure in California; (12) passing upon complaints and ordering remedial work or abandonment.

In District No. 1, with office at Inglewood, the Wilmington subsidence area has been established and certain personnel there are assigned to that phase of supervision.

The general operations and subsidence programs are each supported entirely by an annual assessment on oil and gas produced. The work of the division in part is a fluctuating well inspection service rendered to the oil and gas operators. This service is rendered on a 24-hour basis every day in the year. When this type of service requirement decreases, the engineering time released is devoted to writing of technical reports. The basic research accomplished in writing these reports is used as a basis for answering proposals to do work upon wells or to initiate secondary recovery or disposal operations. In this manner, the technically educated and trained staff is maintained at a uniform level.

Two positions previously authorized for the Subsidence Abatement program were abolished during the current year since the workload needs did not develop.

GENERAL ANALYSIS

Objectives

The Division of Recreation was originally established as the Recreation Commission in 1947. Under provisions of Chapter 1808, Statutes of 1959, the commission became a division of the Department of Natural Resources. The division chief, appointed by the Governor, serves at the pleasure of the director of the department. A 7-member citizen board of recreation commissioners, appointed by the Governor, advises the director and chief on matters of recreation policy. The commissioners serve for staggered 4-year terms.

The division, in accordance with policies established by the Director of Natural Resources, and upon recommendation of the Recreation Commission, helps the State and its communities to develop and utilize recreation areas, facilities and programs, formulates policies, and aids in the co-ordination of local, state and federal recreation activities.

Program and Performance

The division and commission develop policy and program for assisting and co-ordinating recreation programs of other levels of government and private enterprise. Community recreation agencies call upon the division for advice, co-operation, aid, and encouragement in the use of or development of recreation facilities and programs for public benefit.

The division assists in developing standards for recreation personnel and the promotion of training programs for administrators and volunteer and employed recreation leaders. In addition, the division is authorized to make studies and surveys and long-range plans of recreational facilities and programs necessary to meet recreation needs throughout the State. It participates with federal, state and local governmental agencies in advance planning with respect to the development and co-ordination of recreation facilities and programs to eliminate gaps and overlaps.

---

[e] This fund was established with a loan of $250,000 from the California Water Fund. Under Chapter 1877, Statutes of 1959, this loan is to be repaid when the unencumbered balance in the Subsidence Abatement Fund equals $350,000. The repayment is anticipated during the 1960-61 fiscal year.

Department of Natural Resources

DIVISION OF RECREATION—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS—Continued

Program and Performance—Continued

Studies are conducted by the division to collect data on the more than 300 local recreation agencies in California which employ a year-round administrator. An inventory of land and water areas suitable for outdoor recreation as owned, leased or operated by local jurisdictions was prepared for the California Public Outdoor Recreation Plan Committee. A directory of recreation and park officials in federal, state and local agencies in California is published annually.

One new position is provided in 1961-62 to analyze the vast amount of data developed for the California Public Outdoor Recreation Plan and put it in a form readily available for use. A backlog of requests from other agencies for the material from the plan exists.

GENERAL ANALYSIS

Objectives

The division was created by Chapter 2362, Statutes of 1957 (Sections 5801 to 5882 of the Public Resources Code), to implement the State's small craft harbors program. The division may prepare plans for, and acquire, construct, develop and improve small craft harbors, facilities in connection therewith, and connecting waterways. Contained in these statutes is a directive to conduct studies or surveys to determine needs for harbor or boating facilities. The agency is to assist cities, counties, and harbor districts in small craft harbor and waterway developments. All financial assistance given by the division is on a loan basis.

Subsequently Chapter 1454, Statutes of 1959 provided for 4 related programs: small craft registration, accident reporting, equipping regulation, and operating regulation. The registration program will be accomplished by the Department of Motor Vehicles although the Small Craft Harbors Commission must adopt the rules and regulations governing the program. The original application and subsequent application related to the registration program are forwarded to the Department of Natural Resources by the Department of Motor Vehicles for retention as public records. These records have been utilized to provide information for rescue and law enforcement activities, and to develop statistical data used in the small craft harbor development program.

Program and Performance

The general policies guiding the division are set by the 7-member Small Craft Harbors Commission. The commissioners are appointed by the Governor with the advice and consent of the Senate, and they serve staggered 4-year terms. Funds for the harbor development and local aid programs are available in the Small Craft Harbor Revolving Fund. In addition to the foregoing, the program of the commission and the division is funded from a $5,000,000 advance from the Investment Fund which is available for construction loans. These funds were provided by Item 421.5, Budget Act of 1958. In addition the commission has an authorization to make loans from $10,000,000 to be derived from the sale of bonds under the provisions of the Harbor Development Bond Law of 1958.

To date the division has allocated the entire $5,000,000 advance from the Investment Fund for loans and has authorized 1 loan from the Small Craft Harbor Bond Fund. Of the authorized $10,000,000 issue, $3,000,000 has been sold to provide funds in the Small Craft Harbor Bond Fund. The detail for the loan programs are included in the Local Assistance section of this budget.

As a general program, the commission will continue to grant planning loans from the Small Craft Harbor Revolving Fund and construction loans from the balance of the $10,000,000 Harbor Development Bond Law of 1958.

Chapter 1454, Statutes of 1959, provided funds for the initial staffing of the regulation and registration program. This staff includes 5 positions for the regulation function, 3 positions for the registration function and 1 position for liaison work between the Small Craft Harbors Commission, the Department of Motor Vehicles and the Department of Natural Resources. During the first 3 months of the registration program which commenced April 1, 1960, 200,000 boats were registered. It is estimated that there is a total of 250,000 to 300,000 boats in the State.

During the current year a small craft boating survey of the San Francisco Bay and Delta areas was accomplished as a tool in evaluation of the economic feasibility of the several projects which were pending in the market area.

GENERAL ANALYSIS

Objectives

The division assists in the organization and operation of soil conservation districts and, under policy direction of the State Soil Conservation Commission, co-ordinates the planning of the "small watershed" program under Public Law 566. In addition the division authorizes purchases of equipment from the Soil Conservation Development Fund. This equipment is available for rent or sale to districts.

Program and Performance

Workload of the division is divided between the nontechnical and the technical types of assistance to the various soil conservation districts organized in the State. Nontechnical assistance generally covers advice and guidance on district administration, with suggestions and encouragement for suitable soil conservation activities.

The technical phase of assistance is performed in conjunction with the provisions of Public Law 566, as amended by Public Law 1018. The division is authorized 2 small watershed planning teams which with a United States Soil Conservation Service planning team, will do planning work for small watershed projects, including upland management and diversion structures, for which the commission has approved an application. The purpose of the state-supported planning teams is to more quickly establish the state eligibility for federal funds to be used for financing flood control structures up to a maximum of 5,000 acre-feet capacity. The structures may have a capacity up to 25,000 acre-feet including water conservation features if a portion of the cost of the water conservation features is borne by local interests.

During the 1960-61 fiscal year this division contracted with the Division of Beaches and Parks to conduct an engineering study of the Bull Creek Watershed flood control problem. The study is to be made available to the Division of Beaches and Parks prior to the close of the 1961 Session of the Legislature. Two engineering positions, a technical assistant, plus 0.3 man-years of temporary help were added to the staff to accomplish this work. The personnel cost and related expenses incurred in the project will be fully reimbursed.

The division staff has assisted the commission in the administration of the assistance program provided in Section 6816.1 of the Public Resources Code. This program provides grants to local soil conservation districts for various projects which will advance the conservation of soil and water on agricultural, forest, range, or watershed lands.

During the current year a senior soil conservationist and a related clerical position were abolished as a result of a reorganization of the program development section. The reorganization was occasioned by the unallocated reduction of $33,453 made by action of the Legislature in the 1960-61 fiscal year.

GENERAL ANALYSIS

Objectives

The objectives of the California Public Outdoor Recreation Plan Committee were to conduct an intensive review of all factors affecting public outdoor recreation and develop a master plan with recommendations to the Governor and Legislature including recommendations for the general location and size of recreation areas and facilities to be acquired, developed and operated by all levels of government now and in the foreseeable future.

Program and Performance

The committee, created by Chapter 2318, Statutes of 1957, was composed of the Directors of Natural Resources (chairman), Fish and Game, Water Resources, Finance, and Education; the Chief of the Division of Beaches and Parks, Chief of the Division of Recreation, and the executive officer of the State Lands Commission. The committee appointed a technical consultant group consisting of approximately 80 agencies at all levels of government to assist in research work and in the development of information essential to the study. The committee also appointed an advisory council consisting of over 150 organized groups representing the public attitude toward necessities for outdoor recreation to be provided by government.

The plan was to have been submitted to the Governor and Legislature on March 1, 1960; however, because of the scope of the problem, the final report was delayed. On June 30, 1960, the permanent committee staff went out of existence and final work on the two-part report was accomplished by co-operative effort of interested agencies.

GENERAL ANALYSIS

Objectives

The Department of Public Health, in co-operation with local health departments, is responsible for the prevention of disease and the provision of a healthful environment for the people of California.

Program and Performance

The department has now fully implemented the radiation protection program approved by the legislature, including the first registration of radiation producing devices and the establishment of a radiation laboratory. The air sanitation program is continuing to operate an air monitory network and further refine the air quality standards previously established. Assistance is being given the newly established Motor Vehicle Pollution Control Board. During 1960-61 a program to improve nursing home care was established from newly available federal funds.

The incidence of venereal disease, polio and polio-like diseases and occupational diseases have shown an increase indicating the necessity for continued effort in the control of these diseases.

The department has continued to work closely with the California Hospital Association, practicing physicians, and other official health agencies on control of staphylococcal infections. The development of strains which are resistant to the antibiotics has presented a particularly difficult control problem.

The Division of Alcoholic Rehabilitation has continued to work closely with its advisory committee, physicians, and all interested groups. This work was assisted by public hearings.

The department is continuing its program of providing consultative services to local health departments particularly in the fields of maternal and child health, tuberculosis, public health nursing, and social work, mental health, nutrition, vector control and dental health. Field studies and consultation are provided in industrial disease, chronic disease, and water and sewage sanitation, and disposal of radiological wastes.

The vital records program provides registration and certified copies of birth, death and marriage records.

A Crippled Children Program is operated in co-operation with local health and welfare departments. This program is partially supported by a state subvention and provides medical care for crippled children whose parents are unable to provide needed services. It now includes nephrosis and residual effects of polio. A study is being conducted on possible inclusion of epilepsy.

Licensing programs are operated for hospitals, laboratories and laboratory technicians, audiometrists, canneries and a number of related food producing establishments.

The Food and Drug Inspection Program continues to provide protection from adulterated foods, drugs and beverages.

The Health Education Program stimulates education in the health field by consultation to departmental staff and local agencies and the development of media.

The 1961-62 Budget proposes 33 new positions. Of these, 25 positions are based on workload in the following divisions: Administration 6, Preventive Medicine 7, Laboratories 4, Environmental Sanitation 6, and Research 2. These and 8 other new positions are discussed at greater length under the appropriate division.

New Program

An initial program for $110,767 including 3 positions to provide health services to migrant agricultural workers is proposed in the Division of Preventive Medical Services. As a temporary measure, 2 positions were established to develop this important program during the current year. This program is financed from increased federal funds.

An expanded program of $78,050 including 2 new positions to improve nursing home care is proposed for continuation from federal funds.

Expanded heart and cancer control programs at a cost of $57,500 are proposed with federal financing. Three positions will be used for statewide studies and data analysis.

DIVISION OF ADMINISTRATION

Objectives

The Division of Administration includes the Director's Office, Bureau of Business Management, Bureau of Personnel and Training, Bureau of Vital Statistics and Data Processing, and Management Analysis. It provides administrative direction and staff services for the department, and consultation to local health departments in these functions.

Program and Performance

Business services for the department are centralized in the Bureau of Business Management. They include general administrative and operative services, stockroom, mail and messenger service, operation of building and telephone switchboard, accounting, budget preparation and control, licensing, purchasing, a car pool of specialized vehicles, field audit of public health subvention programs, and fiscal consultation to local governmental agencies on subventions.

The Bureau of Personnel and Training has a dual responsibility: first, to develop and administer a comprehensive personnel management program, including employee relations, a classification and salary plan, a recruitment and placement program, and other related personnel services; second, to initiate and carry out a training program, including accredited university training, employee orientation, technical refresher courses, and administrative and supervisory training. Institutes and seminars are organized and conducted to increase the competence of professional staff members in the State Department of Public Health and in local health departments. Stipends are granted for advanced training in the field of public health. Local health officers are assisted on personnel and training problems. Also included is an information program for domestic and foreign visitors.

The Management Analysis unit is responsible for review of systems and procedures, and establishment of workloads and staffing patterns within the department.

The Bureau of Vital Statistics and Data Processing provides direction and assistance as well as related processing services in the development of public health records and vital statistics. This unit provides service to local health agencies as well as units of the department, and includes the preparation of special

---

[a] Grants from the Federal Government and expenditures therefrom are not included in the overall budget totals.

DEPARTMENT OF PUBLIC HEALTH—Continued

DIVISION OF ADMINISTRATION—Continued

Program and Performance—Continued

interpretive reports, analysis of statistical data relating to births, deaths, marriages, population, and data processing consultation to specific programs.

In the Executive Office, 1 clerical position is required to handle the increasing volume of correspondence generated by the growth of the department and complexity of the assigned activities. This proposed position is to be financed from increased federal funds.

In the Bureau of Business Management, 2 clerical positions are still required to meet the increased procurement demands and routine record keeping in the property and maintenance units. Hospital construction aid continues at a high level; more intensive review of hospital per diem charges to the Physically Handicapped Children's program has resulted in reduced charges; and the additional review of tuberculosis records requested by ACR 16 (1960) result in need for continuation of the additional auditor authorized in the current year.

In the Bureau of Personnel and Training, 1 additional personnel analyst is proposed to assist with the classification and recruitment problems resulting from expansion and the broad variety of classes utilized. This position is proposed to be financed from additional federal funds.

In the Bureau of Vital Statistics and Data Processing, 1 applied science programmer is proposed to enable the department to use electronic data processing time more effectively. This is offset by a corresponding reduction in operating expenses. One public health analyst position is to be abolished to finance a new position in the Division of Research.

DIVISION OF ALCOHOLIC REHABILITATION

Objectives

This division engages in the treatment and rehabilitation of alcoholics. All phases of the rehabilitation of alcoholics are investigated and studied as well as all factors necessary to the reduction and prevention of chronic alcoholism and other excessive uses of alcohol.

Program and Performance

The present program consists of research, education, and treatment. Research is conducted both by state staff and other agencies under contract in the following areas:

1. Experimental methods of treating alcoholics.
2. Follow-up studies to evaluate the effectiveness of treatment methods.
3. The nature of alcoholism and the metabolism of alcohol in the human body.
4. The cause of alcoholism.

Treatment of alcoholics is conducted through 7 pilot community clinics. Public information and education programs include the publication of a monthly bulletin, dissemination of appropriate information, distribution of pertinent literature, and sponsorship of training institutes.

DEPARTMENT OF PUBLIC HEALTH—Continued

DIVISION OF COMMUNITY HEALTH SERVICES

Objectives

This division has responsibility for integrating the policy and program objectives of the State Department of Public Health with those of the local health departments of the State, providing local health services (by contract) to areas without organized health departments, and for providing nursing, social work, and health education consultation and services to local health departments and other units of the State.

Program and Performance

Liaison is maintained with each of the individual local health departments, with the Conference of Local Health Officers and all other divisions and bureaus of this department. For small counties who do not maintain their own health departments a minimal public health program is operated under contract. The program for public health residency training is co-ordinated in this division. The bureaus of Public Health Social Work, Public Health Nursing, and Health Education provide recruiting, training, consultation, technical, and administrative assistance to local health departments. Information and education services are furnished for the balance of the department.

DIVISION OF DENTAL HEALTH

Objectives

This division has responsibility for the administration of a program to protect and improve the dental health of the public.

Program and Performance

The program is implemented by advisory and consultative services to local health departments, and community groups, agencies and educational institutions; epidemiological studies of dental diseases; and promotion of training, clinical facilities, water fluoridation, and other public health preventive measures.

DIVISION OF ENVIRONMENTAL SANITATION

Objectives

This division has the primary responsibility for the services necessary to provide a healthful environment for the people of California.

Program and Performance

The division consists of: Bureau of Radiological Health, Bureau of Air Sanitation, Bureau of Sanitary Engineering, Bureau of Vector Control, and Bureau of Food and Drug Inspection, including a cannery inspection section.

The Bureau of Radiological Health has been established to bring together all activities concerned with radiation. These include maintenance of environmental surveillance of radiation sources, collection of data and interpretation of significant fluctuations in radiation levels, observation of radiation users facilities and practices, assisting in site location, and other safety factors of reactor developments, and registration of all radiation sources.

The Bureau of Sanitary Engineering administers a program of consultation, inspection, and regulation in the fields of sewage disposal, industrial waste disposal, water supply, sanitation of bathing places and recreational areas, and water contamination, inspection of radioactive waste sources, and evaluation of the public health hazards of waste disposal and use of isotope tracers.

The program of the Bureau of Air Sanitation includes investigation of the effects of air pollution, assistance to local agencies in the measurement and control of air pollution and its effects, establishment of standards for maximum allowable contaminants in motor vehicle exhaust, and establishment of standards for quality of ambient air. An air monitoring network is maintained in co-operation with local air pollution authorities.

The Bureau of Food and Drug Inspection insures the purity of foods and drugs in California by an inspection program of the manufacturing, wholesale, and retail outlets throughout the State. This program not only removes particular lots of foods and drugs from consumer channels, but operates to provide a long-range program of correction and prevention of unsatisfactory environmental conditions. It also has responsibility for enforcement of kosher food labeling and investigates fraudulent cancer cure devices.

Canneries are licensed and inspected to provide sanitary operation and prevent the occurrence of botulism.

A field program is maintained by the Bureau of Vector Control to stimulate adequate local vector control programs; endemic surveys are conducted to determine the existence of vector-borne disease hazards and control techniques; and methods and equipment are evaluated and demonstrated.

The increasing population is creating new problems in the supply of good quality water and in the disposal of sewage and industrial wastes. Six positions are proposed in the Bureau of Sanitary Engineering to meet these problems plus 4 supportive positions in the Division of Laboratories.

DIVISION OF LABORATORIES

Objectives

This division provides laboratory services to the department and to local areas without laboratories; consultation, investigation and reference service for local laboratories; and regulation of laboratories and laboratory technicians.

Program and Performance

Individual laboratories are maintained in the fields of sanitation and radiation, industrial hygiene and air pollution, food and drug, viral and rickettsial diseases, and microbiology.

The field services section provides consultation, inspection, and licensing of hospital, clinical, and local health department laboratories, laboratories using animals, firms producing biologics, and bone and artery banks.

Four positions are proposed to support the additional work from the Bureau of Sanitary Engineering work on water quality and disposal of sewage and industrial wastes.

DIVISION OF PREVENTIVE MEDICAL SERVICES

Objectives

The Division of Preventive Medical Services is responsible for the medical, hospital, and other services necessary for the prevention of disease.

Program and Performance

The division consists of 9 units: maternal and child health, crippled children services, communicable diseases, chronic disease control, prevention of blindness, occupational health, nutrition, mental health services, and hospitals.

A program of maternal and child health services includes studies and investigations of child health problems, and provides technical consultation to local health departments, hospitals, maternity homes, schools, physicians, and other professional groups.

The program for crippled children provides consultation and assistance to the counties in their operation of a crippled children's program including:

1. Establishment of standards for care, and consultation in the maintenance of such standards.
2. Provision of funds for diagnosis and treatment.
3. Planning and consultation in the provision of treatment and rehabilitation services.
4. Maintenance of records on these children.

In the communicable disease field, surveillance is maintained of all communicable diseases which are significant to public health in California. Clinical and administrative consultation is provided to local agencies both on a routine and emergency basis, and epidemiological field investigations are conducted. Tuberculosis control is accomplished by a subsidy program to counties for assistance in the care of tuberculosis patients, and consultation in case finding, clinic, and nursing services.

The program in chronic disease control, including the investigation of the medical aspects of air pollution, consists of:

1. Consultation to local health agencies, hospitals, and private physicians with regard to preventive measures, and early identification of chronic diseases.
2. Demonstration and evaluation of specific chronic disease control services.
3. Epidemiologic investigations and special studies of the public health significance of chronic diseases.

The occupational health program of the department consists of:

1. Assistance to local health departments in developing preventive health programs for detecting, preventing, and correcting health hazards in industry.
2. Consultation and educational programs to professional, industrial, and labor groups interested in occupational study of industry-wide problems affecting large segments of working population.
3. Analysis of occupational health statistics.
4. Direct services to industry in study of occupational health hazards where other resources are not available.

Consultation and advisory services are provided to local and state health departments to help them to meet mental health problems associated with public health practices.

A subsidy program for the construction of general hospitals, nursing homes, diagnostic and treatment centers, chronic disease hospitals and rehabilitation centers is administered by the Bureau of Hospitals. It also establishes standards for hospital and related facilities (including tuberculosis sanitariums), inspecting and licensing these institutions, and providing limited technical consultation to them.

Technical and administrative assistance in nutrition services are provided local health agencies, as well as assistance in recruitment and training of staff.

The addition of $75,000 for local projects and positions for a medical officer, administrative assistant, and a clerk, are proposed from increased federal funds for this health program for migrant workers.

Increasing complexity of the program in the division requires the addition of an assistant chief, administration, to assume the daily administrative detail and release the medical chiefs for more comprehensive program direction. Proposed financing is from increased federal funds.

An expanded program of $78,050 to improve nursing home care was temporarily authorized in the 1960-61 fiscal year from increased federal funds. Fifty thousand dollars for local projects and the 2 positions of medical officer and consultant therapist are proposed for continuation.

A chief of planning, 2 hospital field representatives, an assistant public health analyst, an administrative assistant, and a clerk, are proposed from increased federal funds to meet increased workload in the Bureau of Hospitals.

A medical officer and research technician are proposed for increased studies of coronary heart disease; a public health analyst is proposed to start analysis of the data collected concerning cancer causes. An increase of $22,500 in contractual services is included to establish minimal programs of heart and cancer work at the local level. These programs in the Bureau of Chronic Disease Control are to be supported through increased federal funds in the current and budget years.

[a] One position temporarily approved during the 1960-61 fiscal year from federal funds for improvement in the care given in nursing homes.

[b] One position temporarily approved in the 1960-61 fiscal year only to provide the minimum services necessary for a preliminary study of the migrant labor health problem.

[c] One position transferred to operating expense in the 1960-61 fiscal year to provide services equivalent to 1 man-year on a contractual basis.

[d] One position transferred to the Bureau of Radiological Health during the 1960-61 fiscal year.

[e] Two positions transferred to the Bureau of Radiological Health during the 1960-61 fiscal year.

[f] Five positions transferred to the Bureau of Radiological Health during the 1960-61 fiscal year.

DIVISION OF RESEARCH

Objectives

This division is responsible for co-ordination of the research activities conducted by the department both with state funds and with funds from outside sources.

Program and Performance

The division of research stimulates an active and effective Public Health research program in California by:

1. defining major unsolved health problems;
2. assisting in the design of research proposals;
3. co-ordinating requests for funds from other agencies;
4. consultation and assistance in the operation of research projects.

The addition of 2 positions is proposed; 1 behavorial scientist to provide technical assistance to other units of the department in development and operation of research activities, and 1 administrative assistant to relieve the chief and assistant chief of routine activities. These positions will be financed through abolishment of an associate public health analyst position in the Bureau of Vital Statistics and Data Processing, Division of Administration and an additional 7 percent overhead charge to all special project activities.

MOTOR VEHICLE POLLUTION CONTROL BOARD

Objectives

The Motor Vehicle Pollution Control Board was established in the Department of Public Health under the provisions of Chapter 23, Statutes of 1960 and is responsible directly to the Governor. The board is composed of 13 members including the Director of Public Health, Director of Agriculture, Commissioner of the Highway Patrol, Director of Motor Vehicles and 9 other members appointed by the Governor with consent of the Senate.

The board is charged with the responsibility to:

a. determine and publish the criteria for approval of motor vehicle pollution control devices;
b. issue certificates of approval for acceptable devices;
c. exempt certain classes of vehicles from compliance with Chapter 3, Division 20, Health and Safety Code.

Program and Performance

The provisions of the law requiring installation of control devices on vehicles specify a timetable which goes into motion only after the new control board has certified 2 or more workable devices. When such devices, now in the developmental stage, are approved, they will be required as follows:

1. One year after certification on all new vehicles registered in the State.
2. One year after the certification date on used motor vehicles upon transfer of registered owner.
3. After the second December 31, following the certification date on all used commercial vehicles.
4. After the third December 31, following the certification date on all vehicles.

The requirements for new vehicles will apply automatically throughout the State, but for used vehicles there will be a degree of local option, of interest principally to rural areas. The new law allows boards of supervisors or air pollution control districts, when they have been formed, to determine whether control devices shall be required on used vehicles.

Provisions are being made for staffing and facilities for testing proposed devices.

SPECIAL PROJECT ACTIVITIES

Objectives

Research, investigations, demonstrations, and special services of value to the development of the California Public Health program for which funds can be obtained from the Federal Government or private foundations are conducted by the department.

Program and Performance

Numerous organizations interested in furtherance of public health make funds available to the department, for activities not financed by the State. Each special activity must be related to public health needs in California or be related to investigations or research being conducted by the State. Projects financed by nonstate funds include overhead charges to reimburse the State for additional costs incurred. Expenditures and reimbursements are not included in budget totals.

Known activities are listed indicating the type of activity and source of funding. Since project fiscal years may not coincide with the state fiscal year, projects are assigned to the one which most nearly coincides with the project fiscal year.

BUREAU OF VITAL STATISTICS AND DATA PROCESSING

Medical Certification Study (National Institutes of Health)
The problems affecting reliability of medical certification of death are being investigated. Accuracy of death certificates is essential to many surveys relying on cause-of-death statistics.

BUREAU OF MATERNAL AND CHILD HEALTH

Child Health Research Unit (Children's Bureau, Department of Health, Education, and Welfare)
The unit has instigated study of the causes of major child health problems, as well as providing technical assistance to State and local special studies. Evaluation by this unit includes such areas as the State Child Health Conference, hearing conservation projects, practices in maternity hospitals, preschool vision and hearing testing, and accident prevention techniques.

Childhood Accidents (National Institutes of Health)
The correlation of certain environmental and behavioral factors to the incidence of accidents among children under 15 years is being investigated. This study is designed to describe factors associated with various types of accidents, and to determine whether these factors are associated more with "accident" children than with "nonaccident" children.

Reproductive Loss (National Institutes of Health)
Methods are being sought for determining the relation between certain factors affecting pregnancy (particularly early stages), and the frequency of infant deaths and malformed children. These methods will then be applied to develop a large scale cooperative study in California on reproductive loss.

Maternal and Child Health Postgraduate Training (Children's Bureau, Department of Health, Education and Welfare)
This is to enable the School of Public Health, University of California (Berkeley), to strengthen its curricula for all candidates for the Master in Public Health degree, and to provide training grants for physicians and nurses wishing to specialize in maternal and child health or school health administration.

Kauai Pregnancy Study (Children's Bureau, Department of Health, Education, and Welfare)
The University of California is studying the incidence of fetal deaths among all women on the island of Kauai, Hawaii. The medical, social, and psychological factors that may influence fetal deaths, premature births, etc., and the factors and conditions associated with favorable pregnancies are being investigated.

Mental Retardation Field Clinics (Children's Bureau, Department of Health, Education, and Welfare)
Field diagnostic services are provided for mentally retarded children in Southern California communities. Diagnostic techniques are being taught and local agencies encouraged to assume sponsorship of the clinics.

Berkeley Nutrition Project (Children's Bureau, Department of Health, Education, and Welfare)
This is a demonstration of the utility of a public health nutritionist in an urban health department; it also provides a training center for nutritionists.

Stanford Family Study (Children's Bureau, Department of Health, Education, and Welfare)
The concept of preventive pediatrics is being introduced into the curriculum of the Stanford School of Medicine. Stanford graduate students with families are being used as the "laboratory."

---

[a] Grants from the Federal Government and expenditures therefrom are not included in the overall budget totals.

SPECIAL PROJECT ACTIVITIES—Continued

BUREAU OF CRIPPLED CHILDREN SERVICES

Regional Congenital Heart Program (Children's Bureau, Department of Health, Education, and Welfare)

Diagnosis and treatment are provided children with congenital heart disease in the western region. These services are furnished in California at centers where medical staff are continually developing and improving such diagnostic and treatment procedures; only in such centers can such service be made available to children in the less populous surrounding states.

Training Program for Audiologists (Children's Bureau, Department of Health, Education, and Welfare)

Stanford University's graduate training program in audiology is being strengthened to provide both more qualified audiologists and more teachers in the field. There is currently a shortage of both types of personnel.

John Tracy Clinic (Children's Bureau, Department of Health, Education, and Welfare)

The medical and audiological needs of preschool children with hearing defects are being explored in an attempt to re-examine existing diagnostic categories and develop appropriate audiological programs to fit them.

Prosthetics for Child Amputees (Children's Bureau, Department of Health, Education, and Welfare)

The School of Medicine, University of California (Los Angeles) conducts this project to prepare and evaluate prostheses suitable for the growing child, perform basic research in prosthetics, and disseminate findings through teaching and written material.

BUREAU OF COMMUNICABLE DISEASES

Venereal Disease Casefinding Project (Communicable Disease Center, Public Health Service)

To counteract the rising number of cases of infectious venereal disease, casefinding and educational efforts have been increased in the State. The objectives are to demonstrate to private physicians and laboratories in local health jurisdictions, the importance of their co-operation with the Health Department in tracing contacts. In addition, educational material and films are being distributed to physicians, schools, and service organizations.

BUREAU OF CHRONIC DISEASE CONTROL

Cancer Chemotherapy (National Institutes of Health)

A data collection center for California's part in a national cancer chemotherapy evaluation program is provided. It is a part of the California Tumor Registry. Newly reported cases of cancer are registered, and previously reported cases are followed. Quality control is maintained on the abstracting of cases in hospitals; the necessary mechanical procedures are carried out to prepare punch cards for the Cancer Chemotherapy National Service Center. This provides basic data for many other cancer studies.

Human Population Laboratory (National Institutes of Health)

One population will be carefully defined for intensive study with attention focused on its personal characteristics and behavioral patterns to determine how these are related to the development of disease in this population. Studies of several chronic diseases and their interrelation are being made.

Twin Study (National Academy of Sciences)

Birth records of white male twins born during the period 1917-1927 were supplied to the National Research Council for a study of heredity and disease. This was to provide information on the role of heredity in disease, as determined by studies of mature twins.

Prevention of Blindness (Kellogg Foundation)

Methods were developed to establish the prevalence of blindness in California, investigate the causes of blindness and establish programs of prevention and control.

Cancer Monograph Tabulation (National Institutes of Health)

Tabulations, describing in detail some 200,000 cases of patients with neoplasms who were reported to the Tumor Registry, are being supplied to the Cancer End Results Program. This data is to allow correlation of variables such as age, sex, treatment, etc., with the survival experience of the patients.

Study of Lung Cancer in Light Smokers and Non-Smokers (National Institutes of Health)

The aim of this study is to determine the masking effect smoking has on lung cancer statistics. By investigating lung cancer among light smokers and nonsmokers, a clearer picture of the distribution of lung cancer by age, occupation, air pollution exposure, etc., should result.

Air Pollution Time Series Analysis (National Institutes of Health)

The statistical methods of time series analyses, which have been successful in economics and business, are being adapted to the study of the effect of air pollution and weather phenomena on health.

Air Pollution Statistical Methods (Bureau of State Services, Public Health Service)

Various statistical methods are being employed through electronic data computers to study the relationship of air pollutant and meteorological measurements versus health, death, accident, and crop damage statistics.

Longshoremen Heart Study (Bureau of State Services, Public Health Service)

In co-operation with Kaiser Foundation Hospital and the International Longshoremen's and Warehousemen's Union, a follow-up multiphasic examination of a group of longshoremen is being conducted, to determine what tests and symptoms may lead to early detection of heart disease.

Areawide Tumor Registry (Bureau of State Services, Public Health Service)

A tumor registry which will report all cases in Alameda County is being established. This is to provide a pool of information on a concentrated population for use in epidemiologic studies of cancer.

BUREAU OF HOSPITALS

Hospital Modernization Needs (National Institutes of Health)

The aim of this project is to develop a standard method for collection and evaluation of data on modernization needs and expansion capabilities of hospitals. The extent to which hospitals can efficiently be included in long-range community planning will also be considered.

Hospital Utilization Data (National Institutes of Health)

A program on a statewide basis is being devised for the regular collection and evaluation of data relating to hospital utilization. The program developed can be applied on a national basis; to date information collected by independent surveys has been of little value to others, there being no standard collection criteria against which comparison can be made.

SPECIAL PROJECT ACTIVITIES—Continued

DIVISION OF ALCOHOLIC REHABILITATION

Drinking Patterns (National Institutes of Health)

An exploratory study to develop valid methods of eliciting, measuring, and analyzing patterns of alcoholic beverage usage and associated conditions. The way in which alcoholic beverages are consumed; i.e., where, when, why, with whom, rather than the amount consumed, is to be studied with the intent of developing hypotheses which relate drinking patterns and attitudes to socio-economic data, general health, and general parental, marital, and cultural beliefs regarding alcoholic consumption.

Conference on Alcohol Education

What information concerning alcohol and alcoholism is suitable for teaching to high school students, and what problems are involved in teaching it were discussed. The Departments of Education and Mental Hygiene participated in the program.

Alcoholism Research Conference (National Institutes of Health)

Persons of various disciplines in the field of alcoholic rehabilitation and alcoholism research attended a conference to define the areas where there is a present need for research. Specific multidisciplinary research proposals, aimed at increasing existing knowledge, were drafted.

DIVISION OF LABORATORIES

Viral Disease Study (National Institutes of Health)

A study of the etiology, immunology and epidemiology of viral diseases. New means are being sought to diagnose viral diseases in order to facilitate epidemiological studies of them; the role of viruses in the causation of human diseases is being evaluated.

Polio and Virus Study (Bureau of State Services, Public Health Service)

Reports on poliomyolitis diagnosis are furnished to the U.S. Communicable Disease Center; and investigation conducted to learn the etiology of polio and related viral diseases.

Encephalitis Study (Rockefeller Foundation)

A general study of arthropod-borne virus diseases and investigation of clinical cases of suspected arthropod-borne viruses in man and animals are being conducted.

Influenza Project (Department of Army)

Company units on an Army post are being inoculated with vaccines containing respiratory disease agents, to determine what effect such vaccines have on infection rate. Persons with respiratory diseases admitted to the post hospital are given serology tests to ascertain what viral disease agents are present in the post population.

Complement Fixation Test (National Foundation)

Complement-fixing antigens from attenuated strains of polio viruses were prepared and evaluated to determine whether strain differences exist between virus types by complement-fixation; better methods of inactivating antigens were sought.

Zincuria Study (National Institutes of Health)

A simplified technique for the early detection of liver damage through alcoholism is being developed by studying the amount of zinc excreted by the body under various conditions.

Properties of Aerosols (National Institutes of Health)

The size and composition of airborne particles in air pollution is being studied and equipment calibrated for this type of work. The results of this study will increase current knowledge of the effects of air pollution on the human body and the relation of size of particles to this effect.

Training of Laboratory Technologists (National Institutes of Health)

Educational programs in colleges, training needs, and on-the-job training programs for laboratory technologists are being reviewed. The development of statewide standards of training, acceptable to the various professional associations and colleges concerned, is anticipated.

Fluorescent Antibody Technique (Bureau of State Services, Public Health Service)

The State is to test and demonstrate a new technique. This is a nationwide project to bring about the use of new equipment, giving rapid standard test results, for the identification of bacteria associated with rheumatic fever.

BUREAU OF VECTOR CONTROL

Organo-phosphorous Resistant Mosquitoes (National Institutes of Health)

A study is being made of mosquitoes resistant to organo-phosphorous insecticides, which are the primary control agents at this time. The physiological basis for organo-phosphorous resistance is being sought by comparing strains of mosquitoes which are, and are not, resistant to such insecticides.

Blue-Green Algae (National Institutes of Health)

An inquiry into the toxic effect upon mosquito larvae of blue-green algae found in rice fields. The action and effect of this algae on mosquito larvae, and their nutritive requirements, are being studied to determine the feasibility of encouraging their growth to reduce the mosquito population.

DIVISION OF RESEARCH

Administrative Research and Training (Kellogg Foundation)

Mechanisms designed to stimulate, promote, co-ordinate, and evaluate public health administrative research activities are developed and tested. In co-operation with other units in the department and with local agencies, the project director encourages and co-ordinates administrative research activities, and participates in existing studies in administrative research, giving consultation in project design and development. In co-operation with the School of Public Health, University of California (Berkeley), areas of study in public health administration valuable to student and faculty are sought.

Training Program for Epidemiologists (National Institutes of Health)

Persons from various professional disciplines receive orientation and practical training in epidemiology as a supplement to academic studies. A unique opportunity is also offered for participation in interdisciplinary study of public health problems in an operating health agency.

Training Program in Rehabilitation (Office of Vocational Rehabilitation)

This program is to provide training to a limited number of trainees in rehabilitation practices and techniques by acquainting them with the activities of such groups as the Vocational Rehabilitation Service, the Committee on Rehabilitation of the California Medical Association, and the rehabilitation programs of selected local health departments.

GENERAL ANALYSIS

Objectives

Departmental Administration has responsibility for the overall administration and direction of the Department of Public Works.

Program and Performance

The executive group consists of the director, a chief deputy, 2 other exempt deputies (1 for planning and 1 for management), and 2 assistant directors.

The director's office performs the primary functions of departmental policy formulation, co-ordination, and overall direction of the activities of the organization.

The director carries out the work of the department through broad delegations of authority to 4 division chiefs, each of whom is fully responsible to the director for the work of his division. Two of these division chiefs, the State Architect (Division of Architecture) and the State Highway Engineer (Division of Highways) are statutory positions heading statutory divisions, but most of the authority and responsibility they exercise is by delegation from the director. The other 2 division chiefs head divisions (Division of San Francisco Bay Toll Crossings and Division of Contracts and Rights-of-Way) which were created by order of the director, rather than by statute.

The director also exercises important policy-making responsibilities over the highway program as chairman of the California Highway Commission, to which the Legislature has given broad authority and responsibility which includes determining the state highway budget and the exact location of state highway routes within legislative guidelines, and for authorizing condemnation of property for highway use.

The director is also a member and secretary of the California Toll Bridge Authority, an ex-officio body which is concerned with the construction or acquisition of toll highway crossings and transportation facilities appurtenant thereto. The department provides all of the staff work for the authority.

The State Highway Fund and the Division of Architecture Revolving Fund are charged on a pro rata basis for the entire cost of Departmental Administration.

---

[a] Prior to July 1, 1960, the Department of Public Works, Internal Audit Section, was budgeted as a function of the Division of Highways and included in the Division of Highways' Budget. This function was transferred to Departmental Administration in 1960-61.

[b] The significant increase in cost of operating expenses in the 1960-61 and 1961-62 fiscal years is due to the addition of the internal audit function in Departmental Administration.

GENERAL ANALYSIS

Objectives

The Division of Architecture is charged by statute (Chapter 2, Part 5, Government Code) with the responsibility for the planning, designing and supervising major and minor construction, repair and alteration projects; for the survey and examination of potential sites for construction projects; for the preparation of site suitability reports; for architectural and engineering investigations; appraisals of properties, and for construction by the employment of day labor under certain conditions as defined in the State Contract Act.

Program and Performance

The division prepares preliminary plans, outline specifications and estimates of cost for proposed major and minor construction projects. These projects in program form originate in the state agencies and are submitted to Department of Finance for the capital outlay budget. Upon approval of the Department of Finance, each project is transmitted to the Division of Architecture. These documents then form the basis for request to the Legislature for appropriation and project authorization.

Upon enactment of the Budget Bill by the Legislature, and its signature by the Governor, and specific authorization by the State Public Works Board, working drawings and specifications and final estimates of cost are prepared and the project advertised for bids. Award of contract to the successful bidder pursuant to the requirements defined in the State Contract Act initiates the final phase of the division's responsibility in the supervision of construction.

Where the Director of Public Works determines that the obtainable staff is unable to perform the particular work within the time required by public interest, he contracts, with approval of the Department of Finance, with qualified architects and engineers for the performance of the work (Section 14101, Government Code). Contracting with private architects and engineers for working drawings and specifications does not relieve the division of responsibility for preparation of preliminary plans, specifications and estimates of cost prior to legislative enactment nor does it relieve the division of responsibility for construction supervision after award of the contract.

Under the authority of Sections 15451 through 15465, Education Code, the Division of Architecture checks and approves plans and specifications and supervises construction of all new public school building construction and all alterations and additions exceeding $10,000 in estimated cost. The function is entirely self-supporting in that all funds appropriated for the support of the unit are payable from the Architecture Public Building Fund which in turn is the repository for fees charged for services rendered by the division in connection with the checking of plans and specifications and supervision of construction. The fee schedule is set forth in Section 15457, Education Code.

The budget for this division is presented for the first time on a program basis in this part of the document and the usual organizational budget is shown in detail in the Appendix.

Budgets are presented herein by 6 major program areas:

Administration—The management of divisional activities.

Preliminary Planning—The preparation of plans and specifications and estimates of cost forming the basis for requests by the Governor to the Legislature for appropriations in the Capital Outlay Section of the Governor's Budget.

Working Drawings—The preparation of drawings, specifications and estimates of cost for advertising and contracting purposes.

Supervision of Construction—Inspection of projects under construction for conformity with plans and specifications.

Supervision of Public Schoolhouse Construction—Checking and approval of all public school building plans and inspection of such projects during construction.

Construction—This program reflects the level of construction activity in terms of payments to contractors.

---

[a] Detail distribution not available for 1959-60.

[b] Expenditure from Division of Architecture Revolving Fund appropriated by Section 14030 of the Government Code. Detail not available for 1959-60.

[c] Budget Act appropriations 1960-61 and 1961-62.

[d] Includes contributions to the State Employees' Retirement Fund ($603,621) ($672,350) ($689,115)

[e] Disbursements for contract payments from Division of Architecture Revolving Fund.

[f] Disbursements represent payments to contractors on contracts awarded on previous and current working drawings. Disbursements for construction are not related to expenditures for the same year for preliminary planning and working drawings during any fiscal year.

[g] Includes contributions to the State Employees' Retirement Fund ($64,610) ($76,491) ($78,027)

DIVISION OF ARCHITECTURE—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS—Continued

1961-62 Program

The reorganization of the division and the establishment of a new control system is being implemented in this budget.

Evaluation of the 1961-62 program must necessarily be made on the 3 separate portions of the total program in which the division is actively participating, all within a single fiscal year. During any particular year the division is: (1) preparing preliminary designs for projects to be included in the budget for the succeeding year; (2) preparing contract drawings and documents for projects previously approved by the Legislature, the funds for which became available during the current year; (3) supervising construction of projects approved in both preceding and current years.

The division prepares preliminary plans, outlines specifications and budget estimates, based on requests from the Department of Finance, for projects which may, or may not, be included in the budget.

In anticipating the workload demanded upon the Division in the preliminary planning phase for the budget year the report to the Joint Legislative Budget Committee titled "State Building Construction Programs, July 1, 1959-June 30, 1964" prepared by the Department of Finance is used as a general guide. In addition to the projects listed for the Budget Year in the Five-year Program, projects prepared for budget submission for previous years and not yet funded were added.

The division in the past year advertised for bids on projects with a value of $84.6 million. In the current year, it is anticipated that a project value of $100 million will be accomplished with essentially the same staffing as in the past year. Again this substantial increase in accomplishment by the same staffing is possible through the reorganization and newly installed control system.

In 1961-62, it is anticipated that projects with a value of $107.6 million will be handled in the working drawing phase.

Currently the division has a total of $125 million in contracts in force for which annual disbursements total $90 million.

It is anticipated that for 1961-62 about $135 million in contracts will be in force and annual disbursements in contract progress payments will total $90 million. The division is effecting a reduction of 25 construction inspection positions. This reduction is possible through better utilization of inspection personnel through job-grouping and controls, yet maintaining the quality of supervision of construction.

PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

ADMINISTRATION

Administration is the program involving management and direction of all divisional activities. Included in this program are the executive positions of the State Architect and the deputy chiefs in the fields of administrative and technical services; a newly established Project Management Service which is responsible for authorizing projects within the division, co-ordinating the requirements and solutions with client agencies and the Department of Finance, scheduling and timing the projects according to statewide priority; schedules and establishes man-hour budgets for the production of plans; and support personnel in the fields of administration, office services, accounting, contracts, personnel, secretarial, and central files. The division has been recently reorganized as the result of a management study.

The head of technical services has been made a parallel position to the former Deputy Chief and carries the title of Deputy Chief, Architecture and Engineering. The management position has line authority over 3 subpositions, 2 with titles of Assistant State Architect, who in turn are responsible for technical services in the Sacramento and Los Angeles offices, respectively, and 1 with title of Chief Construction Engineer, who has the responsibility of all construction supervision and checking of public school plans.

The Deputy Chief, Administrative (formerly Deputy Chief) assumed authority over the newly installed production control system named "Project Management Service" along with other support units. Emphasis is being placed on proper and better utilization of effort on authorized projects and on the reporting, analyzing and controlling of the status of project production and workload distribution. In addition, a strict conformance with the agreed scope of the projects is emphasized in this responsibility.

PRELIMINARY PLANNING

PROGRAM SUMMARY

Preliminary planning is that initial phase of the program involving participation in a project by the division after the basic needs of a state agency are presented in a written program and approved and transmitted by the Department of Finance. The division proceeds with architectural and engineering studies based on approved criteria. During the course of

---

LINE	PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

PRELIMINARY PLANNING—Continued

PROGRAM SUMMARY—Continued

the initial planning, and upon completion of the preliminary plans, meetings are held with the client agencies and Department of Finance to obtain approval of the preliminary plans, and specifications which approval indicates that the plans conform to the requirements of the client agency.

Preliminary planning involves primarily consideration by the architectural design unit with necessary supporting design from the allied engineering fields of structural, mechanical, electrical, civil and sanitary, and service from the estimating unit. Included in this work is delineation of the written program to reach concurrence with the client agency as to intent, purpose, function and design of the proposed facility; inspection of site to properly orient the facility and arrive at a compatible design; negotiation with municipalities for access, egress and utilities; initial land surveys and test borings; determination of availability of water and other utilities; preparation of elementary architectural diagrams, plans and studies; determination of proper material and construction techniques; preparation of elementary structural, mechanical, electrical, civil and sanitary engineering designs.

The ultimate product in the preliminary planning program is a package consisting of preliminary plans, outline specifications and estimates of cost for the proposed project.

This preliminary package, signed by authorized representatives of the using agency and Department of Finance, is transmitted to the Department of Finance for incorporation in the capital outlay portion of the Governor's Budget. It is the defined scope of the project which will be the basis of the contract drawings when the project is funded by the Legislature. Those projects for which preliminary packages are prepared for analysis and consideration, but are not included in the Governor's Budget, represent expenditures which do not result in construction disbursements.

Explanation of Program Emphasis

The preliminary planning cycle is predicated on receiving firm programs from state agencies through the Department of Finance beginning in the month of April, and due to be resolved, translated into plans, specifications and estimates of cost by December 1. This is a relatively short cycle and beyond the control of the division. The emphasis on preliminary planning, however, must still be on the preparation of preliminary plans, specifications and estimates of cost as valid as time will permit because of the reliance placed on the preliminary package for budgeting and planning purposes.

Completeness of the preliminary package ultimately results in more efficient utilization of staff and better preparation of contract drawings through eliminating those changes occasioned by incompleteness.

Although criteria of space and certain material are set by the Department of Finance, the Division of Architecture will continue to explore economical material consistent with good architectural design.

It is anticipated that only a slight increase of 3 positions in addition to the current staff will be sufficient to carry out the program, through increased productivity by reason of recent reorganization and production control.

PROGRAM EXPENDITURES DETAIL

Total Volume of Preliminary Planning	—[a]	$650,000	$600,000

WORKING DRAWINGS

PROGRAM SUMMARY

That portion of the total program devoted to the preparation of contract documents, including construction drawings, specifications and estimates of cost to enable effective contracting, is defined as the Working Drawing Program. The extent of such documents is required by Section 14270, Government Code, a portion of the State Contract Act.

Working drawings are initiated only upon specific authority for projects as appropriated for the Budget Bill and specifically authorized by subsequent resolution of the State Public Works Board. Work in this phase involves responsibilities by the architectural and engineering technical units of architectural design, architectural drafting, landscape architecture; mechanical, electrical, structural, civil and sanitary engineering; specification writing and cost estimating. Included in this work is land surveying and site grading contours; test bores for structural design; load calculations; architectural plans, elevations and details; foundation investigations; structural design of frame and system, mechanical design involving heating, ventilating, air conditioning, refrigeration and plumbing; boiler plant and central steam distribution; elevator systems; electrical design of power, illumination and communication systems, primary and secondary distribution, local transformer and circuits, closed television circuits, telephone and signal systems; sanitary engineering design of sewage disposal, storm drainage, reservoirs and filtering systems; civil engineering of roads, walks, pavement, dams, culverts and canals, and landscape architecture of site planning.

Working drawings are also prepared for all federally financed Air National Guard construction in California. Contracts for this work are awarded by the National Guard Bureau, Washington, D.C. Payments on these construction contracts are made by the U.S. Property and Disbursing Officer. Construction supervision is performed by the Division of Architecture. Expenditures for making drawings and construction supervision included in the summary above do not result in construction disbursements by the State of California.

The division, as a general practice, prepares its construction working drawings for segregated bidding whenever the contract cost is in excess of $300,000 and when several major groupings of work, such as general, mechanical, electrical, etc., are clearly indicated. Segregated bidding results in lower total construction costs.

Also included in the Working Drawing Program is the necessary work that must be performed after award of the contract in the area of checking shop drawings submitted by contractors; reviewing and taking action on submittal of materials for approval; field inspections to co-ordinate intent of drawings with construction progress; issuance of change orders; interpreting and clarifying intent of documents; negotiating and resolving quotations from contractors of change ordered items.

Where the Director of Public Works determines that the obtainable staff is unable to perform the particular work within the time required by public interest, the director may contract,

WORKING DRAWINGS—Continued

PROGRAM SUMMARY—Continued

with the approval of the Department of Finance, with qualified architects and engineers for the performance of the work. (Section 14101, Government Code.)

Even under this program, it is the responsibility of the division personnel to provide all work for a project under the preliminary planning phase prior to inclusion in the Governor's Budget, including: site investigation and preparation of preliminary plans, specifications and estimates of cost.

Also under this program the division provides a substantial review and checking of contract drawings prepared by the private architect before requesting bids and a substantial review of shop drawings and material submittals after award of contracts. Issuance of change orders during the progress of construction is also executed essentially by division personnel, as well as the entire program of supervision of construction.

SUPERVISION OF CONSTRUCTION

PROGRAM SUMMARY

"The State Architect . . . shall have an inspector at each building during the whole time of its construction" (Government Code Section 14100). Under this portion of the total program, resident inspectors of the number required by the size and type of project are assigned to supervise construction. The chief responsibilities are to insure construction in full conformance to the intent expressed in the contract plans and specifications; to co-ordinate work, work schedule and work areas among separate contractors and subcontractors; to interpret and resolve inquiries from contractors; to determine and evaluate actual progress made on construction; and to prepare progress payment estimates; to make periodic and final inspection of workmanship and materials; to recommend final acceptance of project; to keep records of overrun of contract time at completion of construction for determination and justification of liquidated damages; to perform reinspection prior to expiration of guarantees.

Conformance of construction with the requirements of the plans and specifications is more than a contractural requirement demanded by the State, it also serves to insure safety, usability and proper functioning of the project as designed by specialized professionals in their separate fields. In addition, it is an obligation to the State to assure fairness to successful and unsuccessful bidders alike by enforcing compliance with plans, specifications, and all related items of the contract documents.

Consistent with the need for economy in State Government as may be reflected in lowered construction and inspection costs, a major emphasis is made to localize construction in particular areas at the same time to effect better utilization of inspection forces and in turn effect reduction in inspection costs.

A reduction in inspection force is obtained, even with the same dollar volume of projects in force.

PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

CONSTRUCTION OF PROJECTS (DIRECT)

PROGRAM SUMMARY

The State Contract Act provides that all projects shall be done under the contract awarded to the lowest responsible bidder, except that it may be done by days' labor under direction of the Department of Public Works under certain specified situations, some of which are:

1. In case of emergency due to damage to a state-owned building or any other state-owned real property or improvements located thereon.
2. At any time after approval of plans, specifications, and estimates of cost, if the director deems the advertising or award of a contract, the acceptance of any bid, or the acceptance of any further bids after the rejection of all submitted bids is not to the best interest of the State.

The departmental policy has been stated and reaffirmed to the division that it is the State's policy to contract for the performance of construction and improvements projects wherever it is feasible to do so and to do so in full conformance with the spirit and provisions of the State Contract Act rather than to use day labor under force account or to use civil service maintenance crews.

Generally the use of day labor or maintenance crews is limited to the following situations when there is a clear showing that a particular project cannot be accomplished by contract at a reasonable cost to the State because contractors do not appear interested in the project and where there is an urgent need for the project:

1. Improvement or repair work to be done in an area where prisoners are being confined or where mental patients are being cared for, making it necessary to have workmen under state control.
2. Minor construction in a remote location where neither contractors nor a supply of skilled laborers is available.
3. Projects affected by conditions of site or existing structures where it is impracticable to define the details of work with sufficient accuracy to permit competitive bidding.
4. Work which is useful for vocational training at state colleges.
5. Historical restoration projects.

Almost all of the projects that fall into these categories are minor construction projects wherein participation by the division is requested on a current basis.

PROGRAM EXPENDITURES DETAIL

	Actual 1959-60	Estimated 1960-61	Proposed 1961-62
Estimated disbursements for construction of projects by the division's direct construction forces	$1,200,000	$2,400,000	$1,900,000

CONSTRUCTION OF PROJECTS (CONTRACT)

PROGRAM SUMMARY

For purposes of construction supervision, the State is divided into 3 area boundaries as follows:

Area I with headquarters in Oakland, comprises 4 construction districts and includes the Counties of Del Norte, Humboldt, Mendocino, Lake, Sonoma, Napa, Marin, San Francisco, Contra Costa, Alameda, San Mateo, Santa Clara, Santa Cruz, Monterey and San Benito, and portions of San Luis Obispo, Santa Barbara, Trinity and Solano Counties.

Area II with headquarters in Sacramento comprises 3 construction districts and includes the Counties of Siskiyou, Butte, Colusa, Glenn, Lassen, Modoc, Nevada, Placer, Plumas, Sacramento, Shasta, Sierra, Sutter, Tehama, Yolo, Yuba, Alpine, Amador, Calaveras, El Dorado, San Joaquin, Stanislaus, Tuolumne, Fresno, Madera, Kings, Mariposa, Merced, Tulare, and portions of Trinity and Solano Counties.

Area III with headquarters in Los Angeles comprises 3 construction districts and includes the Counties of Inyo, Kern, Los Angeles, Mono, Ventura, Santa Barbara, Imperial, Orange, Riverside, San Bernardino and San Diego.

The amount of contract construction of projects in force is currently $125,000,000 for which progress payments are disbursed at the rate of $90,000,000 annually. The workload in November 1960 was distributed to the three areas as follows:

Area I	$45,000,000
Area II	27,000,000
Area III	53,000,000

It is anticipated that the amount of construction in force for the budget year will average approximately $135,000,000 at any given time and that the distribution to the areas will be as follows:

Area I	$40,000,000
Area II	40,000,000
Area III	55,000,000

Progress payments will be disbursed at a rate of approximately $90,000,000 annually.

Types of occupancies are as varied as the demands of the agencies.

Educational facilities with provisions for general classrooms, science, engineering, industrial arts, speech arts, home economics, psychology, little theaters, music, administration, libraries, gymnasium, natatoriums, cafeterias, boiler plants, corporation yards, etc.

Mental hygiene facilities with provisions for receiving and treatment, wards, hospitals, chapels, auditoriums, occupational therapy, administration, food service, dining, etc.

Correctional facilities with provisions for prison cells, hospitals, vocational rehabilitation, chapels, dormitories, food service, dining, administration, etc.

Office facilities for Department of Finance, Motor Vehicles, Employment, Agriculture, Highway Patrol, Military, Public Works.

Youth Authority facilities with provisions for dormitories, vocational shops, hospitals, food service, administration, etc.

Methods of construction include conventional systems of wood frame, steel frame, monolithic concrete, concrete block; and contemporary systems of prestressed concrete, lift slab, tilt-up walls, and parabolic roofs.

Continued emphasis will be placed upon exploring best construction techniques and methods to reflect lowering construction costs.

PROGRAM EXPENDITURES DETAIL

	Actual 1959-60	Estimated 1960-61	Proposed 1961-62
Estimated disbursements for contract construction of projects	$83,256,000	$90,000,000	$90,000,000

Department of Public Works

DIVISION OF ARCHITECTURE—Continued

SUPERVISION OF PUBLIC SCHOOL BUILDING CONSTRUCTION

GENERAL ANALYSIS

This unit checks and approves plans and specifications for all new public school building construction and for all alterations and additions exceeding $10,000 in estimated cost. By authority of the Field Act (Sections 15451 to 15465, inclusive, of the Education Code), the division is responsible for the checking and approval of all public school building plans, including alterations, and for the inspection of such projects during construction to make certain that public school buildings are properly designed to meet all safety requirements, including earthquake, fire, panic and storm. The unit is entirely self-supporting in that all funds appropriated for the support of the unit are from the Architecture Public Building Fund which, in turn, is supported by fees charged for services rendered by the division in connection with the checking of plans and specifications and supervision of construction. The fee schedule is established in Title 21, California Administrative Code.

Materials and methods structure research is budgeted at $50,000, the same figure that has been budgeted for the past two years.

The volume of public school construction for Budget Year 1961-62 is estimated at $380 million. The following table reflects the estimated and actual volume of public school building plan checking that is the responsibility of the function under the Field Act for the period July 1, 1958 through June 30, 1962:

ESTIMATED COSTS OF PUBLIC SCHOOL CONSTRUCTION IN CALIFORNIA

	Actual 1959-60	Estimated 1960-61	Proposed 1961-62
Local construction	$235,000,000	$158,000,000	$198,000,000
State-aided Program:			
State funds	121,881,000	144,000,000	144,000,000
Local funds	14,776,000	38,000,000	38,000,000
Total State-aided Program	$136,657,000	$182,000,000	$182,000,000
Totals, Public School Construction	$371,657,000	$340,000,000	$380,000,000

Since the inception of the state-aided program in 1947, the State has authorized $1.2 billion to assist school districts in school construction. In addition, local districts have contributed $318.3 million of local funds bringing the total construction under this program to $1,351 million through 1959. Present available funds are estimated to carry the state program through January 1963. Through December 1959, 30,463 classrooms had been financed, seating 1,022,000 children.

The costs of administering these programs are incurred in the Division of Architecture, Department of Education, State Controller, and Department of Finance. They are summarized here for informational purposes:

ESTIMATED COSTS OF STATE OPERATIONS, PUBLIC SCHOOL CONSTRUCTION PROGRAM

	Actual 1959-60	Estimated 1960-61	Proposed 1961-62
Division of Architecture	$1,106,013	$1,280,836	$1,310,799
Department of Education	208,681	233,132	237,308
Division of Local Allocations	746,184	811,001	824,572
State Controller	123,953	151,571	152,254
Total Costs, State Operations	$2,184,831	$2,476,540	$2,524,933

PROGRAM SUMMARY

Local School Districts, upon application, and approval by the Public Works Board receive loans with provisions for repayment of the principal in 30 years and all interest cost within 25 years. Pursuant to Sections 19704 and 19705 of the Education Code, provision is made for deduction of school district obligations under the School Building Aid program from the state schools apportionments. All districts use this method of repayment. Since the start of this program, an estimated $72,200,000 will have been repaid to the State as of June 30, 1959-60.

Total debt services charges to the General Fund on this program through 1959-60 have been $170.2 million. Interest costs to the General Fund for 1960-61 are estimated at $21,182,152 and $26,165,750 for 1961-62.

GENERAL ANALYSIS

Objectives

The Building Standards Commission, which consists of the Director of Public Works and 6 members appointed by the Governor, was established by the Legislature to screen building regulations for conflict, duplication and overlap. The commission also is to write a complete code which will supersede all building regulations by other state agencies.

Program and Performance

There are 23 administrative agencies in the State, 17 of which write and enforce building regulations and standards. There are 10 state statutory code provisions dealing with building regulations and 19 general laws. A workable program has been established by the commission to consolidate the various state codes into a single uniform code and this will continue into the budget year.

GENERAL ANALYSIS

Objectives

The principal functions of the Division of Highways are to plan, construct and maintain the 16,327 miles of the state highway system. Other functions include various special studies in the transportation field and certain responsibilities in connection with county roads on the Federal-aid Secondary System, with the expenditure of state gasoline tax funds on city streets, and with supervision of the Outdoor Advertising Act.

Program and Performance

The planning and construction of state highway improvements is carried as a continuous long-range planning program in accordance with policy established by the Legislature and is tailored to funds available from various sources, including federal aid, as provided by the Legislature and to statutory controls governing geographical distribution of construction expenditures in the northern and southern county groups and within individual counties. Funds for construction and rights-of-way are allocated by the California Highway Commission in accordance with these statutory requirements and on the basis of priority of need to best serve traffic. The California Highway Commission is a statutory body of 7 members, 6 of whom are appointed by the Governor, with consent of the Senate, for staggered 4-year terms. The Director of Public Works serves as ex officio seventh member and chairman of the commission. The commission also has the responsibility for adopting the location of state highways on routes authorized by the Legislature, and for declaring certain routes as freeways.

This program is financed through the Highway Fund. The major sources of revenue to the fund are from fuel taxes, registration and weight fees, transportation tax, and federal subventions, summarized below.

REVENUE SOURCES *(State Highway Fund)*

	1959-60 ACTUAL	1960-61 ESTIMATED	1961-62 ESTIMATED
Fuel License Tax (6¢ per gallon) [b]	$240,029,655	$251,714,323	$262,662,498
Use Fuel Excise Tax (7¢ per gallon)	20,153,630	21,458,570	22,800,000
Transportation License Tax	11,239,059	11,424,969	12,546,811
Vehicle Registration, Weight Fees, Drivers' Licenses, etc.	58,618,103	61,973,910	59,020,053
Federal Aid:			
Major State Highways [c]	157,875,412	219,320,707	265,258,312
Federal-aid Secondary	9,593,647	8,352,716	8,312,500
Miscellaneous	22,302,192	14,698,178	1,927,000
Estimated Revenue Adjustment	134,507,473	–	–
Total Revenues	$654,319,171	$588,943,373	$632,527,174

---

[a] These positions financed from toll bridge revenues.

[b] This is the amount of the 6-cent tax going to the State Highway Fund.

[c] For the major interstate highway system, primary and urban. Other federal aid is carried in federal aid miscellaneous.

DIVISION OF HIGHWAYS—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS—Continued

Program and Performance—Continued

There are additional revenues which go directly to local agencies for highway purposes without going through the State Highway Fund. In 1959-60 this amounted to $71,235,023. An additional $53,251,698 was subvened from the State Highway Fund in 1959-60 to local agencies bringing the total revenue received by local agencies from these tax sources to $132,111,879.

Because the state highway program reaches into every corner of California, the division operates in the field through 11 districts. Nine of these districts are headed by district engineers; the 2 metropolitan districts (San Francisco and Los Angeles) are headed by assistant state highway engineers. Each district is organized along the lines of the headquarters office. Construction of bridges and other highway structures on a statewide basis is administered by the Bridge Department, having offices in Sacramento and Los Angeles.

In order to gain a better perspective on the entire highway program, the expenditures from all parts of the budget are summarized here.

SUMMARY OF EXPENDITURE PROGRAM *(State Highway Fund)*

	1959-60 ACTUAL	1960-61 ESTIMATED	1961-62 PROPOSED
State Operations	$49,635,599	$55,666,126	$57,518,187
Capital Outlay:			
Construction	372,027,141	417,560,611	364,218,119
Rights-of-way	107,908,241	168,856,688	145,926,000
Building, Plants and Equipment	4,081,213	15,775,900	9,000,000
Totals, Capital Outlay	$484,016,595	$602,193,199	$519,144,119
Local Assistance	53,251,698	65,119,859	55,840,555
Board of Control Claims	16,416	36,989	15,500
Total Expenditures *(State Highway Fund)*	$586,920,308	$723,016,173	$632,518,361

CONTRACTS AND RIGHTS-OF-WAY

Program and Performance

The Division of Contracts and Rights-of-Way is a division of the Department of Public Works, administratively established by the director under Government Code Section 14005, which provides legal services for the department, including the Division of Highways. It handles legal problems and litigation arising out of such activities as eminent domain and other legal phases of highway right-of-way acquisition, including matters involving public utilities, contracts, claims, financial affairs and collections, operations of toll bridges and activities involving other governmental agencies.

MAINTENANCE OF STATE HIGHWAYS

Program and Performance

The function of state highway maintenance is to preserve roadways and structures in the safe and usable condition to which they have been built or improved. This description covers hundreds of different tasks, ranging from routine patching to emergency slide removal. About one-fourth of the employees of the Division of Highways are engaged in maintenance work.

Replacement and restoration work on highway facilities is performed by the division forces, with major work of this nature, including resurfacing, being done by contract.

MAINTENANCE OF TOLL BRIDGES

Program and Performance

The Division of Highways is responsible for the operation and maintenance of 5 major bridges in the San Francisco Bay area: the San Francisco-Oakland Bay Bridge, the Richmond-San Rafael Bridge, the San Mateo-Hayward Bridge, the Dumbarton Bridge, and the Carquinez Bridge. All of these are toll facilities. Since September, 1957, toll bridge maintenance costs are paid from the State Highway Fund as provided by Chapter 2249, Statutes of 1957. Formerly these costs were paid from toll bridge revenues.

Operation of these bridges is a function of the Bridge Department, with specific responsibility assigned to a principal bridge engineer, whose office is located at the east end of the San Francisco-Oakland Bay Bridge.

HIGHWAY PLANNING

Program and Performance

Broad-gauge special investigations and studies not closely tied in with localized projects are grouped under the heading of highway planning. These include the annual and monthly traffic counts, long-range research studies of all types, and studies of the economic and other effects of freeways. Current and imminent major projects include co-ordination of the statewide city and county street and road deficiency studies called for by Senate Concurrent Resolution No. 62 of the 1959 Session, and a scheduled re-estimating of Interstate Highway System deficiencies as required by federal legislation.

SUPERVISION OF OUTDOOR ADVERTISING

Program and Performance

Administration of the Outdoor Advertising Act has been assigned to the Division of Highways in accordance with Article 2 of that act, and is carried on as a function of the Maintenance Department. It is a self-supporting function, financed from revenues received from license and permit fees paid by outdoor advertisers who place displays within view of public highways, outside incorporated areas.

DIVISION OF SAN FRANCISCO BAY TOLL CROSSINGS

Office at Berkeley

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
SUMMARY			
TOTAL EXPENDITURES			
San Mateo-Hayward Bridge studies preliminary to improvement *(San Francisco-Oakland Bay Bridge Toll Revenue Fund)* [a]	$86,595 [b]	–	–

GENERAL ANALYSIS

The division was established by the Director of Public Works under Section 14005 of the Government Code and is assigned by the Director of Public Works various studies and surveys, and the preparation of plans, specifications and estimates for additional highway crossings of the San Francisco Bay. It also supervises construction of such bridge projects. The operation of bay crossings after completion, however, is assigned to the Division of Highways.

At present, the division's assignments include studies and plans for a Southern Crossing, improvement of the San Francisco-Oakland Bay Bridge under Chapter 2316, Statutes of 1957, and improvement of the San Mateo-Hayward Bridge under Chapter 1784, Statutes of 1959. Proposed expenditures on these projects are shown in the schedules for the Southern Crossing Engineering Fund, and the San Francisco-Oakland Bay Bridge Toll Revenue Fund.

Personnel man-years	5.9	5.9	5.9	–

GENERAL ANALYSIS

Objectives

The California Aeronautics Commission, which consists of 5 members appointed by the Governor for 4-year terms, provides planning, engineering, zoning, air safety and use (schools vs. airport noise and hazards) and economic analyses services to and for public utilities and corporations (districts) integrated with the local and the State's public interest in a statewide system of airports.

Program and Performance

The more important activities performed by the commission are shown in the following table:

	Actual 1958-59	Actual 1959-60	Estimated 1960-61	Estimated 1961-62
Airport site approvals and permits	30	38	48	56
New airport site studies	44	66	55	62

Aerial surveys and studies	91	50	114	132
Airports closed or abandoned	11	13	14	18
Obstruction to air navigation and airspace problems	123	359	141	149
Hazard and noise studies proposed school sites	76	117	87	93
Advisory service on airport financing (FAAP)	25	67	30	20
Public utility co-ordination meetings, etc.	53	71	66	76
Aviation education and safety programs	72	56	65	60

Federal aid is available to local airports through Public Law 377. During the past year the commission, upon request, assisted in the preparation of federal aid applications for public airports, the airports receiving approximately $5,600,000. The airports will receive an estimated $5,800,000 during the current year and $7,500,000 during the budget year. Other activities included aviation safety, promotion of public acceptance and use of air transportation through publications, maintenance of a film library, and radio and television presentations. Direct assistance is rendered to various state departments in advising on industry needs.

AERONAUTICAL CHART AND AIRPORT DIRECTORY							
This program is included to provide adequate aeronautical charts for the State of California. The present charts are over 10 years old and require revision. The 9 charts prepared by the Federal Government are limited to airports in the National Airport plan. These charts cover only 20 percent of the California airports. The California charts will have all the airports on one chart. There are 102,000 pilots in California. These charts are necessary for the safety of California pilots. Industry requests these charts to aid in the location of new plants.

COLORADO RIVER BOUNDARY COMMISSION

Office at Los Angeles

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	CHANGE FROM 1960-61
SUMMARY				
TOTAL EXPENDITURES				
Support *(State Lands Act Fund)*	$4,471	$14,538	$16,846	$2,308 (15.9%)
Personnel man-years	–	0.8	1	0.2

GENERAL ANALYSIS

Objectives

The commission was created by Chapter 1693, Statutes of 1953, to confer with a similar commission established by the State of Arizona to define a common boundary between the states along the Colorado River. Membership in the commission consists of the Attorney General, Director of Water Resources, and Executive Officer of the State Lands Commission. One member of the Senate, appointed by the Senate Rules Committee, and 1 member of the Assembly, appointed by the Speaker, are advisors to the commission.

Program and Performance

The ultimate goal in the work of this agency is the adoption by the legislatures of California and Arizona of a compact between the states defining the common boundary along the Colorado River, based on recommendations made by the boundary commissions of the 2 states.

Agreement has not yet been reached between the Arizona and California commissions as to the boundary line in certain specified areas. The most important of these is the so-called "Yuma Island Area," where the problem respecting the boundary is political rather than technical. As the result of meetings held during the past year, a solution to this problem may be forthcoming. New maps have been prepared redefining the proposed boundary between the 2 states. The line proposed would effect a compromise in disputed areas. In the "Yuma Island Area," the proposed line would follow the channel of the Colorado River as it was in 1874.

Further work following favorable action by the 2 commissions on the proposed boundary would consist of: (1) the preparation of maps defining the agreed-upon boundary; (2) the setting up of control points at key positions along the river for the entire boundary line agreed upon; (3) the adoption by the 2 states of a compact, based on commission actions; (4) the obtaining of Congressional ratification of the compact adopted; (5) the monumenting of the adopted boundary line along its entire course.

Provision is made for the salary of an executive secretary and other expenses needed for the continuation of negotiations.

---

[a] Composed of savings in salaries and wages, $336; operating expense, $3,250; and equipment, $190.

Personnel man-years	1.1	3	3	–

GENERAL ANALYSIS

The Golden Gate Authority Commission was created by Chapter 1714, Statutes of 1959. The commission consists of 7 members, who are residents of the San Francisco Bay area, appointed by and serving at the pleasure of the Governor. The commission is assisted by an Advisory Council of 14 members appointed by and serving at the pleasure of the Governor.

The commission is studying and investigating the advisability of operating any or all of the bridges, port facilities and airports in the Bay area under a single agency. The commission plans to report its findings and recommendations to the 1961 Legislature.

To carry out the provisions of this statute, $250,000 was appropriated by the Budget Act of 1959, Item 275.5, which is available during 1959-60 and 1960-61. Of this appropriation, a balance of $106,468 is expected to remain unexpended at the close of the 1960-61 fiscal year.

Since Chapter 1714, Statutes of 1959, specifies that the Golden Gate Authority Commission shall terminate December 31, 1961, the estimated unexpended balance at the end of the 1960-61 fiscal year has been allocated to the commission's 1961-62 fiscal year budget to provide for expenditures which may be necessary up to the date of the commission's termination. To implement this proposal, it is necessary to extend the period of availability of the appropriation to include the 1961-62 fiscal year.

GENERAL ANALYSIS

Objectives

This department is responsible for preventing the illegal or unauthorized sale of alcoholic beverages, and preventing the sale of alcoholic beverages where any activity contrary to the public welfare is associated with a licensee or licensed premises.

Program and Performance

The department functions through a headquarters office and area, district, and branch offices. The field offices take and investigate applications for new licenses and transfers of licenses, investigate the character of applicants, provide direct law compliance, and encourage, train, and assist local law enforcement agencies to enforce the Alcoholic Beverage Control Act. Compliance is determined by inspection and investigation. Areas of most frequent violation include sales to minors, sales during restricted hours, sales to obviously intoxicated persons, operating disorderly premises, and business practices contrary to rules and regulations on fair trade, price posting and secret rebates.

There are approximately 45,500 active licenses subject to this act. These licenses include on-sale beer, beer and wine, and general licenses for trains, boats, airplanes, and bona fide business establishments, retail package off-sale establishments, dealers, wholesalers, importers, warehousers, brokers, and manufacturers of beer, wine, alcohol, brandy, and distilled spirits. The total number of licenses has remained fairly constant in recent years. The number of transfers and licensing actions, other than renewals, processed by the department annually approximates 12,000.

During the 1960-61 budget year, the staff of the State Personnel Board determined that 206 Agents and Investigator Trainees of the department would be more properly classified as Special Investigators. This resulted in additional salaries of approximately $62,235.

On the basis of the 1960 census figures, approximately 125 additional on-sale alcoholic beverage licenses will be sold in the 1960-61 fiscal year for a General Fund revenue increase of $750,000. In addition, the Governor's 1961-62 legislative program includes the authorization of intercounty transfers and a reevaluation of the limited license restrictions on the basis of the 1960 census. This action should result in approximately 400 intercounty transfers of on-sale licenses and 400 transfers of off-sale licenses. On the basis of the proposed change in ratio of licenses to population, 1 to 2,000, 580 new off-sale general licenses would become available. The total new General Fund revenue for 1961-62 is estimated at $5,900,000.

GENERAL ANALYSIS

Objectives

The Alcoholic Beverage Control Appeals Board provides administrative review for any person aggrieved by a decision of the Department of Alcoholic Beverage Control.

Program and Performance

The appeals board, as provided in the Constitution, consists of 3 members appointed by the Governor and serve at his pleasure. The board determines whether the Department of Alcoholic Beverage Control has proceeded in the manner required by law, whether the department's actions are supported by the findings, and whether the findings are supported by substantial evidence in light of the whole record. Meetings are held monthly in Los Angeles, San Francisco, and Sacramento to review appealed cases. The board meets bimonthly in Sacramento to discuss cases and approve decisions prepared by the legal counsel in accordance with instructions from the board.

Since the creation of the board in 1954 more than 1,436 cases have been decided. During 1959, 165 cases were appealed.

GENERAL ANALYSIS

Objectives

The Districts Securities Commission is charged with the direction and supervision of certain fiscal and physical facilities of irrigation districts and other districts of the State.

Program and Performance

The commission consists of the Attorney General, the Director of Water Resources, the Superintendent of Banks, and 2 members appointed by the Governor for 4 years. In 1959-60 the commission reviewed and inspected the financial and physical condition of 173 districts, as compared to 159 in 1957-58 and 170 in 1958-59 and assisted district officials with respect to financial problems involving the incurrence of indebtedness and other matters affecting the financial soundness of their districts. Investigations are made by the staff to determine the engineering, economic, and financial soundness of proposals by districts to incur additional indebtedness through the issuance of bonds or warrants or by contract with the federal government providing for water service, construction of facilities, or loans. The commission passes upon the incurrence of major indebtedness by irrigation, water, and other districts and local agencies which request certification of the eligibility of bonds as legal investments pursuant to the Districts Securities Commission Act. The commission also passes upon the expenditure of bond funds during the period of acquisition or construction of district facilities. Co-operative assistance to banks, investment companies, and other lending agencies is provided by making available factual information regarding the economic and financial condition of the districts. This is of substantial importance to both the investment companies and the districts, for, when the financial soundness of a district can be supported, the credit of the district is strengthened, and financing can be more readily secured at a reasonable rate of interest.

As a result of action by the 84th Congress, irrigation and water districts are eligible to obtain federal loans on an interest-free basis for construction of irrigation systems and other water projects. The execution by districts of contracts providing for such loans is subject to commission approval, requiring substantially the same degree of investigation as would be required in the case of financing by the issuance of bonds. As of June 30, 1960, there were applications, or letters of intent, filed with the U.S. Bureau of Reclamation by 11 districts requesting loans. The first project started during 1957, and, up to July 1, 1960, the commission had approved loan contracts totaling in excess of $40,000,000.

In addition to the federal loan program, 35 districts under commission supervision have current negotiations with the United States for contracts providing for a water supply or for construction of facilities which are subject to commission examination and approval.

HORSE RACING BOARD

Headquarters Office at Los Angeles

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	CHANGE FROM 1960-61
SUMMARY				
TOTAL EXPENDITURES				
Support *(Fair and Exposition Fund)* [c]	$188,927	$207,480	$206,855	—$625 (—0.3%)
Personnel man-years	17.1	18.3	17.6	—0.7

GENERAL ANALYSIS

Objectives

The Horse Racing Board regulates and supervises the operation of horse racing meetings where there is parimutuel betting.

Program and Performance

The board, which consists of 3 members appointed by the Governor for 4-year terms, licenses trainers, jockeys, track officials and other persons employed by the racing associations. Investigators check to determine compliance with rules and regulations. Before each race, horses are inspected and after each race drug tests are made on horses under the supervision of the board veterinarian. The workload of the board is indicated by the number of racing days and the number of licenses as follows:

	Actual			Estimated	
	1957-58	1958-59	1959-60	1960-61	1961-62
Number of racing days	499	538	535	538	545
Number of licenses	9,390	9,397	9,673	9,700	10,000

The budget is based on a program of 545 days of racing of which 346 days are to be at major tracks consisting of 271 days of thoroughbred and 55 days of harness horse, 89 days at fair tracks, 55 days for quarter horses, and 55 days for a combination meeting.

---

[a] Composed of savings in salaries and wages, $657; operating expenses, $338; and loss in reimbursements, $452.

[b] Composed of savings in salaries and wages.

GENERAL ANALYSIS

Objectives

The primary objective of the Banking Department is to assure that the funds of the investing public are adequately safeguarded.

Program and Performance

The main programs of the department are to grant licenses for new state banks or branches, examine all state banks annually and liquidate the affairs of banks when this becomes necessary.

Applications for new state banks or branches require surveys to determine: the competition offered by existing banks; the opportunity for profitable employment of the bank's funds; the number of potential depositors; and the volume of banking business which the community may provide. Licenses are then granted or denied after a public hearing of all interested parties.

The staff examines each state bank and branch annually. The examination covers the condition and resources of the bank, the mode of management of its affairs, the actions of its board of directors, the investment and disposition of its funds, the safety and prudence of its management and the security afforded its depositors and creditors.

The Banking Department is supported by a tax on all state banks. This tax is assessed at a rate limited by law to 0.01 percent or less of the total resources, less secured deposits and bills payable. The Banking Department is maintaining a reserve which is sufficient to pay the cost of operating the department without assessing any tax for a period of approximately 5 months.

SUMMARY				
TOTAL EXPENDITURES				
Support *(General Fund)*	$1,735,262	$2,445,228	$3,231,187	$785,959 (32.1%)
Personnel man-years	285.9	365	456.8	91.8

GENERAL ANALYSIS

Objectives

The primary objective of the Division of Corporations is the protection of the California public from fraud in the sale of corporate securities. The division is also charged with responsibility for preventing fraud and usury, as well as unsound business practices, in industrial loan companies, personal property brokers, small loan brokers, credit unions, check sellers and cashers, escrow agents and retirement systems.

Program and Performance

Before many types of corporate securities can be offered for sale in California, application must first be made to this division. As of the fiscal year ended June 30, 1960, there had been 49,850 such permits, licenses and orders issued pursuant to provisions of the Corporate Securities Law. The division investigates properties, books and prospects of the applicants and a permit or license is issued or denied. It is estimated that 59,558 permits or licenses will be issued in 1960-61 and 73,355 in 1961-62.

Industrial loan companies, personal property brokers, small loan brokers, credit unions, check sellers and cashers, escrow agents and retirement systems are regulated by first issuing a permit or license and second by conducting annual examinations in accord with law. In 1959-60 there were 2,515 licensees subject to regulation. It is estimated that there will be 2,775 such licensees in 1960-61 and 3,010 in 1961-62. On July 1, 1960, trading stamp companies became subject to regulation by the division.

The 1959 Session of the Legislature provided the division with additional manpower and funds to expedite the issuance of corporate security permits and to instigate annual examinations of retirement systems, brokers and investment counsel. This program, together with salary increases recently granted, accounts for the major portion of increased expenditures in the current year over the prior year.

As a result of the accelerated securities examination program initiated in 1959-60, the division has been able to reduce the review period from an average of 7.04 days in 1959 to 3.45 days in 1960.

The 1961-62 budget provides for 78 new positions to meet increased workload and maintain the improved level of service, and 12 new positions to intensify the division's investigative program.

GENERAL ANALYSIS

Objectives

The purpose of the Department of Insurance is to protect insurance policy-holders, rights of beneficiaries, and the general public in California.

Program and Performance

The main programs of the department are to: license companies and individuals who engage in the insurance business; admit insurers to operate in California; grant permits to issue securities and make changes in capital structure; approve certain types of policy forms; approve minimum workmen's compensation insurance rates; examine financial condition and procedures of insurers through field audits and analysis of financial statements; take over the California affairs of insurers in financial difficulty for the purpose of liquidation or rehabilitation; investigate complaints against licensees; and check activities of licensees for compliance with all insurance laws.

The department is supported from license fees, examination fees, assessments, taxes and other revenues derived from the insurance business. The unencumbered balance in the fund at June 30th of each year in excess of $2,000,000 is transferred to the General Fund.

This budget provides for 5 policy services officer and 3 junior-intermediate typist positions established in the current year and shown as proposed new positions in the budget year. These positions were added because of the workload increase in the Policy Services Bureau from 3,340 actual complaints received in 1955-56, to 7,800 complaints expected in 1960-61.

GENERAL ANALYSIS

Objectives

The primary objective of the Division of Real Estate is to protect the general public in all matters relating to real estate, subdivisions, business opportunities, mineral, oil, and gas, and mortgage loan transactions handled through licensees and to provide funds for education and research in the field of real estate.

Program and Performance

The division issues an original license to real estate, business opportunity, and mineral, oil, and gas applicants after the applicant has passed a written examination. Licensees must take a written or oral examination before a license is renewed. In the 1959-60 fiscal year, there were 68 more examination sessions given throughout the state than in 1958-59, an increase of 6.2 percent. The bulk of the increase was accounted for by original license examinations, mostly salesmen, which were 3,694, a 14.6 percent increase. This increase in original examinations in the past year will be reflected in the number of second examinations to be given in the current year. Three clerical positions have been provided administratively in the current year for this workload increase and are extended into 1961-62 fiscal year as proposed new positions.

	Actual				Estimated			
	1958-59		1959-60		1960-61		1961-62

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS—Continued

Program and Performance—Continued

During 1959-60, 4,838 complaints against licensees, subdividers and advance fee operators were received as compared with 4,354 in 1958-59. Legislation passed during the last 2 regular sessions to curtail the operations of the advance fee operators has resulted in a drastic reduction of the problems connected with this activity.

Each subdivision to be sold in California must be filed with this division. If after investigation it would work a fraud on the public to permit the sale, a stop order is issued. During 1959-60, 3,135 subdivisions were filed. The amended subdivision law requires impounding buyers' deposits, or employing alternative methods of protecting them. A subdivider may post a surety bond to guarantee return of deposits in event the subdivider cannot deliver clear title, or post a bond and impound all sums above the principal amount of the bond; or impound the deposits and later furnish a bond to release them. The number of promotional subdivisions and the number of complaints in connection therewith have materially increased. This has imposed an additional burden on the audit staff in checking the accounts and bond requirements of these operators. Subdividers in the State had on file with the commissioner 302 bonds in the total amount of $6,034,650 as of June 30, 1960. Many subdivisions are revived necessitating re-investigation and amended reports to be written. During 1959-60, 4,134 reports—preliminary, original, and amended—were written. The law requires the commissioner to investigate and write a report on out-of-state subdivision offered for sale in California. Last year there were 74 such subdivisions filed with the division.

The burden on the division created by the new Real Property Loan Brokers Law will fall principally on the audit section of the division. It will be necessary for them to check accounts of those engaged in this business—corporations, co-partnerships or individuals—to ascertain:

> First, that the bonds which they have furnished are sufficient in principal to equal the total aggregate amount of all moneys held by the mortgage broker for the account of others; in checking these accounts it will be necessary on occasion for the division auditor to examine pertinent records in title companies, escrow companies, and savings and loan companies;
>
> Second, it will be necessary to determine whether the real property loan broker should furnish a bond under the provisions of the law but has failed to do so; the new law requires that all funds accepted by a real property loan broker for the purchase of a promissory note, secured by a lien on real property or for the negotiation of a loan evidenced by a promissory note secured by a lien on real property, either as principal or as agent, shall be maintained in a trust account in a legal depository until such time as the buyer or lender approves or disapproves of the purchase or loan; this mandate of the Legislature requires that examination of the trust accounts of the real property loan brokers be made to see that they are complying with the law in this respect;
>
> Third, in addition to the above areas of workload, it has been necessary and will continue to be necessary that the auditors of the Division of Real Estate check the accounts and records of those engaged in this type of activity to determine whether the charges, costs, expenses, and interest that are being levied on clients of these concerns are within legal limits; the division has been using its audit staff in checking the books and transactions of mortgage loan brokers under the former mortgage loan broker regulations.

Approximately 10,000 real estate brokers have registered with the Real Estate Commissioner as Real Property Loan Brokers. Approximately 250 of these are actively engaged in the business as their principal vocation. Of 40 concerns audited in 1959-60, 24 recommendations were made for revocation, dismissal or suspension, or are in Superior Court. The auditing staff anticipates that a minimum of 20,170 man-hours will be required for auditing mortgage loan broker accounts in 1960-61 and 19,500 hours in 1961-62. They also anticipate 2,300 hours on subdivision accounts and 1,940 hours on brokers trust accounts in 1960-61; with 4,100 hours on subdivisions and 3,800 on brokers trust accounts in 1961-62. This is a total workload of 25,210 man-hours in 1960-61 and 28,000 man-hours in 1961-62. One attorney, five deputy commissioners, three auditors and two clerks have been provided administratively in the current year for this workload increase and are extended into 1961-62 as proposed new positions.

The Real Estate Commissioner continues to administer the operation of the real estate education and research program financed by legislative appropriation from the Real Estate Education and Research Fund established for the advancement of real estate education and research at the University of California, the state colleges and the junior colleges. The state college and junior college programs are co-ordinated with the activities in real estate education and research at the University of California through the Commissioner's office by means of the Commissioner's Real Estate Education and Research Advisory Committee comprised of representatives of the University, the colleges and the real estate industry. Two deputy commissioners and one clerk have been provided administratively in the current year and are extended into 1961-62 as proposed new positions in order to relieve existing personnel of the detail workload so that experienced personnel can develop and institute a master plan for real estate education in the state and junior colleges.

GENERAL ANALYSIS

Objectives

The primary objectives of the Division of Savings and Loan are the examination of state-licensed savings and loan associations to determine their stability, their compliance with Savings and Loan Law and their financial condition. The purpose is to protect the funds of the investing public.

Program and Performance

This division administers the Savings and Loan Association Law, annually licenses eligible associations and their agents and salesmen, examines each association and its branches annually to determine compliance with law and to prevent unsound business practices in order to safeguard funds of the investing public. Applications for licenses made to the division are the subject of examination and public hearings to determine issuance or denial. Because of the increasing number of associations and branches and their growing assets together with applications for new facilities, additional examiner and appraiser personnel are required to examine and physically appraise real properties securing loans made by the associations, in order that the quality of examinations and appraisals may not be reduced.

Department of Investment

DIVISION OF SAVINGS AND LOAN—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	CHANGE FROM 1960-61

GENERAL ANALYSIS—Continued

Program and Performance—Continued

The increased workload trend is expected to continue through 1961-62 necessitating 1 additional administrative officer, 1 additional attorney, 1 additional examiner, 2 additional appraisers and 2 additional auditors.

Facilities Requiring Examinations:

	Actual			Estimated
	1957-58	1958-59	1959-60	1960-61
Number of associations	171	173	174	186
Number of branches	113	131	149	159
Total facilities	284	304	323	345

Limitations on operations of associations are dependent to a considerable degree upon appraised value of realty securing their loans. Division appraisers attempt a 7 percent sampling of association appraisals on new loans and the appraisal of the security underlying delinquent loans.

The division takes over the assets and business of associations in financial difficulties for the purpose of rehabilitation or liquidation.

This agency, wholly supported by annual assessment of operating associations, maintains 2 offices, 1 in Los Angeles and 1 in San Francisco.

GENERAL ANALYSIS

Objectives

This board was established to maintain high standards for the osteopathic profession; to assist and protect licentiates and the public; and effect economies within the board consistent with effective administration and adequate policing.

Program and Performance

The Board of Osteopathic Examiners was created by initiative measure in 1922 and consists of 5 members appointed by the Governor for 3-year terms from graduates of osteopathic schools who are licensed to practice in this State and have been citizens for 5 years preceding appointment. It is a licensing and policing agency which has the responsibility of licensing as physicians and surgeons, graduates of osteopathic schools meeting the requirements of Division 2, Chapter 5, Business and Professions Code.

The board receives applications for examination for licensure as a physician and surgeon, investigates and approves approximately 120 applications per year, conducts a 3-day written examination, generally once a year, processes the examination, grades and licenses those applicants who have passed the written examination and have completed a year of internship in an approved hospital. Applicants may take the examination upon completion of their medical course, but a license may not be issued until they have completed a year of intern training. The board also receives and investigates an average of 30 applications for physician and surgeon certificates by reciprocity each year. The board has approximately 2,500 licentiates.

To maintain fiscal solvency of the board, effective in 1960-61, the annual tax and registration fees were raised administratively from $17 to $25 and the examination fees were increased from $25 to $35.

GENERAL ANALYSIS

Objectives

The purpose of the board is to protect the public and users of the San Diego port facilities by assuring that pilots are qualified to perform their function.

Program and Performance

The board licenses pilots operating vessels on the San Diego Bay, after careful examination of qualifications, fixes rates of pilotage, and records fees received by each pilot as submitted to the board on monthly reports. The 3-member board is appointed by the Governor to serve at his pleasure for terms not exceeding 4 years. Members include the mayor of San Diego as ex officio member, a nautical man and 1 citizen, who must be residents of San Diego.

GENERAL ANALYSIS

The Board of Pilot Commissioners for the Bays of San Francisco, San Pablo and Suisun consists of 3 members appointed by the Governor for 4-year terms. This board qualifies persons as pilots operating vessels on San Francisco, Suisun, and San Pablo Bays. At the present time 35 pilots are licensed by the board. Revenues are received from pilotage fees.

GENERAL ANALYSIS

Objectives

To protect the public health, welfare and safety by permitting only persons and firms of demonstrated knowledge and abilities to perform public services for compensation; to prevent unauthorized practices upon the public and to discipline those licensed who fail in their public trust.

Program and Performance

The department is headed by a director, appointed by the Governor. Approximately 560 people are employed by the department and its member agencies.

The member agencies of the Department of Professional and Vocational Standards are headed by boards of 3 to 13 members

---

[a] These funds are derived from assessments against other funds which expenditures are included in the overall budget totals.

[b] Expenditures and revenues of the Professional and Vocational Standards Fund are not carried into the budget totals, since the assessments against the various boards and the rent receipts for the building have been included as expenditures in the budgets of the respective boards and agencies.

GENERAL ANALYSIS—Continued

PROGRAM AND PERFORMANCE—Continued

appointed by the Governor from among members of the particular profession or vocation regulated. The members usually serve overlapping 4-year terms.

In general, the agencies have authority to determine the qualifications of applicants for licenses, to give examinations and issue licenses, and to regulate licenses by means of inspection, investigation and formal disciplinary action. Each agency employs a staff to assist with these functions. With minor exceptions the cost of operations of the member agencies is paid by the fees collected from those engaged in the occupations regulated.

The departmental administration co-ordinates and supervises the administrative and financial affairs of 27 professional and vocational licensing agencies and the Division of Administrative Procedure. It performs centralized personnel, budgetary accounting, and mechanical registration for these agencies and manages the Business and Professions Building and Annex.

The administration budget for the 1961-62 fiscal year provides for 7 new positions in the general service areas of the department; specifically, in the mail processing, duplicating, machine reregistration, and supply areas, where the increased workload requires additional personnel. This workload increase is due to new licensees who have been approved by the several boards, and through the moving of the headquarters by all but one agency to Sacramento.

In addition, a position of records management analyst and a stockroom clerk have been added to develop and put into effect a continuing program of records management and to establish a centralized facility for office supplies.

The 1961-62 department budget provides for the following significant changes in program:

Agency	Program	Number of positions	Cost
Departmental Administration	Administrative and Clerical	7	$31,230
Departmental Administration	Licensing	2	8,400
Board of Accountancy	Clerical	1	3,996
Board of Barber Examiners	Clerical	1	3,996

BUSINESS AND PROFESSIONS BUILDING ANNEX

In accordance with the provisions of Sections 400 and 404 of the Business and Professions Code, the Business and Professions Building was constructed and is being operated by the Department of Professional and Vocational Standards as a self-sustaining enterprise. Out of the rentals received from state agencies occupying space in the building and fees paid by users of its parking facilities, are defrayed the cost of operating and maintaining the building. Generally, the remaining receipts are apportioned back to the agencies contributing to the cost of the building in proportion to their respective investments.

Repayments to investing agencies are estimated on an accrual basis. Actual repayments are made semiannually, after the close of the period in which net rentals accrued.

Investing Agencies	Investment as of July 1, 1960	Estimated Repayments 1960-61	Estimated Repayments 1961-62
Department of Professional and Vocational Standards:			
Board of Accountancy	$181,733	$6,703	$16,757

GENERAL ANALYSIS

This division is responsible for co-ordinating and improving the quasi-judicial functions of the various licensing boards, including agencies not within the department itself. It furnishes trained hearing officers to any state agency conducting disciplinary proceedings, and it compiles and publishes the California Administrative Code, consisting of agency rules and regulations. The expenses of the hearings function, including retirement, are supported entirely on a reimbursable basis by the agencies utilizing the services.

The agency workload is indicated by the following figures:

	Actual			Estimated	
	1957-58	1958-59	1959-60	1960-61	1961-62
Cases heard	1,238	1,095	1,230	1,400	1,500

GENERAL ANALYSIS

This board, which consists of 7 members appointed by the Governor for 4-year terms, licenses and regulates certified public accountants and public accountants. Workload formerly handled by an accountancy committee has been shifted to the clerical staff. One new clerical position is included in this budget to meet this clerical workload. The agency workload is reflected in the following table:

	Actual 1957-58	Actual 1958-59	Actual 1959-60	Estimated 1960-61	Estimated 1961-62

Support *(Collection Agency Fund)*	$90,873	$127,770	$118,411	—$9,359 (—7.3%)
Personnel man-years	6.8	9.6	9.6	–

GENERAL ANALYSIS

The Collection Agency Licensing Bureau examines, licenses and regulates collection agencies, their officers and employees. Also, this bureau registers employees and licensees, examines the financial accounts of licensees and appoints conservators for liquidations when necessary. The chief of the bureau is appointed by the Governor and serves under the direction and supervision of the Director of the Department of Professional and Vocational Standards. In addition the chief serves in the same capacity for the Bureau of Private Investigators and Adjusters with his salary being shared equally by each agency. There is within this bureau a California Advisory Board of Collection Agencies which consists of 5 members appointed by the Governor for 4-year terms.

This budget provides for a current year augmentation in order to finance contingencies which could not have been contemplated at the time that this budget was transferred from the Secretary of State. These include pro rata charges and conservatorships over which this agency has no control, and the one-time cost of an audit study to determine the extent of regulation which this agency must practice in fulfilling its statutory requirements.

Legislation will be necessary in the 1961 Legislative Session to maintain this program on a solvent basis. Agency workload is indicated in the following figures:

	Actual			Estimated	
	1957-58	1958-59	1959-60	1960-61	1961-62
Licensees	769	746	749	755	755

CONTRACTORS' LICENSE BOARD

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	CHANGE FROM 1960-61
SUMMARY				
TOTAL EXPENDITURES				
Support *(Contractors' License Fund)*	$991,088	$1,094,716	$1,171,429	$76,713 (7%)
Personnel man-years	103.9	105.4	114.9	9.5

GENERAL ANALYSIS

This board of 7 members, each appointed by the Governor for a 4-year term, licenses and regulates contractors in the various branches of the construction industry. The budget for 1961-62 provides 9 additional positions based on workload increases in the number of licensees and the number of complaints received. The legal counsels and attendant positions are intended to represent the agency in administrative hearings so as to relieve investigative personnel from the dual role of prosecutor and witness and to advise investigator personnel in legal aspects of their investigations. The additional clerical positions are added to meet the gradual increase in workload. Since the 1945-46 fiscal year, licensees have increased 122 percent without a comparable increase in positions to carry on the clerical functions of the agency.

The current year budget provides for an augmentation in order to finance increased pro rata charges, over which this agency has no control, and increased traveling costs. These costs are the result of new statutory requirements, increased construction, and the changing trends in urban and suburban development.

The following table indicates the agency's workload:

	Actual			Estimated	
	1957-58	1958-59	1959-60	1960-61	1961-62
Licensees	82,081	84,494	87,020	89,370	91,962

SUMMARY				
TOTAL EXPENDITURES				
Support *(Cosmetology Contingent Fund)*	$315,792	$363,084	$391,209	$28,125 (7.7%)
Personnel man-years	30.5	30.9	33.8	2.9

GENERAL ANALYSIS

The board, which consists of 5 members appointed by the Governor for 4-year terms, examines, licenses, and regulates the practice of hairdressers, cosmeticians, manicurists, electrologists, beauty shops and cosmetology schools. This budget provides 2 additional special investigator positions to handle the increase in shop and school inspections and also the increased number of complaints assigned to investigation and to reduce the backlog of assigned complaints. Two clerks have been provided to meet workload increases, one of which was authorized in the current year. In addition, the current year budget provides for an augmentation in order to finance additional expert examiner help, and operating expenses arising from a greater number of examinations than budgeted. Additional funds are provided for charges arising from a redistribution of cost for the Departmental Administration reregistration program. The charge for this service is now based upon total licensees. Workload increases are indicated in the following table:

	Actual			Estimated	
	1957-58	1958-59	1959-60	1960-61	1961-62
Licensees	72,677	76,194	81,658	87,172	92,640
Applications	5,532	7,585	8,693	9,220	10,130
Number of shops	10,526	11,021	11,400	11,800	12,200
Number of schools	102	105	129	150	170

---

[a] Composed of savings in salaries and wages, $2,011; operating expenses, $6,238; equipment, $564; and increase in reimbursements, $172.

GENERAL ANALYSIS

This board, which consists of 7 members appointed by the Governor for 4-year terms, inspects and licenses dry cleaning plants and press shops and examines and licenses operators.

The expenditures of this board are exceeding revenues to the extent that on June 30, 1962 the estimated surplus will be insufficient to maintain normal operations. Legislative consideration to provide additional revenue will be necessary to continue this program on a solvent basis at the existing level of service. The board's workload is indicated by the following figures:

GENERAL ANALYSIS

The bureau licenses and regulates sellers and processors of overstuffed furniture and articles of bedding. An inspection service is maintained to insure truthful labeling of these goods. There is in the bureau an advisory board of 7 members appointed by the Governor for terms of 4 years. The bureau's workload is reflected in the following table:

	Actual			Estimated	
	1957-58	1958-59	1959-60	1960-61	1961-62

GENERAL ANALYSIS

The Board of Guide Dogs for the Blind consists of 7 members. Five are appointed by the Governor for 4-year terms, 1 is the superintendent of the California School for the Blind, and 1 is the head of the Bureau of Vocational Rehabilitation. This board was established for the purpose of licensing and regulating guide dog schools and guide dog trainers. Nine licenses are in effect. Staff for this agency's work is currently provided jointly by the Department of Professional and Vocational Standards and the Department of Education. This budget provides a current year augmentation to provide temporary help to meet clerical workload increases.

BOARD OF MEDICAL EXAMINERS

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	CHANGE FROM 1960-61
SUMMARY				
TOTAL EXPENDITURES				
Support *(Medical Examiners Contingent Fund)*	$426,068	$503,098	$523,316	$20,218 (4%)
Support *(Physical Therapy Fund)*	10,959	13,622	13,812	190 (1.4%)
Totals	$437,027	$516,720	$537,128	$20,408 (3.9%)
Personnel man-years	32.8	37.4	38.1	0.7

GENERAL ANALYSIS

The Board of Medical Examiners consists of 10 members appointed by the Governor for 4-year terms. Within the board there is a chiropody examining committee of 5 members, a psychology examining committee of 7 members, and a physical therapy examining committee of 4 members. Each committee member is also appointed by the Governor for 4-year terms.

The board examines, licenses, and regulates physicians and surgeons, chiropodists, drugless practitioners, and midwives. Within the board, the chiropody examining committee reviews applications and examines applicants for licensing as chiropodists; the psychology examining committee examines and passes upon the qualifications of applicants for certification and registration as psychologists; and the physical therapy examining committee reviews applications and examines applicants for licensing as physical therapists, subject to approval by the board.

The current year budget provides for augmentations in order to finance automobiles, traveling and other related expenses which were inadvertently omitted for the 4 new positions authorized in the 1960-61 Budget. In addition, because of the new positions and increased workload, the general expense, communications, and pro rata charges reflect modest increases.

This budget provides 1 additional investigator position to handle the increased number of complaints assigned to investigation, and to reduce the backlog of assigned complaints per investigator.

The rate of proposed expenditures for both the current and budget years is in excess of estimated revenues. The Board of Medical Examiners has taken action to raise the annual tax from $3 to $5 per year to become effective with the current fiscal year to meet the increased expenditure programs. Similar action will be required to align the revenues with expenditures for the Physical Therapy Fund if the current expenditure program is to continue beyond 1961-62.

The agency workload is indicated by the following figures:

	Actual			Estimated	
	1957-58	1958-59	1959-60	1960-61	1961-62
Licentiates:

Support *(Nurse Examiners' Fund)*	$248,483	$369,344	$365,689	—$3,655 (—1%)
Personnel man-years	26.3	35.6	37.2	1.6

GENERAL ANALYSIS

The Board of Nurse Examiners, which consists of 5 members appointed by the Governor for 4-year terms, examines, licenses, and regulates nurses and schools of nursing in California. The budget for 1961-62 provides for 1 man-year of temporary help to convert the files of this agency to a system more compatible with machine reregistration, and 0.5 additional typist-clerk position for the Los Angeles office. This position will be shared equally by the Board of Dental Examiners. The current year budget provides an augmentation in order to finance the conversion of existing filing equipment to a modern drum-type filing system. This will produce future savings through increased efficiency. Additional funds are provided for charges arising from a reallocation of cost for the departmental administration reregistration program. The charge for this service is now based upon total licentiates. The board's workload is indicated by the following figures:

	Actual			Estimated	
	1957-58	1958-59	1959-60	1960-61	1961-62

GENERAL ANALYSIS

This bureau examines, licenses and regulates private detectives, adjusters, repossessors, and employees and officers of private detective agencies. The chief of the bureau is appointed by the Governor and serves under the direction and supervision of the Director of the Department of Professional and Vocational Standards. In addition, the chief serves in the same capacity for the Collection Agency Licensing Bureau with his salary being shared equally by each agency.

This budget provides for a current year augmentation in order to finance increased pro rata charges over which this agency has no control and other minor contingencies arising through recent legislation.

Legislative consideration will be necessary to continue the program on a solvent basis at the existing level of service.

The following table indicates the bureau's workload:

	Actual			Estimated	
	1957-58	1958-59	1959-60	1960-61	1961-62
Licensees	1,211	1,261	1,690	2,060	2,280
Registrants	–	–	2,124	2,450	2,700
Applications	237	259	260	270	300

---

[a] Composed of savings in salaries and wages, $706; operating expenses, $4,130; equipment, $213; and increase in reimbursements, $934.

Personnel man-years	1.4	0.7	0.7	–

GENERAL ANALYSIS

The Certified Shorthand Reporters Board, which consists of 5 members appointed by the Governor for 3-year terms, examines, licenses and regulates shorthand reporters. This budget reflects an administrative change wherein the functions of this board have been incorporated into the facilities and personnel currently responsible for the functioning of the Board of Landscape Architects, the Board of Examiners in Veterinary Medicine, and the Yacht and Ship Brokers Commission.

The result of this integration has been the elimination of a full-time clerical position and a part-time executive secretary. Temporary help funds have been added only for peak load assistance and the duties formerly performed by the part-time executive secretary will be assumed by the full-time registrar, which position, shown under the Yacht and Ship Brokers Commission, will serve all 4 agencies.

SUMMARY				
TOTAL EXPENDITURES				
Support (*Vocational Nurse Examiners' Fund*)	$82,381	$122,992	$122,789	—$203 (—0.2%)
Personnel man-years	7.7	10.5	10.2	—0.3

GENERAL ANALYSIS

The Board of Vocational Nurse Examiners is composed of 9 members appointed by the Governor for terms of 4 years. This board establishes curriculums, examines, licenses, and regulates vocational nurses and psychiatric technicians in California. Investigative and consultant services in this board are being shared jointly by both functions.

The current year budget provides for an augmentation in order to allocate the cost of administration of the psychiatric technician program to the proper account within the Vocational Nurse Examiners Fund. Most of this will be offset by a savings within the vocational nurses account of this fund.

The agency's workload is reflected in the following table:

	Actual			Estimated	
	1957-58	1958-59	1959-60	1960-61	1961-62

GENERAL ANALYSIS

Objectives

It is the duty of the commission to secure adequate and safe services at rates that are fair and reasonable for both the public and the privately owned utilities and transportation companies.

Program and Performance

The commission consists of 5 members appointed by the Governor for 6-year terms to hear matters relating to rates, charges, services, safety and affairs of the utilities and carriers under its jurisdiction. The commission then determines intrastate rates and service of privately owned utilities and transportation companies. These include gas, electric, telephone and telegraph utilities; streetcars, trucks, buses, airlines and vessels transporting freight or passengers in intrastate commerce; warehousemen, wharfingers, carloaders, and pipeline operators.

The commission regulates the issuance of securities and other transactions relating to the capital structure of public utilities, and protects the public interest by appearing before federal agencies and courts as an advocate in interstate proceedings.

The activities of the commission are reflected in the following statistics:

	Actual			Estimated	
	1957-58	1958-59	1959-60	1960-61	1961-62
Formal proceedings filed	1,493	1,394	1,574	1,600	1,600
Overall formal documents registered	7,591	7,146	7,784	8,000	8,000
Decisions and orders issued	1,916	1,991	1,805	2,000	2,000
Parties notified of hearings	16,026	20,210	32,376	25,000	25,000

Growth of California's population and increased usage of utility service per customer both provided problems for the State's privately owned utilities and the Public Utilities Commission. At the end of 1959 investment in utility plants was 2½ times what it was in 1949, with $8,293,062,000 invested in gas, steam, electric, water, and telephone plants, compared with investments of $3,146,714,000 just 11 years ago.

There were more than 4,000,000 gas customers, well over 3,000,000 electric customers, 7,323,000 telephones in use and more than 1,000,000 customers of 491 water utilities. To protect the interests of these Californians required constant vigilance by the commission and its technical experts.

The commission authorized rate increases estimated to produce an additional $35,000,000 per year in gross revenue of utilities due to higher wages, increased costs of materials and supplies and higher taxes, which brought requests for raises. However, $29,000,000 out of the $35,000,000 was authorized for gas utilities to offset raises in the cost of an out-of-state gas company, which supplies three-fourths of all gas used in California. This was the reason for organization of the Gas Producer Cost Branch in the Utilities Division, with engineers assigned full time to work with the Legal Division and Utilities Finance and Accounts Division to combat higher charges for gas from other states. Attorneys were added to the legal staff to participate in the disputes involving excessive charges for gas over which the Public Utilities Commission does not have control.

The commission is currently undertaking an appraisal study of the just compensation to be paid by the Monterey Peninsula Water District for acquisition of privately owned utility properties. The cost of this study will be charged to the municipal district.

Accelerated investigations of highway carriers' operations brought formal commission suspension of 33 carriers because of violation of the Public Utilities Code. In addition, carriers were required to collect from shippers the amounts by which they were charged less than lawful rates. This work is important in stabilizing the State's transportation system and preventing discriminatory charges.

The commission is supported from both the General Fund and the Transportation Rate Fund. Activities supported by the Transportation Rate Fund are largely regulatory upon rail, truck and water carriers engaged in the transportation of property. The Transportation Rate Fund revenue is derived from a fee of one-third of 1 percent of the gross operating revenue earned by carriers from the transportation of property and from other related fees.

ADMINISTRATION

Objectives

The Administrative Division carries out the statutory duties provided for in the Public Utilities Code and maintains the general services necessary to the commission and its operating divisions.

Program and Performance

This division is concerned with receiving and recording all official filings; processing and distribution of all commission decisions and orders; supervision of general business affairs of the commission; reporting of all hearings; internal fiscal accounting; central personnel services; and handling inquiries from the public and other state agencies regarding commission actions and procedures.

The number of overall filings received by the commission in 1959-60 fiscal year totaled 7,784 as compared with 7,146 for 1958-59 fiscal year. During the past year, 1,574 formal filings were received by the commission through the Administrative Division, compared to 1,394 received in the 1958-59 fiscal year. The commission issued 1,643 decisions and 162 orders, and adopted 1,487 resolutions. During the year, 1,063 days of hearing were held. Thirty-two thousand three hundred seventy-six notices of hearing were mailed to interested parties.

To meet current and anticipated workload increases, the division has included 6 new clerical positions. An intermediate typist-clerk is to be located in the office of the commission secretary, and 5 clerks are provided for increasing filing and messenger duties.

UTILITIES DIVISION

Objectives

The Utilities Division assists the commission in insuring the public adequate electric, gas, telephone, telegraph, water and steam heat utility service and facilities at reasonable rates without discrimination, as are necessary to promote the safety, health, comfort and convenience of the public, customers, and employees of utilities.

Program and Performance

This division provides the technical and clerical staff to analyze and conduct studies in connection with the regulation of rates, service, facilities, safety, valuation, and certification matters relating to the public utilities.

The Utilities Division's assignment is accomplished through the development of factual information and the making of engineering, operating, rate, administrative and other recommendations to the commission based on fact, experience and judgment.

The division's workload during 1959-60 fiscal year was distributed as follows: 39 percent of the work involved rate proceedings; 24 percent, formal proceedings other than rate; 8 percent, customers' service; 12 percent, administration of general orders; and 17 percent to other divisional work. As of the end of 1959, the plant value of major utilities amounted to over $8 billion. There were 566 utilities as of June 30, 1960. A total of 583 formal decisions were issued by the commission on proceedings which required staff work by the Utilities Division during the past fiscal year. These latter two figures reflect an increase over the prior fiscal year of over 1 percent in number of utilities to over 6 percent more formal decisions decided.

UTILITIES FINANCE AND ACCOUNTS DIVISION

Objectives

This division is charged with the review of applications for authorization to issue securities, with participation in financial aspects of rate proceedings, with making accounting examinations of books and records of carriers, with the review of annual and other financial reports, and with the supervision of the application of accounting procedures prescribed by the commission.

Program and Performance

Formal proceedings involving rate increases, security issues and related matters utilize the major portion of the division's time and manpower. During the 1959-60 fiscal year, the division actively participated in 111 formal rate proceedings as compared with 106 proceedings during the prior fiscal year. In 1959-60 the commission, in considering applications involving the issuance of securities, authorized security issues aggregating $1,820,443,712. This compares with authorizations totaling $570,877,139 for the 1958-59 fiscal year. In addition, 4,448 annual and other financial reports of utilities were filed with this division.

This division further accelerated its program of auditing motor carrier records to check the correctness of amounts of revenue reported as a basis for the payment of the quarterly fee, and in addition, commenced participation in rate proceedings by the Federal Power Commission involving out-of-state gas producers and gas pipeline companies.

TRANSPORTATION DIVISION

Objectives

This division regulates rates, service, safety and operating conditions of privately owned, for-hire carriers of passengers and property by railroad, highway and water, and to a limited extent, by air.

Program and Performance

The division studies cost factors, service rates, and regulations applicable to the movement of freight and passengers by railroad, highway, airlines, water carriers, express corporations, freight forwarders, warehousemen, wharfingers and carloaders. These studies are presented as exhibits in public hearings before the commission involving the establishment of minimum rates throughout the State. The staff examines tariffs filed with the commission for compliance with statutes and commission regulations; audits summaries of rates charged by carriers to determine violations of established rates; quotes rates to the public; and participates and presents evidence in transportation rates hearings before the Interstate Commerce Commission to protect the interests of California shippers.

The division inspects for compliance with safety standards, railroad bridges, trestles and tunnels, industry tracks, and the

operations and equipment of bus companies and the limited number of motor truck carriers, and investigates accidents of all carriers under its jurisdiction. During the 1959-60 fiscal year 3,088 miles of mainline railroad tracks and 494 miles of shortline tracks were inspected for unsafe conditions. It is planned to inspect 3,150 miles of mainline tracks and 551 miles of shortline tracks in the 1960-61 fiscal year, and for the 1961-62 fiscal year, 3,925 miles of mainline tracks and 734 miles of shortline tracks.

For motor truck operations, safety experts checked 1,136 terminals and inspected 4,292 heavy duty trucks in 1959-60 fiscal year. For the 1960-61 fiscal year it is planned to inspect 900 terminals and 7,500 trucks. Emphasis is to be made on vehicles this current year, and on terminals in the 1961-62 fiscal year.

For passenger bus operations, the inspections will involve 148 main terminals, 60 subterminals, and 600 buses.

The division makes engineering studies relative to the need for and construction of new railroad grade separations and grade crossing protection structures, investigates crossing accidents and recommends preventative action. Allocations from the State Highway Fund to aid cities and counties in improving protection at railroad-highway grade crossings have decreased accidents. A comparison was made of accidents and fatalities at 227 crossings for 3 years before protection was improved and 3 years after improvements were installed. This showed a 75 percent decrease in deaths and 58 percent drop in accidents.

Field personnel in 14 district and headquarters offices effect compliance of the carriers transporting property within the State by field investigations of carrier records as well as advising carriers regarding operating procedures and practices directed toward a dependable and adequate transportation system in the State. In the past fiscal year the enforcement program resulted in 33 decisions which suspended carriers' operative rights for a total of 168 days. There are approximately 14,000 carriers of property within the State subject to regulation by the commission.

PUBLIC UTILITIES COMMISSION—Continued

SUPPORT EXPENDITURES DETAIL				ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	CHANGE FROM 1960-61

LEGAL DIVISION

Objectives

This function provides legal service and staff counsel in certain proceedings before the commission.

Program and Performance

This division represents the commission in proceedings in all of the federal courts and all of the California courts, as well as federal regulatory agencies. It also represents the public interest in proceedings before the commission. An important part of the federal litigation involves the oil and gas producers and pipeline corporations.

The chief counsel and assistant chief counsel review all proposed commission orders and actions. The Legal Division staff co-ordinates with the Division of Corporations on security issues of utility corporation; provides staff counsel in certain proceedings before the commission; handles legislative matters; just compensation proceedings; analyzes records and recommends action on petitions for rehearing; advises concerning legality of pleadings and filing problems; handles complaints seeking immediate injunctive relief by interim order; advises the commission, the technical staff, political subdivisions, utilities, carriers, and the public on legal and procedural matters; reviews the technical staff's informal investigations and determines and recommends whether or not formal proceedings or court action should be taken.

The Legal Division spent a substantial amount of time representing the commission in proceedings in the United States Supreme Court, the California Supreme Court, and lower courts, as well as before the Federal Power Commission and Interstate Commerce Commission. It also represents the public interest in matters before the California Public Utilities Commission.

In the 1959-60 fiscal year, the California commission assigned 7 attorneys to hearings before the federal agencies. Cases were argued in the federal courts in San Francisco, Los Angeles, New Orleans and in Washington, D.C. A total of 25 months' time was spent by the attorneys exclusively on these cases. Extensive hearings were conducted in Washington, D.C., totaling approximately 19 weeks. It is anticipated that 10 attorneys will spend approximately double this amount of time on similar hearings during the coming year. There were 37 cases pending in federal courts and before federal agencies as of June 30, 1960, 28 of which are Federal Power Commission cases. There are 17 cases pending in state courts. Staff counsel is required in major utility and highway carrier rate proceedings before the commission, as well as investigatory and numerous other proceedings involving substantial questions of law. Formal proceedings before the commission have increased by 341 during the past 7 years. The growth of the State would indicate that the need for these proceedings will continue to increase proportionately. The transportation enforcement program involves review of possible violations, recommendations for proceedings in the courts or before the commission and the preparation and handling of trials or hearings resulting from such recommendations. There were 6 penalty cases pending in California superior courts as of June 30, 1960. There were 124 hearings pending at that time before the commission to which staff counsel was assigned.

EXAMINER DIVISION

Objectives

This function provides the hearing examiners to assure due process to those seeking formal relief from this agency.

Program and Performance

Examiners are assigned to all formal filings which require a decision of the commission. During the 1959-60 fiscal year a total of 1,978 decisions and orders were issued. Of the total decisions 535 were rendered after public hearings. One thousand sixty-three days of hearings were held in the 1959-60 fiscal year. During the 1959-60 fiscal year, a total of 1,574 formal filings were received. As of June 30, 1960, there were 704 matters pending.

REPORTING

Objectives

This function provides the hearing reporters and transcribers for commission proceedings.

Program and Performance

Hearing reporters are assigned to all proceedings held before the commission. The reporters' notes are not transcribed unless ordered by either the litigants or the commission. Transcripts were prepared in over 60 percent of the hearings reported in the 1959-60 fiscal year. There were 198,688 original folios produced in the past fiscal year. This compares with 202,537 original folios produced in 1958-59. The number of days of hearing totaled 1,063.

GENERAL ANALYSIS

Objectives

The basic objectives of the Department of Social Welfare are (1) to assure that programs for assistance of needy persons are administered uniformly and humanely throughout the State in such a manner as to minimize distress, encourage self-respect and independence, and preserve family life; (2) to develop and strengthen services to children, to protect them, to prevent delinquency, and to provide substitute homes for children who cannot live in their own homes, and whenever possible provide permanent homes through adoption; (3) to provide protection and care through family homes or institutions for aged persons who cannot live in their own homes; (4) to promote and develop methods to assure the most economical and effective means of administration of the social welfare programs through other agencies.

Program and Performance

Programs are carried out within the framework of state and federal law. For administration of public assistance to the aged, blind, children and disabled, the department is responsible for assuring the Federal Government that these programs are administered uniformly and in accordance with state and federal standards in all counties of the State. The department develops the annual state plan under which federal funds for child welfare services are received and allocated. Except for direct licensing responsibilities and reporting to courts on independent adoption petitions, the administration of these programs is discharged through other agencies, public and private.

Total expenditures for these programs involve over $613,000,000 a year in state, county and federal funds for assistance payments, administration and services.

They directly help approximately 640,000 people and must serve a wide range of individual problems. Their complexities are inherent in the basic differences in circumstances and conditions in which people are found, and the aim is to meet these wide ranges of need for financial help and for protective care and services. Wherever possible, the aim is to maintain or restore persons to a maximum degree of self-care or self-support.

The public assistance programs provide direct financial aid and services to approximately 254,400 needy aged, 13,700 blind persons, 9,400 totally disabled, to 209,500 children and 57,900 adults in 75,100 families and to 12,500 children cared for in foster homes, for a total of approximately 557,400 persons.

Monthly, some 2,800 children needing homes are under study in a statewide adoption program. Another 3,300 children placed in adoptive homes are under supervision pending final approval of placement. Approximately 1,800 prospective adoptive parents are being studied by staff of 30 local public and private agencies to determine suitability of their homes for adoptive placements. The 30 agencies are licensed and supervised by the department and the costs of the service in the 20 public adoption agencies are provided by state subventions.

Adoption services also include a study and recommendation to the courts by state staff and county adoption agencies of approximately 5,300 active petitions per year for adoption of children placed independently.

Leadership is given local communities to develop and strengthen child welfare services to help troubled parents and children by dealing with behavior problems and family relationships to protect children, prevent delinquency, and preserve family life. Child welfare service plans involving use of federal funds are in effect in 20 counties.

Some 320 homes providing 24-hour care for the aged and children are licensed by the department under standards developed by it. Similarly, about 1,000 day nurseries are licensed by the department. Local agencies accredited by the department license about 3,000 boarding homes for aged and 16,000 foster homes for children in accordance with department standards. In addition, 32 private child placing agencies, with approximately 900 foster homes for children, certify such homes for their own use under the department's supervision. These agencies are operating under licenses issued or renewed annually by the department.

At any point of time, about 100,000 persons are directly benefiting from the department's licensing, placement or adoption activities.

1959-60 Accomplishments

Although the major portion of the department's activities was in connection with supervision and administration of ongoing programs, considerable effort was spent in the implementation of legislative measures passed by the 1959 General Session which required the establishment of new policies, procedures, rules, and regulations. Significant progress was also made in streamlining administration and strengthening programs for which the department is responsible.

Major efforts were extended on projects designed to improve quality of services to recipients of medical care including the launching of a study to point out areas of unmet medical needs so that future planning will best meet those needs; setting up drug classifications which made possible projection of cost figures on drugs recommended for addition to the program; and issuance of an audit guide for county welfare use in establishing a systematized method of auditing medical care bills.

Continued emphasis was placed on assisting counties to raise the level of administration and on decreasing dependency among the Aid to Needy Blind recipients. A statewide seminar on Aid to the Blind was held which afforded opportunities for exchange of ideas with emphasis on problems and solutions. Representatives of 12 counties participated. Further emphasis was placed on the establishment of specialized units in county welfare departments to provide more skilled services to blind persons. Ninety percent of the statewide caseload is now carried by specialized county workers. In order to achieve maximum utilization of the resources of other state agencies engaged in endeavoring to assist blind persons in achieving self-care and self-support, 339 referrals were made to the Home Teachers Counselor Service, State Department of Education.

A total of 8,826 eye examination reports to determine eligibility were processed. Of these, 4,762, or about 53.9 percent, were for new applicants and 4,064, or 46.1 percent, were for recipients to determine continued eligibility. Of the 4,762 examinations for new applicants, 2,473, or 51.9 percent, were found eligible for aid while 1,859, or 39.1 percent, were found ineli-

[a] The summary of expenditures from state, federal, and county funds for social welfare programs administered by the department and county administration of Child Welfare Services appears in the Local Assistance Budget, "Subventions for Social Welfare."

[b] Grants from Federal Government and expenditures therefrom are not included in the overall budget totals.

GENERAL ANALYSIS—Continued

1959-60 Accomplishments—Continued

gible. Of the total number of examinations made for recipients, 3,140, or 77.3 percent, were found to continue to be eligible and 481, or 11.8 percent, were found ineligible.

A comprehensive survey of departmental and local agency training needs and emphasis was completed. Basic information was obtained upon which current work plans were completed.

Personnel administration continued to be strengthened. For the first time in 10 years a complete position classification review was made of all county welfare departments.

As a result of the classification study, the department developed revisions to Merit System classes and new classes to reflect the trend towards restorative services and the increasing educational background required of social work staff. The need for a wider range of classes was demonstrated and these have been included in the total proposed classification plan. This new plan will be completed in the current fiscal year.

Comprehensive estimates of the amount and kind of staff needed to meet the State's program objectives over a 10-year period were also developed. This will be used as a basis for anticipating recruitment and training needs and for planned approaches to manpower problems.

Single statewide examinations for Social Worker I class were given for all counties. Previously each of the 14 Civil Service counties administered its own examination and the county Merit System examinations for the remaining 44 counties were administered by the State Personnel Board. Under the previous system a candidate for employment in this class could conceivably have taken 15 separate examinations. As a result of this new procedure, one single examination is given for all counties.

Placement of children in adoptive homes increased approximately 20 percent over the preceding year and reached a new high of 3,235 placements. Adoptions were completed for 2,650 children and families. Almost 12,000 requests were received. During the year agencies completed studies of 4,512 applications. The department and 14 county adoption agencies received 4,887 new independent adoption petitions for study and report to the court.

The department initiated a study of irregular placement practices in the independent adoption program.

The intercountry adoption program was initiated in the department's area offices. Up through June 30, 1960, approximately 1,450 inquiries had been received and studies had been completed for 116 families.

Emphasis on the use of Child Welfare Services funds in the past year was placed on the recruitment of promising people to the child welfare field. Sixty scholarships for graduate training in social work were granted persons who will be employed in county welfare departments. These funds were also used in 15 special projects to strengthen programs serving children and their families in local communities.

More effective service in the licensing of boarding homes for children in the provision of placement service and of family care and group day care service to children was made possible through workshops and institutes with the use of Child Welfare Services federal funds.

Assistance to child care institutions in developing a uniform cost accounting system was initiated.

To meet the long-felt need of county welfare departments for a statistical system which would enable them to know more about children served in terms of the kinds of problems presented, the services given or the reasons for not giving service, a statistical reporting system which could also be used as a basis for work planning, performance budgeting and cost analysis was undertaken.

Strengthening of administration continued on several other fronts. Through studies and reviews initiated by the State-County Fiscal Committee on Fiscal Operations, development of improved and simplified methods and procedures in fiscal operations at the county level were continued. Claiming processes and forms were reviewed and simplified. Plans were developed for initiation of fiscal reviews in the counties. Development of guide material for training in the preparation of claims was started.

Medical care repayment procedures were clarified and controls strengthened in counties to eliminate fraud.

Clerical yardsticks placed into effect last year have not only proved to be an effective tool in budgeting and assignment of staff, but have also provided cost information in various operations which have been valuable for work simplification purposes. Simplification of county forms ordering procedure was developed and put into effect as well as the development of a departmental driver accident training program.

Mechanization of the duplicating processes continued. Savings of approximately $5,000 a year resulted from a simplified process of duplicating appeal decisions.

The department's participation in the statewide Work Improvement Program resulted in 180 suggestions being submitted. Forty of these were adopted and have been put into effect for a net annual savings in administrative costs of over $10,000 per year.

A variety of other work simplification projects were undertaken covering fiscal processes, statistics and clerical procedures as well as providing county welfare departments with an increasing amount of consultation on a wide variety of administrative and organizational problems including electronic data processing system. In addition to 4 counties already planning to use this equipment, 6 additional counties have made decisions to utilize electronic data processing equipment in payment and other processes of welfare administration. A project was initiated to develop guides to help counties improve their budgeting methods and improve interpretation of budget requests.

Major attention was given to directing administration of the assistance programs toward increasing the potential of recipients for self-care, self-support and solution of problems of concern to the community. A task force study of the Aid to Needy Children program covering aspects of the program under criticism was completed and plans initiated for corrective action.

Guides were developed jointly with the Department of Corrections for co-operative staff work with prisoners, parolees and their families receiving Aid to Needy Children and plans made for extensive attention to rehabilitation services to this portion of the caseload. A number of projects were carried on for increasing work opportunities for adults and older children in Aid to Needy Children families. New policies and procedures were developed for helping families with money management problems, for improving the functioning of disabled persons toward self-care and for volunteer services to aged and disabled recipients.

Considerable effort was expended in development of case classification ideas as the basis of caseload management as well as the initiation of a pilot program of case management in one county. The department conducted a series of institutes for state and county personnel.

In addition a comprehensive management study of the department organization structure was continued by the Organization and Cost Control Division of the Department of Finance. Final recommendations are scheduled during the current fiscal year.

Departmental Objective and Work Emphasis Program—1961-62 Fiscal Year

The overall objective of this department during the 1961-62 fiscal year will be in continuing to help conserve and protect human resources by preventing social breakdown; by providing protection and care for aged persons; by providing minimum standards of living for those who are unable to support themselves and their families; by developing their capacity for self-reliance and self-sufficiency through rehabilitation, vocational training, medical care and social services; and by restoring them to useful and productive activity in community life and to do this as efficiently as possible.

Administratively, the department will continue to review and evaluate current methods, procedures, and policies to assure the most economical and effective means of administration of the Social Welfare programs. Specifically, work emphasis and objectives on programs during the 1961-62 fiscal year will be as follows:

A. Program Objectives:

1. To bring into play the maximum effort to administer aid in such a way that it supports a well-staffed program focused on the strength of the individual, and emphasizes restoration, rehabilitation and prevention. In the Aid to Needy Children program the focus should be upon protecting children who are in jeopardy as the result of:
   - a. Inadequate family income
   - b. Family disruption and disorganization
   - c. Parental misbehavior or failure

DEPARTMENT OF SOCIAL WELFARE—Continued

GENERAL ANALYSIS—Continued

Departmental Objective and Work Emphases Program—1961-62 Fiscal Year—Continued

2. To bring about a closer integration of the various categories including General Assistance (this pertains not to consolidation, but to the elimination of artificial distinctions which tend to divert attention from needs of individuals or from going about the problem-solving process in a simple consistent and unified manner).
3. To keep public assistance geared to the job of making up what an individual or family lacks to meet acceptable standards—affording the individuals maximum of opportunity with which to bring into effective use whatever strengths and initiative he has (this would include considerations relating to the use and application of the person's physical as well as his personal resources; e.g. property, earnings, etc.).
4. To keep assistance services and benefits in line with changes in the general level of living costs in the community.
5. To systematically explore, define and improve the role that welfare services can play in improving the situation of marginal and underprivileged population segments, to the end of reducing their potential dependency.
6. To provide assurance that actual expenditures are being made in accordance with law and other fiscal, administrative procedures geared to program objectives and desirable end results.

B. Administrative Objectives:

1. Increasing Efficiency:

   Efforts toward improving the quality of administration of county welfare departments is to be intensified. Maximum attention is to be given in assisting counties in dealing with problems of dependency and effects of dependency upon the ability and will of those involved to handle their problems independently of public intervention.

   In this area specific attention must be given to simplification of work procedures—the elimination of nonproductive procedures which do not contribute to the end result being sought and to eliminate all requests upon county government which impose nonproductive work requirements.

   The methods applied by county welfare department staff to the solution of case problems are to be carefully assessed to provide a basis for intensified training service.
2. Experimentation and Validation of Alternatives:

   Increasing use of alternative approaches to the solution and treatment of problems of dependency must be encouraged by county governments throughout the State. The most notable examples are the projects under way in San Mateo and San Francisco and the one undertaken some time ago and completed in Marin County. Activity of this same general nature must be undertaken in as many counties as possible during this next year.
3. Improving the Quality of Service:

   During the past decade, the major legislative emphasis by both the United States Congress and the State Legislature has been to impose upon administrators a responsibility to provide services to support the payment of assistance. Some of these legislative directives have been toward the ultimate reduction of dependency and the costs of assistance. Of equal interest to the legislative bodies has been the comfort and well-being of those who require financial assistance. Greater concern must be expressed by the public welfare establishment for the achievement of the level of supporting services.

1961-62 Budget Request

Current Program

The budget provides for 22.7 new positions amounting to $162,285 to properly administer and serve the various welfare programs as mandated under the existing laws of the State. Of these positions, 13.7 are justified on a yardstick basis. The positions are summarized below:

	Professional	*Clerical*	*Total*	*Cost*
A. *Continuation of existing workload*				
Area Operation—Medical Services Unit	3	–	3	$26,733
Case Management Project	4	2	6	52,150
B. *Program workload*				
Adoptions	3	–	3	$19,080
Aid to Totally Disabled	2.7	2	4.7	32,246
Licensing	3	–	3	20,376
Clerical yardsticks	0	3	3	11,700
Totals	15.7	7	22.7	$162,285

The 3 positions requested for continuation in the area operations Medical Services Unit are for the supervision of the Medical Services Section of each area office and for co-ordination of the area, county, and central office medical activities. The ongoing work of the administration of the Medical Care Program continues to expand. Congressional legislation passed at the last session provides for further expansion of this program. Consequently, the need for these positions for administration of the program is required.

The continuation of the 6 positions shown for the Case Management Project is required as part of a long-range plan to improve the methods of diagnosis, prevention and treatment for the present and future people that public welfare programs serve. The prevention and control of social problems together with really effective and practical approaches to the rehabilitation of those served by our local welfare agencies are the goals toward which this department's efforts are now directed.

The 13.7 positions requested under program workload are on the basis of existing yardsticks which measure position requirements on the basis of work units. The increases in volume of workload estimated for 1961-62 over the current year justify the additional positions. These positions will be established only when workload reaches the point where additional staff is justified by application of the yardstick.

The budget also provides for an increase in the Prevention of Blindness Program of $36,070 which covers increased hospital charges amounting to an average of 6.6 percent and an increase in caseload to be served amounting to 10.2 percent. This is necessary in order to provide the minimum funding necessary for workload increases.

Proposed New Legislative Program

To implement legislation proposed by the Governor, 18.9 new positions are requested as detailed below:

	Professional	*Clerical*	*Total*	*Cost*
A. Medical Assistance for the Aged	4.4	4	8.4	$50,274
B. Grants for Community Services to Older Citizens	2	–	2	17,052
C. Administrative Assistance to County Welfare Departments	6.5	2	8.5	62,520
Totals	12.9	6	18.9	$129,846

Federal matching funds are available for medical assistance for the aged, not recipients of Old Age Security, but without resources sufficient to defray the cost of medical expenses. Legislation is proposed by the Governor to establish a program of medical services for such persons. One public assistance specialist IV and 1 medical social work consultant II, as well as additional medical consultant time, are necessary to develop necessary administrative and instructional materials and provide consultation. This will be particularly necessary in the area of hospitalization with which the department has had very limited experience. Because the department is dealing with a group about which it has very little information, additional effort needs to be exercised in gauging the effects of policy and proposed changes in it. Program planning and control will be to a great extent dependent upon statistical information and the most effective use of it. For this purpose, 1 senior research technician and 1 associate research technician are necessary, as a minimum. An allowance of $2,500 is also requested as temporary help to provide special research consultation and tabulating service, if necessary. Two intermediate clerical positions are requested to assist the above 4, and 1 accounting technician II and 1 intermediate clerical position for the auditing and processing of claims under this and other proposed programs.

Legislation is proposed by the Governor for a grant of $150,000 to promote local community activities for older citizens. One public assistance specialist IV and 1 associate research tech-

DEPARTMENT OF SOCIAL WELFARE—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS—Continued

1961-62 Budget Request—Continued

nician are necessary to implement this program. These persons will develop criteria for grants, provide consultation on the preparation of local projects, build into the projects the means for evaluation of results and provide the guidance necessary for successful operations. In general, these persons will be working with communities without much previous experience in the field, for it is not the purpose of the grants to displace existing activity.

Legislation introduced by the Governor for administrative assistance to county welfare departments is designed to (1) make available state funds for planned projects of dependency reduction in Aid to Needy Children, and (2) increase the capacity of local staff to undertake a more effective and aggressive program of dealing with case problems through expanding in-service training and providing educational leave stipends.

A family service consultant (public assistance specialist IV), 1 senior research technician and 1 intermediate stenographer-clerk are requested for the dependency reduction projects. These persons will develop criteria for grants, provide consultation on preparation of local projects, build into the projects the means of evaluation of results and provide guidance necessary for their successful completion. These projects will not be primarily research projects, but will have carefully prepared designs for measuring and evaluating accomplishments for subsequent administrative consideration. Design and validation are very technical and difficult in this field.

In the area of training, 1 training officer I position is requested to prepare criteria for and pass upon requests for educational leave stipends, to develop additional resources in terms of supervised placement of students in county welfare departments, and develop and promote the use of training standards in local agencies. One training officer I, 1 public assistance specialist III and 1 intermediate typist-clerk are requested to operate a central induction center for new social work recruits in small counties who do not have the resources for operating their own organized induction training programs. Three half-time public assistance specialist III positions are requested to supervise graduate students placed in state or county offices as a part of their graduate social work education.

DEPARTMENTAL ADMINISTRATION

Objectives

This unit includes the Social Welfare Board, office of the director, and the administrative advisor, and is responsible for the direction and co-ordination of departmental programs.

Program and Performance

Policies, rules and regulations for the administration of the department's programs are established by the Social Welfare Board, consisting of 7 members appointed by the Governor. The director of the department, also appointed by the Governor, is the administrator of the department and secretary of the board. The chief deputy director is appointed by the Governor.

The administrative advisor's unit furnishes legal information and advice to the department and the Social Welfare Board, and conducts appeal hearings for the Social Welfare Board.

Medical consultants are placed in this unit since they report directly to the deputy director.

Six new positions are proposed for the continuation of the Case Management Project which was previously included in temporary help and financed by federal grant funds. This project is proposed as a continuing function in the department to be funded through a combination of state funds and federal funds for public assistance.

COMMUNITY WELFARE SERVICES

Objectives

The area offices in Los Angeles, San Francisco and Sacramento are responsible for the supervision of local agencies and the execution of departmental policies throughout the State.

Program and Performance

Area deputies supervise the area staffs who are responsible for program consultation to local agencies and direct adoption and licensing programs. District representatives are responsible for the co-ordination and overall relationships with the counties.

The majority of the professional and clerical positions are budgeted on the basis of workload for which staffing yardsticks have been developed. The remaining positions provide program consultation to counties and private agencies.

A total of 16.7 new positions are proposed for the 1961-62 fiscal year. Of these, 3 are area supervisors in the medical services section proposed for permanent extension. These were established on a year to year basis in the 1957-58 fiscal year to provide area, county and central office co-ordination of the health program at the county level. The other 13.7 positions: 3 child welfare specialists in adoptions, 3 typists in the clerical pool, 3 child welfare specialists in licensing and 0.7 medical consultant time, and 2 medical social work consultants and 2 stenographers in medical services section, are based on workload increases. These positions are discussed in the General Analysis. (See page 614.)

[a] Three positions extended for the 1960-61 fiscal year only.

DEPARTMENT OF SOCIAL WELFARE—Continued

MANAGEMENT SERVICES

Objectives

Management Services is responsible for the development and execution of fiscal and administration policies, personnel management, research, management studies, training and housekeeping functions.

Program and Performance

All equipment and operating expenses for the department, except some special activities, are included under Management Services.

The Deputy Director—Management Services is responsible for the supervision and co-ordination of the activities of the bureaus. The fiscal officer is the supervisor of the Bureau of Administrative Accounting, Bureau of Fiscal Services, Bureau of Field Audits, and the Bureau of Office Services. The Bureau of Administrative Accounting maintains accounting, budgetary cost accounting, and property records of the department; maintains records of county estimates and expenditure statements; and compiles estimates and expenditure statements for submission to the Federal Government. The Bureau of Fiscal Services has general responsibility for the claims submitted by the counties and other agencies; and makes field audits in relation to life care agreements; develops accounting systems recommended to counties. The Bureau of Field Audits performs field audits in relation to expenditures for welfare made by the counties. This function was transferred from the State Controller's Office by legislative action in the 1959-60 fiscal year. The Bureau of Office Services performs general housekeeping functions, operates the duplicating unit, stenographic pool, central files, mail section, and supply section. The Bureau of Personnel administers a merit system for counties not having a civil service system, supervises the operations of the county civil service system covering personnel engaged in the administration of public assistance and child welfare programs and performs the personnel work for the state department. Research and Statistics is responsible for analysis of statistics for all operations of the department; for preparation of estimates and special studies; and for the preparation of departmental and statistical reports. The Bureau of Management Analysis is responsible for administrative progress reporting, reports control, forms control, and management and procedural analysis. The Bureau of Training is responsible for the development and administration of in-service training program for county and departmental personnel.

Two research technicians, one clerk and $2,500 for temporary help are requested for statistical control and research in the program of medical assistance for the aged proposed by the Governor. Two research technicians and 1 stenographer-clerk are proposed for the Governor's program for (1) grants for community services to older citizens, and (2) grants to county welfare departments for projects in the area of dependency reduction.

One accounting technician and 1 account clerk are requested to handle work incident to claims arising under the legislation proposed by the Governor.

One training officer is requested to prepare administrative and guidance material on educational leave stipends, negotiate with local agencies and colleges in respect thereto, provide consultation to and promote training in counties as needed.

For an orientation and induction center and other direct training services those counties not providing this service for themselves, there are requested 1 training officer, 1 public assistance specialist and 1 stenographer-clerk.

To provide fieldwork supervision in state or local welfare offices for graduate students in social work, 3 half-time public assistance specialist positions are requested.

PROGRAM DEVELOPMENT

Objectives

Program Development includes Division for the Blind, Division of Child Welfare, Division of Medical Care and Division of Social Security. The overall objective of Program Development is to evaluate the effect of the department's program policies in operation, develop proposals designed to improve welfare services or meet changing social and economic patterns, and making recommendations thereon. The responsibilities for divisions are as follows:

PROGRAM DEVELOPMENT—Continued

DIVISION FOR THE BLIND

Objectives

This division is responsible for the formulation and interpretation of standards, policies, rules and regulations governing the administration of the Aid to Blind Programs.

Program and Performance

The personnel of this division review reports of eye examinations, provide consultant services on medical phases, and administer the Prevention of Blindness Program. The Prevention of Blindness Program provides treatment or surgery to prevent blindness or restore vision to persons applying for or receiving aid to the blind. Advisory committees assist in the development of policies.

DIVISION OF CHILD WELFARE

Objectives

The responsibility of this division is the administration of the programs for the care and protection of children and for residents of boarding homes and institutions.

Program and Performance

Divisional administration supervises and co-ordinates the activities of the Bureau of Child Welfare Services, Bureau of Adoptions, Bureau of Boarding Homes and Institutions, and maintains liaison with the children's bureau of the Federal Department of Health, Education and Welfare.

The Bureau of Child Welfare Services is responsible for the administration of child welfare services in rural areas and in areas of special need. With the exception of the clerical position, this bureau is financed from federal funds. The Bureau of Adoptions is responsible for the administration of the adoption programs, including the licensing of private and public adoption agencies. The Bureau of Boarding Homes and Institutions is responsible for the inspection and licensing of boarding homes, institutions, and child placing agencies by area staff and public agencies delegated for that purpose.

The budget proposes the continuation of the Intercountry Adoption Program established by Chapter 2050, Statutes of 1959. If federal legislation to extend the program after June 30, 1961, is not passed, the budget will be adjusted administratively to provide for liquidation of the program.

DIVISION OF MEDICAL CARE

Objectives

It is the responsibility of this division to formulate and interpret standards, policy, rules and regulations governing the administration of the new medical program for public assistance recipients.

Program and Performance

Medical consultation is provided for in the executive unit. Continued efforts in formulation and interpretation of policies will be given. In addition, responsibilities of this division will include negotiation of fees, co-ordination with other public assistance programs and consultation with departmental and county staffs.

One public assistance specialist, 1 medical social work consultant and 1 stenographer-clerk will prepare necessary administrative and instructional material on the proposed medical assistance program for the aged.

DIVISION OF SOCIAL SECURITY

Objectives

This division is responsible for the supervision and review of the public assistance programs administered by the department.

Program and Performance

This division consists of Divisional Administration, Bureau of Field Review, Bureau of Aid to Needy Children, Bureau of Aid to Needy Aged, and the Bureau of Aid to Needy Disabled.

The Bureau of Field Review performs the evaluation and planning of field reviews necessary for evaluating the performance of welfare administration in the counties. The Bureau of Aid to Needy Children develops and interprets rules and regulations and provides consultation for the Aid to Needy Children Program. The Bureau of Aid to Needy Aged interprets rules and regulations and provides consultation for the Aid to Needy Aged Programs. The Bureau of Aid to Needy Disabled is responsible for the administrative policies of the new program. Close surveillance is being given to assure that department policy is consistent with legislative intent. Consultation is provided to local agencies by each of the bureaus concerning their respective programs.

Two public assistance specialists will develop criteria and instructional material and will pass upon projects for community services for the aged and for reduction of dependency in aid to needy children.

GENERAL ANALYSIS

Objectives

To encourage and assist citizen participation and action to make it possible for senior citizens to live with security, dignity, self-respect and usefulness; and to advise the Governor on the problems of aging, are the responsibilities of this committee.

Program and Performance

The committee of 8 citizen members is appointed by the Governor and is augmented by 4 members of the Legislature, 2 from the Senate and 2 from the Assembly, appointed by their respective houses.

The committee is charged with the responsibility to study the problem of aging in California and to make recommendations to the Governor for needed action. Through its staff it provides consultation and guidance to the communities of California on the development of programs designed to meet the varied needs and problems of their older residents. Further, it receives as a result of this activity the expressions of community interest and concern regarding the needs and problems of aging persons which is helpful in the formulation of recommendations by the committee for the consideration of the Governor. The committee and its staff serve as a clearing house on activities in the field of aging at a state and local level. A library of books, periodicals, and pamphlets concerned with the field of aging is being developed. A newsletter is prepared to summarize the developments and programs in the field of gerontology and to give information regarding current activities at a state and local level in California.

The 1961-62 budget reflects an anticipated increase in community information services as the result of past Governor's Conference on Aging, White House Conference on Aging, and activities of the committee and its staff on a state and area level in California. An allocation from the Emergency Fund of $1,100 is provided in 1960-61 for temporary clerical services to handle increased workload resulting from the Governor's Conference on Aging and the White House Conference on Aging.

EXPENSES OF WHITE HOUSE COMMITTEE ON AGING

A grant of $15,000 was made by the Federal Government to finance activities in California prior to the White House Conference on Aging to be held in 1961. The funds may be used to conduct surveys of services to aged persons, for conducting conferences on aging at the state level or to pay expenses of delegates to the White House Conference in Washington, D.C. The federal grants are being used to conduct a survey of services to aged persons and to issue a report of findings of the survey. A position of Special Consultant was established from January to October 1960 to conduct the survey and prepare the report.

GENERAL ANALYSIS

Objectives

The Department of Veterans Affairs administers the State's program of veterans benefits and provides a claims and rights service to assist veterans in obtaining benefits to which they are entitled from the Federal Government.

Program and Performance

Programs administered by the department include the financing of farm and home purchases, educational assistance for veterans and veterans' dependents, and determination of eligibility for state benefits as well as preferences granted under civil service. The department also operates the Veterans Home and Woman's Relief Corps Home.

In addition, the department administers the subventions for county service officers through which certain counties are reimbursed for a portion of the cost incurred by these counties in providing services to veterans.

DIVISION OF DEPARTMENTAL ADMINISTRATION

GENERAL ANALYSIS

The administration division provides the functions of policy formulation and administrative direction to the other divisions of the department. The California Veterans Board, a policy-making body composed of 7 members appointed to 4-year terms by the Governor; the administrative head of the department; the assistant to the director; and functions common to all divisions, such as accounting and personnel; are included in this division.

General Activities

EDUCATIONAL ASSISTANCE DIVISION

GENERAL ANALYSIS

This division administers 2 programs of educational assistance, 1 for California veterans, the other for dependents of veterans who died or were totally disabled as a result of war service. Under both programs, the division provides educational counseling and assistance in securing admission to suitable institutions of learning. After acceptance into the program the students' grades are reviewed periodically and only those making satisfactory progress are continued.

Under the veterans' educational assistance program, California veterans are provided with tuition and fees plus a monthly maintenance and book allowance of $50 to a maximum of $1,000. Only veterans whose federal benefits are no longer available are eligible for this program. In addition, veterans must show a legitimate need for further training. The division discontinued accepting non-disabled World War II applicants July 25, 1959. For workload and costs of the program see Educational Assistance to Veterans, pages 626 and 627.

The veterans' dependents' education program provides an allowance of $20 monthly while attending high school and $50 monthly while attending schools above the high school level to qualified veterans' dependents. For workload and costs of this program see Educational Assistance to Veterans' Dependents, pages 626 and 627.

SERVICE AND CO-ORDINATION DIVISION

GENERAL ANALYSIS

The function of this division is to assist veterans and dependents of veterans in establishing rights to any privilege, preference, care, or compensation provided for by the laws of the United States or the State of California.

The headquarters and field service function provides for the determination of the eligibility of veterans to state benefits, including preference in civil service examinations. This function also provides advisory services to county service officers and performs a quarterly review of the service officers' activities. As of July 31, 1960, a total of 542,015 applications to establish California veterans eligibility had been approved and 138,861 veterans had established their eligibility for preference in civil service examinations.

This division provides assistance to veterans in presenting and pursuing claims which the veteran may have against the United States as a result of war service. Prior to January 1, 1960, this service was provided by various veterans organizations on a contractual service.

Two veterans representatives and seven clerical positions have been abolished in current and budget years since workload experience has fallen short of that anticipated. Related expenses have been reduced accordingly.

EDUCATIONAL ASSISTANCE

Educational Assistance to Veterans

This program, administered by the Educational Assistance Division pursuant to the provisions of Sections 981 to 981.8 of the Military and Veterans Code provides the opportunity for California veterans to continue their education. The total assistance is limited to $1,000 per California veteran. The subsistence is limited to $40 per month based on actual attendance in school, plus school books and supplies as are necessary, not to exceed a total of $50 per month. In addition, tuition costs are paid, provided the maximum of $1,000 per veteran is not exceeded.

Advanced professional and technical training which might otherwise be completely beyond the applicant's financial means is encouraged. While the low subsistence paid covers only a small part of the present-day cost of school attendance, it does serve as an incentive to continue in school and divert other income toward an educational goal.

Only applicants whose federal benefits are no longer available are accepted, therefore there is no duplication with federal educational programs. In addition, veterans must show a legitimate need for further training and demonstrate the ability to successfully pursue the educational course requested. Once in training, the student's grades are reviewed periodically and only those making satisfactory progress are continued. Division representatives also insure that the selected educational plans are financially sound. The veteran's entitlement is then budgeted as necessary. As a result of these policies, substantial savings are realized and the full $1,000 entitlement is seldom used, the average expenditure being approximately $500.

Processing of new applications from World War II veterans was terminated on July 25, 1959; however, an increase in enrollment of Korean veterans, together with an increase in tuition at most schools, has more than offset the elimination of new World War II applications.

The 1961-62 fiscal year is based on an estimated average enrollment of 7,000 veterans.

Educational Assistance to Veterans' Dependents

This program is administered by the Educational Assistance Division. By this program dependents of qualified veterans are given an opportunity to continue their education. The educational aid to widows and orphans is not limited as to the total benefit to each eligible; however, tuition payments may not exceed $480 per year on the basis of school attendance. Subsistence payments are limited to $50 per month for college students, and $20 per month for high school students. Eligibles between the ages of 14 and 21 may file for and receive assistance until the course is completed or until 27 years of age is reached, whichever occurs first. The minimum age was lowered from 16 to 14 by Chapter 1577, Statutes of 1959. Assistance to widows is limited to not more than 4 years duration. The new federal program of assistance to dependents has reduced the growth of this program, since the Department of Veterans Affairs requires that the federal program be used when available. Even with the federal benefit, continuation of the increased rate of enrollments experienced in recent years is expected. This is the result of a larger number of dependents becoming eligible each year due to the lower minimum age and higher birth rates during and since World War II.

Chapter 1744, Statutes of 1959, abolished the Veterans' Dependents' Educational Fund and placed its reserve and annual income of $300,000 from oil royalties into the General Fund, effective June 30, 1960.

The amount proposed for the 1961-62 fiscal year is based on an estimated average enrollment of 2,785 dependents.

---

[a] A utility enterprise fund, not included in overall budget totals.

VETERANS' CLAIMS AND RIGHTS SERVICE

Under the provisions of Section 699.5 of the Military and Veterans Code the State may assist veterans of any war of the United States and the dependent of every such veteran in presenting and pursuing claims. This assistance was provided by means of a contractual arrangement with the various veteran organizations until December 31, 1959. Beginning January 1, 1960, the activities have been performed by the Division of Service and Co-ordination.

GENERAL ANALYSIS

Objectives

The Veterans' Home of California was established to provide a home for qualified California veterans who have physical disabilities and need hospital, chronic, or domiciliary care which they are unable to provide for themselves.

Program and Performance

The home was founded in 1883 by the Grand Army of the Republic and the Associated Veterans of the Mexican War and was taken over by the State in 1897. As of July 31, 1960, there were 1,851 resident members, including 59 women veterans. The Federal Government acknowledges its responsibility for the veterans cared for by contributing $912.50 per year for the partial support of each member.

To be eligible for admission, a veteran must have been a resident of California for at least 10 years immediately prior to making application, and have honorable wartime service in the armed forces of the United States. He must have temporary or permanent disability to the extent that he is unable to follow a gainful occupation and be financially unable to provide for his hospitalization or domiciliary care. The home has no facilities for and does not accept veterans who are mentally ill, tubercular, chronically alcoholic, or addicted to narcotics or other drugs. Chapter 1825, Statutes 1959, authorizes the Department of Veterans Affairs to investigate the financial status of applicants and members to determine if the veteran is able to finance hospital or domiciliary care outside the home.

To carry out its medical program, the home's facilities include a fully accredited modern medical surgical hospital of 449 beds and a 26-bed receiving ward. This includes 1 unit of 55 beds for women veterans, a recreation center, and various specialized buildings, including some employee housing. The hospital staff has 20 full-time physicians, 103 graduate nurses, and 182 hospital aids.

Convalescent hospital cases and most chronic ambulatory patients are assigned to the convalescent barracks near the main hospital. Members placed here are normally able to take care of themselves, go to meals in their own dining room, and obtain medical care at the Domiciliary Medical Center.

Approximately 60 percent of the present membership live in the 8 domiciliary barracks on the reservation. Of these barracks, 7 are for male veterans and 1 is for women veterans.

The Veterans' Home offers broad possibilities for the rehabilitation of members along physical, occupational, vocational, social, and spiritual lines. Unless employed at the home or excused by the chief of medical services, all domiciliary members are required to perform work therapy duties.

---

[a] Balance reverted to General Fund in accordance with Chapter 1744, Statutes of 1959. Controller's transfer No. 6972, June 30, 1960.

[b] Federal grants and expenditures therefrom are not included in the overall budget totals.

GENERAL ANALYSIS

Objectives

The home provides custodial, medical, and nursing care for widows and dependent destitute unmarried daughters of Union Veterans who served honorably in the Civil War.

Program and Performance

Admissions to the home were closed in 1947 and effective May 1, 1954, the facilities were leased to private persons for the purpose of conducting a nursing home for the aged. Under the terms of a contractual arrangement between the Department of Veterans Affairs and the lessee, the remaining members will be cared for in accordance with standards of care and service prescribed by the department. An average population of 2 members is estimated for the 1960-61 and 1961-62 fiscal years. This budget reflects a decrease in average population of 2 members.

GENERAL ANALYSIS

Function

The department has responsibility for planning, constructing, and operating authorized state water projects; co-operates in water projects with federal and local government units; takes responsibility for averting, alleviating, or restoring damaged property during times of emergency resulting from storms and floods, and for declaring of an emergency from such causes; compiles basic data on water resources and water use; compiles data on diversions and stream flows on the Sacramento and San Joaquin Rivers and tributaries; performs maintenance work on the Sacramento River Flood Control Project; approves designs and supervises construction of all dams, except those federally owned, as regards their safety; supervises certain flood and storm damage repairs in which the State participates financially; supervises certain public water districts, reviews federal reports on flood control and water supply projects; administers state filings on water and provides watermaster service; makes investigations of surface and underground water supplies; makes water quality investigation; licenses artificial weather control experiments and operations; administers interstate compacts relating to water; administers the reallocation program to reimburse local agencies for their costs incurred by co-operation on federal flood control projects; represents the State on matters pertaining to the Central Valley Project; conducts engineering investigations for the California Districts Securities Commission; supervises construction of hydraulic structures for other state agencies; has responsibility for investigating and correcting beach erosion; and in co-operation with other agencies, forecasts snowmelt and other runoff.

Budget Format

The state operations budget for the department is presented on a program basis in order to provide information on the department's many projects, investigations, and activities.

---

[a] Expenditures from the California Water Fund in 1961-62, other than $25,000 from Item 254.1 Budget Act 1960, include only expenditures for activities which are defined within the purview of system facilities as provided in Chapter 1762/59. Pursuant to this definition expenditures for certain activities in the California Water Planning Program, Basic Data Program, and Other Projects and Activities have been transferred to the capital outlay budget and are financed from the California Water Fund in 1961-62. The program detail for these activities is included in the State Operations budget in order that the total program involving department staff and related operating expenses can be shown together.

[b] Includes $387,223 expenditures from the General Fund.

[c] Includes $34,318 expenditures from the General Fund.

[d] Includes $32,739 expenditures from the General Fund.

[e] Shown in other projects and activities, page 667.

[f] Expenditures from the General Fund.

DEPARTMENT OF WATER RESOURCES—Continued

PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS—Continued

Budgets are presented herein by eight major programs:

General Administration—the management of departmental activities;

Technical Co-ordination—departmentwide co-ordination of engineering, scientific, and technical specialties;

California Water Planning Program—study and analysis of the needs and development of recommendations for water development projects;

California Water Development Program—design and construction of authorized projects;

Basic Data Program—collection, recording, and analysis of data bearing upon the quantity, quality, and availability of water;

Operation and Maintenance—management of constructed facilities for which the department is responsible;

Services to Other Agencies—studies, investigations, and construction for other agencies conducted on a reimbursable basis; and

Other Project and Activities which includes certain statutory and regulatory activities, and other projects unrelated to, or not directly connected with, the major programs.

The organization budget, which presents the costs of the department in terms of positions, related operating expenses, and equipment, is shown in detail in the Appendix in the Water Resources Revolving Fund. In addition the department provides service to other agencies including other governmental levels which are completely reimbursed. The departmental costs less the reimbursed services are summarized in the following schedule.

	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Departmental Costs:			
Support	$9,543,204	$11,321,832	$10,285,360
Capital Outlay	7,290,110	10,413,252	13,155,413
Total Departmental Costs [a]	$16,833,314	$21,735,084	$23,440,773

GENERAL ADMINISTRATION

General Administration is the program involving direction and supervision of all departmental activities. This covers the area of management from the director and his staff, through the division chiefs and district engineer and their branch chiefs, to the section chief level or to the point where project management costs can be identified with the specific project.

The 1961-62 Budget provides for a departmental overhead charge to the various projects and activities to apportion the costs of the general administrative functions. A provision for the overhead charge has been made in the cost of each project and activity. An additional charge is shown for the California Water Development Program to finance the General Administration overhead structure as a result of additional administrative costs necessitated by construction and related activities. These additional charges will be made to Water Deveolpment Program and related projects financed from the California Water Fund. This will result in a two-part overhead charge with one rate to the General Fund activities and another to the California Water Fund activities.

Explanation of Program Emphasis

The increase in administrative costs in the budget year is attributable to the need for program review, scheduling, and estimating, in anticipation of full-scale activity in design, construction, and operation of the State Water Facilities. Direction of program policy and control is centered in the Executive Office. The Policy and Program Office, formed during 1959-60 has made a small staff of advisers in the engineering, financial, economic, recreation, and power fields immediately available to the Director. The Program Control function, activated on a small scale during the 1960-61 fiscal year, will assume full status during the budget year.

The Division of Administration is expected to increase its services and staff requirements as to department-wide growth and activity increases. Further analyses will be made to separate and transfer nonengineering activities from the engineering area to the appropriate management and service groups in the Division of Administration.

PROGRAM EXPENDITURES DETAIL	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
SUPPORT

DEPARTMENT OF WATER RESOURCES—Continued

PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

TECHNICAL CO-ORDINATION

The planning, design, and operation of water development projects require the skills of a number of engineering, scientific, and technical specialties, such as applied nuclear engineering, power planning, recreation planning, economic, land and water use, mapping and surveying, geology, delineation, machine operations, hydrology, meteorology, and water quality supervision.

The activities in this group represent the department-wide co-ordination of these specialties. Co-ordination includes functional supervision, and studies leading to the establishment of department policy concerning each specialty, provision of consulting services, preparation of reports, and determination of operating procedures.

PROGRAM EXPENDITURES DETAIL	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

BASIC DATA PROGRAM

The program of observing, collecting, analyzing, and reporting basic data is essential to water project development, flood control, and protection of water supply and its utilization. The department and other public agencies cannot accomplish their statutory and organizational directives without historical and current data concerning water supplies, water qualities, water uses, and water rights.

Basic data related to water are observed by many agencies, both public and private, with a scope and accuracy limited by their particular purposes. The department takes advantage of these limited data, and also gathers the additional data needed for the State's purposes of administration, planning, design, construction, and operation.

The basic data program is continuous. The water records of 1860 are being used with those of today.

---

DEPARTMENT OF WATER RESOURCES—Continued

PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

BASIC DATA PROGRAM—Continued

SURFACE WATER MONITORING

The objectives of this program are to secure continuous and reliable water quality data from a network of sampling stations representative of all major surface streams and lakes of the State; study and interpret chemical, physical, and radiological information collected to develop a comprehensive understanding of the factors which make up and alter the water quality at any station; by means of sampling, study, and interpretation, detect changes in water quality and alert the control agency (regional water pollution control boards, state and local health departments, or State Department of Fish and Game), when adverse quality changes are detected; and assemble and collate statistics from all sources for areas where water quality conditions are particularly critical.

Samples are collected monthly at monitoring stations located on the major streams and lakes of California. As soon as possible after collection, the results of water analyses and an appraisal of chemical water quality changes and their causes are published in a monthly report distributed to co-operators and other interested agencies.

The work program for 1961-62 will be a continuation of the 1960-61 program.

GROUND WATER QUALITY MONITORING

The objectives of this program are to secure continuous and reliable water quality information on ground waters; study and interpret chemical, physical, and radiological information collected to develop water quality parameters; and from sampling, study, and interpretation, detect changes in water quality and alert regulatory agencies when adverse quality changes are detected.

The work program for 1961-62 will consist of a continuation of the 1960-61 program.

INVESTIGATIONS OF FUTURE WATER QUALITY CONDITIONS

The objectives are: determination of the quality of water that would be developed by any water resources development facility, including not only the quality of water at its source, but also possible degradation while in transit to areas of use; appraise the suitability of the predicted quality of these water supplies for meeting the diverse requirements of the various uses anticipated; and delineate water quality problems which might arise as the result of operation of water resources development facilities, in areas of supply as well as in areas of use.

Estimates are made of water quality conditions which would exist under operation of proposed water development projects. Factors evaluated for these studies include geology, water utilization, drainage and waste disposal, and hydrology. These factors are utilized, together with proposed project operation schedules, to determine whether unfavorable quality conditions will result.

Quality changes occurring within the Sacramento-San Joaquin Delta and in the San Joaquin River Basin portion of the San Joaquin Valley will be studied. These studies will be directed toward the development of parameters for evaluating biological and biochemical conditions.

WATER QUALITY INVESTIGATIONS OF PROBLEM AREAS

The objective of this program is to determine the causes and sources of impairment to the quality of water in particular areas where water quality problems exist or are threatened, and recommend measures to remedy or prevent such conditions.

Quality conditions in the Livermore Valley, in Alameda County and oil fields in Kern County are included in this program during the 1960-61 fiscal year.

Areas to be included in the program for 1961-62 are Lassen and Modoc Counties; and Salinas Valley, Monterey County.

WASTE WATER RECLAMATION

The program objective is to evaluate the quantity and quality of wastes presently being discharged to tidal waters and inland streams to determine the feasibility of re-using waters reclaimed from such wastes to supplement available surface and ground water supplies.

During the 1961-62 fiscal year, the investigation entitled "Reclamation of Water from Wastes—July 1, 1959–June 30, 1961" will be completed and the report published. Data collection for the biennial waste water reclamation report for the period 1961-63 will be initiated. Sampling of irrigation return waters will be initiated during this fiscal year and will be incorporated in the biennial inventory program. It is estimated that about 72 major irrigation return flows will be sampled on a statewide basis for mineral, radiological, and sanitary analyses.

WELL STANDARDS INVESTIGATIONS

The program objective is to prepare recommendations for minimum standards of water well construction and sealing to form a basis for possible regulatory action by state or local agencies.

Particular areas are selected for study on the basis of requests or expressed interest of local agencies where improperly constructed or sealed water wells may be contributing to impairment of the quality of water in ground water reservoirs.

During 1961-62, several reports, covering well standards by counties, will be completed. When the reports are completed, field and office studies will be initiated for preparation of recommendations concerning water well construction and sealing standards for Shasta and Sutter-Yuba Counties.

SACRAMENTO RIVER WATER POLLUTION SURVEY

The principal objective of the Sacramento River Water Pollution Survey is to satisfy the requirements of the various agencies responsible for or interested in the field of water quality for a comprehensive picture of the many interrelated variables which influence water quality in the Sacramento River. The survey will provide the information necessary to establish suitable guides for use in maintaining adequate levels of water quality in the Sacramento River.

To supplement these general objectives, the Sacramento River Water Pollution Survey study will: (1) Obtain information regarding water quality and hydrologic factors influencing the waste assimilative capacity of the Sacramento River. (2) Determine present quality conditions. (3) Obtain detailed information regarding present sources of degradation, and their influence on water quality. (4) Establish a continuing monitoring program and point out areas where continuing studies may be required.

The water quality guides will become increasingly important because the river carries water from Northern California to the Delta for export to areas of deficiency. At the same time that the export demand increases, there will be an increasing need for waste disposal in the Sacramento River Basin with the development of more industries and larger communities in the area. Effective control and abatement of water pollution requires reliable records of sources of quality impairment. This program will provide this information.

During the course of this program, samples are being taken at frequent intervals from stations between the Shasta dam and the mouth where wastes are presently discharged into the river. Their mineral, biochemical and physical structure is being determined. Comprehensive biological and bottom-sediment studies are being conducted also.

During 1961-62 the department will complete evaluation of the data collected, co-ordinate reports submitted by the various participating agencies, and complete the final report.

DEPARTMENT OF WATER RESOURCES—Continued

LINE	PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

BASIC DATA PROGRAM—Continued

GROUND WATER MEASUREMENT

The objectives are the collection and processing of the depth-to-water measurements made in some 13,000 wells in Northern and Central California in co-operation with the U. S. Geological Survey, the U. S. Bureau of Reclamation, and local agencies; and to gradually extend water-level measurements and collection of other basic ground-water data to all significant ground-water basins in Central and Northern California. Data processing involves checking information before preparation of data cards, ground-water contour maps, monthly reports, and preparing an annual report.

Negotiations will continue in an effort to extend the co-operative well-measurement program to include additional counties and other local agencies. Monthly key-well observations will be gradually expanded and improved to include a better selection of wells and more ground-water basins and units. The assignment of state well numbers to wells on a department-wide basis, and the filing of water-well logs and water-quality analyses will continue.

SURFACE WATER FLOW MEASUREMENT

The program objective is to provide an inventory of data on surface water which will be readily available now and in the future for:

1. Forecasting of stream flows.
2. Planning of water development projects.
3. Operations of flood control and multipurpose projects.
4. Studying tidal action and encroachment of saline waters.
5. Formulation of agreements on water rights without extensive and expensive litigation, not only along streams in the Central Valley but also along all other streams of the State where future water development is being considered by the department.

To accomplish the above, the department operates about 270 gages to provide stream flow and stage data, makes measurements of use of water at approximately 1,500 points of diversion, gathers salinity samples at 40 points of observation in the delta and bay, and provides technical assistance to co-operating local agencies in the obtaining of records of stream flow and diversion.

The 1960-61 program reflected a reduction in program through a net reduction of about 10 gaging stations and reduced frequency of observation at many points of diversion. The level of activity for 1961-62 includes a further reduction since the concept of the surface water program is changing to emphasize hydrology needs of the department and reduce activities pertaining to individual water rights.

CO-OPERATIVE SNOW SURVEY

The snow survey provides as efficiently and accurately as possible sufficient data each year to forecast the spring and summer stream flow. The California Co-operative Snow Survey Program consists of regularly scheduled measurements at about 300 snow courses in mountainous areas of the State. Additional snow data are obtained from general area photographs, radioactive snow gages and photographs of aerial snow-depth markers. Co-operators in the California Co-operative Snow Survey Program assist in support of the program either with contributed funds or by participation in field work.

During the current fiscal year, all activities needed in the co-ordination of surveys, the maintenance program, the forecasting activities, and the publication of annual Water Conditions Reports are continuing as in preceding years. In addition, records from present snow-data collection programs in individual watersheds will be critically examined for adequacy of scope and timing; aerial snow-depth marker and snow cover reconnaissance programs will be studied; new forecast schemes will be completed for streams not presently being forecast; and existing forecast schemes will be reviewed.

During 1961-62, the continuing co-ordination, maintenance, forecasting, and publishing activities will be carried on. Also, various aspects of snow science will be investigated, including the effects of air temperature on snow melt, and the loss of water supply resulting from snow evaporation. A start will be made on devising schemes for forecasting minimum stream flow.

CLIMATOLOGIC DATA

The primary objective of the climatologic data program is to gather, correlate, and maintain reliable weather records for use by the department and other agencies. The program includes: the evaluation of the adequacy of current climatological data-collection program in California; the promotion of increased weather data collection in record-deficient areas through co-operating agencies and individuals; the preparation of current indexes to all climatological stations in and adjacent to California; and compilation and interpretation of weather information. As part of the program, the State assists the United States Weather Bureau in its California data collection activities.

During 1960-61, records of climatological data are being processed, and attention is being given to increasing the accessibility of the data. The job of collection, reviewing, and editing all evaporation records in California is being continued with the aim of completing the work this year.

During 1961-62, in addition to the continuing data-processing activities, work on special studies, such as a study of the effects of weather on recreation and construction, will be carried on.

VEGETATIVE WATER USE STUDIES

Vegetative water use studies are divided into 3 phases. One phase is to determine or measure unit water use by irrigated and non-irrigated crops in the San Joaquin Valley and in the northeastern counties. These water use data are correlated with evaporation and other agroclimatic data collected at the measurement sites so that these unit values of water use may be extended to other agroclimatic zones throughout the State. A second phase is the measurement of evaporation and other agroclimatic factors throughout the State for the purpose of subdividing the State into agroclimatic zones having similar water use. The third phase is the collection of data regarding irrigation practices and efficiencies under various conditions. The 1961-62 program will be a continuation of the present program level.

URBAN-RELATED WATER USE STUDIES

The objective of the program authorized by Chapter 2090, Statutes of 1959, is to determine unit values of water use by various urban, industrial, and recreational demands throughout the entire State, subdivided by appropriate area, type of user, and function. Past and present unit values of water use must be known as a basis for determining future needs. The study of urban-related water use involves the definition and delimiting of pertinent items, the collection of data on the numerous groups of water users, the analysis of this data, and the assembly and presentation of the collected data in utilitarian form.

For the 1961-62 fiscal year, collection of data on various urban-related water uses will continue. Based on data presently being collected, two reports entitled "Register of California Water Service Agencies" and "Water Use by the California Manufacturing Industry" are planned for publication.

LINE	PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

BASIC DATA PROGRAM—Continued

MAP INFORMATION OFFICE

The purpose of this function will be to establish a central agency to collect, review and disseminate information of mapping and surveying activities throughout the State. This activity will also provide better co-ordination between state mapping and surveying agencies. Channels will be provided for exchange of all survey and map data which will minimize duplication and make the data available to all public and private agencies.

FEATHER RIVER TRIAL DISTRIBUTION

The objectives of this program are: to obtain factual data regarding entitlements to the use of water by local water users along the Feather River; to conduct negotiations with these users, in co-operation with the department's Policy and Program Office, regarding the probable extent of these rights, and to provide a supplemental water supply under contract from the Feather River Project. The fulfillment of these objectives will protect the interests of both the local water users and the State.

During the 1961-62 fiscal year, it is anticipated that negotiations between the State and the local water users will continue. The staff of the Trial Distribution Unit will continue to assist in these proceedings by making such special studies pertaining to water right assumptions as may be required. It is anticipated that negotiations will be completed by June 1962.

BASIC HYDROLOGIC DATA COLLECTION—SOUTHERN CALIFORNIA

The objectives of the basic hydrologic data collection activity are to compile timely, adequate, and accurate hydrologic information for use in the investigation, planning, and design of water resources developments in the Southern California District.

During 1960-61 the program to adapt basic ground water data in the department's files to the State Well Numbering System will be continued to the greatest possible degree in order that all the basic hydrologic data can be processed by machines and also used for calculations by electronic computers. The program to convert historical data to machine language will be continued with emphasis placed upon the San Gabriel and Coachella Valleys in anticipation of investigations in these areas.

During the 1961-62 fiscal year, the program of collection, maintenance and publication of basic hydrologic data will be continued at approximately the 1960-61 level. However, efforts will be continued to expand data collected from co-operating local agencies in San Luis Obispo and San Diego Counties, and the inland desert areas. In addition it is probable that there will be some increase in the amount of data collected from specified areas in connection with aqueduct design.

LAND AND WATER USE STUDIES—SOUTHERN CALIFORNIA DISTRICT

Detailed knowledge of the various uses of the land in combination with the unit values of water requirement associated with the land use provide one of the most accurate and convenient means for establishing the historical and present uses of water, and trends derived therefrom provide a means for projecting future needs.

During 1960-61 it is expected that final reports will be completed on the Desert Area Land and Water Use Survey and the San Diego County Land and Water Use Survey, and the San Luis Obispo and Santa Barbara Counties Land and Water Use Survey, were conducted during the 1959-60 fiscal year.

During the summer and fall of 1961, it is planned to conduct a field survey to derive land use in Ventura County, northern Los Angeles County, and the Colorado Desert Area. Supplemental surveys of multiple crop areas, particularly in Ventura County and in Antelope Valley, will be conducted in October, 1961, and January and April of 1962.

It is planned to complete the report of the Coastal Los Angeles County survey during the 1961-62 fiscal year, and to complete the preliminary work necessary to a resurvey of Orange County and the Upper Santa Ana River Valley.

UNIT WATER USE STUDIES—SOUTHERN CALIFORNIA DISTRICT

The objective of the program is to develop new and improved unit values of applied and consumptive water use for the various types of urban development and agricultural crops as a basis for a more reliable analysis of the disposition of water supplies and consequently their effect on present and projected needs for water. This program which relates to activities in the district office is part of a statewide study and all activities are co-ordinated with a similar program being carried on in Northern California.

During fiscal year 1960-61, the urban phase of this activity will include receipt, review, and analysis of the information derived from industrial water use questionnaire, and the selection of industries for followup interview.

The activity during the 1961-62 year will continue at approximately the level reached during the latter part of the 1960-61 fiscal year. Observation and analysis of field data will continue at the study areas in San Luis Obispo, Santa Barbara, and San Diego Counties.

Studies of residential and commercial use will be continued with installation of instrumentation and observation of field data at additional locations and the analysis of data collected from installations observed during the 1960-61 fiscal year.

WATER QUALITY MONITORING—SOUTHERN CALIFORNIA DISTRICT

The objective of this program is to maintain records of current mineral quality of surface and ground water supplies by periodic surveillance and evaluation to recognize impairment of that quality. Early recognition of quality impairment is the first necessary step in the control of water quality and sources of pollution. A further objective of this water quality program is to provide the basic data essential to long range planning for water supply developments and particularly for the planned operation of ground water reservoirs.

The 1961-62 program will be a continuation of the 1960-61 program, and the magnitude of the monitoring program will remain the same. An effort will again be made to concentrate the monitoring in areas of known quality impairment and areas where development is creating new threats of impairment. Evaluation of the monitoring programs will continue so that the maximum use of new methods of analysis can be effected.

DEPARTMENT OF WATER RESOURCES—Continued

LINE	PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

BASIC DATA PROGRAM—Continued

WATER QUALITY INVESTIGATIONS—SOUTHERN CALIFORNIA DISTRICT

The objectives of the water quality investigations are to study the water quality problems of local areas, study the problems of salt balance in ground water basins, and to investigate the water quality changes that may be expected under future conditions. In addition, these investigations will provide a basis for the formulation of sound engineering plans for the comprehensive development of the local water resources of Southern California and the storage and distribution of imported water supplies.

During 1960-61 emphasis will be placed on studies of salt balance in ground water basins. In this study the distribution of mineral salts in a typical ground water basin where good historical data are available will be analyzed and the effect of imported water and waste waters on the ground water quality will be investigated. It is anticipated that this study will take two years to complete.

During the 1961-62 fiscal year the water quality investigations will continue at about the same level as in 1960-61.

The special investigations of areas of acute water quality problems will be carried out as required. The general investigations of the water quality problems in the San Diego Region will be completed and field work will be initiated for a similar study in Orange County.

WASTE WATER RECLAMATION—SOUTHERN CALIFORNIA DISTRICT

The purpose of this program is to collect the necessary data on quantity and quality of waste discharges and to conduct studies determining the feasibility of reclaiming water for beneficial purposes from such sources. The report on the feasibility of reclamation of water from wastes in the Los Angeles Metropolitan Area is scheduled for completion in 1960-61.

During the 1961-62 fiscal year the activity will be expanded to keep pace with the constantly increasing discharges of waste water. The collection of essential information concerning the quantity and quality of waste discharges will also be increased. The collection and evaluation of data on the small scale planned reclamation projects in Southern California will be continued.

It is expected that the report on feasibility of reclamation of wastes in the San Diego Metropolitan Area will be completed during this fiscal year.

Planning will be initiated during fiscal year 1961-62 on an investigation to differentiate the sewage and industrial wastes in the Upper Santa Ana River Valley which can be reclaimed from those which should be exported. This investigation will be co-ordinated with the several counties and major industries producing industrial wastes.

WELL STANDARDS INVESTIGATION—SOUTHERN CALIFORNIA DISTRICT

The objectives of this program are to prepare recommendations for minimum standards of water well construction and abandonment to form a basis for legislation by state or local agencies. These recommendations, to be appropriate for each particular area must be based upon the geology and hydrology of the area.

The report on "Recommended Water Well Practices for the Protection of Ground Water Quality in West Coast Basin, Los Angeles County" will be completed during the 1960-61 fiscal year.

During the year field and office work will be prosecuted toward a recommended well standards report on the Central Basin of Los Angeles County.

During the 1961-62 fiscal year, the report on recommended well standards in the Central Basin of Los Angeles County will be completed. Additional work on this program will be devoted to field and office work leading to the production of a report on recommended water well standards for the Oxnard Plain Basin of Ventura County.

PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

CALIFORNIA WATER PLANNING PROGRAM

The California Water Planning Program is an intensive and continuing program of study of the needs for specific local and statewide water development projects, analysis of their economic justification and financial feasibility, where appropriate, and determination of the recommended priority of their construction, using the California Water Plan as a general guide. Such a program is necessary to enable the planning and construction endeavor to keep pace with the needs of a rapidly growing state. The population of the State is increasing at a rate exceeding 500,000 persons per year. This increase demands the development of new sustaining supplies of water at the rate of some 750,000 acre-feet per year.

The California Water Planning Program is of necessity a long-range program, wherein works will be recommended for construction when and as they are needed.

MAJOR PROJECTS

North Coastal Development

Projections of water demand in California based on probable growth of population, irrigated agriculture, and industry indicate that increasing large supplies of water will be required in the future. Current studies and studies made for the California Water Plan indicate that the rivers of the North Coastal Area will afford the most promising source of these future supplies.

The long-range objective of this investigation is the formulation of sound, acceptable and practical plans for development of the water resources of the North Coastal Area to meet anticipated needs in local areas and in deficient areas of the State; preserve, or possibly enhance the anadromous fisheries of the area; develop the hydroelectric power and recreational potential; and provide protection against recurring floods. In order to carry on this program reliable basic information in all of the fields related to water development must be obtained and evaluated.

The program of investigation embraces virtually all aspects of development, control, and conveyance of water, with studies ranging from cursory examination to careful detail as projects and features are crystallized. While much of the investigational work in progress has general application to the rivers of the North Coastal Area as a whole, the 1961-62 work program will also be directed towards preliminary selection of the most favorable initial export projects. They may include, but are not limited to, possible reservoirs on the Upper Main Stem of the Eel River in the vicinity of English Ridge; the Middle Fork of the Eel River above Dos Rios, and the upper Trinity River at Helena. Studies in this category also include a possible off-stream storage reservoir on the west side of the Sacramento Valley on Stony and Thomes Creeks which could conserve water imported by gravity from the Middle Fork Eel River and possibly the upper Trinity River. A similar study involving the enlargement of Monticello Reservoir for storage of water imported from the Eel River by way of Clear Lake is also contemplated.

Upper Sacramento River Basin Development

The need for a comprehensive basin-wide investigation of water resources within this 2,600-square mile portion of the Sacramento River watershed has been manifest for many years. Runoff is virtually uncontrolled at present and approximates that of the entire American River Drainage Basin. Possible works of the area are also closely related to future imports from the Trinity and Klamath Rivers.

The objective of the investigation is twofold: to analyze prospective storage reservoirs on tributaries to the Sacramento River, agricultural service areas which may be dependent upon these sources for supply, and alternative measures to provide water supplies for these lands; and, to complete studies in all necessary categories for the formulation of plans and solutions

---

[a] Surface Water Flow Measurement combines Stream Gaging Operation and Maintenance, Sacramento-San Joaquin Water Supervision, and Sacramento River Trial Distribution.

[b] Included in the amount for Services to Other Agencies in the Summary.

[c] Amount for contribution to State Employees' Retirement Fund included in the program cost for 1961-62.

DEPARTMENT OF WATER RESOURCES—Continued

LINE	PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

CALIFORNIA WATER PLANNING PROGRAM—Continued

MAJOR PROJECTS—Continued

Upper Sacramento River Basin Development—Continued

to problems relative to the potential future development of a storage reservoir on main stem of the Sacramento River at the Iron Canyon site.

The area of investigation comprises the drainage basins of the Upper Sacramento River between Shasta Dam and Red Bluff, and of Thomes Creek. Also included are possible service areas on the Sacramento Valley floor, dependent upon these sources for water supplies.

The investigation encompasses virtually all aspects of water development, utilization, and control.

The work program for fiscal year 1961-62 will be directed toward the completion of studies necessary for the formulation of the economically optimum comprehensive basin-wide plan. Preliminary determination will be made of development sequence and scale for each new project unit in the overall construction program to be recommended. Preliminary studies of cost allocation and repayment schedules will be initiated, using approximate methods where possible to indicate the financial integration of the development program. Integrated operational studies of project units within the Upper Sacramento Basin for various anticipated development levels will be co-ordinated with existing and proposed developments in the Central Valley and with North Coast import plans.

A final report covering the prospective tributary stream reservoirs will be completed, and an interim report covering information developed to date for the Iron Canyon Project will be prepared. Insofar as it is affected by possible future north Coastal imports, the final report on the Iron Canyon Project must necessarily be deferred and co-ordinated with the North Coastal studies.

Yuba and Bear River Development

The original objective of the investigation contemplated an intensive program of several years' duration, directed towards formulation of plans for comprehensive and orderly development of the Yuba and Bear Rivers, and conforming essentially with feasibility investigational standards. Without reducing the geographical scope of the investigation, these high level investigational standards have since been reduced, first in 1959 to conform with intermediate investigational standards, and again in 1960 to provide reliable general guidance for any agency concerned with water development in the investigational area. The changed level of intensity of the studies will make it possible to complete the investigation at an earlier date than would otherwise be possible, without impairing the usefulness of the report for guidance purposes and as a basis for the resolution of conflicting development proposals. The investigation will also establish the potential for construction of additional state water facilities on the Yuba River as originally contemplated.

Tentatively, the initial project may consist of two large storage reservoirs—one near Bullards Bar on North Yuba River, and the other between Daguerre Point and Parks Bar Bridge on the lower river. Full consideration is also being given to the associated power, fisheries, and recreational aspects of the initial project.

Fiscal year 1961-62 will be the final year of investigation under the modified study program. Much of the major effort during fiscal year 1961-62 will be devoted to preparation of the report of investigation and appropriate appendices relating thereto. Minor field work and some refinement of the development plans is anticipated. Considerable effort will be devoted to further study of the operational aspects of the projects, particularly as they may affect the water supplies available at the Delta.

CALIFORNIA AQUEDUCT STUDIES

Salinity Control Barrier Investigation *(Capital Outlay)*

The Salinity Control Barrier Investigation was initiated in 1953 pursuant to the Abshire-Kelly Salinity Control Barrier Act of 1953, and continued under subsequent acts 1955, 1957, and 1959. In 1959 authorization and funds were provided for construction of levee test sections in the Delta and for an investigation of the water requirements and plans for service in the western Delta area. The basic studies for western Delta investigation will be completed in fiscal year 1960-61. Work on the levee test sections will continue in 1961-62.

Advanced planning studies of Delta problems and the Delta Water Project are required to:

1. Confirm and refine certain design and operational criteria.
2. Define more adequately existing physical conditions in order to demonstrate conclusively the effect of future project operation.
3. Evaluate minor revisions to the comprehensive plan, as needed, in preliminary negotiations for construction and operation of the facilities.

The investigational area embraces the Sacramento-San Joaquin Delta in Contra Costa, Sacramento, San Joaquin, and Solano Counties.

Advanced planning studies needed for the operation of the Delta Water Project and negotiation of operation standards and allocation of cost, must continue for several years. It will be necessary to maintain a planning staff dealing specifically with Delta water problems until the Delta Water Project is in full operation.

The continuous measurement of outflow from the Delta will be continued during the summer and early fall of 1961. Some current meters will be relocated to other Delta channels to obtain more precise estimates of the net flow in such channels. Limited field studies with tracer materials will be made to refine flow distribution. The 4 chlorinity stations in the western Delta channels and the electronic analog will be continued in operation. Analyses of the data will include salinity intrusion relationships, depletion of water in the Delta and net flow patterns.

Collection of data from key instruments in the levee test sections will be continued in conjunction with seismic experimentation to refine levee design and improve knowledge of physical conditions in the Delta. Refinement of the master levee design and cost estimates and development of construction criteria will be undertaken.

Assistance will be provided for negotiations with the Bureau of Reclamation regarding operation of water development facilities in the Central Valley.

Co-operation with the Corps of Engineers will be maintained in an anticipated study by the corps of flood control benefits of the Delta Water Project. Preliminary negotiations will be made concurrently with local interests for repayment of flood control costs in proportion to local benefits.

Water Requirements and Project Staging

This program will provide knowledge of the development potential and probable rate of growth of California, the associated need for water resources development, the most favorable sequence, timing, and formulation of projects to meet anticipated needs, and the long-range funding requirements for water resources development.

Studies under this program have been conducted to date as 3 separate programs known as Staging and Programming, Central Valley Operations, and Inventory of Water Resources and Requirements, with the former concentrating generally in the San Joaquin Valley and the latter in the North Coastal area and, in part, the Sacramento Valley. During 1960-61, the 3 programs will be carefully co-ordinated as the Sacramento Valley becomes the focal point of the 3 studies. In 1961-62, the 3 programs will be combined into 1 study under the title of Water Requirements and Project Staging Program.

This is a long-range program designed to provide basic data for and guidance to the planning, construction, and operation activities of the department, and to agencies and individuals concerned with water development in California.

During 1961-62 hydrologic analyses, evaluation of the cost and extent of local water supply facilities, layout of additional distribution facilities as such facilities affect the cost of imported

CALIFORNIA WATER PLANNING PROGRAM—Continued

CALIFORNIA AQUEDUCT STUDIES—Continued

Water Requirements and Project Staging—Continued

water supplies, and projection of future cropping patterns will be completed for the San Joaquin Valley floor area. The program of collection of essential basic data will be continued in the Sacramento Valley floor.

The interim depletion study will continue with development of costs of local surface and ground water supplies and distribution systems, determination of cropping patterns, and evaluation repayment capacities on a basin by basin approach.

Work will be continued on the North Coastal Area report. Reports on land and water use will be completed on the Russian River, Mattole River-Mendocino Coast, and the Lost River-Butte Valley Hydrographic Units. Field work will be concluded in Putah-Cache Creeks and American River Hydrographic Units. Field work on reports will be initiated in Feather River, Sacramento Valley Northeast, and Shasta Lake Hydrographic Units.

Sacramento Valley Seepage Investigation

The Sacramento Valley Seepage Investigation has as its objectives the evaluation of existing and probable future damage resulting from seepage along leveed watercourses in the Sacramento River Basin, and formulation of comprehensive plans to resolve both existing and anticipated future seepage problems. Evaluation of existing damage and estimation of future damage adjacent to rivers and bypasses in the basin will provide a basis for determining the authenticity of claims of damage against the State due to project operations. It will also serve as a foundation for determination of the economic justification of seepage control works, and for cost allocation of such works to local interests, to the Central Valley Project, and to the Feather River Project and subsequent state water developments.

During the first two years of this study, surveys of river stages and seepage damages, including effects of seepage on crop yields, were carried out. In addition, geologic investigations of specific seepage problem areas were undertaken.

Fiscal year 1961-62 will constitute the third year of investigation. Previous investigational activities will be continued. In addition to these, a study of the physical flow of seepage and the effect of possible alleviation methods thereon will be undertaken for each specific study area, using an electric analogy model.

The effectiveness, cost, and benefits of various seepage control measures will be evaluated for each study area, and results applied to other portions of the basin with similar characteristics.

The progress report which is tentatively scheduled for publication March 1962 will be prepared.

San Joaquin Valley Drainage Investigation *(Capital Outlay)*

The objectives of this program are to formulate a comprehensive drainage plan for the entire valley, and to develop specific initial projects to the point of legislative authorization where economic justification and financial feasibility can be shown.

The program of investigation consists of a determination of the potential drainage disposal requirement of each of the various subdivisions of the valley, an evaluation of the benefits and detriments to be derived from provision of a master drain, and, finally, the design of the physical features required.

The primary function of the master drainage system is conceived to be the prevention of a rise in the salinity above an acceptable level in the water supply of the San Joaquin Valley.

Economic studies will be made to evaluate revenue from agricultural and other enterprises during the proposed project repayment period, both without the drain in operation and with various plans in effect, as a means of measuring the benefits.

Finally, preliminary designs and estimates of costs for alternative locations and systems of conduits will be compared in order to select the most economic solution to the problem, and the initial facilities selected will be designed in sufficient detail to provide a basis for a request for funds for their subsequent construction.

During fiscal year 1961-62, the collection of data relating to determination of drainage needs will be completed and the final location and sizing of the entire drainage conduit will be well advanced. Particular consideration will be given to the effects of biochemical and bacteriological considerations on the design of the conduit and on the selection of a disposal point. Studies to establish methods of financing and cost recovery will be essentially completed during the year, and detailed cost allocation studies will be initiated. This investigation is scheduled for completion in June 1963.

Delta and Suisun Bay Pollution Investigation

The necessity of a comprehensive investigation of the potential pollution problems in the western Delta channels and Suisun Bay stems from planning studies for Delta improvement features of the State Water Facilities, the necessity of determining the location of the terminus of the San Joaquin Valley Master Drain, forecasts of extensive future industrial waste discharges in the area, and frequent requests from water pollution control boards for advice and comments regarding waste discharges.

A comprehensive study of the potential water pollution problem in the channels of the western Delta and upper San Francisco Bay system will require at least three years. The two main phases of the investigation will consist of:

1. Evaluation of the hydraulic characteristics of the channels under various conditions of outflow and tides.
2. Evaluation of the waste assimilation characteristics of the channel system, the present and future waste discharges, and the effects of such wastes. Projections of future conditions will be initiated during the third year.

Studies of the hydraulic characteristics of the Delta channels and Suisun Bay will involve preliminary field surveys during 1961-62. A tracer material will be injected into the channels under various conditions of flow and tides, and its lateral and vertical distribution will be followed with instrumented boats.

These studies will provide data for outlining subsequent extensive field surveys.

Studies of waste assimilation will involve collection and analyses of available data and formation of a definite program of field studies for subsequent years.

Central Coastal Area Basic Planning Studies

In conjunction with the Salinity Control Barrier Investigations, the Legislature directed that a comprehensive study be made of water supplies for the San Francisco Bay counties. A general plan for water service was developed. Localized problems within the area now warrant further study and any major changes in plans for scope of water service from State Water Facilities involve responsibility to evaluate alternative water supply plans.

The objective of the program is to gather data and make investigations of the most urgent water supply and related problems in the central coastal area. Almost all segments of this portion of the State are rapidly developing and studies which have been deferred must be undertaken to ensure prudent development of water supplies which will be in the best interest of the State.

Decisions regarding the most urgent of the several water supply problems will be made at the beginning of fiscal year 1961-62, since the specific program will be dependent upon studies and local water development programs during fiscal year 1960-61.

Completion dates for studies of localized problems will be dependent upon the nature of the specific problems. In general, most studies will be completed in not more than 2 years.

Studies of water supply problems will include population and urban land use projections and irrigated land use projections. Analyses will be made of the yield of surface and ground water supplies. Existing data and previous studies will be basic to these analyses in the early phases of the study of a particular problem. Geologic investigations, primarily surface mapping, will be accomplished for sites of water supply facilities. Consideration will be given to recreation use and to fish and wildlife in plans for development. Economic analyses will be made of the benefits of water development projects and the financial feasibility thereof.

LINE	PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	

CALIFORNIA WATER PLANNING PROGRAM—Continued

LOCAL PROJECTS

The basic and broad objective of this program is to disseminate information pertinent to the solution of local water development problems. Co-ordination and integration of the activities of federal and local agencies is an integral part of this program.

Specific objectivities are to investigate and formulate plans for development so that downstream areas can proceed with needed conservation and flood control works without jeopardizing the potential for growth in areas of origin; conduct, on a continuing basis as need arises and funds become available, comprehensive investigations throughout the State on a basin by basin approach to formulate plans to maximize benefits from local water resources development; and, provide a service in the administration of the Davis-Grunsky Act by reviewing plans for proposed projects submitted by agencies requesting state loans and grants, and to evaluate such plans as to conformance with the principles and objectives of The California Water Plan.

Each special investigation will be undertaken on an individual basis. A report will be published on each following its completion.

During the current fiscal year, the review and editing and the printing of reports on the Upper Feather River Basin, Shasta County, Upper Pit River Basin, Shasta Valley, Upper Tule River, Branscomb Project, and Alameda County investigations will be completed. Preliminary edition of reports on Clear Lake-Cache Creek Basin and Tuolumne County will be issued.

During 1961-62, reports will be edited and released on Mokelumne-Calaveras-Stanislaus River Basins, Mariposa Area, Northeastern Counties Ground Water, Colusa Basin, and Putah Creek.

The Madera Area Investigation will continue as the second year of a 3-year project. Technical assistance will be provided to aid in the administration of the Davis-Grunsky Act. An investigation of the East Side Sacramento Valley Stream Group will be initiated. It will include a study of water problems and water needs of areas served by stream basins in Butte and Tehama Counties. The investigation is programed to be completed in 3 years.

The Box Canyon Investigation will continue as the second year of a 2-year project. The report will be completed and released in 1961-62.

SOUTHERN CALIFORNIA DISTRICT

Sea-Water Intrusion Studies—Southern California District

This program is designed to secure geologic, hydrologic and water quality data essential for the detection and reporting on the extent and rate of sea-water intrusion and to formulate plans to halt and control sea-water intrusion. The 1961-62 fiscal year work program will continue at about the same level as in 1960-61 with collection, analysis, and evaluation of water quality, geologic, and hydrologic data from areas of sea-water intrusion.

Ground Water Basin Studies—Southern California District

The objective of this investigation is to comprehensively study the major ground water basins of Southern California in order to formulate a plan of operation that will permit the maximum utilization of these ground water basins.

The hydrology studies of the Los Angeles County Coastal Plain will be completed in 1960-61.

The geologic studies of the San Gabriel Valley ground water basin will be completed and hydrology studies of the area will be undertaken.

During 1961-62 the comprehensive report on the investigation of the planned utilization of the ground water basins in the Los Angeles County Coastal Plain will be completed.

Also during 1961-62 the interim report on the hydrology of the San Gabriel Valley will be completed and the operational studies commenced. An interim report on the geology of the Orange County Coastal Plain will be prepared.

The geologic investigation of the Chino Basin will begin in 1961-62. The 1961-62 program will continue at about the same level as the 1960-61 program.

Hydrologic Studies—Southern California District

The objectives of this program are to provide the interpretation and analysis of the basic hydrologic and related data needed to establish and facilitate methods and procedures for use in the district's investigation of the water resources of Southern California. During 1960-61 special emphasis will be placed on developing criteria for conjunctive operation of ground water basins of Southern California with both local and imported supplies.

The activity during the 1961-62 fiscal year will continue approximately at the same level as 1960-61. Work will be continued in developing criteria for conjunctive operation of ground water basins in Southern California with emphasis on special or localized basins.

Specialized studies of the hydrology of the San Gabriel Valley will be completed and similar studies will be initiated for the Orange County Coastal Plain.

OTHER INVESTIGATIONS

Water Resources Planning—Coachella Valley Investigation

The basic objective of this program is to provide complete and detailed information on water resources and plans for water resources development to assist local areas in understanding and solving their water problems.

This is a continuing program with individual investigations commenced as requested and funded.

During 1960-61 an investigation of the surface and ground water resources of the Coachella Valley was begun. This is a 2-year co-operative investigation with the Coachella County Water District.

For 1961-62, work on the Coachella Valley investigation will be concentrated on the hydrologic studies which will involve a comprehensive water inventory of the area. Analysis of this information will permit the determination of the replenishment of the area by local and imported water supplies and the relationship of ground water levels to the amount of ground water in storage. Water quality and operational studies will be made. A final report on the investigation will be prepared by the end of the 1961-62 fiscal year.

Flood Plain Zoning Study

As the sprawling urban centers throughout the State increase in population and economic value a more intensive effort is needed toward the solution of flood problems. Work under this program will be directed toward the development of knowledge and criteria for controlling encroachment of development upon the flood plains of the State, and for providing guidance to local and federal agencies in planning and staging flood control works. This program extends and consolidates the department's past efforts in this field.

The program will be initiated on July 1, 1961, and will be of a continuing nature. Reports will be issued from time to time as needed to assist in the solution of specific problems.

The work program for the 1961-62 fiscal year will consist of the initiation of an inventory of the areas of encroachment of development on flood plains of the State, consideration of problems involved in control of this encroachment, and a study of economic factors related to flood plain zoning, or alternative methods of encroachment control. Effort also will be directed toward identifying areas of greatest need.

DEPARTMENT OF WATER RESOURCES—Continued

PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

CALIFORNIA WATER PLANNING PROGRAM—Continued

OTHER INVESTIGATIONS—Continued

Planning Manual Program

In order to insure that water projects in all of their aspects are formulated on a common and rational basis, there is need to standardize, insofar as possible, basic planning criteria and methods of approach to proper planning.

The objective of this new program will be the preparation of a comprehensive manual covering all aspects of water project formulation. When completed, it is anticipated that the manual can serve the purposes of general guidance throughout the department and the planning engineer in particular, on matters associated with water project formulation. The manual will establish uniform, but necessarily flexible, guidance and procedures for the conduct of an investigation and the preparation of reports thereon.

The work program for 1961-62 will consist of collecting all available data on the subject of planning manuals, the preparation of an outline or table of contents, and the initiation of introductory chapters.

PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

CALIFORNIA WATER DEVELOPMENT PROGRAM

The California Water Development Program consists of the detailed design and implementation of the State Water Facilities as defined in Chapter 1762, Statutes of 1959 [Water Code Section 12934(d)]. The facilities, which are the initial features of the California Water Resources Development System, are incorporated in the following projects:

Feather River Project
South Bay Aqueduct Project
San Joaquin Valley-Southern California Aqueduct Project
San Joaquin Valley Drainage Project
North Bay Aqueduct Project
Delta Water Project

The detailed design and implementation of these projects, with the exception of the San Joaquin Valley Drainage Project, will be in progress in fiscal year 1961-62.

The proposed schedule of accomplishment of the 3 major work categories, design, right-of-way acquisition and construction, for the current California Water Development Program is presented for fiscal years 1960-61 through 1963-64 as part of the explanation of each project. These schedules are based on the best current estimates of project emphasis and production potential. Accordingly, the schedules show the time relationship between the major work categories for the four fiscal years ending 1963-64. This does not imply that the work shown extending into 1963-64 will be completed by that year.

The following definitions of the work categories that are used to present the California Water Development Program in the budget are provided to give a general understanding of the significant elements of the program.

Design:

The design category is made up of 2 phases, preliminary design and final design.

Preliminary Design—Preliminary design is the initial step in the design activity—the purpose being to perform detailed surveys and explorations to finalize hydraulic design, establish structure location and alignment, and define the limits of right-of-way requirements.

Final Design—Upon completion of preliminary design, the project moves to the final design phase, which includes:

1. Detailed design, which is the engineering studies and computations necessary for the proper selection and precise delineation of each element of the project;
2. Construction plans, which are the detailed drawings of each element of the project from which the works are constructed;
3. Specifications, which are the required legal and technical provisions necessary for the clear understanding of the type and quality of materials to be incorporated in the work, and the workmanship required to provide the finished structure as delineated in the plans;
4. Construction cost estimate, which is the engineering cost estimate for the project and is the basis upon which the director authorizes advertisement for bids and award of a construction contract.

DEPARTMENT OF WATER RESOURCES—Continued

PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

CALIFORNIA WATER DEVELOPMENT PROGRAM—Continued

Right-of-way Acquisition:

The phases of the right-of-way function to be performed by the Department of Water Resources' personnel include right-of-way engineering, utility relocations, permits from public agencies, management of acquired properties, and clearance of improvements prior to construction. The appraisal, negotiation for purchase and scheduling of payment for all acquisitions of private property, except condemnation judgments, are being handled by Right-of-way Department of the Division of Highways on a contract basis subject to the review and approval of the Department of Water Resources.

The co-ordination and liaison of the right-of-way activities between the Division of Highways, the Department of Water Resources and, in eminent domain proceedings, the Attorney General's office, will be handled by the right-of-way liaison personnel of the Department of Water Resources. The Department of Water Resources liaison personnel will review and approve appraisals and settlements. They will also certify that rights-of-way are available prior to calling for construction bids.

The Right-of-way Engineering Section will prepare maps, legal descriptions and acquisition documents. Relocations of public and private utility facilities will be done by the Relocation Section. Certification of clearance as to all phases of right-of-way acquisition will be the responsibility of the Right-of-way Department.

Construction Supervision:

Construction supervision involves contract administration, the necessary field surveying, interpretation of plans and specifications, and enforcement of specifications and contract provisions through inspection of the construction work to insure that the work performed by the contractor is in accordance with the plans and specifications.

This part of the budget includes the staff and related expenses for the design, acquisition and construction supervision activities necessary for the implementation of the California Water Development Program. The staff costs of these functions are financed in the Capital Outlay budget and reimbursed to the State Operations budget to provide specific staff and relate expenses.

FEATHER RIVER PROJECT

The Feather River Project embraces the entire Feather River Basin and consists of 5 reservoirs in the upper basin, designated the "Upper Feather River Division," and Oroville Dam and Reservoir and associated facilities, designated the "Oroville Division."

The Upper Feather Division includes the Frenchman, Grizzly Valley, Antelope Valley, Dixie Refuge and Abbey Bridge Units. The Frenchman Unit, which is presently under construction, consists of the Frenchman Dam and Reservoir located on Little Last Chance Creek about one mile downstream from its confluence with Frenchman Creek. It includes provision for basic recreation facilities and access roads. The reservoir, with a storage capacity of 51,000 acre-feet, will regulate the waters of Little Last Chance Creek for downstream irrigation use, provide incidental downstream flood control, and form the basis for enchancement of an outdoor recreation area. The Grizzly Valley Unit consists of Grizzly Valley Dam and Reservoir, located on Big Grizzly Creek about five miles north of Portola, a main conveyance canal to deliver water to Sierra Valley, and basic recreation facilities and access roads. The reservoir, with a storage capacity of 80,000 acre-feet, will regulate the waters of Big Grizzly Creek for downstream use and form the basis for enhancement of an outdoor recreation area. The Antelope Valley, Dixie Refuge and Abbey Bridge dams and reservoirs, and associated public recreation facilities, are known as the "Indian Creek Recreation Project." The reservoirs will have gross storage capacities of 21,600, 16,100, and 11,100 acre-feet, respectively, and will form the basis for enhancement of an outdoor recreation area. Included are provisions for development of a large park and recreation area in Genesee Valley, and the improvement of approximately 60 miles of mountain stream.

The Oroville division consists of the following principal features:

1. Oroville Dam, Spillway and Reservoir
2. Oroville Power Plant
3. Thermalito Diversion Dam
4. Thermalito Power Canal
5. Thermalito Forebay Dam
6. Thermalito Power Plant
7. Thermalito Afterbay Dam

In addition to these "main" features, numerous facilities m be relocated to allow for dam construction and filling reservoirs.

Oroville Dam will be an earth and graded-gravel fill structure which will be about 735 feet high containing approximately 78,000,000 cubic yards of embankment material. The storage wil be 3,523,000 acre-feet forming a water surface area of 15,500 acres. The facilities downstream of Oroville Dam are for river reregulation after power generation at Oroville and for added power generation utilizing the remaining head available before returning the flow to the river in the vicinity of the present Sutter-Butte Diversion Dam. The Thermalito Afterbay will contain sufficient storage to permit pump-back operation through the system to the Oroville Reservoir enabling the maximum firm power generation for peaking purposes. To make the project fully operational, certain auxiliary features, such as fish facilities and various permanent buildings and roads, will be required.

It is anticipated that the Western Pacific Railroad and U. S. Highway 40 Alternate will be completely relocated and that the other necessary relocations will be completed rendering the Oroville Dam site clear for construction by June 1, 1962. At that time major contracts can be awarded to begin construction of the principal Oroville Division facilities.

Preliminary design on many of the principal features listed above will be completed prior to fiscal year 1961-62. The funds required for the 1961-62 budget year activities will be utilized for preliminary design and preparation of final designs and construction plans and specifications for the elements of the project delineated on the attached schedule.

PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

CALIFORNIA WATER DEVELOPMENT PROGRAM—Continued

SOUTH BAY AQUEDUCT PROJECT

The South Bay Aqueduct will convey water from the San Joaquin Valley-Southern California Aqueduct (initially from the U.S. Bureau of Reclamation's Delta-Mendota Canal) to serve areas in the Livermore Valley portions of Alameda and Contra Costa Counties, the southern "Bayside" portion of Alameda County, and Northern Santa Clara County.

The main conduit will extend some 39 miles from Bethany Forebay, located on the proposed San Joaquin Valley-Southern California Aqueduct approximately 10 miles northwest of Tracy in Alameda County, to Airpoint Reservoir located approximately 4 miles northeast of Milpitas, Santa Clara County. The water will be lifted by the South Bay Pumping Plant from Bethany Forebay to an elevation from which it will flow by gravity to the several service areas. A temporary canal 2 miles long and a temporary pumping plant will supply water to Bethany Forebay from the U.S. Bureau of Reclamation's Delta-Mendota Canal until water becomes available from the San Joaquin Valley-Southern California Aqueduct.

Regulatory storage for part of Livermore Valley and for the Alameda Bayside and the Santa Clara service areas will be provided by Del Valle Reservoir located on Arroyo Del Valle 6 miles south of Livermore. Del Valle Reservoir will be connected to the main aqueduct by a short branch in which a pumping plant will be included. The plant will pump water between the main aqueduct and the reservoir with the direction of pumping depending on the reservoir water surface elevation and the water demands. Del Valle Reservoir will also provide flood protection for the Livermore Valley and for the downstream portion of the Alameda Creek Basin. Airpoint Reservoir will provide terminal reservoir storage for the Santa Clara service area.

The Doolan Unit of the South Bay Aqueduct consists of 12 miles of conduit along the northeast edge of Livermore Valley and a terminal storage reservoir.

CALIFORNIA WATER DEVELOPMENT PROGRAM—Continued

SAN JOAQUIN VALLEY-SOUTHERN CALIFORNIA AQUEDUCT PROJECT

The San Joaquin Valley-Southern California Aqueduct Project comprises all of the State Water Facilities south of the Delta necessary to convey water to project service areas in San Joaquin Valley and Southern California.

This project is comprised of the following divisions: North San Joaquin Division, San Luis Division, South San Joaquin Division, Tehachapi Division, West Branch Division, East Branch Division, and the Coastal Division.

The North San Joaquin Division includes the intake channel from the Delta to the Delta Pumping Plant and the necessary fish protection works; Delta Pumping Plant, discharge lines and appurtenant features; the extension of Bethany Forebay dikes; and concrete lined canal which extends from Bethany Forebay to San Luis Forebay, a distance of approximately 70 miles. These facilities will be located along the west side of the San Joaquin Valley, in Contra Costa, Alameda, San Joaquin, Stanislaus, and Merced Counties.

The San Luis Division includes the San Luis Forebay; the forebay intake canal; San Luis Pumping Plant, discharge lines and appurtenant features; San Luis Dam and Reservoir and appurtenances; and a canal of varying capacity which will extend from San Luis Reservoir approximately 108 miles south to Kettleman City. These facilities will be located along the west side of San Joaquin Valley in Merced, Fresno, and Kings Counties. This division is coincident with the federal San Luis Project and is to be developed as a joint federal-state undertaking. The U.S. Bureau of Reclamation will have prime responsibility for construction of this division. The Department of Water Resources will be responsible for the necessary right-of-way acquisition. The funds requested herein are for liaison and co-ordination with the U.S. Bureau of Reclamation to insure that the State's requirements are met and for the necessary acquisition work scheduled for the budget year.

The South San Joaquin Division includes a canal of varying capacity which extends approximately 93 miles from Kettleman City to a pumping plant at the base of Wheeler Ridge, 2½ miles of canal from Wheeler Pumping Plant I to Wheeler Pumping Plant II, 2½ miles of canal from Wheeler Pumping Plant II to Wheeler Pumping Plant III, and 12 miles of canal from Wheeler Pumping Plant III to Tehachapi Pumping Plant; pump lifts Wheeler I, II, and III, and the required discharge lines and appurtenant features. Wheeler Pumping Plants I, II, and III will be located southeast of Buena Vista Lake in the vicinity of Wheeler Ridge. These aqueduct features will be located along the west and southwesterly side of the San Joaquin Valley in Kings and Kern Counties crossing the Kern Lake Bed and passing east of Buena Vista Lake to Wheeler Ridge. From Wheeler Ridge the aqueduct will extend generally eastward to the vicinity of Pastoria Creek.

The Tehachapi Division includes Tehachapi Pumping Plant and appurtenant features, and an aqueduct consisting of discharge lines, tunnels, and siphons which will extend from the Tehachapi Pumping Plant to the south portal of the Tehachapi Tunnels. These facilities are located in Southern Kern County and begin in the vicinity of Pastoria Creek.

The West Branch Division includes all aqueduct facilities required to deliver water from the East Branch Division to the vicinity of Castaic, a distance of about 20 miles. These facilities will be located in Kern and Los Angeles Counties.

The East Branch Division consists of those portions of the aqueduct system from the south portal of the Tehachapi Tunnels to Perris Reservoir and includes the conduit from the forebay at the south portal of the Tehachapi Tunnels to the Cottonwood Power Development; the Cottonwood Power Development, penstocks and appurtenant features; concrete lined canal and pipeline extending to the forebay of the Pearblossom Pumping Plant, a distance of approximately 53 miles; Pearblossom Pumping Plant, discharge lines and appurtenant features; a concrete lined canal and pipeline extending from the Pearblossom Pumping Plant to Cedar Springs Reservoir, a distance of approximately 47 miles; Cedar Springs Dam and Reservoir; approximately 4 miles of tunnel extending from Cedar Springs Reservoir to the Devil Canyon Power Development; the Devil Canyon Power Development, penstocks and appurtenant features; pipeline extending from the Devil Canyon Power Development to Perris Reservoir, a distance of about 29 miles; and Perris Dam and Reservoir. These facilities will be located along the south side of the Antelope Mojave region and across the Santa Ana Valley in Kern, Los Angeles, San Bernardino, and Riverside Counties.

The Coastal Division consists of those portions of the aqueduct system from Los Perillas Forebay at the San Joaquin Valley-Southern California Aqueduct near Avenal Gap in Kings County to a terminus at the Santa Maria River and includes all equeduct facilities required to make water deliveries to San Luis Obispo and Santa Barbara Counties. The facilities in this Division will be located in Kings, Kern, San Luis Obispo, and Santa Barbara Counties.

CALIFORNIA WATER DEVELOPMENT PROGRAM—Continued

NORTH BAY AQUEDUCT PROJECT

The North Bay Aqueduct will provide conveyance and pumping features for the purpose of transporting water from Lindsay Slough to areas in Solano, Napa, Sonoma and Marin Counties.

The project as now conceived involves an intake channel with fish screen facilities to take project water from the Delta area at Lindsay Slough. The water is to be lifted at Calhoun Cut Pumping Plant where it will flow by gravity through the aqueduct to Cordelia Pumping Plant. After the lift at Cordelia, water will be carried in the aqueduct through Napa and Sonoma Valleys and terminating in Novato Reservoir.

The aqueduct is being restudied at this time to review water requirements in view of recent action by water agencies of North Bay counties to secure alternative water supplies. It is, therefore, expected that adjustments may be necessary in facility sizing. Portions of the project are sufficiently firm, however, to allow for right-of-way acquisition.

DELTA WATER PROJECT

The Delta Water Project is a multipurpose project which will accomplish the salvage of water which would otherwise be required for the repulsion of ocean salinity; protect the Sacramento-San Joaquin Delta from the resulting damage of salinity intrusion, flooding, and seepage; and provide transportation and navigation benefits. The project will include the following physical works which will be located throughout the Delta:

1. Control structure, barge lock and fishway on the Sacramento River at Ryde;
2. Control structure on Steamboat Slough at its confluence with Sutter Slough;
3. Enlargement of intake works on the Cross-Delta Canal at Walnut Grove;
4. Control structure on Holland Cut near Franks Tract;
5. Fixed crest control structure at head of Paradise Cut at the San Joaquin River;
6. Master levees along about 570 miles of project channels; of which about 320 miles are high standard levees and will not need improvement;
7. Channel improvements and closures on interior channels;
8. Irrigation and drainage water facilities;
9. About 200 miles of relocated and improved roads;
10. Small craft locks and small boat transfer facilities; and
11. Public recreation areas and developments.

LINE	PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

OPERATIONS AND MAINTENANCE PROGRAM

The Operations and Maintenance Program is the final phase in the planning, design, and construction of the State Water Facilities. This program will also include a number of existing functions involving operation and maintenance of previously constructed facilities for which the department is responsible.

Prior to the actual completion and operation of facilities under the Burns-Porter Act, the first of which will be the South Bay Aqueduct and Frenchman Projects, many studies are required, including financial and economic analyses to determine the best financing program, to determine repayment ability, and to properly allocate costs. Operation studies must be prepared on which to base system operation plans and decisions; plans must be developed for project management and operation; and contracts for the sale and purchase of water and power must be negotiated. Negotiation of agreements for joint or coordinated operations with the Bureau of Reclamation and the Corps of Engineers will also be required.

PROJECTS

Project Operations Studies *(Capital Outlay)*

Reservoir, aqueduct, and pumping plant power operation studies are required to insure that the most effective and efficient use is made of project facilities and that project services of maximum value are obtained at minimum cost. Of particular importance is the need that capital expenditure be limited to funds available under, and projects authorized by, the Burns-Porter Act, requiring numerous studies of reoperation of project facilities to determine the effects of capital economies. Studies of coordinated operation of project facilities with those of others, including utilities, federal agencies, and various districts are also needed. This work is a continuation of the studies conducted by the former marketing section of project operations which support design activities and are aimed at detailed study and refinement of project operations.

General Water Program Management and Operation *(Capital Outlay)*

Studies of the overall operation and management of state water facilities includes work of such general nature as to make it impractical to identify with individual project features. The program involves preparation of overall project cost allocations; financial studies including annual and capital costs, revenues, and repayment; preparation of studies on which to base decisions relative to the management of the California Water Fund and the California Water Resources Development Bond Fund, including investment of surpluses; treatment of replacement reserves and related matters; preparation of operation studies on which to base system operation plans and decisions; development of plans for project management and operation; and development of general contract provisions for the sale of water and power.

Water Program Management and Operation—Feather River Project *(Capital Outlay)*

This program is designed to effectuate the sale of project water and power in order to obtain funds with which to operate the project facilities and repay the costs, determine services required for project operation, and to develop management and operation criteria. Specifically, contracts will be prepared and negotiated for sale of water and power, and for obtaining pumping power by purchase of exchange, and for power transmission service. For each water contract negotiation a factual report will be prepared, including all pertinent physical and economic information. As design of facilities is finalized, appropriate changes in the Federal Power Commission license will be obtained by preparation of applications for amendment. Cost allocations and other factors involved in the federal contribution to flood control will continue to require attention. A program for the management and operation of project facilities will be developed.

In the Upper Feather River Division of the Project, Frenchman Dam and Reservoir will be completed and in operation. Recreational facilities and areas at Frenchman Reservoir are expected to be operated and maintained by Plumas County, with the State's interest safeguarded by a contract. Contract negotiations presently call for the project itself to be operated by the watermaster assigned to Sierra Valley. Maintenance of the dam will be the responsibility of the department. Payment received for the sale of project water following completion of the project late in 1961 will be credited to Water Fund revenue.

North Bay Aqueduct *(Capital Outlay)*

Analyses are required of all factors related to the integrated management of the North Bay Aqueduct as a part of the State Water Facilities. Determination will be made in conjunction with the Division of Design and Construction when the North Bay Aqueduct should be scheduled for construction, and the demand for which the facilities should be sized and proper contracts negotiated. Studies will be made of willingness and ability to pay, cost of service, financial management, and other related factors. If the foregoing analyses indicate justification, this will become a continuing program leading to negotiation of contracts for sale of project services and commencement of construction.

Delta Water Project *(Capital Outlay)*

In conjunction with activities in the Division of Resources Planning, this program will include preparation of operation studies, cost allocations, repayment analyses, and provision for financial management. The staff will negotiate with the Corps of Engineers for federal flood control participation, and with representatives of areas adversely affected for acceptance of substitute water supply facilities. This work will be in part a continuing program progressing into the operational phase.

South Bay Aqueduct Project *(Capital Outlay)*

The program calls for preparation of final plans for operation of facilities, some of which will be completed by the end of the budget year. Negotiation of contracts for sale of water must be completed in order to insure recovery of costs. This will require preparation of factual reports detailing all factors involved in service to each service area. This is a continuing program which will develop into a permanent part of project operation and management.

San Joaquin Valley-Southern California Aqueduct Project *(Capital Outlay)*

The program includes preparation and negotiation of contracts for water service for which factual reports covering all economic and physical factors involved must be completed. Negotiations will be made for arrangements for the supply of pumping power requirements. Plans for operation of facilities, including those for joint operation with the Bureau of Reclamation of the San Luis facilities, will be developed. Water Operation studies covering everything affecting the availability of water in the delta and including the joint operation of San Luis Reservoir will be prepared. This is a continuing program that will develop into a permanent part of project operation and management.

Flood Control Operations

Sacramento River Flood Control Project Maintenance

The Department operates and maintains approximately 200 miles of levee, ditches and canals, weirs, pumping plants, and related facilities in the Sacramento Valley. Levees are patrolled during high water conditions; during dry seasons the crews work in continuous clearing of several thousand acres of overflow channels and bypass areas. Personnel are also used in a departmental labor pool, supplying labor at considerable savings in cost and recruitment time to other departmental sections. These activities will continue at a uniform level during 1961-62 except when flood threats arise.

Flood Operations Program

The objectives of the program are to have trained personnel at both the local and state level available to give technical and physical assistance, to co-ordinate all efforts for maximum efficiency in combating flood threats, to provide a statewide

OPERATIONS AND MAINTENANCE PROGRAM—Continued

PROJECTS—Continued

Operations Program—Continued

warning system, and to maintain interagency co-ordination of operations of flood control projects, reservoirs, and distribution systems. The program consists of three parts: the State Flood Operations Center, the State-Federal Joint River Forecast Center, and Project Operations, the last responsible for operation of the Sacramento River Flood Control Project, and co-ordination with the activities of the various reclamation districts. The work program will continue at approximately the same level through 1961-62.

Project Inspections

The project includes making semiannual inspections of flood control projects, and the preparation of an annual report, "Status of Project Levee Maintenance," setting forth the condition of protective works comprising a levee system aggregating 1,120 miles in length, situated in 93 districts and areas. Also included in the project is co-operative work with the U.S. Corps of Engineers in the latter's planning for repair and construction. Presently authorized federal and state sponsored project works indicate that inspection activity will increase in 1961-62 approximately 25 percent above the 1960-61 fiscal year level.

Engineering Operations Studies

Hydraulic, hydrologic, and meteorologic studies are required to develop criteria for operation of integrated flood control or water development projects, both for the department and for the Reclamation Board. Work includes continued study of the application of the Knox model for obtaining estimates of maximum possible precipitation in other areas of the State and use of the model in operational forecasting of runoff from mountainous watersheds. Radar data for use in operational work will be studied, and available hydrometeorological data reviewed. The work program will continue at the 1959-60 level through the 1961-62 fiscal year.

Flood Damage Inspection and Repair

The project involves making investigations, reports, and recommendations concerning all applications for assistance from public agencies which relate to hydraulic structures. The cost of administering the program is chargeable to the funds appropriated for the flood relief program. Work will drop off in this area during the 1961-62 fiscal year unless it becomes necessary to administer a 1961 flood damage program.

New Hogan and Black Butte Participation *(Capital Outlay)*

The state assumed an interest in both of these projects of the Corps of Engineers by underwriting the repayment of the costs allocated to water conservation. An organized program of review of construction programs, accrual of capital costs, plans of operation, sale of water, and other factors is required to protect the State's interest and to prepare for possible future sale of Black Butte and/or New Hogan water by the State. The objective is to take all possible steps to insure that the financial obligation assumed by the State is no more than a fair and equitable share and that the obligation will ultimately be recovered from the water users.

These are continuing projects authorized by Water Code Section 11252, and will be completed only if sale of the entire water yield is contracted for by the Bureau of Reclamation within 7 years after the individual project is ready to begin the storage of water.

ALLIED ACTIVITIES

Watermaster Service—Sacramento

Watermaster service was created by statutes of the Water Code in 1913, with actual service beginning in 1924. Purpose is to distribute available water supplies, on an equitable basis, in areas where such supplies are inadequate to meet all demands. The police power of the State may be used to effect such distribution in accordance with voluntary agreements or court orders. Water right owners who have had their rights defined by court decree or agreement, and recorded, may petition the department for watermaster service. At present there are 16 service areas under the administration of nine field watermasters. Cost of watermaster service is paid half by the water users and half by the State. Activities will remain at the same level during 1960-61 and 1961-62 with the exception that a new watermaster service will be extended to the Sacramento River and Sacramento-San Joaquin Delta. This additional service is being treated as a separate project.

Watermaster Service—Southern California District

The primary function of the watermaster in the three basins under Watermaster Service in the Southern California District is the administration of Court Orders and Judgments within the basins. The activities consist of metering ground water production and surface diversions, calibration of meters, maintaining stream gaging stations including the determination of rating curves, measurement of depth to ground water, preparation of ground water contour maps, determination of general hydrologic relationships including safe yield, and administration of the exchange water pools. An annual report is prepared for each Watermaster Service Area describing the activities of the watermaster and the water conditions in the basin during the year.

The activities are scheduled during the year and among the several Watermaster Service Areas to provide a reasonably level workload. No increase in the level of activity during 1961-62 over that in 1960-61 is expected.

Watermaster Service—Sacramento River and Delta

The Sacramento River is used as a conduit to carry water released from Shasta and Folsom Reservoirs to the Sacramento-San Joaquin Delta. Portions of the storage releases from these reservoirs are being used by many water users along the Sacramento River and in the Delta. The Bureau of Reclamation, as operator of the Central Valley Project, is currently receiving no compensation for the use of this water; in order to provide effective project operation equitable contracts must be negotiated to provide for such compensation. Current negotiations between the bureau and local water users, aimed at agreement upon contract terms, are essential to avoid protracted and costly lawsuit. Legal jurisdiction of the State as watermaster will be defined in these contracts.

Upon successful culmination of contract negotiations, watermaster service will be needed to obtain the required basic data on use of available unregulated flows and project regulated flows, and to administer the terms of the contracts between the bureau and all or a part of the water users. Negotiations will be required to establish the scope of the work, and the costs and distribution of costs which will be shared by local water users, the Bureau of Reclamation, and the State.

This new program involves the service area of the Sacramento River below Shasta Dam, and the entire Sacramento-San Joaquin Delta.

Pacific Northwest-California Power Intertie Studies *(Capital Outlay)*

The objective of this study is to protect and represent state interest in a possible power interconnection with the Northwest. Although the report on the Pacific Northwest-California power intertie study, scheduled for submittal to the Legislature January 2, 1961, will complete the current studies, it is anticipated that partly as a result of the report, there will be continued activity in the matter with the objective of implementing the findings of the current studies. Studies and negotiations, depending upon results of the report made by a consulting firm studying the program, may be started towards possible state participation in the construction, operation, and use of the intertie facilities.

Communications

The program provides the department with a mobile radio system designed to cover potential flood areas for flood fighting purposes and to provide communication coverage for more routine operations. The network is made up of 91 mobile units, 30 fixed stations, and 26 portable stations with coverage throughout the Sacramento and San Joaquin Valleys. The program also

OPERATIONS AND MAINTENANCE PROGRAM—Continued

ALLIED ACTIVITIES—Continued

Communications—Continued

provides a river stage radio telemetering system to furnish immediate information on the river stages at key locations in the Sacramento and San Joaquin River Basins. Engineering and maintenance services are also provided for any electrical or electronic equipment within the department. Work programs for 1960-61 and 1961-62 are comparable.

Heavy Equipment Pool

The heavy equipment pool is a central control, designed to pool heavy equipment procurement, replacement, use, preventive maintenance, lubrication, repairs, and final distribution. The pool sets basic intradepartmental rentals for the equipment, based on general contractor's rates. It is a nonprofit activity and rental rates reflect only the actual costs of services rendered to the department.

PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

OTHER PROJECTS AND ACTIVITIES

Certain statutory and regulatory activities and projects otherwise differentiated from the Basic Data, Water Planning or Water Development programs are grouped herein.

Supervision of Safety of Dams

This statutory function is a regulatory activity, its primary duty that of supervision of the safety of design, construction maintenance, repairs, alterations, and operation of all dams in the State, except those controlled by the Federal Government.

The 1961-62 fiscal year program will stay at about the same level as the 1960-61 activity.

Advisory Services for Water Pollution Control Boards

The objective of this program is to furnish technical information and advice to the water pollution control boards regarding municipal and industrial waste discharges in support of the board's regulatory activities in establishing waste discharge requirements.

---

[a] Amounts for contribution to State Employees' Retirement Fund included in the program cost for 1961-62.

LINE	PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

OTHER PROJECTS AND ACTIVITIES—Continued

Advisory Services for Water Pollution Control Boards—Continued

This unit submits comments and recommendations regarding specific municipal and industrial waste discharges. In addition it notifies water pollution control boards regarding applications to this department for construction and enlargement of dams and forwards information on water quality, water rights, beneficial water uses, and known or suspected pollution hazards.

The program will be continued during the 1961-62 fiscal year. In light of the increasing needs of the water pollution control boards with respect to municipal and industrial waste discharges, the increasing complexity of waste disposal problems encountered, the recent changes in the water pollution control laws, and the department's increased activity in the field of water development, this program will be expanded to process adequately the anticipated requests for service.

Review of Federal Reports and Related Activities

The objective of this activity is to review and prepare recommendations for the State of California on the reports of federal agencies affecting the water resources of the State. In its review reports, the State makes recommendations with respect to such aspects as project service areas, upstream development and protection, capacities of project facilities, water rights, sequence of construction, and other matters, all with the objective of encouraging the optimum, timely, and co-ordinated development of the State's water resources. The California Water Plan, together with subsequent studies of all agencies, is utilized as a principal guide to this objective.

Proposed federal projects, and local projects for which federal financial assistance is requested, are analyzed, and comments reflecting the views of the State are submitted to the agency or agencies involved. Projects are reviewed with respect to engineering and economic feasibility and relationship to The California Water Plan. Comments of other state agencies are requested and incorporated when formal comments of the State are prepared.

It is presently estimated that the workload in 1961-62 fiscal year will be essentially the same as for previous fiscal years.

Formation and Supervision of Public Water Districts

The objective of this activity is the protection and furtherance of the public interest in the formation of public water districts by prior determination of the overall feasibility and propriety of district organization, as well as by supervision of operating districts, to the extent provided by law.

The department provides assistance on the formation and supervision of irrigation districts, water storage districts, and related projects as requested.

The work program for the 1961-62 fiscal year is anticipated to be at the same level as in previous years.

Applied Nuclear Engineering Administration

Two fields of engineering are covered in this program—saline water conversion and nuclear engineering. Activities in saline water conversion are: the acquisition of information concerning processes; co-operation with public and private agencies conducting research and development; collection and analysis of technical data on conversion plants; investigation of specific areas for sea and brackish water conversion plants. Activities in nuclear engineering consist of engineering studies on the application of nuclear energy to water resources development.

The work program for 1961-62 includes continuance of co-operative endeavors with the Federal Office of Saline Water and the University of California; expansion of use of radioisotopes; further studies of application of heat and power from nuclear reactors.

Electronic Data Processing Methods Survey

The Methods Survey Program includes the delineation of the practical and economical applications of machine computation and data processing that will increase the effectiveness and efficiency of the department; the review of engineering methods; the development of coding systems for collation, correlation, analysis, retrieval, and processing of data collected by the department and from other agencies, and the participation in development and selection of format and media for recordation and storage of data in machine language.

The 1961-62 program will continue at about the same level as in 1960-61. The procedure surveys to date indicate a need to continue the program at this level for a longer period of time than originally anticipated because of the great technological development being experienced in both computational and data observation equipment. Record linkage, retrieval systems, and processes leading to report preparation will be emphasized.

Reallocation of Flood Control Funds

The State Legislature, by enactment of the State Water Resources Law of 1945 and the Flood Control Fund Law of 1946, established the policy of financial assistance by the State on federally authorized flood control projects.

The objective of this activity is to reimburse local agencies for the costs of lands, easements, rights-of-way, and relocation of utilities on federal flood control projects approved by the Legislature.

An annual report is submitted to the Legislature that sets forth the funds required for state participation in existing and new flood control projects. Periodic reports are prepared setting forth the status of claims and funds associated with the flood control programs.

During the 1961-62 fiscal year, this activity is expected to continue to increase because the projects under way from the previous year will be continuing and several new starts are anticipated. The prepared budget shows an apparent decrease because the 1960-61 budget included other secondary functions, principally supervision of flood control project construction.

State Water Rights Filings Administration

The objectives of this program are to acquire water rights for the various works, prior to their construction and operation, of the State Water Facilities, and to insure that applications for these facilities are protected to the maximum extent consistent with the Water Code; and to co-ordinate activities of various sections of the department involving water rights to insure that departmental policies are followed consistently, and to provide these sections with information on the effects of water rights on problems before them.

Applications are prepared for appropriation of water pursuant to Section 10500 of the Water Code. The California Water Commission is assisted in its responsibility to act on requests for assignment or release from priority of state applications. This requires compilation of staff reports and appearances before the commission to present statements.

During the 1961-62 fiscal year the department will be involved in negotiations with protestants to its applications. The State Water Rights Board will schedule these applications for hearing during the year, requiring staff studies in support of the applications. This program will continue at about the same level as in 1960-61.

Beach Erosion Investigation

The objective of this program is the collection of data and for the preparation of plans and methods to prevent destruction of the limited beach area available for public recreation and other uses. The department participates in the construction of protective works on a co-operative basis among federal, state and local agencies.

Crustal Strain and Fault Movement

The objectives of the program are to determine the rate, constancy, and magnitude of ground distortion at sites proposed for engineering structures; to locate active faults where the ground surface may rupture as a result of accumulating crustal strain; to estimate the amount and direction of displacement across active faults which may occur during an earthquake; to develop rational seismic and crustal movement factors for engineering design based on frequency and intensity of earthquakes, probable crustal displacement, foundation conditions, etc., at each site as related to type of structure and the seriousness of the loss of service should structural damage occur; and to co-ordinate and support the work of other agencies engaged in engineering seismology and general seismological activities and to add activities as needed to provide overall solutions to engineering problems concerned with seismicity as soon as practicable. Geology, geodesy, and seismology comprise the 3 major phases of the investigation of crustal strain and fault movement.

The program will continue at about the 1960-61 level. Analysis of data will produce very preliminary seismic factors for engineering design with emphasis being placed on the seismic phase of the work. Geodetic observations will be continued.

Special Economic Studies

Under this program the following services are provided: review of reports emanating from federal, department, or other state agencies; preparation of drafts of replies to correspond-

DEPARTMENT OF WATER RESOURCES—Continued

PROGRAM SUMMARY	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

OTHER PROJECTS AND ACTIVITIES—Continued

Special Economic Studies—Continued

ence, and performance of other special assignments on request; review of state and federal legislation for economic implications; provision of technical economic guidance to others within the department; collection and analysis of economic data of general or statewide applicability to the department's objective; participation in economic studies of mutual applicability with the Economic Development Agency Department of Finance, or with other state or local groups as the need and opportunity for the studies arise.

Review of Reports of Other Agencies—Southern California District

The function of this program is to co-ordinate the planning activities of various agencies, federal, state, and local, in order to achieve the most effective and economic development and utilization of the water resources of the State. In its review reports, the department makes recommendations with respect to such aspects as project engineering and financial feasibility and economic justification. The California Water Plan, together with more detailed studies thereof, is utilized as a principal guide.

Reallocation of Flood Control Funds—Southern California District

It is the intention of the Legislature and the policy of the State that the State shall pay the costs of lands, easements, and rights-of-way necessary for construction of federally authorized flood control projects.

The objective of this program is to implement and administer the State Water Resources Law of 1945 which sets forth the policies and principles governing the department in the payment of these local costs on federal flood control projects.

Supervision of Safety of Dams—Southern California District

This statutory function of the department consists of the review of design, inspection of construction, and maintenance inspection of all dams in Southern California coming under state supervision. At the present time, there are 224 dams in the Southern California District coming under the jurisdiction of the State. Direct technical supervision of this function is retained by Sacramento. The staff of 7 will be maintained at the same level during the 1961-62 fiscal year as in 1960-61.

Activities with Respect to Public Water Districts—Southern California District

The objective of this program is the protection and furtherance of the public interest in certain public water districts through determination of the feasibility of district formation and propriety of district operation, particularly construction of water district facilities and expenditure of funds secured from the proceeds of the sale of bonds.

Administration of State Financial Assistance for Local Projects *(Capital Outlay)*

To assist local agencies in the financing of worthwhile water projects, the Legislature enacted Chapter 2052, Statutes of 1957. The program has since been amended and added to by the Davis-Grunsky Act, Chapter 1752, Statutes of 1959, which established a loan and grant fund for implementation of the program.

The objective of the program is to provide state financial assistance to public agencies for development of needed and economically justified local water projects. Also, the State may participate in the construction of local projects where the objectives of The California Water Plan indicate that a project should be constructed to a capacity beyond the needs of the public agency.

To encourage public agencies to develop the public recreational potential of these projects, the program also provides for state grants for costs properly allocated to the incidental recreational and fish and wildlife benefits of the project.

During the 1961-62 fiscal year, the department will continue to receive and process applications for assistance and carry on informational activities at about the same level as for the 1960-61 fiscal year. Negotiation of contracts with applicants pursuant to approved loans and grants, review and approval of construction plans and specifications, and supervision of construction of approved projects is expected to expand considerably during the 1960-61 fiscal year and continue at a high level during the 1961-62 fiscal year.

Administration of State Financial Assistance for Local Projects—Southern California District *(Capital Outlay)*

This is the Southern California program for "State Financial Assistance for Local Projects" as described above.

Co-ordination of Federal-State Projects *(Capital Outlay)*

The objectives of this program are to develop with the Bureau of Reclamation, co-operative, operational criteria to co-ordinate the existing and future water conservation facilities of the Federal Central Valley Project and the State Feather River and Delta Diversion Projects for the greatest benefit of all interested parties.

It is estimated that initial agreements on mutually acceptable project-operation criteria will be obtained with the bureau by June 1963. However, work will continue at a reduced scale for several years until the full objectives are attained.

During the 1961-62 fiscal year, the program staff will continue negotiations with the bureau, co-ordinate those existing studies within the department relevant to these negotiations, and make additional studies not within the normal program work of the other department units which would be required to fulfill the objectives of this program.

Federal-State Sea Water Conversion Plant *(Capital Outlay)*

This is a federal-state co-operative program covering the design and construction of a one million gallon-per-day sea water conversion plant under the federal demonstration conversion plant program. The plant will be built in San Diego. The State has appropriated $1,500,000 to be applied to the cost of design and construction of the plant, and has participated in the selection of the site and the review of the design and specifications of the plant. It will continue to participate in the construction, which will be completed in 1961, and in the operation of the plant.

WORK IN CO-OPERATION WITH FEDERAL GOVERNMENT

In this program the State participates co-operatively with the Federal Government in various research, data collection, and other projects related to water planning and development. State funds are matched by the expenditure of equal or greater amounts by Federal agencies.

Yuba River Debris Control Project

The Yuba River Debris Control Project provides for the storage of over 300,000,000 cubic yards of mining debris in the Yuba River overflow area near Marysville, which would otherwise pass in some degree into the navigable channels of the Feather and Sacramento Rivers.

Plans for the work are prepared by the Corps of Engineers, of which the California Debris Commission is a part, and submitted to the Department of Water Resources for approval. Over $1,000,000 of state funds have been appropriated for debris control. A budget request for $50,000 is being made for the 1961-62 fiscal year to match an equal amount proposed to be appropriated by the Federal Government for the continuation of this work.

Co-operative Mapping

The Co-operative Mapping Program between the State of California and the U.S. Geological Survey was established with the enactment of Chapter 1424, Statutes of 1945.

Under this program topographic mapping of the State of California is carried on by U.S. Geological Survey with funds matched by the State. Areas to be mapped, scales of mapping and priority schedules are mutually decided upon by both participants.

Stream Gaging

This is a continuing program of measurement of the discharge of streams of the State in co-operation with the U.S. Geological Survey. The program consists of approximately 375 stream gaging stations operated by the U.S. Geological Survey to provide data on water supply, runoff and diversions. It is planned to build about 12 additional stations. The program of determination of flood runoff from small drainage areas of 10 square miles or less is being continued and three additional areas are

WORK IN CO-OPERATION WITH FEDERAL GOVERNMENT—Continued

Stream Gaging—Continued

to be included in the program for fiscal year 1961-62. The program for modification of an ultrasonic current velocity measuring device is continued during this fiscal year.

Irrigation Research

Studies in co-operation with the Agricultural Research Service, U.S. Department of Agriculture, will continue in 1961-62 to develop data on water uses and requirements and ground water recharge essential to water development planning. Specific studies will include (1) consumptive use of water by crops and native vegetation, irrigation efficiency, the contribution of rainfall to the ground water supply; and (2) research studies of water conservation by artificial recharge of underground basins including evaluation of the effect of deliberate recharge upon the quality and quantity of ground-water supply.

Ground Water, Subsidence, and Specific Yield Studies

This program for development of data on various aspects of the ground water resources of California in co-operation with the U.S. Geological Survey will be continued at approximately its present level. Specific studies in this co-operative program include the following: Sampling and determination of specific yield of sediments by various direct and indirect laboratory and field methods to provide data necessary for a more accurate determination of the storage capacity of the ground water basins of the State, $30,000; investigation of land subsidence in the San Joaquin Valley to develop information required for planning of water facilities, $40,000; ground water development studies in specific areas of the San Joaquin ground water basin, $42,000; water-level measurements in key wells in ground water basins of the State to provide a continuous record of ground water storage conditions, $12,500; and basic data collection and observation well measurements in Southern California desert areas, $17,500; total, $142,000.

Beach Erosion Investigations

A budget in the amount of $25,000 has been made for fiscal year 1961-62 to provide direct matching funds to the Corps of Engineers, United States Army, in accordance with the provisions of Public Law 727, 79th Congress, 2d Session, for the State's share of the cost of co-operative beach erosion investigations.

Research in Snowpack Management

This is a co-operative program with the U.S. Forest Service consisting of an estimated 10-year study of snowpack management begun in 1956. All technical activities of this project are carried on by the U.S. Forest Service, Pacific Southwest Forest and Range Experiment Station. Information provided by this study will be directed toward developing techniques for increasing and delaying the runoff from Sierra and Cascade snowpacks through selective timber-cutting practices.

Sediment Investigations

The U.S. Geological Survey in co-operation with the Department of Water Resources maintains 12 continuous and 23 periodic stream sediment sampling stations and makes surveys of sediment deposited in reservoirs. The stream station data measures both characteristics and quantity of sediment transported by the streams.

The 1961-62 program will continue at the 1960-61 level of $35,000. The federal government matches this sum providing a total program of $70,000. Analysis of sedimentation problems will be made at additional reservoirs for which adequate historical data is available.

Water Quality Investigation

Under this program the U.S. Geological Survey makes mineral and heavy metal analyses of water samples in connection with the department's surface and ground water quality monitoring programs, and water quality investigations. It is estimated that 2,680 samples will be analyzed during the fiscal year 1961-62.

A 3-year research program investigating the possibility of using trace elements found in saline and fresh waters as indicators of saline degradation will be continued.

Leveling in Subsidence Areas

Under this co-operative program the U.S. Coast and Geodetic Survey conducts surveys in subsidence areas in California. The location and scheduling of operations is mutually decided upon by the co-operating agencies and costs are shared equally. Data obtained under this program is vital to safe and economic design of canals, aqueducts and other engineering structures in the State.

Several areas in the State are subsiding at rates in excess of 1 foot per year. Presently known areas of subsidence include the San Joaquin and Santa Clara Valleys, the Delta region and the Long Beach area.

Forest Management Research

This is a new program proposed for the 1961-62 fiscal year. The U.S. Forest Service, through the Pacific Southwest Forest and Range Experiment Station, has proposed a 10-year study of the possibilities of enhancing runoff from the commercial timber lands below the snowline. This area, which contributes 30 percent of the State's stream flow, is an area where forest management for water production may conflict with management for many other purposes. The study, which will be aimed at developing methods for best managing forested watersheds below the snowline, will complement a similar co-operative study of forest watershed management in the snow zone, which began in 1956. During 1961-62, it is proposed to begin the inventory of present conditions in the commercial forest zone.

SERVICES TO OTHER AGENCIES

The department undertakes water studies, investigations, and construction for other agencies as work programs permit or as the Legislature directs. Such projects are financed on a completely reimbursable basis.

Studies may include development of data or information on questions related to water resources, investigations of water facilities at State institutions, design or review of plans for proposed water projects, and, as performed for the California-Nevada Interstate Compact Commission, all the administrative, legal, and engineering services required by that body.

California-Nevada Interstate Compact Commission

The primary function delegated to each of the two state commissions is "to co-operate with one another in formulating and submitting to the legislatures of both states for their approval an interstate compact relative to the distribution and use of the waters of Lake Tahoe, and the Truckee, Carson and Walker Rivers."

The objective of the Interstate Compact Commission Unit of the Department of Water Resources is to provide the California Commission with such technical information and services as the commission may require in formulating such a compact.

It is anticipated that, by the start of the 1961-62 fiscal year, the compact commissions will have accepted a basic draft of compact terms and will be working to finalize agreement on the more complex points under consideration.

Klamath River Compact Commission

The major purpose of the compact commission is to provide for the equitable distribution and use of the waters of the Klamath River between the two states. The department furnishes the services of an employee, and his related expenses, as executive director for the commission. This service is authorized annually by agreement. This program will continue during the 1961-62 fiscal year at the same level as in previous years.

Special Water Quality Studies for Regional Water Pollution Control Boards

The objective of this program is to furnish information to the boards to enable the evaluation and establishment of requirements for specific municipal and industrial waste discharges, and to formulate and adopt long-range plans and policies with respect to water pollution control within their regions.

These investigations are based upon specifications prepared by the boards, normally after consultation with personnel of this department. Any of the following items may be included in these investigations: collection, evaluation, and reporting of basic data on ground and surface water quality; geology; ground water hydrology; surface water flow; waste discharge practices; quantities and quality of water; and other water quality data as required.

The cost of these investigations is reimbursed by the State Water Pollution Control Board under provisions of an interagency agreement executed each fiscal year.

Flood Control Maintenance Areas

The features of the Sacramento River Flood Control Project that are not state maintained must be maintained by local agencies. However, if they so desire, these agencies can request the State to perform this function for them, with the local agencies reimbursing the State for the cost of work done. During 1960-61 the department will perform maintenance work for 12 maintenance areas with an estimated 127 miles of levee. During 1961-62 it is estimated that there will be 13 areas with 167 miles of levees.

Lower San Joaquin River Flood Control Project

The State plan for flood control along the San Joaquin River and tributaries from the mouth of the Merced River upstream to Friant Dam is part of a comprehensive, federally authorized, plan for flood control along the San Joaquin River from Friant Dam to the Delta. State construction of confining levee works upstream from the Merced River is authorized in lieu of State acquisition of certain flowage easements required under the adopted Federal plan for flood control.

The Reclamation Board, as the designated State agency responsible for implementing Federal and State plans for flood control along the San Joaquin River in 1953, contracted for the engineering services of the then Division of Water Resources for investigation and development of a confined plan for flood control between the mouth of the Merced River and Friant Dam. By subsequent amendment the basic service agreement between the two agencies has been expanded to where the Department currently provides planning, design, right of way and construction engineering services for the Board.

Physical limits of the project extend from the confluence of the Merced and San Joaquin Rivers, near the Stanislaus-Merced County line, upstream along the San Joaquin to a point near the head of Gravelly Ford Canal, approximately 12 miles northeast of Mendota, a total distance along the San Joaquin River of 114.7 miles.

The project is divided into 11 individual contract units representing fiscal appropriations to the Reclamation Board for the years 1958-59 through 1962-63. Contracts Nos. 1 and 2 are presently under way with termination of both scheduled for early in the current fiscal year. Active construction work will be in progress on Contracts 3, 3B, 5, 6, 7, and 9 during the fiscal year 1961-62.

Upon completion of each project construction unit, operation and maintenance responsibility is delegated to local interests under State and Federal flood control law.

Engineering Studies for the Attorney General's Office

The Attorney General's Office relies upon the department as its expert engineering staff in matters pertaining to flood damage where legal action is taken against the State.

Special studies are made to determine actual damages resulting from the flood and to investigate issues declared by the plaintiff in his complaint. This may involve complex engineering analysis, especially in the investigation of the hypothetical issues brought forth.

Special Investigations for Regional Water Pollution Control Boards—Southern California

The Southern California District provides technical assistance of a general nature and undertakes special water quality investigations at the specific request of Regional Water Pollution Control Boards 3, 4, 6, 7, 8, and 9.

The objectives of these special investigations are to provide the regional boards with information and technical advice for support of appropriate regulatory action by the boards.

Whale Rock Project—Southern California

The Whale Rock Project is a joint venture between the City of San Luis Obispo and the State. Construction includes the Whale Rock Dam, appurtenant structures, and an 18 mile pipeline with 2 pumping plants.

During the fiscal year 1960-61, all construction work on this project should be completed.

Special Projects for Other State Agencies—Sacramento

In executing their own functions, other state agencies frequently request the Department of Water Resources to provide engineering information and advice on questions of water resources and related matters. The agencies most frequently involved are the District Securities Commission, Department of Finance, Division of Forestry, Division of Architecture, Division of Beaches and Parks, Wildlife Conservation Board, and the Division of Highways.

The Department makes engineering investigations and reports on proposed water projects for the California District Securities Commission upon request.

Investigations for state agencies, other than the District Securities Commission, are concerned usually with water problems of existing or proposed state institutions and facilities, and occasionally with claims for damages and law suits against the State.

It is anticipated that the level of effort will remain approximately the same in 1961-62, although an increase may result due to construction of conservation camps and centers by the Division of Forestry and Department of Corrections.

Special Projects for Other Agencies—Southern California

Work is performed in the Southern California district offices in connection with problems of water supply, flood hazards, water quality, and other related items, including some design and construction. The agencies most frequently involved are the Department of Finance, Division of Forestry, Division of Architecture, Division of Beaches and Parks, Wildlife Conservation Board, and the Division of Highways.

GENERAL ANALYSIS

Objectives

The State Water Rights Board was established as an independent state agency on July 5, 1956, by virtue of Chapter 52, First Extraordinary Session of 1956. The board, composed of 3 members appointed by the Governor for 4-year terms, is in charge of maintaining orderly procedure in the administration of the following programs outlined in Division 2 of the Water Code, State of California:

1. Administration of appropriation of unappropriated water through the application, permit and license procedure and to verify compliance with the law in putting the appropriated water to beneficial use.
2. Investigation of physical facts and assistance to the courts in water rights controversies, and implementation of statutory procedures whereby an administrative determination of water rights can be made prior to court action. Development of a physical solution is usually made for the court's convenience.
3. Administration of the act requiring the recordation of data relating to the extraction of ground water in the counties of Riverside, San Bernardino, Los Angeles and Ventura.
4. Administration of the act authorizing the retention of ground water rights when extractions are reduced by use of water from an alternate source. This act applies to 8 counties of Southern California, and consists of recording statements filed by water users.

Program and Performance

During the year 1959-60, the board devoted 53 days of hearing on applications of the United States Bureau of Reclamation to appropriate water from Sacramento River and Sacramento-San Joaquin Delta, filed prior to August 1938, in furtherance of the federal government's Central Valley Project. The board also held and completed hearings on applications of California-Oregon Power Company and Pacific Gas and Electric Company to appropriate water from McCloud River; applications to appropriate water from East Branch of North Fork Feather River and its tributaries; applications of Merced Irrigation District to appropriate water from Merced River; applications of County of Yolo to appropriate water from Cache Creek; applications of 12 individuals to appropriate water from Santa Rosa Creek and Laguna de Santa Rosa; applications of the City of Ukiah and certain districts in Sonoma and Mendocino Counties to appropriate water from Russian River, and on numerous individual applications and other miscellaneous water right matters. During the 1959-60 fiscal year, 41 decisions were adopted by the board relative to protested applications.

During the 1960-61 fiscal year, the board has continued and will complete the hearings on Sacramento River and Sacramento-San Joaquin Delta. Major hearings commenced during the 1959-60 fiscal year which will probably be completed during the current fiscal year involve 21 applications of individuals and agencies to appropriate water from Tule River system above Success Dam and applications of Richvale Irrigation District to appropriate water from Middle Fork Feather River and its tributaries.

Major hearings probably will be initiated during the current year on applications filed since 1938 to appropriate water from Sacramento-San Joaquin Delta, which includes an application by Westlands Water District for the San Luis project. Also hearings will be held on applications involving rights to water on Kings River at and below Pine Flat Dam, Stanislaus River, Calaveras River, Walker River, Carson River, Lake Tahoe and Arroyo Grande Creek. Other applications involving minor projects and miscellaneous matters will also be heard during the remainder of the year.

During the 1961-62 fiscal year, applications should be ready for hearings on the Cosumnes River, Yuba River, Kern River and Tulare Lake. Other protested applications which have advanced to the hearing stage will also be scheduled to be heard together with miscellaneous water right matters.

During 1959-60 there were 677 new applications to appropriate water filed with the board. This is a larger number than was filed in any previous year. The large number of filings made in July 1960, indicates that a still larger total may be expected for the 1960-61 fiscal year. Processing the increased number of applications will produce an extremely heavy workload on the staff during the current fiscal year. The large number of applications filed should begin to affect the hearing load of the board by the end of the current year.

Adjudication activities of the board are proceeding in four court references. Two of these are in Southern California involving ground water in the West Coast Basin and in the San Fernando Valley. Both of these references are in Los Angeles County. Reports of Referee are expected to be filed by the board in both these proceedings in the near future. The remaining 2 adjudications are in Northern California and involve surface streams in Mariposa County and in Butte County. Reports of Referee are expected to be filed in these proceedings at an early date. Inquiries have been received by the board regarding additional adjudications which may be initiated this fiscal year or early in the 1961-62 fiscal year. Due to a decrease in reimbursements from adjudication activities, the 4 positions related to the reduction have been deleted in the 1961-62 fiscal year.

Filings of notices under the Recordation Act pertaining to the extraction of ground water in the 4 Southern California counties, for the 1959-60 fiscal year, were 324 first notices and 5,203 annual notices.

GENERAL ANALYSIS

Objectives

Co-operates with the Corps of Engineers, United States Army, in construction of flood control projects through the acquisition of rights-of-way for such projects; acts as governing body for the Sacramento and San Joaquin Drainage District; approves construction of levee systems and flood channels; and fulfills such construction obligations as have been assumed by the State in its agreement with the Federal Government.

Program and Performance

The agency program involves work on a number of flood control projects in the Sacramento and San Joaquin valleys. The presently active projects of the board are the Sacramento River Flood Control Project, the San Joaquin River Flood Control Project, the Calaveras-Littlejohn Flood Control Project and the Middle Creek Project. Construction of the work on all of these projects is done by the Corps of Engineers with the exception

GENERAL ANALYSIS—Continued

Program and Performance—Continued

of the portion of the San Joaquin Project lying above the mouth of the Merced River. The construction work on this project is being accomplished by the Department of Water Resources under agreement with the Reclamation Board.

The primary function of this agency is the acquisition of the necessary lands, easements and rights-of-way for these projects and the relocation of roads, bridges and utilities as may be necessary in conjunction with their construction. In addition the board also is responsible for the control of encroachments upon the works of these various flood control projects and is responsible for the enforcement of sound maintenance standards.

During the current year the Corps of Engineers has undertaken construction on Elder Creek and Cherokee Creek, as well as other units of the Sacramento River Flood Control Project. Work is being continued by the Corps of Engineers on the Middle Creek Project and, in addition, work has been initiated on the construction of the east levee of the San Joaquin River between the mouth of the Merced River and the mouth of the Tuolumne River. Right-of-way acquisition has been essentially completed upon these units with the exception of necessary follow-up work and final settlement of condemnations.

The Department of Water Resources has recently accepted the first unit of construction of the San Joaquin River Project lying above the mouth of the Merced River and is preparing in the near future to award two more contracts for work on this project. This agency has secured the right-of-way necessary for these construction units and has also secured approximately 60 percent of the right-of-way necessary for the portion of the project lying north of State Highway No. 152.

During the current year, personnel of this agency is acquiring right-of-way and relocating existing facilities for the Corps of Engineers on the Sacramento and San Joaquin River Flood Control Projects which will be under construction by the Corps of Engineers in the latter part of the current fiscal year and during the next fiscal year.

Also during the 1961-62 fiscal year, the agency will acquire rights-of-way and arrange for the relocation of facilities for the Chico, Mud and Sandy Gulch, and other portions of the Sacramento River Flood Control Project. Also being acquired is a portion of the right-of-way for the Calaveras-Littlejohn Project in San Joaquin County and rights-of-way necessary for the next units of construction of the San Joaquin River Project below the mouth of the Merced River. Above the mouth of the Merced River, this agency is acquiring the remaining rights-of-way necessary for the completion of the project. In addition, funds will be provided for the Department of Water Resources to continue the award of contracts for the construction of this project.

The agency, during the current and next fiscal year, will also process a large number of applications for the approval of plans for the placement of various encroachments on or in the vicinity of the projects within the board's jurisdiction and co-operate with the Attorney General in the handling of litigation including that arising from the floods of 1955-56. A program of requiring better levee maintenance throughout the area of the board's jurisdiction is also being actively pursued.

GENERAL ANALYSIS

Objectives

The Colorado River Board was created by Chapter 838, Statutes of 1937 for the purpose of protecting California's rights pertaining to the Colorado River. The board, and its staff, collects, compiles and analyzes engineering and legal data on the existing and proposed utilization of the Colorado River water supply, appears before congressional committees and interested federal agencies, and confers with representatives of other Colorado River Basin states regarding legislation and developments affecting California's rights and interests.

Program and Performance

The board comprises 6 members appointed by the Governor, each representing 1 of the 6 agencies having rights to the use of water or power from the Colorado River. The agencies are: The Metropolitan Water District of Southern California; Department of Water and Power, City of Los Angeles; San Diego County Water Authority; Imperial Irrigation District; Coachella Valley County Water District; and Palo Verde Irrigation District.

Major phases of the board's work program as anticipated for the current fiscal year and the fiscal year 1961-62 are summarized as follows:

1. Preparation of engineering and legal material for appearances before congressional committees and for conferences with interested federal agencies, senators and congressmen regarding legislation pending before the Congress affecting California's rights and interests on the Colorado River.
2. Exhaustive study of reports on proposed projects for development, control and utilization of water of the Colorado River System including analysis of engineering, financial and legal aspects of the proposals as required, and preparation of formal views and recommendations.
3. Collection, compilation and analysis of basic information on the water supply of the Colorado River System and present and future use thereof, with a view to ultimate determination of:
   a. The long time average water supply available for beneficial use.
   b. Unit rates and total requirements of beneficial consumptive use of water for agricultural, industrial, domestic, and municipal purposes.
4. Engineering studies and research needed in connection with the suit, Arizona v. California, et al., still pending before the United States Supreme Court.

In early June, 1960, after intensive study and analysis of the Draft Report of the Special Master in Arizona vs. California et al., which was unfavorable to California, the defendants filed motions: (a) that the Master appoint disinterested experts to report and testify as the Court's witnesses on water supply, (b) that the Master review further evidence with respect to the construction of the California Limitation Act, the Boulder Canyon Project Act and the Water Delivery Contracts and (c) that the Master hold a conference concerning the problems of administration under the proposed decree.

COLORADO RIVER BOARD—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	CHANGE FROM 1960-61

GENERAL ANALYSIS—Continued

Program and Performance—Continued

On July 1, 1960, the Master responded denying California's motion that he appoint disinterested experts on water supply but granting the motion for oral argument and conference, which were held on August 17 to 19, in New York City. California submitted offer of proof on its second motion and argued these and other issues. On August 31, 1960, the California defendants filed a motion to reopen the trial for the taking of evidence with respect to the consumptive use of Colorado River system water in the upper Colorado River basin and the depletion of the flow of the Colorado River at Lee Ferry, and the effect of the proposed decree on the water supply available to existing California projects by this depletion and other related issues. Present indications are that the Special Master will submit his Report and proposed decree to the U. S. Supreme Court without responding to the motion of the California Defendants.

5. Legal and engineering studies related to the administration of the Law of the River including analysis and, if necessary, recommendation for Board action to insure that the operation of the Colorado River System is in accordance with the provisions of the Colorado River Compact, the Upper Colorado River Compact, the Mexican Water Treaty, Colorado River Storage Project Act, the Boulder Canyon Project Act, and other relevant statutes, regulations and court decrees.

KLAMATH RIVER COMPACT COMMISSION

Headquarters at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	CHANGE FROM 1960-61
SUMMARY				
TOTAL EXPENDITURES				
Support *(General Fund)*	$2,343	$572	$5,698	$5,126 (896%)

GENERAL ANALYSIS

Objectives

The major purposes of this compact are, with respect to the water resources of the Klamath River Basin:

A. To facilitate and promote the orderly, integrated and comprehensive development, use, conservation and control thereof for various purposes, including, among others: the use of water for domestic purposes; the development of lands by irrigation and other means; the protection and enhancement of fish, wildlife and recreational resources; the use of water for industrial purposes and hydroelectric power production; and the use and control of water for navigation and flood prevention.

B. To further intergovernmental co-operation with respect to these resources and programs for their use and development and to remove causes of present and future controversies by providing (1) for equitable distribution and use of water among the two states and the Federal Government, (2) for preferential rights to the use of water after the effective date of this compact for the anticipated ultimate requirements for domestic and irrigation purposes in the Upper Klamath River Basin in Oregon and California, and (3) for prescribed relationships between beneficial uses of water as a practicable means of accomplishing such distribution and use.

Program and Performance

The commission was created effective September 11, 1957, with the passage of an act of the Congress of the United States consenting to the provisions of that certain compact designated as the "Klamath River Basin Compact Between the States of Oregon and California." The Legislature of the State of California ratified and approved the compact by Chapter 113, Statutes of 1957.

The compact provides that the commission consist of 3 members. The Director of the Department of Water Resources represents the State of California. The representative of the State of Oregon is the State Engineer. The federal representative is appointed by the President. The representative of the United States serves as chairman of the commission without vote. The commission has entered into a service agreement with the Department of Water Resources for the services of the executive director, including all necessary clerical, stenographic or related services required in the performance of his duties.

California's share of the expense of the commission together with the State of Oregon's share is deposited in a trust account from which all expenses are paid.

During 1961-62, the commission will initiate studies on possible changes in water requirements for fish and wildlife purposes due to changes in land use for these purposes in the Upper Klamath River Basin.

Also during 1961-62, the commission will initiate a water rights study of the Klamath Indian Reservation, to obtain a complete history of water rights in this area due to the termination of federal jurisdiction over the reservation.

Land and water use studies and water quality studies in the Upper Klamath River Basin will be continued in 1961-62.

The commission is requesting an additional $5,698 which will finance California's share of the joint Oregon-California-United States expenditure program through 1961-62. An additional appropriation together with remaining balances in the trust account will be needed to finance California's share of the expense in 1962-63.

The total California appropriations to date for this commission have been as follows:

Chapter 113, Statutes of 1957	$12,000
Budget Act of 1959, Item 265	2,343
Budget Act of 1960, Item 260	572

The status of the trust account is shown below in order to complete the financial history of the commission.

GENERAL ANALYSIS

Objectives

The California-Nevada Interstate Compact Commission of California was created by Chapter 1810, Statutes of 1955. Its function is "to co-operate with a similar commission representing the State of Nevada in formulating and submitting to the legislatures of both states for their approval an interstate compact relating to distribution and use of the waters of Lake Tahoe and the Truckee, Carson and Walker Rivers." The commission consists of the Director of the Department of Water Resources and 6 other members, appointed by the Governor, from electors residing, owning property or engaged in business in the areas comprising the basins of the Truckee, Carson and Walker rivers and Lake Tahoe. The chairman of the commission is selected by the members.

Program and Performance

Entering its fifth year of extensive negotiations with its counterpart commission from the State of Nevada, the California commission is now hopeful that the end of fiscal year 1961-62 will see a successful culmination of its efforts to create an interstate compact. The work of the California commission during 1960-61 will be pointed toward completion of the negotiations.

During 1961-62 the commission will:

1. Negotiate with federal, state and local agencies on final provisions of the compact;
2. Hold public hearings in Sacramento and Carson City and the county seats of 5 counties in California and 6 counties in Nevada which are directly affected by the compact terms;
3. Present the completed compact to the state legislatures of California and Nevada for their approval during the period January through March 1962;
4. Introduce consent legislation in Congress to obtain federal approval of the compact by both houses during the period April to July 1962.

GENERAL ANALYSIS

Objectives

The principal objective of the state water pollution control program is to regulate the disposal of domestic sewage and industrial waste so as to preserve and protect the recognized beneficial uses of the waters of the State. Another objective is to prevent nuisances resulting from unreasonable waste disposal practices. The regulation of waste discharges is the primary responsibility of the 9 regional water pollution control boards. Prescribed waste discharge requirements must, in the final analysis, be reasonable and must be promulgated after balancing the interests of both the water users and the waste dischargers. For this reason, the regional boards are composed of local people appointed by the Governor and associated with 7 specified fields of interest.

In addition to the major task of prescribing, checking, and enforcing waste discharge requirements, the regional boards have the following other statutory duties and responsibilities:

1. To formulate and adopt long-range plans and policies for control of water pollution.
2. To co-ordinate the actions of the various state and local agencies in the control of water pollution.
3. To investigate conditions of pollution or nuisance.
4. To report cases of suspected contamination (actual hazard to the public health).
5. To recommend water pollution control projects needing financial assistance.
6. To request enforcement of water pollution control laws by appropriate federal, state or local agencies.

The 14-member State Water Pollution Control Board has the following principal responsibilities:

1. To formulate and adopt statewide policy for control of water pollution.
2. To review actions of any regional board which may fail to take or obtain appropriate action to correct conditions of pollution or nuisance.
3. To refer cases of uncorrected contamination (hazard to public health) to any state agency having jurisdiction.
4. To administer statewide programs of financial assistance for sewerage construction.
5. To administer statewide programs of research in the technical phases of water pollution control.

Program and Performance

The program of the state and regional boards for the 1961-62 fiscal year is essentially a continuation of the current program. However, 2 factors have affected the planning of the 1961-62 budget and program. They are:

1. The workload of prescribing, checking, and enforcing waste discharge requirements, which began a steady rise in 1957, is continuing in much of the State.
2. Federal (Public Law 660, 84th Congress) program grants, amounting to approximately $130,000 annually for the past 5 years, are scheduled to end during the 1960-61 fiscal year. These grants have been made available for use in extending or improving state water pollution control programs and, in California, have been used primarily to augment the state board's research program.

One parameter of the added workload is documented by the increased activity on enforcement proceedings. During the first 9 years of operation under the 1949 Statutes (which stressed the co-operative approach to controlling pollution), the regional boards issued only 8 enforcement orders, 7 of which were issued in 1959. During the first 9 months after the enforcement provisions of the Water Pollution Control Act were amended in 1959, the boards took enforcement actions against 35 municipalities or industries that were violating prescribed waste discharge requirements.

The most significant factor in the expanding workload is the program of checking waste discharges for compliance with the boards' requirements. The bulk of the checking or monitoring programs is conducted by the waste dischargers, either on a co-operative and voluntary basis or under specific order of the regional boards. However, such self-monitoring programs do not completely abrogate the State's responsibility to assure compliance with prescribed requirements, and, as a result, the regional boards must be adequately staffed for the following reasons:

1. It is necessary for the staff of the regional boards to develop self-monitoring programs for individual waste discharges.
2. There is continuing necessity to make spot checks by periodic inspection of waste discharges to determine if the discharger is accurately and objectively observing and reporting on the quality of the discharge or its effect on the receiving waters.
3. An effective self-monitoring program requires a substantial amount of staff time in reviewing reports and laboratory analyses submitted by the waste dischargers.

The boards are delegated with the responsibility of administering the federal (Public Law 660, 84th Congress) construction grant program. This program will continue during the 1961-62 fiscal year at approximately the same level of activity as in the past 5 years, unless Congress expands the program. Since the 1956-57 fiscal year, allocations to California have been slightly in excess of $2 million each year. Eligible communities may receive grants for construction of waste treatment works up to 30 percent of the project cost with a maximum of $250,000. Requested grants each year total several times the available funds. Priorities are based on water pollution control needs determined by the regional boards and on financial needs found by the state board. Actual grants are made by the U.S. Public Health Service upon certification of priority by the state board.

P.L. 660 CONSTRUCTION GRANT PROGRAM

Year	Total appropriation	Number of applicants receiving grants

WATER POLLUTION CONTROL BOARD—Continued

RESEARCH IN TECHNICAL PHASES OF WATER POLLUTION CONTROL

Objectives

The program of applied research in the field of water pollution control is conducted to provide technical data to aid the boards in properly discharging their statutory responsibilities.

Program and Performance

The research program sponsored by the state board is carried out by contracting special projects with organizations or individuals competent in the particular field of research. A basic program has been supported since 1950 at a state level of approximately $80,000. In 1956-57 the research studies were expanded using federal (Public Law 660, 84th Congress) program grant funds in an amount of approximately $113,000 annually. These federal grants are scheduled to terminate in the 1960-61 fiscal year.

During the 5-year period when the federal grants became available, the program has been concentrated on research in the field of waste disposal in the marine environment. Research projects in this field began phasing-out in 1960-61. The oceanographic survey of southern California, contracted with the Allan Hancock Foundation of the University of Southern California, and the collation of data relative to marine disposal of liquid wastes, contracted with Engineering-Science, Inc., Arcadia, will terminate in 1960-61. The kelp investigation, contracted with the University of California Institute of Marine Resources, and the north coastal oceanographic study, contracted with Humboldt State College, will terminate in 1961-62.

In 1960-61 research was started in 2 new areas of water pollution control, namely, (1) revision of State Board Publication No. 3, "Water Quality Criteria," and (2) collation of data on effects of refuse dumps on groundwater quality. The first is a 2-year project contracted with California Institute of Technology. Under an agreement with the state board, the U.S. Public Health Service is co-operating on this project by providing the services of one of their sanitary engineers. The groundwater study is an exploratory project contracted with Engineering-Science, Inc., and will be continued in the 1961-62 fiscal year.

FIELD AND LABORATORY SERVICES BY OTHER AGENCIES

Program and Performance

This category covers the cost of contracting with other agencies for field and laboratory services. Such services consist of technical investigations, inspection of waste discharges, sampling and analysis of wastes and receiving waters, and financing the bacteriological and radiological aspects of the statewide stream sampling program. These services are contracted with state or other agencies best qualified to perform the required technical work. The physical and chemical aspects of this program are performed by the Department of Water Resources.

For 10 months of each year, the Department of Water Resources makes partial analyses and physical examinations of all samples collected in the statewide stream sampling program. The samples collected during the remaining 2 months are subjected by the department to a more complete mineral analysis, and, in addition, heavy metals determinations are made. These data are utilized to determine existing water quality conditions in the surface waters of the State; to evaluate trends and changes in water quality and ascertain causes; to advise appropriate regulatory agencies regarding existing and potential water quality problems; and to assemble, collate, and publish water quality data.

The 1960-61 Budget includes $112,959 for contracting with the University of California for the comprehensive study of San Francisco Bay, and the 1961-62 Budget provides for continuation of this study. The bay study was initiated in 1959-60 under Chapter 1909, Statutes of 1959, which appropriated $83,000 to the University of California to start the investigation.

GENERAL ANALYSIS

Chapter 2400, Statutes of 1957 provided for an advance to the Los Angeles World Trade Center Authority. The amount appropriated is to be repaid to the General Fund out of the proceeds from the sale of the first revenue bonds sold by the authority under the provision of the World Trade Center Authorities Act.

Availability of the appropriation made by Chapter 2400, Statutes of 1957, terminated September 1960 in accordance with Section 16304, Government Code.

Permanent Revolving Funds—Continued

GENERAL ANALYSIS

An augmentation of $500,000 is provided for the Correctional Industries Revolving Fund to equip a shoe factory and knitting mill at the California Men's Colony, East Facility, in San Luis Obispo.

An augmentation of $256,000 is provided for the Purchasing Revolving Fund. Of the augmentation, $23,051 is for initial costs of a new warehouse in Los Angeles, which will permit agencies in Southern California to purchase stores items at lower costs. Also, $192,710 is needed to finance the difference between the cost of replacing vehicles and the depreciation reserve and for initial costs of new state garages in Oakland, Fresno, and Los Angeles. Expansion of the state-owned microwave system requires another $82,094 for implementation of the increased servicing by the Radio Maintenance Section. Available surpluses and prior augmentations reduce the total need to $256,000. It is estimated that pool cars will be driven 36,500,000 miles in 1961-62 fiscal year as compared with 34,000,000 miles in 1960-61, an increase of 2,500,000 miles or 7.5 percent.

Section 8352(g) of the Revenue and Taxation Code appropriates $750,000 annually from the Motor Vehicle Fuel Fund to the Small Craft Harbor Revolving Fund. This sum represents the amount of money attributable to taxes imposed on motor vehicle fuel used in propelling vessels.

Theodore Roosevelt Centennial Commission

GENERAL ANALYSIS

Objectives

The commission was created by Chapter 2280, Statutes of 1957, to insure participation by the State in programs commemorating the 100th anniversary of the birth of Theodore Roosevelt.

Program and Performance

The major activities of the commission culminated in a statewide observance of the centennial on October 27, 1958. The commission ceased to exist on July 1, 1959.

GENERAL ANALYSIS

Objectives

The Capitol Building and Planning Commission was created by Chapter 1952, Statutes of 1959. The commission consists of 13 members appointed by and serving at the pleasure of the Governor. Three members are nominated by the City of Sacramento and 3 members by the County of Sacramento. The duties of the commission are to establish a master plan for the orderly development of future state buildings and other facilities in the capitol area of the City of Sacramento.

After adoption of the master plan by the Legislature, the commission is required to submit at each general session a report on projects completed or initiated and may recommend revision of the plan.

Program and Performance

The commission is to review all factors affecting the plan including any changes in the needs of the State relative to the location and design of buildings to be constructed, parking facilities, and landscaping, the ordinances, plans and proposed improvements of the County and City of Sacramento including zoning regulations, population trends, and plans for rapid transit development. In addition, the commission has agreed to advise private developers of property within the area covered by the master plan on the status of the plan and its effect on such developers.

The commission is to report to the Legislature at each general session on the state building construction projects initiated, completed or proposed and to set forth the commission's appraisal of the degree to which such projects conform to the master plan. The commission may also include in its report recommendations of revisions of the plan from time to time as such changes become necessary.

The contributions of the County and City of Sacramento to the 1959-60 and 1960-61 budgets were to aid in the expense of preparing the master plan. This budget proposes that the continuing operation of the commission be supported entirely by the State.

A staff coordinator and a clerical position were temporarily established in lieu of contractual services to facilitate development of the master plan. These positions are proposed on a permanent basis in this budget. Legislation is being proposed to authorize the reimbursement of travel expenses incurred by out-of-town members of the commission.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
General Emergencies			
SUMMARY			
TOTAL EXPENDITURES			
Unallocated balance *(General Fund)*	–	$193,911	$2,000,000

GENERAL ANALYSIS

To provide funds for various state agencies for unseen contingencies for which no appropriation or insufficient appropriation has been made by law. Amounts as necessary are allocated to agencies by the Department of Finance upon finding of need.

Program and Performance

Unusually heavy demands during the 1959-60 fiscal year required allocations for emergency fire suppression ($675,000), increases in grants to counties for care of persons suffering from tuberculosis ($612,700), and increased cost of educational assistance to veterans and veterans' dependents ($356,500).

Allocations for emergency fire suppression during the 1960-61 fiscal year amount to $410,000. There is an unallocated balance of $193,911 which is available for unforseen emergencies during the balance of the fiscal year. This balance is only sufficient for the minor emergency needs of the State through June 30, 1961. Any major emergencies would require an augmentation which could be provided by a deficiency appropriation in the latter part of the 1961 legislative session.

It is proposed that $2,000,000 be made available for emergencies for 1961-62. Deficiency appropriation measures may not be presented at budget sessions, so it is desirable to provide sufficient appropriations for all emergency purposes.

In the detail of the allocations below, there is included allocations from the Emergency Fund and the Salary Increase Fund. All these allocations are shown as available funds in each agency budget. The unallocated balance, if any, is shown as an expenditure in this section of the budget.

The allocations for salary increases for 1959-60 were made on a net requirement basis after savings, while in 1960-61 the allocations are on a gross basis.

Totals	$9,398,100	$16,790,975	$19,276,250	$2,485,275

GENERAL ANALYSIS

Objectives

To pay the interest and principal redemption charges for state general obligation bonds.

Program and Performance

The State Construction Program Bond Act of 1955 and the State Construction Program Bond Act of 1958 provide in total $400,000,000 to meet part of the building construction requirements for the departments of State Government which are financed primarily from General Fund revenues.

Sales of $50,000,000 each were made in December 1958, March 1959, January 1960, and March 1960. Two additional sales of $25,000,000 each are tentatively scheduled during the 1960-61 fiscal year to provide the funds to meet the cash requirements for the authorized projects under construction. The sale of bonds during the 1960-61 fiscal year will complete the financing of projects previously authorized from State Construction Program Bond sources. Two additional sales of $25,000,000 each are tentatively scheduled during the 1961-62 fiscal year to finance new projects included in the 1961-62 Governor's Budget.

Interest and redemption charges on highway bonds are withheld from motor vehicle license fee revenues for the payment of debt service.

Interest and redemption charges on bonds issued for construction of state and university buildings, and for acquisition of areas for state park purposes were paid from funds which were set aside from General Fund Surplus and placed in the Bond Sinking Fund of 1943. Though the funds required to meet all debt service payments to final maturity were set aside, $5,000,000 was transferred to the State Highway Fund to be used as a loan to the Golden Gate Bridge and Highway District to be repaid from toll revenues.

Sufficient money has been transferred to the Sacramento State Building Interest and Sinking Fund to retire the outstanding Sacramento State Building Bonds.

Debt service requirements for the school building bonds are considered as local assistance and included in the local assistance part of the budget.

This debt service statement does not include the cost of bonds issued for the San Francisco Harbor Development, Small Craft Harbor Development, or the Veterans' Farm and Home Loan Program. Though these bonds are general obligation bonds of the State of California, the debt service costs are primarily obligations of the utility funds and are paid from the respective funds.

Small Craft Harbor Development Bonds were subject to sale in the amount of $3,000,000 on July 19, 1960. Interest income will be earned from bond sale proceeds that are invested until disbursed for the needs of this program. The principal redemption payments for this issue amount to $150,000 annually and begin in the 1965-66 fiscal year. It is anticipated that interest due from contracts will be available to assist in the payment of bond interest costs due semiannually. The first interest costs for this issue will be due during the 1960-61 fiscal year.

California Water Resources Deveolpment Bonds will not be sold during the 1961-62 fiscal year. The first sale of bonds under the recently approved $1,750,000,000 bond authorization will be scheduled during 1963. General Fund appropriations will be made annually in the future to pay the interest and principal due on the bonds that are issued and sold. Premium and accrued interest from completed bond sales will be transferred into the General Fund for payment of debt service, plus revenue from operating projects after maintenance and operation costs are paid on an annual basis.

STATE BUILDING PROGRAM

SUMMARY OF PROPOSED NEW CAPITAL OUTLAY APPROPRIATIONS FOR 1961-62

AGENCY AND PROJECT	PROPOSED NEW APPROPRIATIONS FROM GENERAL FUND	 FROM STATE CONSTRUCTION PROGRAM FUND †	 FROM OTHER FUNDS
The following table summarizes the proposed new appropriations for the 1961-62 fiscal year for the State Building Program by departments. Detailed explanation and description of each project is contained in the agency detail budget.			
Department of Agriculture:			
Construct inspection station—Yermo	–	$361,000	–
Department of Corrections:			
Conservation Center:			
Equip conservation center—Lassen County—phase I	–	$500,000	–
Equip conservation center branch—Tuolumne County—phase I	–	50,000	–
Construct conservation center branch—North Coast	–	1,250,000	–
Equip conservation center branch—North Coast—phase I	–	50,000	–
Deuel Vocational Institution:			
Construct in-service training building	–	110,400	–
Institution for Men:			
Equip addition to hospital	–	105,000	–
State Prison at San Quentin:			
Equip chapel—phase II	–	8,000	–
Institution for Women:			
Construct reception-guidance center	–	1,236,800	–
Minor construction and improvements	$399,671	–	–
Totals, Department of Corrections	$399,671	$3,310,200	–
Department of the Youth Authority:			
Northern California Reception Center and Clinic:			
Construct storm water disposal system	–	$117,600	–
Equip living unit	–	11,950	–
Fred C. Nelles School for Boys:			
Construct classroom building—phase II	–	253,200	–
Equip classroom building—phase II	–	17,300	–
Construct commissary building	–	218,400	–
Equip commissary building	–	16,000	–
Enlarge gymnasium, shower and dressing room facilities	–	92,000	–
Equip gymnasium, shower and dressing room facilities	–	2,600	–
Construct storm drainage system	–	103,800	–
Install security lighting	–	74,600	–
Convert kitchen and dining room into chapels—working drawings	–	11,000	–
Equip 2 living units	–	26,000	–
Equip food service facility	–	41,150	–
Youth Training School:			
Construct visiting room addition	–	98,235	–
Ventura School for Girls:			
Construct 2 50-girl living units	–	744,000	–
Construct additional shops and classrooms	–	228,600	–
Equip new institution	–	574,370	–
Northern California Youth Center:			
Working drawings—initial central services and 400-ward institution	–	150,000	–
Minor construction and improvements	$421,325	–	–
Totals, Department of the Youth Authority	$421,325	$2,780,805	–
Department of Education:			
Special Schools:			
School for Cerebral Palsied Children, Southern California:			
Construct new facility	–	$1,639,000	–
School for the Deaf, Berkeley:			
Construct swimming pool	$41,300	–	–
Minor construction and improvements	29,650	–	–
Totals, Department of Education	$70,950	$1,639,000	–
University of California:			
Berkeley Campus:			
Equip education-psychology building	–	$457,400	–
Equip agricultural greenhouses	–	49,500	–
Construct environmental design building		6,018,700	–
Construct photosynthesis laboratory	–	415,200	–
Construct and equip sanitary engineering building	–	235,000	–
Construct and equip alterations to Haviland Hall	–	348,100	–
Construct alterations to Hearst mining building	–	611,400	–
Construct alterations to life sciences building	–	636,000	–
Construct alterations to home economics building	–	216,900	–
Construct biochemistry building	–	2,822,000	–
Working drawings for physical science lecture hall	–	23,500	–
Construct utilities	–	391,500	–
Working drawings for chemistry—unit 2	–	200,000	–
Land acquisition	–	680,000	–
Davis Campus:			
Equip partially physical science—unit 1	–	50,000	–
Construct and equip addition to physical education building	–	678,500	–
Construct office section of classroom and office building—unit 2	–	1,175,900	–
Construct library addition to and make alterations to library-administration building	–	1,820,000	–
Construct veterinary science laboratory animal housing—unit 2	–	151,700	–
Construct and equip poultry husbandry building for experimental birds	–	174,700	–

---

† Expenditures from bond funds not included in budget totals.

STATE BUILDING PROGRAM

SUMMARY OF PROPOSED NEW CAPITAL OUTLAY APPROPRIATIONS FOR 1961-62—Continued

AGENCY AND PROJECT	PROPOSED NEW APPROPRIATIONS FROM GENERAL FUND	FROM STATE CONSTRUCTION PROGRAM FUND †	FROM OTHER FUNDS
La Jolla Campus:			
Complete construction and equip partially building B for school of science and engineering	–	$520,000	–
Construct building C for school of science and engineering	–	2,465,000	–
Construct utilities and site development—step 2 for school of science and engineering	–	250,000	–
Los Angeles Campus:			
Equip graduate school of business administration building	–	257,300	–
Equip engineering unit 3	–	335,000	–
Complete addition to chemistry-geology building—step 1	–	182,000	–
Construct north campus library—unit 1	–	4,943,000	–
Construct physics—unit 2	–	5,408,400	–
Working drawings for art—unit 2	–	132,000	–
Construct life sciences graduate instruction and research—unit 2	–	1,297,000	–
Construct utilities, roads and walks to north campus area	–	195,000	–
Working drawings for university activities memorial center	–	163,000	–
Working drawings for addition to the administration building	–	72,500	–
Los Angeles Medical Center:			
Construct physical rehabilitation unit	–	3,561,000	–
Riverside Campus:			
Construct humanities building	–	3,372,400	–
Construct addition to the library building	–	1,795,000	–
Land acquisition	–	650,000	–
Construct improvements to field 9	–	60,300	–
Construct protective filters and coolers for glasshouses—step 1	–	246,500	–
San Francisco Campus:			
Construct primary electrical system expansion	–	295,500	–
Working drawings for addition to and alterations to clinics building	–	174,000	–
Santa Barbara Campus:			
Equip library—unit 2	–	191,000	–
Construct classroom wing of classroom and office—unit 2	–	1,074,600	–
Construct utilities and site development	–	208,800	–
Construct central laboratory for radioactive materials	–	666,000	–
Land acquisition	–	596,700	–
Minor construction and improvements	$1,732,000	–	–
Totals, University of California	$1,732,000	$46,268,000	–
State College System:			
State College of Alameda County:			
Construct fine arts building	–	$2,356,500	–
Construct science building	–	5,415,000	–
Site development and working drawings for future site development	–	943,800	–
Initial complement of equipment	–	400,000	–
Chico:			
Remodel administration building—phase II	–	410,600	–
Working drawings for engineering building	–	65,000	–
Equip remodeled administration building—phase I	–	4,060	–
Equip men's gymnasium	–	98,930	–
Fresno:			
Working drawings for library addition	–	60,000	–
Equip men's gymnasium	–	43,200	–
Humboldt:			
Working drawings for remodel library	–	20,000	–
Construct outdoor physical education facility	–	226,400	–
Construct corporation yard	–	480,000	–
Equip corporation yard	–	19,540	–
Working drawings for marine fisheries laboratory	–	32,550	–
Construct surface parking	–	133,500	–
Equip education psychology building	–	115,200	–
Equip library	–	122,100	–
Equip engineering curricula	–	88,475	–
Long Beach:			
Working drawings for health service building	–	43,600	–
Equip engineering building—phase II	–	761,800	–
Equip administration addition	–	17,750	–
Equip fine arts wing No. 3	–	260,945	–
Equip science wing No. 3—phase II	–	56,780	–
Los Angeles:			
Site acquisition, development and construction—parking	–	1,258,000	–
Working drawings for engineering addition—partial cost	–	100,000	–
Working drawings for classroom No. 2—partial cost	–	200,000	–
Construct feeding facility	–	380,500	–
Equip science building—phase II	–	450,000	–
Orange:			
Construct science building and boiler plant	–	8,293,400	–
Working drawings for music, speech, drama building	–	250,000	–

---

† Expenditures from bond funds not included in budget totals.

STATE BUILDING PROGRAM

SUMMARY OF PROPOSED NEW CAPITAL OUTLAY APPROPRIATIONS FOR 1961-62—Continued

AGENCY AND PROJECT	PROPOSED NEW APPROPRIATIONS		
	FROM GENERAL FUND	FROM STATE CONSTRUCTION PROGRAM FUND †	FROM OTHER FUNDS
State College System—Continued			
Sacramento:			
Working drawings for music building addition	–	$95,000	–
Equip women's gymnasium	–	45,435	–
San Diego:			
Construct surface parking	–	173,000	–
Working drawings for classroom building	–	180,000	–
Construct boiler addition	–	123,500	–
Equip life science and psychology building—1st increment	–	500,000	–

DEPARTMENT OF AGRICULTURE

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS

The work of this department is of a regulatory and service nature. It is headquartered in Sacramento and has offices, field crews, advisors, and consultants operating throughout the State. A major portion of the departmental responsibility is accomplished in co-operation with the 56 offices of the county agriculture commissioners and consists of protection of plants and animals from infectious diseases, pest animals, weeds and injurious insects and the prevention of the introduction and spre of crop and livestock pests and diseases.

This budget provides for the relocation of a plant quaranti inspection station at Yermo due to a realignment of the hig way in the vicinity of the present station in keeping with t interstate highway plan.

POULTRY IMPROVEMENT COMMISSION

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

This commission provides California's poultry industry with accurate production data on the various types and strains of chickens and turkeys. The work is divided into 2 distinct areas, the chicken project which is located near Modesto and the tu key project which is located near Keyes.

No expenditures are proposed for the 1961-62 fiscal year.

GENERAL ANALYSIS

The 5-year building program of this department is designed to provide facilities which will meet the anticipated population growth and ultimately permit housing of inmates in accordance with the following standards:

For cell buildings—1 bed and 1 prisoner per cell.

For dormitory—1 bed per 50 square feet.

The 1961-62 major construction program is primarily directed to progress toward the goals set forth above and some expansion of capacity to meet the needs of an increasing population. The proposed construction to increase the rated capacity is limited to a 120-inmate capacity, reception-guidance center at the Institution for Women and the construction and equipment of the Conservation Center, North Coast Branch for 160-inmate capacity.

Utilities and auxiliary buildings are proposed to meet the requirements at the various institutions to handle the increasing inmate population. These facilities include an in-service training building at the Deuel Vocational Institution and numerous items for equipment to be installed in previously authorized projects which include equipment for: the conservation center at Lassen County; the Tuolumne Conservation Center Branch; the hospital addition at the Institution for Men; and the second phase of the chapel at San Quentin.

---

d Expenditures from bond funds not included in budget totals.

DEPARTMENT OF CORRECTIONS—Continued

Conservation Center

The Conservation Center is being constructed on 1,120 acres located in Lassen County, approximately 7 miles east of Susanville. It was authorized by Chapter 1583, Statutes of 1959, and has a projected completion date of June 30, 1962. It is to be built of reinforced concrete and brick and is to house 600 minimum and 600 medium custody inmates.

Because of favorable construction costs, phase II of the Lassen center will be authorized during the current year from current appropriations. This final phase includes a chapel and an employee housing facility.

There are to be 2 branches of 160-inmate population each, located in Tuolumne County and the North Coast area and an 80-bed capacity facility located in the Mono-Inyo area. The branches are to consist of barracks, administration building, messhall and kitchen, dayrooms, warehouses, and forestry facilities of semipermanent wooden frame construction.

The Conservation Center and branches are to serve as a matériel and inmate manpower support center for the conservation camp operated by the Division of Forestry and the Division of Highways. This budget proposes to equip the Conservation Center and the Tuolumne Branch and to construct and equip the North Coast Branch.

STATE BUILDING PROGRAM

PROPOSED 1961-62 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Equip Conservation Center—Lassen County—phase I	–	–	$500,000
To equip this facility for 1,200 which was authorized in 1959-60 and is scheduled for completion in July 1962.			
Equip Conservation Center Branch—Tuolumne County—phase I	–	–	50,000
To equip this facility for 160 inmates, which was authorized in 1959-60 and is scheduled for completion in July 1962.			
Construct Conservation Center Branch—North Coast	–	–	1,250,000
Equip Conservation Center Branch—North Coast—phase I	–	–	50,000
This project will provide capacity for 160 inmates in the conservation program.			
Minor Projects:[c]			
Construct microwave system	–	–	35,000

Correctional Training Facility

This is a medium security institution with agricultural, industrial, academic, and vocational training programs. It is located on 907 acres of land in the Salinas Valley about 4 miles north of Soledad.

The central facility is a permanent, reinforced concrete construction and was completed in December, 1951 with a rated capacity of 1,527 inmates. A temporary barracks-type facility with rated capacity of 272, but an administrative population quota of about 630, operates as a farm unit. The new north unit has a rated capacity of 1,224. Four camps totaling 270 inmates are administered from the central institution. In July, 1960 a 40-capacity mobile camp was activated. In December, 1960 a new 80-capacity conservation camp will be opened and an old 30-capacity camp will be closed. After these changes the total rated capacity of the Correctional Training Facility will be 3,383. The construction program consists of minor projects totaling $145,785 to correct deficiencies and to improve the physical plant.

Deuel Vocational Institution

This medium-security institution is located on 783 acres of farm land in San Joaquin County four miles east of Tracy, and 15 miles south of Stockton. It is primarily an academic and vocational training institution for younger offenders with some industrial and farming activities available.

The institution operates a reception-guidance center processing Youth Authority wards and some adult offenders committed by the criminal courts and an adjustment center unit handling behavior problem cases in the younger age group.

The institution has a rated capacity of 1,515 inmates including the new 300-man reception-guidance center which was activated in September 1960.

The construction of an in-service training building is proposed as a result of increasing numbers of employees and space demands at the institution.

State Prison at Folsom

This is a maximum security prison with emphasis upon industrial and work programs. The total rated capacity is 2,455 inmates including 436 in camps. The capacity of the camps will be increased by 120 in the 1960-61 fiscal year with the opening of the 40-man mobile camp in September, 1960, and the opening of an 80-man camp in April, 1961. This will bring the total rated capacity to 2,575 for both the 1960-61 and 1961-62 fiscal years including 2,019 in the institution and 556 in camps.

The original construction was completed in 1858, and is located on 1,700 acres of land about 2 miles northeast of the City of Folsom.

The budget provides for minor construction projects to provide a new tower and to eliminate unsafe conditions in the handicraft shop.

Institution for Men

This is primarily a minimum security prison with an extensive agricultural and industrial program. The institution is located in San Bernardino County about 2 miles south of Chino on 2,435 acres of land. It was opened in 1941 and consists of reinforced concrete permanent main buildings, semipermanent steel industrial buildings, frame farm buildings and temporary steel barracks buildings. The institution has a rated permanent-type capacity of 728 with a capacity of 217 in the temporary barracks. The state conservation camps operated from this institution have a capacity of 620. The southern Reception-Guidance Center is located on a 15-acre portion of the Chino site, and is of reinforced concrete construction with a capacity of 550 inmates. The total capacity by June 30, 1962, will be 2,115.

The Tehachapi Branch, located near Tehachapi, is administered by the main institution at Chino. It has a rated capacity of 380. This budget proposes to equip the addition to the hospital, and correct deficiencies and improve the physical plant by proposed minor construction projects totaling $43,890.

The 1961-62 program includes equipment for the hospital expansion and projects to correct deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM			
PROPOSED 1961-62 EXPENDITURES [a]			
Equip addition to hospital	–	–	$105,000
To equip previously approved project which adds 38 inmate capacity.			
Minor Projects: [c]			
Construct inmate activity building—Tehachapi	–	–	29,000
Resurface institution roadway—Tehachapi	–	–	12,060
Alteration and improvement under $5,000	–	–	2,830

[a] From State Construction Program Fund unless otherwise indicated.

[c] Minor projects from General Fund unless otherwise indicated.

Medical Facility

This institution, with a rated capacity of 1,935 includes the central facility with a rated capacity of 1,342 and a reception-guidance center unit with a rated capacity of 593. The central facility provides medical and psychiatric treatment and special custodial care for inmates suffering from mental illness, chronic physical illness, narcotics addiction, sexual deviation, severe emotional disturbance, and tuberculosis. Due to the types of inmates, emphasis is placed on the psychiatric and medical program areas rather than the vocational, academic, industrial, and farming programs carried on throughout other institutions in the department.

The reception-guidance center unit receives adult male felons committed from the 47 northern counties for diagnosis, classification and recommendation for institutional placement. In general, a higher degree of custodial supervision is exercised over these inmates. Inmates were first received in July, 1957.

The institution is located in Solano County, about 2 miles south of Vacaville, and consists of 903 acres of land, of which approximately 100 acres are to be used for inmate and employee building areas. The construction program consists of one minor project for improvement of institution roads.

STATE BUILDING PROGRAM

Men's Colony—East Facility

The Men's Colony is located at Los Padres, which is 5 miles west of the city of San Luis Obispo and approximately 12 miles east of Morro Bay on the north side of State Highway No. 1. The East Facility of the Men's Colony is a new medium security institution which is planned for an immediate capacity of 2,400 inmates with possible future expansion to 3,000 inmates. The construction of the 2,400 capacity is authorized with the basic utilities constructed so that the planned 600-man minimum security unit can be added with a minimum of change. Construction is scheduled for completion in April, 1961. Minor construction in 1961-62 would eliminate a serious erosion hazard.

Men's Colony—West Facility

The Men's Colony is located at Los Padres which is 5 miles west of the City of San Luis Obispo. The West Facility is a minimum security facility utilizing the hospital section of the army installation at Camp San Luis Obispo to provide capacity for 1,350 inmates in open barrack type wooden buildings. The program has been designed especially to handle the older inmates. It is planned to continue operations in this facility after the activation of the new medium security East Facility. No new Capital Outlay projects are proposed for 1961-62.

State Prison at San Quentin

This is a close-medium security prison with extensive industrial activities as well as extensive educational and treatment programs. The activation of the 101-capacity isolation-segregation building, two 80-capacity conservation camps and a 40-capacity mobile camp will bring the 1961-62 total capacity to 3,493 including 672 in camps. The institution is located on 404 acres adjacent to San Francisco Bay in Marin County about 3 miles southeast of San Rafael. Included in this budget is a project to equip the newly constructed chapel. Minor projects are proposed to correct deficiencies, improve the physical plant, and provide original complement of equipment for 2 new forestry camps.

STATE BUILDING PROGRAM

DEPARTMENT OF CORRECTIONS—Continued

Institution for Women

All women committed to the Department of Corrections are confined in this institution, which must be able to handle all types of security, serve as a reception center, and provide medical facility functions. The medical program has been stressed as well as the academic, vocational, and industrial program. The capacity of the institution will be 801 by the end of the current fiscal year. The institution is located in San Bernardino County some 7 miles northwest of the City of Corona, on 120 acres of ground, 62 acres within the custodial enclosure. Included in the budget is the construction of a new reception-guidance center for 120 inmates, so that new commitments may have an adequate processing procedure.

GENERAL ANALYSIS

The Capital Outlay program of the Department of the Youth Authority is planned to meet the capacity requirements resulting from the increasing California juvenile population and the gradual increase in rate of commitment from the counties. The demand for additional capacity is being alleviated to some extent by a program of encouraging improvements in juvenile law enforcement and probation, increased use of county juvenile homes and camps through both maintenance and construction subsidies, and increased use of parole.

The major projects in the Capital Outlay program for the 1961-62 year consist of the second increment of working drawings for the Northern California Youth Center's initial central services unit and the first 400-ward unit.

At the Northern Reception Center and Clinic and Fred C. Nelles School, improved storm water disposal systems are included in the 1961-62 year. Also at Fred C. Nelles School, security lighting, a classroom building, the enlargement of the gymnasium, shower and dressing room and a new commissary building are proposed.

Youth Training School has included an addition to the visiting room which will provide the minimum space necessary for visiting at this 1,200-ward institution.

At Ventura School for Girls two 50-girl living units and additional vocational shops and classrooms are included.

Minor construction projects are budgeted for all existing institutions with the exception of the Southern California Reception Center and Clinic and the Conservation Camps for Boys. Minor projects provide for necessary alterations, improvements, and small additions which will improve efficiency.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

Northern California Reception Center and Clinic

This institution is located on a 17-acre site approximately 7 miles east of Sacramento, near Perkins. This facility receives all boys and girls from Northern California. The major purpose is to centralize intake and to make diagnostic studies and training recommendations on each case. Intensive medical, dental, psychological and psychiatric treatment is given. Serious medical and psychiatric cases developing in the schools are also treated. Upon completion of the projects financed in the 1960-61 Budget, this institution's capacity will total 318 plus 32 hospital and detention beds.

Projects proposed for 1961-62 include equipment for a previously funded project, a storm water disposal system and minor projects to correct deficiencies and improve the physical plant.

Youth Authority Conservation Camps for Boys

In co-operation with the Division of Forestry, 4 youth conservation camps will be in existence and operating in the 1961-62 year. The 3 presently existing camps are located at Mt. Bullion in Mariposa County, Pine Grove in Amador County and Ben Lomond in Santa Cruz County. The fourth camp, currently under construction and to be in operation in June, 1961, will be located at Washington Ridge in Nevada County. In addition to the 4 main camps, 3 spike camps are operated on a year-round basis. Total capacity of these conservation camps is 360.

No additional camp projects are proposed for 1961-62.

Fricot Ranch School for Boys

Fricot Ranch School for Boys is located in the foothills, 11 miles from the City of San Andreas, at an elevation of approximately 1,700 feet. The general terrain of the country is mountainous. Of the total of 1,090 acres, buildings are located on approximately 50 acres. The living unit funded in the 1959-60 fiscal year will be completed July 1961, which will give a capacity of 220 beds plus 12 hospital beds.

Projects proposed in 1961-62 are to correct deficiencies and to improve the physical plant.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

Fred C. Nelles School for Boys

This institution was constructed at Whittier, California, in 1890. Remodeling of this institution was begun in the 1959-60 fiscal year, and upon completion of the projects funded through the 1961-62 fiscal year the institution will have a bed capacity of 528 plus 37 hospital and detention beds. The projects proposed in the 1961-62 fiscal year are required to provide facilities for the increased population and include equipment for previously funded projects, new classrooms and equipment, a new commissary and equipment, working drawings for conversion of dining facilities into chapels, and minor items to correct deficiencies and improve the physical plant.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
STATE BUILDING PROGRAM			
PROPOSED 1961-62 EXPENDITURES[a]			
Equip 2 50-boy dormitories	–	–	$26,000
This will provide equipment for 2 previously funded living units.			
Equip food service building	–	–	41,150
This project will provide equipment for this previously funded building.			
Construct classroom building—phase II	–	–	253,200
This project will provide educational facilities for the increased population.			
Equip classroom building—phase II	–	–	17,300
Construct commissary	–	–	218,400
This will provide adequate area for commissary goods necessary to supply the maximum population at this institution.			
Equip commissary	–	–	16,000
Working drawings—conversion of dining facilities into chapels	–	–	11,000
Construct storm water drainage system—phase I	–	–	103,800
This project will remedy a presently hazardous storm water disposal problem and alleviate future flooding possibilities.			
Enlarge gymnasium, shower and dressing room facilities	–	–	92,000
This project will provide the facilities necessary to adequately handle the increased population.			
Equip gymnasium, shower and dressing room facilities	–	–	2,600
Install security lighting	–	–	74,600
This project will provide adequate lighting to aid in deterring and early detection of escapes and disturbances.			
Minor Projects:[c]			
Rehabilitate clothing repair and storage area	–	–	15,000
Relocate security fence and roadway	–	–	40,000
Increase blacktop at institution entrance	–	–	8,000
ESTIMATED 1959-60 AND 1960-61 EXPENDITURES[b]			
Construct 2 living units	–	$573,000	–
Cottage alterations	–	185,200	–
Equip cottage alterations	–	2,200	–
Construct library and classroom buildings	–	424,200	–
Equip library and classroom buildings	–	23,620	–
Construct field shower and dressing facilities	–	116,000	–
Equip field shower and dressing facilities	–	4,070	–
Construct food service building	–	674,000	–
Construct visiting and control unit	–	260,100	–
Equip visiting and control unit	–	3,325	–
Equip 2 living units	–	26,060	–
Equip arts and crafts and music building	–	28,675	–
Additional electrical facilities	–	78,700	–
Construct special treatment building	–	113,940	–
State Construction Program Fund			
Equip special treatment building	–	3,000	–
Construct 2 dormitories	$546,200	–	–
State Construction Program Fund			
Construct arts and crafts building	291,400	–	–
State Construction Program Fund			
Minor Projects:[c]			
Completion of lawn irrigation system	–	22,100	–
Outdoor physical education facilities	–	40,000	–
Renovate Greenleaf cottage	–	23,700	–
Repair and resurface roads	–	8,000	–
Replace steam lines	—362[e]	434	–
Construct swimming pool	–	25,000	–
Install fire escapes	17,000	–	–

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

Northern California Youth Center

The Northern California Youth Center to be located in Northern California is the first of 2 such centers planned for California. With the possible exception of additions to the northern reception center, all of the department's capacity requirements for Northern California in the next 20-25 years will be provided here. It is anticipated that 12 400-ward institutions served by 1 central administrative and business services unit will be constructed on a large site in San Joaquin County. While each 400-ward institution's treatment program will be complete and self-contained, the overall supervision, business services, maintenance, feeding, hospital care, and communications will be provided by the central unit. Thus the operational economies of a large institution are expected with the program benefits of small 400-ward units.

The 1961-62 program will provide additional funds to complete the working drawings for an initial 400-ward institution.

Paso Robles School for Boys

The Paso Robles School for Boys is located near Paso Robles in San Luis Obispo County. The school site covers 203 acres and the institution occupies an area of approximately 40 acres. The facilities have a capacity of 455, plus hospital and detention capacity of 39. All buildings are of single-story reinforced brick construction with radiant heating. Each cottage houses 50 boys and contains both single rooms and dormitory quarters.

Budget year proposals include minor projects to correct deficiencies and improve the physical plant.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

Youth Training School

The Youth Training School, located on the site of the Institution for Men, Chino, is planned for a capacity of 1,200 wards in the 18-21 age group plus 72 hospital and detention beds. This total capacity will be available for occupancy in the 1961-62 fiscal year. The major program at this institution is vocational education. The projects provided for the 1961-62 fiscal year, a visiting room addition and a canteen building, will complete the auxiliary facilities presently planned for the operation of this institution.

Ventura School for Girls

The present physical facility of Ventura School for Girls was built in 1916 in Ventura County. A new institution is presently under construction approximately 20 miles from the present site, and will be available for occupancy in the 1961-62 fiscal year. The projects funded through the 1960-61 budget will provide for a capacity of 400, plus 16 hospital beds and 50 detention beds.

Two living units to provide an additional capacity of 100 are proposed in this budget along with necessary educational facilities. Equipment for the new institution is also included for the 1961-62 fiscal year.

STATE BUILDING PROGRAM

GENERAL ANALYSIS

The Department of Education administers 3 production centers for the blind, an orientation center for the adult blind, and 5 special schools for physically handicapped children including 1 for the education of the blind, 2 for the education and diagnosis of the cerebral palsied, and 2 for the education of the deaf.

One major project is proposed for 1961-62. The school for cerebral palsied children in Southern California now occupies rented quarters in Altadena. It is proposed to construct a new facility similar to the Northern California school on a site adjacent to the campus of Los Angeles State College. The site is to be purchased with funds provided in the 1959-60 Budget. This will give the 2 schools a capacity of approximately 32 residents each.

School for Cerebral Palsied Children, Southern California

This is a residential school for the diagnosis and treatment and the determination of an educational program for Southern California children crippled by cerebral palsy and other similar handicaps. The school now has a capacity of 30 students and occupies rented facilities in Altadena. The 1961-62 construction program proposes the construction of a new 32-capacity facility with an outpatient diagnostic clinic.

STATE BUILDING PROGRAM

PROPOSED 1961-62 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Construct new facility	–	–	$1,639,000

This project will provide a new 32-capacity school to replace the rented quarters now occupied in Altadena. It is proposed that the new facility be adjacent to Los Angeles State College of Applied Arts and Sciences to provide a demonstration laboratory for the training of teachers and other professional personnel working with handicapped children. The project includes an outpatient diagnostic clinic which is planned to provide a program similar to that in the School for Cerebral Palsied Children, Northern California.

School for the Deaf, Riverside

This residential school educates mentally normal deaf children from the elementary through the high school grades with special emphasis on language concepts.

The total student enrollment capacity is 500 including 463 resident students and 37 day students. The 1961-62 Capital Outlay program proposes a minor project for $3,000 to correct deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1961-62 EXPENDITURES

	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Minor Projects: c			
Install attention lights in classrooms (1st of 2 increments)	–	–	$3,000

ESTIMATED 1959-60 AND 1960-61 EXPENDITURES b

	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Equip gymnasium	$6,285	$3,169	–
Construct primary classroom building	—5,563 e	–	–
Minor Projects: c			
Install controlled sprinkler system	–	8,507	–
Install deep freeze box	4,498	1,502	–
Replace primary power distribution system	27,400	–	–
Replace condensate lines	—9,172 e	–	–
Alteration and improvement projects under $5,000	9,864	1,132	–
TOTAL EXPENDITURES, CAPITAL OUTLAY *(General Fund)*	$33,312	$14,310	$3,000

RECONCILIATION WITH APPROPRIATIONS

General Fund

	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
APPROPRIATIONS			
Budget Act appropriation	$43,500	$9,037	$3,000
Prior Year Balances Available:			
Budget Act of 1959, Item 338A	–	2,053	–
Budget Act of 1958, Item 357	19,939	13,654	–
Budget Act of 1958, Item 358	366	51	–
Budget Act of 1957, Item 350	53	–	–
Total Available	$63,858	$24,795	$3,000
Available in subsequent year	—15,758	–	–
Transferred to Section 16409, Government Code:			
Budget Act of 1958, Item 357	–	—10,485	–
Budget Act of 1957, Item 350	—9,225	–	–
Unexpended Balance, Estimated Savings:			
Budget Act of 1955, Item 355	—5,563	–	–
TOTAL EXPENDITURES, CAPITAL OUTLAY	$33,312	$14,310	$3,000

---

[b] Major projects for 1959-60 and 1960-61 from General Fund unless otherwise indicated.

[c] Minor projects from General Fund unless otherwise indicated.

[e] Unexpended balances previously reported as expended in a prior year.

UNIVERSITY OF CALIFORNIA

The University operates on 7 major campuses and on a number of experiment stations. Major campuses are situated at Berkeley, San Francisco, and Davis in Northern California, and at Los Angeles, La Jolla, Riverside, and Santa Barbara in Southern California. Los Angeles includes a general and medical campus and San Francisco is a medical campus.

The 1961-62 Capital Outlay program for the University totals $48,000,000 from state funds, distributed by campus as follows:

Campus	*Total*
Statewide	$161,100
Berkeley	13,520,900
Davis	4,249,800
La Jolla	3,338,000
Los Angeles	13,326,500
Los Angeles Medical Center	3,639,500
Riverside	6,316,000
San Francisco Medical Center	591,800
Santa Barbara	2,856,400
Totals	$48,000,000

In general the projects included in the 1961-62 program provide for: Classrooms, and facilities for operation of such classrooms, which are required to accommodate student enrollment at time of completion of the project; research facilities related to the teaching staff and postgraduate students; and auxiliary facilities required for operation of existing facilities, which if omitted would seriously hamper efficient operations.

Enrollment projections upon which this budget is based are as follows:

SUMMARY OF FULL-TIME STUDENTS

Campus	Actual Fall 1959	Actual Fall 1960	Estimated Fall 1961	Estimated Fall 1962	Estimated Fall 1963	Estimated Fall 1964
Berkeley	19,805	21,739	23,500	25,450	26,900	27,500
Davis	2,404	2,802	3,200	3,600	4,000	4,500
La Jolla (Scripps Institution of Oceanography and School of Science and Engineering)	44	107	150	200	300	400
Los Angeles (excluding medical)	15,740	16,399	17,050	18,250	19,150	20,750
Los Angeles Medical	703	769	1,000	1,100	1,350	1,600
Totals, Los Angeles	16,443	17,168	18,050	19,350	20,500	22,350
Riverside	1,258	1,588	1,950	2,250	2,600	2,900
San Francisco	1,660	1,842	1,900	2,000	2,050	2,100
Santa Barbara	2,865	3,450	3,900	4,550	5,050	5,700
Totals	44,479	48,696	52,650	57,400	61,400	65,450

STATE BUILDING PROGRAM

PROPOSED 1961-62 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
STATEWIDE			
Minor Projects:[c]			
Imperial Valley Field Station—improve surface drainage system	–	–	$48,500
Hopland Field Station—construct supply building, glasshouse and potting shed	–	–	32,500
Imperial Valley Field Station—construct feed preparation building, glasshouse, lathhouse and potting shed	–	–	28,000
Mt. Hamilton:			
Provide 24-inch photometric telescope	–	–	20,000
Rehabilitate and modify 36-inch telescope	–	–	22,300
Make a topographic and utility map of Mt. Hamilton	–	–	9,800
BERKELEY CAMPUS			
Equip education-psychology building	–	–	457,400
To provide a first increment of equipment for the education-psychology building funded in the Budget Act of 1958.			
Equip agricultural greenhouses	–	–	49,500
To equip agricultural greenhouses funded in the Budget Act of 1960.			
Construct environmental design building	–	–	6,018,700
To construct a building with classrooms, laboratories, and offices for college of environmental design, including architecture, city and regional planning, decorative art, landscape architecture, and sculpture.			
Construct photosynthesis laboratory	–	–	415,200
To provide matching funds for non-State funds to prepare working drawings for and construct a building with offices, laboratories, and supporting and service facilities for research in the fields of photosynthesis and chemical biodynamics.			
Construct and equip sanitary engineering building	–	–	235,000
To provide matching funds for non-State funds to prepare working drawings for, construct, and equip a building with offices, laboratories and supporting and service facilities for teaching and research in air pollution, radiological waste disposal, and water and waste reclamation.			

---

[a] From State Construction Program Fund unless otherwise indicated.

[c] Minor projects from General Fund unless otherwise indicated.

STATE BUILDING PROGRAM—Continued			
PROPOSED 1961-62 EXPENDITURES—Continued			
BERKELEY CAMPUS—Continued			
Construct and equip alterations to Haviland Hall	–	–	$348,100
To construct alterations to and equip areas in Haviland Hall to convert for the schools of social welfare and criminology the space vacated by education in its move to the new education-psychology building.			
Construct alterations to Hearst Mining Building	–	–	611,400
To construct alterations to the Hearst Mining Building (1) to convert for new occupancy the space vacated by paleontology in its move to the new earth science building and (2) to make the building as a whole more effectively usable for teaching and research in mineral technology and related fields.			
Construct alterations to life sciences building	–	–	636,000
To prepare working drawings for and construct alterations to life sciences building to convert for biological sciences departments the space vacated by psychology in its move to the new education-psychology building.			
Construct alterations to home economics building	–	–	216,900
To prepare working drawings for and construct alterations to home economics building to convert home economics areas to teaching and research facilities for graduate and agricultural experiment station programs in nutrition.			
Working drawings for physical sciences lecture hall	–	–	23,500
To prepare working drawings for a 550-seat demonstration-lecture hall and ancillary facilities for classes in physical sciences.			
Construct biochemistry building	–	–	2,822,000
To prepare working drawings for and construct a building with laboratories and offices for teaching and research in biochemistry.			
Construct utilities	–	–	391,500
To prepare working drawings for and construct utility improvements required by campus expansion; work includes augmentation of electrical substation capacity, improvement of campus electrical distribution system, and utilities extensions to site of engineering unit 1.			
Working drawings for chemistry unit 2	–	–	200,000
To prepare working drawings for a building with laboratories, offices and library and other special facilities for teaching and research in chemistry.			
Land acquisition	–	–	680,000
To purchase off-campus building sites for campus expansion projects; included are $480,000 for one-half of funds needed for a site for residence hall unit 3 which is for 968 students and $200,000 for purchases of opportunity or necessity.			
Minor Projects:[c]			
Building T-6—alter building to provide space for student and alumni placement center	–	–	12,000
Campbell Hall—install second elevator car in existing shaft	–	–	36,000
Optometry Building—alter Room 121 for use as a contact lens clinic	–	–	4,700
Life Sciences Building—alter Rooms 2051 and 2059 to provide graduate instruction and research facilities for Department of Botany	–	–	16,300
Environmental design—70 Rincon Drive—construct headhouse and fence for Department of Landscape Architecture	–	–	23,900
Life Sciences Building—alter Room 5096 to provide four faculty offices for Department of Bacteriology	–	–	13,100
Engineering Building—alter Rooms 407, 409, 410, 412 and 416 for use as civil engineering design instruction facilities	–	–	23,700
Strawberry Canyon storm damage prevention, step 2	–	–	50,000
2227 College Avenue—rehabilitate building for faculty office use	–	–	21,000
Mulford Hall—expansion of laboratory equipment and facilities in Room 26 to provide for 15 additional students	–	–	28,500
Life sciences building—rehabilitate animal room 5507 and add mezzanine for department of physiology	–	–	50,000
Lewis Hall—improve ventilation in basement rooms	–	–	16,600
Life sciences building and Wheeler Hall—improve lighting and public address systems in large classrooms	–	–	14,500
Forest products laboratory—construct sawmill shed and convert shop area to laboratories and offices	–	–	50,000
Morrison Hall—complete library bookstacks for department of music	–	–	6,900
Cowell Hospital—complete replacement of steam lines	–	–	22,000
Kleeburger Field—install lighting for intramural activities for department of physical education	–	–	26,500

---

[c] Minor projects from General Fund unless otherwise indicated.

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
STATE BUILDING PROGRAM—Continued			
PROPOSED 1961-62 EXPENDITURES—Continued			
DAVIS CAMPUS			
Equip physical sciences unit 1—(1st increment)	–	–	$50,000
To provide a first increment of equipment for the physical sciences building funded in the Budget Act of 1959.			
Construct and equip addition to physical education building	–	–	678,500
To provide general state funds to augment the 1956-57 allocation from the Fair and Exposition Fund to construct an addition to the physical education building with classrooms, offices, laboratories, and instructional activity facilities for physical education.			
Construct office section of classroom and office building unit 2	–	–	1,175,900
To construct a building with faculty offices for the social science, language and literature, agricultural economics, mathematics, education, psychology, and arts departments.			
Construct library addition to and make alterations to library-administration building	–	–	1,820,000
To prepare working plans for and construct an addition to the library-administration building to provide expanded book capacity, additional library reading rooms, and ancillary facilities; and to alter existing campus administration areas for use in meeting library needs.			
Construct veterinary science laboratory animal housing unit 2	–	–	151,700
To prepare working drawings for and construct animal quarters and supporting service facilities for teaching and research in veterinary science.			
Construct and equip poultry husbandry building for experimental birds	–	–	174,700
To prepare working drawings for, construct, and equip a building with bird rooms and supporting service facilities for physiology and nutrition research in poultry husbandry.			
Minor Projects: [c]			
Purchase fire department pumper	–	–	30,000
Construct storage compound building for departments of botany, viticulture and entomology-parisitology	–	–	25,000
Provide distilled water system for Hunt Hall and horticulture and landscape horticulture greenhouse ranges	–	–	32,000
Landscape horticulture field headquarters building—convert rooms 103 and 108 into 6 offices and 2 small laboratories for staff use	–	–	20,000
Construct air conditioning for chemistry building to provide air cooling equipment to eliminate hazards from fumes and contaminated air in laboratories	–	–	45,000
Veterinary medicine—construct sheep barn, hay storage building and livestock facilities on land areas B-3 and B-4	–	–	40,000
Demolish old viticulture building—fire and public safety hazard	–	–	7,000
LA JOLLA CAMPUS			
Complete construction and partially equip building B for school of science and engineering	–	–	520,000
To provide air conditioning for building B, as required by the interior laboratory arrangement, and to provide a second increment of equipment for building B.			
Construct building C for school of science and engineering	–	–	2,465,000
To construct a building with offices, classrooms, laboratories and supporting service facilities for graduate instruction and research in mathematics, earth sciences, life sciences, and engineering.			
Construct utilities and site development—step 2 for school of science and engineering	–	–	250,000
To construct utilities and site improvements, including utility extensions (electrical, telephone, fire alarm, gas, water, and sewer systems) and site improvements (clearing, grading, paving, curbs, gutters, sidewalks, storm drains, street and walk lighting, and landscaping) for complementing buildings A, B, and C for the new school of science and engineering.			
Minor Projects: [c]			
Make repairs and improvements to pier and sea water system	–	–	38,000
Service building—remodel building for expansion of purchasing, storehouse and receiving operations	–	–	15,000
Marine geology—construct underground storage facility for ocean research specimen cores	–	–	50,000

---

[c] Minor projects from General Fund unless otherwise indicated.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
STATE BUILDING PROGRAM—Continued			
PROPOSED 1961-62 EXPENDITURES—Continued			
LOS ANGELES CAMPUS			
Equip graduate school of business administration building	–	–	$257,300
To equip graduate school of business administration building funded in the Budget Act of 1958.			
Equip engineering unit 3	–	–	335,000
To complete funding of equipment for engineering unit 3; construction was previously funded in the Budget Act of 1958 and a first increment of equipment in the Budget Act of 1960.			
Complete addition to chemistry-geology building—step 1	–	–	182,000
To provide air-conditioning for addition to chemistry-geology building, as required by laboratory processes.			
Construct north campus library unit 1	–	–	4,943,000
To construct a library building to provide expanded book capacity, additional reading rooms and ancillary facilities.			
Construct physics unit 2	–	–	5,408,400
To construct an addition to the physics building with classrooms, laboratories and offices for teaching and research in physics.			
Working drawings for art unit 2	–	–	132,000
To prepare working drawings for a building with classrooms, laboratories and offices for teaching and research in art.			
Construct life sciences graduate instruction and research unit 2	–	–	1,297,000
To prepare working drawings for and construct an addition to the life sciences graduate instruction and research unit 1 with animal quarters and laboratories for teaching and research in bacteriology and zoology.			
Construct utilities, roads and walks to north campus area	–	–	195,000
To prepare working drawings for and construct the second step of utilities and site development in the north campus area, particularly in the vicinity of the graduate school of business administration building.			
Working drawings for university activities memorial center	–	–	163,000
To provide two-thirds of the funds needed to prepare working drawings for a multi-purpose building for campus sports activities and for meetings and cultural events with large attendance; one-third of the required funds is to come from non-State sources.			
Working drawings for addition to the administration building	–	–	72,500
To prepare working drawings for an addition to the administration building with offices and supporting facilities for campus administrative offices.			
Minor Projects:[c]			
Moore Hall—room 100—improve 500-seat lecture hall by acoustically treating walls, relocating ventilating ducts, installing public address system, and painting	–	–	25,000
University elementary school—provide ventilating system for rooms 1028, 1046, 1056, and 1068	–	–	11,000
Mechanics building—reconstruct roof trusses and other areas to make reasonably safe from earthquake damage	–	–	50,000
Install 30-inch storm drain between Westwood Boulevard and Gayley Avenue as part of campus physical drainage plan	–	–	30,700
Royce Hall—replace old (1929) electrical wiring in stage and auditorium to coincide with installation of new switchboard	–	–	7,800
Haines Hall—renovate old (1929) lecture hall—room 39—by providing new lights, floor covering, seats, and painting	–	–	50,000
Home economics building—convert room B-113 into vivarium for instruction and research in nutrition	–	–	40,000
Royce Hall—replace hazardous (1929) stage counterweight system	–	–	49,500
Royce Hall—convert classroom 240 to language laboratory for department of Italian	–	–	27,300
Art building—install exterior metal louvers on south wing of second floor to reduce excessive heat and sun glare	–	–	5,000
University elementary school—provide storage space in basement area of administration building	–	–	15,000
Music building—equip organ instruction rooms with 3 practice organs	–	–	30,000

---

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
STATE BUILDING PROGRAM—Continued			
PROPOSED 1961-62 EXPENDITURES—Continued			
LOS ANGELES MEDICAL CENTER			
Construct physical rehabilitation unit	–	–	$3,561,000
To construct a building with laboratories, clinic and hospital facilities, and supporting and service facilities for teaching and research in physical rehabilitation.			
Minor Projects: [c]			
U.C. Hospital—dietary—alter and add to kitchen facilities to provide faster service in serving line	–	–	33,000
Medical center—Cancer Research Institute—replace exhaust fans for 14 fume hoods	–	–	7,000
Construct air conditioning for medical center building to provide for Cancer Research Institute air conditioning for A level and insulate air ducts in mechanical equipment room	–	–	15,000
U.C. Hospital—nursing—alter patient nursing areas to provide suction outlets, hand rails in corridors and isolation area for patients having communicable diseases	–	–	13,500
U.C. Hospital—medical records—alter medical records area to gain additional working and filing space	–	–	10,000
RIVERSIDE CAMPUS			
Construct humanities building	–	–	3,372,400
To construct a building with classrooms, laboratories, offices, and a 500-seat lecture hall-laboratory theater for teaching and research in the humanities (languages and literature, art, music, and drama).			
Construct addition to the library building	–	–	1,795,000
To prepare working drawings for and construct an addition to the library building to provide expanded book capacity, additional reading rooms and ancillary library facilities.			
Land acquisition	–	–	650,000
To purchase 840 acres of land in the Moreno Valley to provide for land needs of the new college of agriculture and the agricultural experiment station, particularly for research on vegetable, field, and fruit crops.			
Construct improvements to field 9	–	–	60,300
To prepare working drawings for and construct improvements to field 9, including grading and an irrigation and runoff collection system, for agricultural experiment station research on virus problems, plant breeding, production and cultural practices, and agricultural chemical experiments related to vegetable and field crops.			
Construct protective filters and coolers for glasshouses—step 1	–	–	246,500
To prepare working drawings for and construct protective filters and coolers for 13 glasshouses for the prevention of air-pollution damage to plants in glasshouse experiments.			
Minor Projects: [c]			
Make site improvements on newly acquired 9-acre area adjacent to new administration building	–	–	26,000
Construct glasshouse and screenhouse for virus indexing of foreign citrus importations	–	–	50,000
Social sciences-humanities building—modify 2 classrooms to provide 8 small offices and 2 special-use laboratory rooms for department of psychology	–	–	50,000
Soils and plant nutrition building—rewire building to correct electrical overload	–	–	22,300
Develop experimental area for life sciences—step 1	–	–	43,500
SAN FRANCISCO CAMPUS			
Construct primary electrical system expansion	–	–	295,500
To prepare working drawings for and construct and/or purchase the necessary equipment and facilities to accommodate the new 12,000 volt service required by the expansion of the campus, and to replace obsolete switchgear in the existing 4,160 volt system.			
Working drawings for addition to and alterations to clinics building	–	–	174,000
To prepare working drawings for an addition to, as well as alterations to, the clinics building to provide clinics, laboratories, and supporting service and office facilities for increased undergraduate classes and graduate and postgraduate programs in medicine and dentistry, and other medical center administrative and service activities.

Minor Projects: c			
Medical sciences building—construct greenhouse for school of pharmacy	–	–	$21,300
Medical sciences building—alter room S-214 for bed-patient lecture-demonstration room	–	–	5,000
Medical sciences building—convert part of the nursing arts laboratory to six faculty offices	–	–	26,000
Clinics building—alter room C-645 for dental clinic laboratory use	–	–	4,200
Medical sciences building—modify ventilation system to reduce noise level and maintenance work	–	–	8,600
Medical sciences building—alter and improve physiology and biochemistry chemical laboratories for school of pharmacy	–	–	44,000
Moffitt Hospital—modify ventilation system in dietary department to eliminate excessive heat-humidity areas	–	–	5,700
Moffitt Hospital—alter radioactive isotope handling rooms for use as office-patient radioactivity measurement rooms	–	–	7,500
SANTA BARBARA CAMPUS			
Equip library unit 2	–	–	191,000
To equip library unit 2 funded in the Budget Act of 1959.			
Construct classroom wing of classroom and office unit 2	–	–	1,074,600
To construct a building with classrooms and teaching and research laboratories for economics, history, political science, mathematics, geography, and sociology-anthropology, and facilities for a campuswide digital computer center.			
Construct utilities and site development	–	–	208,800
To prepare working drawings for and construct utility and site improvements including walks and curbs in areas of new buildings, road electroliers and walk lights, underground electrical and telephone ducts, and plantings.			
Construct central laboratory for radioactive material	–	–	666,000
To prepare working drawings for and construct a building with laboratories and supporting service facilities for instruction and research in physics, chemistry, and biology involving radioactive materials.			
Land acquisition	–	–	596,700
To provide for payment toward purchase of 111 acres contiguous to the campus to permit campus expansion to west. Total cost is $1,560,000.			
Minor Projects: c			
Science unit 1—complete equipping by providing distilled water still, specimen cabinets, steel shelving and 200 steel trays for specimen cabinets	–	–	27,000
Auditorium—alter and improve seating area, stage and lighting	–	–	42,300
Physical education—prepare site for and construct two tennis courts and a bangboard for teaching, and provide portable bleachers and protective fence between spectators and track	–	–	50,000
ESTIMATED 1959-60 AND 1960-61 EXPENDITURES b			
STATEWIDE			
Preliminary Plans:			
General Fund	$24,500	$1,122,100	–
State Construction Program Fund	860,620	–	–

General Fund	–	242,000	–
State Construction Program Fund	200,000	–	–
Land acquisition for engineering building	600,000	–	–
State Construction Program Fund			
Equip Cafeteria:			
General Fund	80,000	–	–
State Construction Program Fund	120,000	–	–
Construct physical education courts	113,300	–	–
State Construction Program Fund			
Construct Cory Hall improvements	399,284	–	–
State Construction Program Fund			
Construct and equip engineering building	629,266	–	–
State Construction Program Fund			
Working drawings for architecture building	217,300	–	–
State Construction Program Fund			
Minor Projects: [c]			
Harmon Gymnasium—alter room 18 to consolidate storage and equipment issue facilities, and to release issue room for use as laboratory	–	6,300	–
Forest products laboratory—provide improvements to controlled environment room	–	21,000	–
Forest products laboratory—construct water cooling tower	–	8,800	–
Doe Library—install instructional exhibit facilities in wide corridors of third floor for department of art	–	6,000	–
Life sciences building—rehabilitate rooms 2556 and 2558 for department of physiology	–	13,200	–
Botanical gardens—construct 2 greenhouses	–	12,000	–
Forest projects laboratory—construct storage shed	–	8,800	–
Provide electron microscope for inter-department use	–	57,000	–
Life sciences building—replace ammonia refrigeration system with freon system	–	20,000	–
Improve lighting in various buildings	–	50,000	–
Life sciences building—alter rooms 1030 and 2040 for increased effectiveness as botany teaching laboratories	–	8,800	–
LeConte Hall—construct lead shield around fume hood for protection from radioactivity	–	7,700	–
Hesse Hall—replace roof membrane over room 240 and install rollaway metal door in north wall of room 240	–	6,300	–

---

[c] **Minor projects from General Fund unless otherwise indicated.**

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
STATE BUILDING PROGRAM—Continued			
ESTIMATED 1959-60 AND 1960-61 EXPENDITURES—Continued			
BERKELEY CAMPUS—Continued			
Minor Projects—Continued			
Cowell Hospital—provide auxiliary electrical generator	–	$42,000	
Agriculture Hall—develop room 204 as a teaching laboratory	–	5,000	–
Botanical gardens—install new electrical distribution system	–	3,000	–
Harmon Gymnasium—alter rooms 5-B, 5-C, and 5-D to provide expanded class areas	–	4,000	–
Sproul Hall—provide ventilation for room 108	–	9,000	–
Doe Library—rehabilitate men's washrooms	–	20,000	–
Blodgett Experimental Forest—construct garage, workshops, and storage shed	–	49,500	–
Cowell Hospital—replace steam lines	–	21,000	–
Life sciences building—rehabilitate room 3545 for department of bacteriology	–	6,900	–
Life sciences building—remodel rooms 2024 and 2024-A and put display cabinets in corridor	–	17,000	–
Harmon Gymnasium — alterations and repairs to swimming pools	–	21,000	–
Life sciences building—refurnish room 3530 for bacteriology	–	32,500	–
Various buildings—rehabilitation of 4-KV switches	–	27,500	–
Strawberry Canyon—storm damage prevention—step 1	–	50,000	–
Hesse Hall—purchase and install main electrical panel, room 120 for engineering	–	6,000	–
Poultry—botanical garden—rehabilitate gas line	–	7,000	–
Gill Tract—remodel headhouse No. 1 for agriculture-biological control	–	11,200	–
Donner Laboratory—alteration and extension of teaching laboratories rooms 315, 317, 321	–	14,400	–
Richmond field station—enlarge towing channel and building	–	23,000	–
General campus—repair water pressure valves—various buildings	–	10,000	–
Life sciences building—increase distilled water facilities	–	22,500	–
Enlarge 4-KV feeder system of campus main electrical system	$60,000	–	–
Convert to academic and administrative use part of storehouse building and residences at 2620 Bancroft Way, 2222 Piedmont Avenue and 2232 Piedmont Avenue	45,000	–	–
Engineering building—alter attic (room 500) to provide effective storage facilities	18,500	–	–
Life sciences building—alter refrigeration room and laboratory room 3521 for department of bacteriology	9,500	–	–
Life sciences building—partition room 4013 into offices for department of zoology	2,650	–	–
Equip room 50 of home economics building as nutrition research laboratory	23,000	–	–
Install root temperature tanks in plant pathology greenhouse	5,200	–	–
Fair and Exposition Fund			
DAVIS CAMPUS			
Construct general campus utilities	–	765,600	–
Construct Biological Sciences Unit 2:			
General Fund	–	3,247,000	–
Fair and Exposition Fund	170,300	–	–
Construct classroom unit 2	–	1,325,000	–
Horticulture-viticulture building—completion	–	620,000	–
Construct physical sciences unit 1	1,592,890	–	–
State Construction Program Fund			
Construct General Campus Utilities—Step 2:			
General Fund	361,500	–	–
Fair and Exposition Fund	363,000	–	–
Equip auditorium	30,300	–	–
Fair and Exposition Fund			
Minor Projects: [c]			
Complete remodeling of psychrometric chamber for animal husbandry	–	16,000	–
Construct access roads to new residence hall unit 4	–	17,500	–
Food technology building—repair equipment in pilot plant	–	30,000	–
Poultry husbandry building—provide sun control	–	3,400	–
Remodel barn on Hopkins Tract for animal husbandry	–	21,900	–
Provide improvements to building on Hopkins Tract for better use as poultry husbandry field headquarters	–	3,200	–

Enrollments

The construction programs for the 15 state colleges are based on a projected enrollment of 96,890 regular students (FTE) in 1964-65. This enrollment estimate is an increase of 26,230 over the 70,660 regular students (FTE) anticipated in 1961-62. This differs from enrollment estimates for support budget purposes where full-time equivalents of all students are considered. In California, enrollments in the state colleges during the next several years are estimated to increase at a rate many times that of the growth of the population as a whole.

These enrollments have been estimated from statistics based on prior experience of the progression of students from high schools to the colleges and through the various collegiate levels. The state college data includes a compilation of the numbers of students by county of origin in order to allow a reasonably accurate distribution of students by college or university area. The projections also assume a continual increase in the percentage of population attending college in tax-supported institutions.

The following table outlines actual enrollments of regular students in the state colleges from 1958-59 to 1959-60 and estimated enrollments from 1960-61 through 1964-65.

---

[d] Expenditures from bond funds not included in budget totals.

Totals, State Colleges	48,851	52,955	61,630	70,660	79,160	87,430	96,890

Capacity

The basic unit for measuring classroom student capacity is the student station. The stations are weighted depending upon whether they are in lecture rooms, activity rooms, or laboratories. A room is categorized by its primary use. A student station count is assigned the room based on accepted measurements, and weighting, based upon the time of required attendance per unit of student credit in each type of classroom.

The weighting is predicated on utilization standards which fix minimum utilization at 30 hours per week for lecture rooms, 25 hours per week for activity rooms and 20 hours per week for laboratories. Lecture rooms are programed to be occupied an average of 75 percent of student station capacity each hour of use, while activity rooms and laboratories are programed to be occupied an average of 85 percent of student station capacity each hour of use.

The categorization of a room as lecture, laboratory, or activity can shift from year to year depending on its planned use. For example, a large enrollment in art courses will result in the shifting of lecture classrooms to art activity classrooms. These shifts can result in changes in the measured capacity of any given college plant from one school year to the next.

A fourth categorization is that of earned capacity. This is the capacity that results from actual enrollments in courses that use facilities which cannot be measured in terms of student stations. The best example of this type of capacity is the gymnasium.

The existing and funded capacity of the various college plants based on planned 1964 use is shown below.

Summary of Capacity—Existing and Funded—Available in the Fall of 1964

	LECTURE	ACTIVITY	LABORATORY	EARNED	TOTAL
Chico State College	2,105	781	236	212	3,334
Fresno State College	5,000	545	410	396	6,351
Humboldt State College	1,350	191	355	164	2,060
Long Beach State College	8,671	1,193	946	665	11,475
Los Angeles State College of Applied Arts and Sciences	7,732	1,398	779	685	10,594
Orange County State College	–	88	–	117	205
Sacramento State College	3,422	462	340	249	4,473
San Diego State College	6,791	673	1,105	376	8,945
San Fernando Valley State College	2,237	1,029	599	372	4,237
San Francisco State College	4,580	1,344	487	382	6,793
San Jose State College	9,269	2,223	846	963	13,301
California State Polytechnic College:					
San Luis Obispo Campus	4,800	107	1,107	217	6,231
Kellogg-Voorhis Campus	3,150	85	570	270	4,075
Totals	59,107	10,119	7,780	5,068	82,074

The total of the presently existing and funded capacity for the Fall of 1964 is programed at 82,074 FTE. Enrollments for the Fall of 1964 are estimated at 96,890 FTE; this would indicate a deficiency of 14,816 FTE to meet capacity needs in September of 1964. The construction projects proposed in this budget will provide a capacity for 8,301 FTE, and projects for which working drawing funds are requested will provide capacity for 10,295 FTE.

The primary difference between the total programed capacity of 100,670 FTE and projected enrollments of 96,890 FTE, in the amount of 3,780 FTE, is the result of planning several very large specialized facilities to serve enrollments beyond the Fall of 1964. Because of the economies inherent in constructing large units, the programing for specialized facilities provides for lead time of 6 academic years rather than the 3 academic years provided for nonspecialized facilities. The remaining difference is accounted by existing overcapacities at 3 colleges caused by prior construction of such facilities or by leveling off of enrollment growth.

Status of Presently Authorized Capacity and 1961-62 Budget Provisions

	Enrollment	Capacity
1964-65 enrollment of regular students (FTE)	96,890	–
1964 existing and funded capacity	–	82,074
1961-62 proposed projects (construction)	–	8,301
1961-62 proposed projects (working drawings)	–	10,295
Totals	96,890	100,670

---

[1] Includes FTE of physical education and production activities (earned FTE).

[2] These colleges will be operating in rented facilities during this time.

STATE COLLEGE SYSTEM—Continued

SUMMARY—Continued

PROJECTS PROPOSED FOR FINANCING IN 1961-1962

The total Capital Outlay program for the state college system is $40,456,195. Appropriations for 1961-62 total $40,331,195 and $125,000 has been reappropriated from the 1960-61 fiscal year. Appropriations for major construction projects total $39,255,970 or 81 percent of the total. The balance is composed of projects for the purchase of equipment, $6,550,950, and minor construction projects of $1,075,225.

The Capital Outlay program is summarized below by the type of project together with a general explanation of the projects. Additional detail is included in the budgets for the individual colleges.

New Colleges

One project at $510,000 is included which will provide for the orderly development of the new campus of Stanislaus State College located near Turlock. The permanent site has been purchased and masterplanning will proceed during the current year. The $510,000 will provide for site development and working drawings of the initial permanent facilities.

Science and Engineering Facilities

The importance of science and engineering programs has resulted in an expanded enrollment in these areas, necessitating an expansion of existing facilities. Included in this budget to meet these expanded enrollments are 8 projects (Alameda, Chico, Los Angeles, Orange, San Fernando, San Jose, and 2 at Kellogg-Voorhis, including 1 remodeling project) totaling $14,865,900 which is 37.9 percent of the total Capital Outlay appropriations for construction.

Physical Education Facilities

There are 3 projects included in the budget to provide physical education facilities. These projects are for Humboldt, San Fernando, and Kellogg-Voorhis.

Other Instructional Facilities

A total of $10,787,090 or 27.5 percent of the Capital Outlay program for construction is proposed for other instructional facilities. These 12 projects located on 9 campuses, are classroom buildings to provide the lecture, activity, and laboratory capacity required to serve the increasing enrollments. Ten of these projects are for working drawings only. Construction funds will be provided in the 1962-63 Budget. Sixty thousand dollars is provided for working drawings for a library addition at Fresno State College.

Site Development

Four projects totaling $1,583,830 for site development are included. Three of these are to provide for water development and utility and road improvements. The fourth project is for utilities and campus development at Alameda State College.

Site Acquisition

Two projects are included to purchase land for future construction and parking in the amount of $2,300,000 which is 5.9 percent of the total Capital Outlay appropriations for construction. One of the 2 projects is for Los Angeles State College and the other is for San Fernando Valley State College.

Parking Facilities

A parking program is included in the amount of $590,600. These appropriations will provide additional parking spaces for students and employees. Projects are included for 4 colleges which are: Humboldt, Los Angeles, San Diego, and Kellogg Voorhis.

Other

The remaining appropriations for capital outlay total $1,533,200 which includes remodeling the administration building at Chico, construction of a corporation yard at Humboldt, working drawings for a student health building at Long Beach, co struction of a feeding facility at Los Angeles; an additio boiler at San Diego, street improvements at San Fernar Valley and working drawings for a faculty office building San Francisco.

Equipment

$6,550,950 is included in this budget for equipping building and facilities which are scheduled for completion in 1961-62. T total cost of this equipment is 16.2 percent of the total Capi Outlay appropriations.

Minor Capital Outlay

The final portion of the Capital Outlay program is a t of $1,075,225 which is included in this budget for projects minor Capital Outlay including a number of equipment proj for new instructional programs. The total of minor Cap Outlay is 2.7 percent of the total Capital Outlay appropriatio

[1] In accordance with 1960 Budget Act.

State College for Alameda County

The State College for Alameda County was established by Chapter 1681, Statutes of 1957, with an appropriation of $1,650,000 for the site acquisition, site development and improvements. In addition, $830,108 was appropriated by the Budget Act of 1958 for construction, improvement and site development.

The college opened in rented facilities in September 1959, with an FTE of 140, and an estimated 480 FTE for 1960-61. Enrollments are estimated to increase to 815 FTE in the 1961-62 fiscal year.

A site in the hills east of Hayward has been selected by the Public Works Board and occupancy of the initial permanent buildings is scheduled for the fall of 1963.

The acquisition and development of the site is expected to cost approximately $3,000,000. The City of Hayward has agreed to contribute approximately $739,000, to be divided between site development and the construction of utilities and roads approaching the campus. 1964-65 enrollment is estimated at 1,560 regular students (FTE) while the two initial buildings will provide capacity for 1,642 regular students (FTE).

This budget includes the funds for the construction of the first permanent buildings, the fine arts building and the science building; site development for utilities and campus improvements required for the opening of this campus for instruction and an equipment requirement is included to meet the needs of a rapidly developing curricula being offered in rented facilities.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
STATE BUILDING PROGRAM			
PROPOSED 1961-62 EXPENDITURES [a]			
Construct fine arts building	–	–	$2,356,500
This project will provide initially for instructional facilities for home economics, art, business, economics and social and behavioral sciences. Initial instructional capacity totals 1,018 FTE. The executive and student personnel functions will also be housed in this building.			
Construct science building	–	–	5,415,000
This project will provide ultimately for 750 FTE in the various fields of science. During the developmental stages of this college, this building will house science, music education, library and the audio-visual functions. Initial instructional capacity totals 624 FTE.			
Site development—phase II	–	–	943,800
This project will provide the utility and campus improvements for the permanent site.			
Initial complement of equipment—2d increment	–	–	400,000
This project will provide equipment to service the instruction program.

STATE COLLEGE SYSTEM—Continued

Chico State College

Chico State College, established in 1887, offers courses in teacher education, general education, arts and sciences, and certain occupational fields including engineering and agriculture.

The college is located on a site totaling 111 acres in the City of Chico and additional land is being acquired for a science building, engineering building, corporation yard, and a site of 647 acres has recently been acquired for a college farm. This budget includes funds for the second phase to remodel the administration building, working drawings for an engineering building and equipment for phase I of the remodeling of the administration building and men's gymnasium. An enrollment of 3,160 regular students (FTE) is anticipated in 1964-65. Presently existing and funded capacity totals 3,334 (FTE).

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
STATE BUILDING PROGRAM			
PROPOSED 1961-62 EXPENDITURES[a]			
Remodel administration building—phase II	–	–	$410,600
This project is the second phase to remodel the existing administration building. This project will modernize the administrative sections of the building and provide air conditioning of the entire building.			
Working drawings for engineering building	–	–	65,000
This project will provide instruction capacity for 86 FTE and necessary auxiliary rooms to serve enrollments in civil, electrical, and mechanical engineering.			
Equip remodeled administration building—phase I	–	–	4,060
This project will provide equipment for the remodeled administration building phase I project financed by the Budget Act of 1960.			
Equip men's gymnasium	–	–	98,930
This project will equip the men's gymnasium funded by the Budget Act of 1959.			
Minor Projects:[c]			
Farm development—phase II	–	–	50,000
Initial complement of equipment for engineering (2d increment)	–	–	49,000
Alteration and improvement projects under $5,000	–	–	24,850

Fresno State College

Fresno State College is a 5-year institution offering programs in teacher training, agriculture and general education. The college is located on sites totaling 1,324 acres on the northeast side of the City of Fresno. The estimated enrollment for 1964-65 is 4,960 students (FTE). Presently existing and funded capacity totals 6,351 (FTE). This budget includes working drawings for a library addition and equipment for men's gymnasium.

STATE BUILDING PROGRAM

PROPOSED 1961-62 EXPENDITURES [a]

Working drawings for library addition This project will provide working drawings of an addition to the college library. This addition will provide reader stations and book stacks for a library to serve an enrollment of 5,500 FTE. This project will also provide for a campuswide audio-visual service facility.		–	$60,000
Equip men's gym This project will provide the equipment for the men's gym financed by the Budget Act of 1960.	–	–	43,200
Minor Projects: [c]			
Farm development projects—phase I	–	–	35,000
Sidewalk improvements	–	–	10,000
Install automatic sprinklers—phase I and II	–	–	45,500
Provide electrical distribution system	–	–	45,300
Alteration and improvement projects under $5,000	–	–	5,150

STATE COLLEGE SYSTEM—Continued

Humboldt State College

Humboldt State College is a fully accredited, 5-year institution offering programs—both graduate and undergraduate—in liberal arts, teacher education, and vocational training. The latter includes curriculums in forest management, fisheries, and game management. Humboldt State College is located on a site of approximately 88 acres in the City of Arcata. An enrollment of 2,070 regular students (FTE) is predicted for 1964-65. Presently existing and funded capacity totals 2,060 (FTE).

This budget includes funds for the construction of a corporation yard and outdoor physical education facilities; working drawings to remodel the existing library, and provide for a marine fisheries laboratory; provide additional parking and to equip the education psychology building, library, corporation yard, and engineering curricula.

STATE BUILDING PROGRAM

PROPOSED 1961-62 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Construct corporation yard	–	–	$480,000
Equip corporation yard	–	–	19,540
This project will provide the necessary corporation yard facilities to serve the entire campus. This project will free the existing engineering building which is being used for a corporation yard and is needed to serve engineering enrollment.			
Working drawings for remodeling library	–	–	20,000
This project will provide for the working drawings to remodel the existing library to a classroom building. A new library is currently under construction. This project will provide an additional FTE capacity of 400.			
Construct outdoor physical education facility	–	–	226,400
This project provides for handball courts, tennis courts, and a comfort station. Seventy parking spaces will be provided within the scope of this project.			
Working drawings for marine fisheries laboratory	–	–	32,550
This project will provide working drawings for a marine fisheries laboratory to provide necessary instructional facilities in marine biology. This project has an instructional capacity of 10 FTE.			
Construct surface parking	–	–	133,500
This project will provide 300 parking spaces for students and employees.			
Equip education-psychology building	–	–	115,200
This project will provide equipment for the education-psychology building funded by the Budget Act of 1959.			
Equip library building	–	–	122,100
This project will provide equipment for the college library funded by the Budget Act of 1960.			
Equip engineering curricula	–	–	88,475
This project will provide equipment for engineering curricula recently approved by the State Board of Education.			
Minor Projects:[c]			
Alteration to fieldhouse	–	–	15,000
Improvements and equipment—college forest	–	–	17,000
Remodel founder's hall	–	–	32,200
Site development	–	–	50,000
Alteration and improvement projects under $5,000	–	–	3,850

ESTIMATED 1959-60 AND 1960-61 EXPENDITURES[b]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

Long Beach State College

This college was established in 1949 as an upper division liberal arts college, and beginning in the fall of 1953, the college was authorized to offer lower division courses. In the fall of 1951 it was moved to a permanent 320-acre site donated by the City of Long Beach.

An enrollment of 10,610 regular students (FTE) is estimate for 1964-65. Presently existing and funded capacity totals 11,47 FTE. This budget includes working drawings for the studer health service building and equipment for the engineering buil ing, administration addition, fine arts wing No. 3 and scien wing No. 3.

STATE BUILDING PROGRAM

PROPOSED 1961-62 EXPENDITURES[a]

	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Working drawings for health service building	–	–	$43,600
This project provides for the working drawings for a health service building to provide student health services.			
Equip engineering building—2d increment	–	–	761,800
This project provides the equipment for the engineering building financed by the Budget Act of 1959.			
Equip administration addition	–	–	17,750
This project provides the equipment for the administration addition financed by the Budget Act of 1959.			
Equip fine arts wing No. 3	–	–	260,945
This project provides the equipment for the fine arts wing No. 3 financed by the Budget Act of 1959.			
Equip science wing No. 3—2d increment	–	–	56,780
This project provides equipment for the science wing No. 3 financed by the Budget Act of 1958.			
Minor Projects:[c]			
Alterations and equipment—silversmith laboratory	–	–	21,600
Alteration and improvement projects under $5,000	–	–	1,500

STATE COLLEGE SYSTEM—Continued

Los Angeles State College of Applied Arts and Sciences

Los Angeles State College, established in 1947, offers courses in business, economics, education, fine arts, applied arts, music, social sciences, natural sciences, biological sciences, technical sciences, physical education and special education.

The campus of the college is located at the intersection of Eastern Avenue and the San Bernardino Freeway on a campus of 97 acres. Classroom buildings completed or funded have a capacity of 10,594 regular students (FTE), while the projecte total enrollment of regular students (FTE) for 1964-65 14,300 FTE. This budget includes a snack bar to be constructe on the roof of classroom building No. 1, working drawings fo an engineering addition, working drawings for another gener classroom building, equipment for the science program and si acquisition and development for parking.

Orange County State College

Orange County State College is located on a site of 238 acres in the vicinity of Fullerton. This college is offering instruction in temporary buildings on the permanent site. Funds for site development and working drawings of the first building were appropriated in the Budget Act of 1960. The 1964-65 enrollment is estimated at 2,350 regular students (FTE). The 1964-65 capacity which consists of the temporary facilities and the 2 permanent buildings will be 2,725 FTE. This budget includes construction funds for the first building and working drawings for a second building.

Sacramento State College

Sacramento State College established in 1947 offers courses in teacher training, liberal arts, general education and occupational curriculums leading to a bachelor's degree in various fields.

The college moved to its present 265-acre site in 1953 to accommodate the increase in student enrollments.

A regular student enrollment of 4,880 FTE is estimated for 1964-65. Presently existing and funded capacity totals 4,473 FTE. This budget includes working drawings for a music building addition and equipment for the women's gymnasium.

San Diego State College

This college is located on a 268-acre site within the City of San Diego. An enrollment of 11,220 regular students (FTE) is anticipated for 1964-65. Presently existing and funded capacity totals 8,945 FTE.

San Diego State College offers 57 approved undergraduate majors and 34 Masters degrees. Major growth during recent years has occurred in the sciences, including mathematics, and in business administration, both at the graduate and undergraduate levels.

This budget includes: working drawings for two major classroom buildings, the business administration and mathematics building which has an FTE capacity of 2,155 students, and the little theater and speech building which has an FTE capacity of 159 students; equipment for life science building; parking facilities; and boiler addition.

STATE BUILDING PROGRAM

PROPOSED 1961-62 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Working drawings for classroom building This project provides working drawings for a classroom building to provide capacity for 2,155 FTE in business administration and mathematics.	–	–	$180,000
Construct boiler addition This project will provide the heating capacity needed to service the enlarging physical plant of this campus.	–	–	123,500
Equip life science and psychology building—1st increment This project provides equipment for the life science and psychology building financed by the Budget Act of 1960.	–	–	500,000
Working drawings for little theater This project will provide the working drawings for a little theater of 250 seats for stage and drama productions for 114 FTE.	–	–	80,000
Construct parking—phase I This project will provide for the site development for a future parking facility for 500 parking spaces for students and faculty.	–	–	173,000
Minor Projects:[c]			
Improve parking lots	–	–	20,000
Pave alleyway between Montezuma Road and College Avenue	–	–	5,350
Construct storage area	–	–	8,600
Provide acoustical treatment in industrial arts building	–	–	6,500
Provide ventilation in humanities-social science building	–	–	8,450
Alteration and improvement projects under $5,000	–	–	9,200

STATE COLLEGE SYSTEM—Continued

San Fernando Valley State College

San Fernando Valley State College became a separate state college July 1, 1958, by authority of Chapter 2265, Statutes of 1957. The campus, located in Northridge, comprises 245 acres. An enrollment of 7,450 regular students (FTE) is anticipated for 1964-65. Presently existing and funded capacity totals 4,237 FTE. This budget includes site acquisition for future parking, construction of classroom building No. 1, working drawings for an engineering building and an administration-classroom building, construction of outdoor physical education facilities, equipment for gymnasium, and street improvements.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
STATE BUILDING PROGRAM			
PROPOSED 1961-62 EXPENDITURES [a]			
Site acquisition	–	–	$1,300,000
This project will provide for the acquisition of 55 acres for future parking for students and employees.			
Construct classroom building No. 1	–	–	7,108,040
This project will provide for the construction of classroom building No. 1 which will provide instruction capacity for 4,669 FTE, auxiliary facilities, and faculty offices.			
Working drawings for engineering building	–	–	250,000
This project will provide for working drawings for the construction of an engineering building. This project includes 971 FTE and includes general classrooms, engineering laboratories, and faculty offices.			
Working drawings for administration-classroom building	–	–	200,000
This project provides for working drawings for an administration building. Initially a portion of this building will provide instruction capacity for 717 FTE.			
Construct outdoor physical education facilities—augmentation	–	–	148,000
This project will provide for phase II of the outdoor physical education development to provide facilities to meet increasing enrollments.			
Construct street improvements	–	–	75,000
This project will provide for the paving of Zelzah Avenue bordering the campus.			
Equip gymnasium, pool and outdoor physical education facilities	–	–	165,550
This project provides equipment for the gymnasium financed by the Budget Act of 1958 and the pool financed by the Budget Act of 1959.			
Minor Projects: [c]			
Initial complement of equipment—engineering	–	–	46,950
Initial complement of equipment—geography	–	–	26,700
Initial complement of equipment—psychology	–	–	20,900
Remodel building H for child study center	–	–	7,550
Alterations of administration offices	–	–	5,000
ESTIMATED 1959-60 AND 1960-61 EXPENDITURES [b]			
Acquisition of site	$679,218	$196,922	–
Equip temporary buildings	241	–	–
Equip additional temporary buildings	—17,018 [e]	–	–
Equip library building	1,384	188	–

STATE COLLEGE SYSTEM—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

San Francisco State College

San Francisco State College, first established in 1899, now occupies a site of 93 acres between 19th Avenue and Lake Merced Boulevard.

An enrollment of 8,650 regular students (FTE) is anticipated for 1964-65. Presently existing and funded capacity totals 6,793 (FTE). This budget includes working drawings for a psychology and air science building, a faculty office building and an addition to the music and speech building. Equipment for the multistory parking facility and engineering program is included.

STATE BUILDING PROGRAM

PROPOSED 1961-62 EXPENDITURES[a]

	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Working drawings for psychology and air science building	–	–	$60,000
This project will provide working drawings for additional psychology laboratories and auxiliary facilities and lecture and specialized facilities for the Air Force ROTC program. Total instructional capacity of this project is 162 FTE.			
Working drawings for music and speech addition	–	–	90,000
This project will provide working drawings for instructional facilities for music and drama, a music hall and an instructional television facility. Total instructional capacity of this project is 235 FTE.			
Working drawings for classroom building No. 2 addition	–	–	20,000
This project will provide working drawings for an additional faculty office building to provide for the increasing number of teachers on the staff.			
Equip multistoried parking facility	–	–	10,125
This project provides equipment for the multistory parking facility financed by the Budget Act of 1959.			
Equip engineering curricula—2d increment	–	–	75,000
This project provides equipment required to meet the needs of the engineering curricula approved by the State Board of Education.			
Minor Projects:[c]			
Provide television distribution system	–	–	50,000
Construct ramps for handicapped	–	–	6,000
Alterations to little theater	–	–	5,000
Alterations to microbiology laboratories—phase I	–	–	20,000
Construct basketball courts	–	–	15,000
Improve pumping system of sanitary sewer	–	–	19,750
Alteration and improvement projects under $5,000	–	–	5,000

ESTIMATED 1959-60 AND 1960-61 EXPENDITURES[b]

	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Provide additional electrical services	–	$113,700	–
Equip creative arts basement	–	3,170	–

San Jose State College

The San Jose campus was established in 1870, and is a fully accredited 5-year college offering programs in general education and teacher training. This college is located on a 107-acre site in the City of San Jose. The enrollment estimate of regular students for 1964-65 is 12,240 FTE. Presently existing and funded capacity totals, 13,301 FTE. Additional facilities proposed in this budget include working drawings for science building No. 2 and equipment for the engineering building and aeronautics building.

STATE BUILDING PROGRAM

PROPOSED 1961-62 EXPENDITURES [a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Working drawings for science building No. 2 This project will provide for working drawings for a science building to support the undergraduate and graduate programs in physical science. This facility will provide teaching stations for 845 FTE.	–	–	$500,000
Equip engineering building—1st increment This project will provide equipment for the engineering building funded by the Budget Act of 1958.	–	–	2,000,000
Equip aeronautics building This project will provide equipment for the aeronautics building funded by the Budget Act of 1958.	–	–	200,290
Minor Projects: [c]			
Provide electrical distribution system—phase III	–	–	45,000
Initial complement of equipment—geology	–	–	36,000
Initial complement of equipment—meteorology	–	–	22,450
Alteration and improvement projects under $5,000	–	–	14,650

ESTIMATED 1959-60 AND 1960-61 EXPENDITURES [b]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Site acquisition	$1,363,919	$1,492,118	–
Construct audio-visual building addition	–	390,400	–
Working drawings for police-military science building	–	110,000	–
Construct women's gymnasium addition	–	2,090,100	–
Extend steam services, phase II	–	120,000	–
Equip audio-visual building addition	–	57,860	–
Equip Library Addition:			
General Fund	–	22,000	–
State Construction Program Fund	–	419,600	–
Equip Music Building Addition:			
General Fund	–	19,900	–
State Construction Program Fund	–	80,000	–
Equip Speech and Drama Building Addition:			
General Fund	–	3,200	–
State Construction Program Fund	–	29,200	–
Equip Outdoor Physical Education Facilities:			
General Fund	–	4,400	–
State Construction Program Fund	–	8,200	–
Remodel industrial arts area for corporation yard	82,422	–	–

Sonoma State College

Funds for site acquisition for a new state college in the North Bay area were appropriated by Chapter 1681, Statutes of 1957. On March 2, 1960, the State Public Works Board selected a site near Cotati in Sonoma County.

Chapter 66, Statutes of 1960, First Extraordinary Session, provides for the establishment of a new state college in Sonoma County. The support budget includes funds for opening this college in the fall of 1961 in rented facilities.

Stanislaus State College

Funds for site acquisition for a new state college in Stanislaus County were appropriated by Chapter 1681, Statutes of 1957. On December 9, 1959, the State Public Works Board selected a site of 220 acres 1 mile north of the City of Turlock and the property has been acquired. The budget act of 1960 appropriated an additional $200,000 for the development of the college.

Stanislaus State College opened classes in September, 1960, in rented facilities on the Stanislaus County Fairgrounds. This budget includes $510,000 for master plans, site development, and working drawings for a classroom building, library-cafeteria, utilities, and outdoor physical education facilities.

California State Polytechnic College

California State Polytechnic College provides occupational education at the collegiate level in agriculture, engineering, and the arts and sciences.

The campus at San Luis Obispo is located on a site of 2,838 acres and including existing and funded buildings has a capacity of 6,231 regular students (FTE). An enrollment of 6,810 (FTE) is anticipated for 1964-65. This budget includes projects to remodel an administration building for additional classrooms, a site development project and equipment for the food processing building, engineering and physical science buildings.

The Kellogg-Voorhis campus, located near Pomona has an existing and funded capacity of 4,075 regular students (FTE). An enrollment of 5,370 (FTE) is anticipated for 1964-65. To accommodate this enrollment this budget includes working drawings for an engineering addition, working drawings for a gymnasium, and remodeling of physics laboratories. Other projects include water development, site development and equipment for the administration-classroom building and the agriculture-classroom building. An additional 200 parking spaces are included for students and employees.

STATE BUILDING PROGRAM

PROPOSED 1961-62 EXPENDITURES [a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
San Luis Obispo Campus:			
Remodel administration building—phase I	–	–	$115,000
Equip administration building	–	–	113,780
This project provides for the remodeling of the administration building to provide for additional capacity for business and art education and improve the electrical and ventilation system. The remodeling of the entire building will provide an additional 552 FTE of instructional capacity.			
Site development	–	–	243,030
The project provides for the main trunk line, distribution system and storage of agriculture irrigation water. This project also provides for enlarging of sewage system and improvement of the electrical distribution system.			
Equip food processing building	–	–	256,900
This project provides for the equipment for the food processing building financed by the Budget Act of 1959.			
Equip physical science building	–	–	137,600
This project provides for the equipment for the physical science building financed by the Budget Act of 1960.			
Equip engineering program—1st increment	–	–	260,100
This project provides equipment for engineering programs.			
Minor Projects: [c]			
Initial complement of equipment—metallurgy	–	–	19,240
Convert laboratory to metallurgy laboratory	–	–	10,080
Purchase and install hammer mill	–	–	13,450
Reroof agriculture engineering building	–	–	27,000
Alteration and improvement projects under $5,000	–	–	7,705

---

[a] From State Construction Program Fund unless otherwise indicated.

[c] Minor projects from General Fund unless otherwise indicated.

[d] Expenditures from bond funds not included in budget totals.

PROPOSED 1961-62 EXPENDITURES—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Kellogg-Voorhis Campus:			
Working drawings for engineering buildings	–	–	$200,000
This project provides working drawings for engineering buildings to provide laboratories and auxiliary facilities for electrical, aeronautical, industrial and mechanical engineering. The capacity of this project is 919 FTE.			
Working drawings for men's gymnasium and pool	–	–	100,000
This project provides working drawings of a men's gymnasium and pool to serve the increasing enrollments. Instructional capacity for 150 FTE is included.			
Remodel physics building	–	–	42,500
Equip physics building	–	–	67,740
This project provides for the remodeling and equipment necessary to provide for 2 physics rooms to meet enrollments in physics.			
Water development—off-campus	–	–	164,000
This project provides for the installation of a water distribution system for agriculture irrigation from an off-campus site to the Kellogg campus.			
Site development	–	–	233,000
This project provides for the distribution of irrigation waters and improvements of roads and fencing.			
Equip administration-classroom building	–	–	93,500
This project provides equipment for the administration-classroom building financed by the Budget Act of 1960.			
Equip agriculture classroom building	–	–	186,150
The project provides equipment for the agriculture classroom building financed by the Budget Act of 1960.			
Construct surface parking	–	–	26,100
This project will provide 200 additional parking spaces for students and employees.			
Minor Projects:[c]			
Construct pasture lots	–	–	16,450
Construct restroom facility	–	–	6,000
Alteration and improvement projects under $5,000	–	–	7,750

MARITIME ACADEMY

This school is located at Vallejo and will have an average enrollment of 250 students in 1961-62. Permanent facilities consist of a gymnasium and pool, classroom building, messhall, administration building, residence hall and an engineering building.

The construction program proposed for 1961-62 includes a minor project for $5,000 to correct deficiencies and to improve the physical plant.

DEPARTMENT OF EMPLOYMENT

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS

For the 1959-60 and preceding fiscal years the Capital Outlay program for the Department of Employment was financed from the Department of Employment Contingent Fund. For the 1960-61 fiscal year the major part of the funds for this program was appropriated from funds made available to the department under Section 903 of the Social Security Act, as amended (Reed Act). The enabling legislation for this appropriation (Chapter 1814, Statutes of 1959) was enacted in the 1959 legislative session and provided authorization for use of such funds, after appropriation by the Legislature. For the 1961-62 fiscal year it is proposed to continue funding the major part of this program from funds made available under Section 903 of the Social Security Act, as amended (Reed Act).

The Federal Bureau of Employment Security will provide rental grants to the Department of Employment to amortize the cost of the building projects over a number of years. The amortization amounts will be returned to the Unemployment Trust Fund, thereby restoring to this fund the full amount expended for the building project. Of the total amount of $13,351,082 of Reed Act allocations credited to the Unemployment Fund, an amount of $8,993,617 remains available for appropriation in the 1961-62 fiscal year. If these funds are to be used for administrative purposes, under federal law they must be obligated within 5 years of the date credited to the Unemployment Fund. This restriction makes it necessary that this Capital Outlay program be submitted for consideration in the 1961-62 fiscal year budget.

An appropriation of $185,000 is proposed from the Department of Employment Contingent Fund because the proposed construction of additions to existing buildings in Hollywood, Sacramento and San Bernardino will necessitate substantial alterations to existing buildings. The Bureau of Employment Security will not provide rental grants to amortize these costs if funds made available under the Reed Act are used for alterations. If, however, the alteration work is financed from funds appropriated from the Department of Employment Contingent Fund, the Bureau of Employment Security will provide rental grants to amortize the costs, thereby ultimately returning to the Contingent Fund the amounts expended. Funds for this alteration work will also be requested in the first instance from regular Bureau of Employment Security administrative grants for repair and alteration work and no more will be expended from the Contingent Fund than is necessary, as determined by the action on the federal grants.

The 1961-62 Capital Outlay program of the department may be divided into the following major categories consisting of:

1. Construction of additions to 2 existing buildings to provide facilities required by growth in the communities served by such offices.
2. Construction of additional buildings in 2 locations adjoining existing Department of Employment buildings. The additional facilities are needed because of growth in the communities served by the existing offices.
3. Land acquisition adjacent to 4 existing Department of Employment buildings to provide for future expansion and adequate parking facilities.
4. Construction of parking lots adjacent to 17 existing Department of Employment buildings to provide adequate parking facilities.
5. Construction of a building in Pasadena on a site now owned by this agency.
6. Land acquisition and building construction in 8 communities where new Department of Employment buildings are needed to serve the areas.

This proposed program, with the exception of the new projects identified in the 6th category, is essential to protect the investment of the State in the existing land and/or structures. Buildings previously constructed were built with the expectation that they would be adequate for 10 years. This has been true in a number of locations. In others, accelerated growth in the communities has made the buildings inadequate in less than a 10-year period. In the light of these developments and forecasts of the future, construction of additional buildings and additions to existing buildings is imperative. The program also provides for the acquisition of land for future expansion and the construction of adequate off-street parking facilities for the public.

STATE BUILDING PROGRAM

PROPOSED 1961-62 EXPENDITURES[g]

Site acquisition, parking lot and future building expansion—Pasadena	–	–	$85,000
This project will provide for further building expansion in the future and provide off-street parking area for the public.			
Site acquisition, parking lot—Sacramento	–	–	150,000
This project will correct deficiencies in off-street parking.			
Site acquisition, parking lot and future building expansion—Vallejo	–	–	50,000
This project will provide for further building expansion in the future and provide off-street parking for the public.			
Site acquisition, parking lot and future building expansion—San Francisco	–	–	143,000
This project will provide for future building expansion and off-street parking.			
Site acquisition for building—Oakland	–	–	535,000
This project will provide a site for the construction of an Oakland industrial service office and off-street parking.			
Site acquisition for building—Richmond	–	–	175,000
This project will provide for the acquisition of a building site for a future Department of Employment local office building at Richmond and an off-street parking area.			
Site acquisition for building—Modesto	–	–	420,000
This project will provide for the acquisition of a building site for later construction of a local office building in Modesto and an off-street parking area.			
Site acquisition for building—Berkeley	–	–	220,000
This project will provide for the acquisition of a building site for a Department of Employment local office building at Berkeley and an off-street parking area.			
Site acquisition for building—El Centro	–	–	125,000
This project will provide for the acquisition of a site for a future Department of Employment local office building and an off-street parking area.

DEPARTMENT OF EMPLOYMENT—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
STATE BUILDING PROGRAM—Continued			
PROPOSED 1961-62 EXPENDITURES—Continued			
Site acquisition for building—Marysville	–	–	$200,000
This project will provide for the acquisition of a site for a future Department of Employment local office building at Marysville and an off-street parking area.			
Site acquisition for building—Merced	–	–	75,000
This project will provide for the acquisition of a suitable site for a Department of Employment local office building at Merced and an off-street parking area.			
Site acquisition of building—Porterville	–	–	75,000
This project will provide for the acquisition of a building site for a future Department of Employment local office building at Porterville and an off-street parking area.			
Construct and equip building addition and parking lot—Hollywood	–	–	400,300
The Hollywood building addition and parking lot are proposed to correct existing deficiencies and provide for future growth.			
Alter and equip existing building—Hollywood	–	–	100,000
Department of Employment Contingent Fund			
This project will cover the cost of alterations to the existing building made necessary by the construction of the Hollywood building addition.			
Construct and equip building addition—San Bernardino	–	–	376,592
Growth in the area served by the San Bernardino office has caused an increase in the workload and the staff to the point that additional office space is necessary. Building expansion cannot be accomplished on the present site therefore funds for acquisition of a site for an additional building were provided for in the 1960-61 fiscal year. The program of constructing an additional building in San Bernardino contemplates 2 phases: (a) construction of a new building of approximately 11,132 net square feet to house a disability insurance office, an audit district office and a referee office; (b) remodeling the San Bernardino Employment Building to make the existing disability insurance and audit district office spaces usable for local office purposes.			
Alter and equip existing building—San Bernardino	–	–	75,000
Department of Employment Contingent Fund			
This project will cover the cost of remodeling disability insurance and district audit office space in the existing San Bernardino building for local office purposes.			
Construct and equip additional office building and parking lot—Los Angeles	–	–	643,000
Funds were provided in the 1960-61 fiscal year budget for the acquisition of all properties in the block bounded by 14th and 15th Streets, Broadway and Hill for future building expansion and off-street parking for the Los Angeles office. In keeping with the concept of an Employment Center it is planned to develop upon a portion of that block a building of 25,000 more or less gross square feet to house the Los Angeles commercial office and the professional-scientific employment service office and provide on the balance of the property an off-street parking area pending need for future office building construction.			
Construct and equip building addition—Sacramento Warehouse	–	–	102,100
Additional floor space is needed for the storage of equipment and supplies in the Sacramento Warehouse. To correct this deficiency it is proposed to construct within the existing structure a mezzanine floor of approximately 6,000 square feet.			
Construct and equip new office building—Pasadena	–	–	435,000
Funds are requested to construct a Department of Employment local office building at Pasadena. The department owns a suitable building site.			
Construct and equip new office building—Oakland	–	–	725,673
Funds are requested to construct a building of approximately 25,000 square feet to house the department's Oakland industrial-service office.			

DEPARTMENT OF EMPLOYMENT—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
STATE BUILDING PROGRAM—Continued			
PROPOSED 1961-62 EXPENDITURES—Continued			
Construct and equip new office building—Richmond	–	–	$503,464
Funds are requested to construct a building of approximately 15,400 square feet to house the local office.			
Construct and equip new building—Modesto	–	–	455,900
Funds are requested to construct a building of approximately 13,000 square feet to house the Modesto local and district audit offices.			
Construct and equip new building—Berkeley	–	–	319,192
Funds are requested for the construction of a building to house the Berkeley local office.			
Construct and equip new building—El Centro	–	–	303,000
Funds are requested to construct a building of approximately 10,000 square feet to house the department's El Centro local and district audit offices.			
Construct and equip new building—Marysville	–	–	280,349
Funds are requested to construct a building of approximately 9,000 square feet to house the department's Marysville local and district audit offices.			
Construct and equip new building—Merced	–	–	200,000
Funds are requested to construct a building of approximately 6,000 square feet to house the department's Merced local and district audit offices.			
Construct and equip new building—Porterville	–	–	170,849
Funds are requested to construct a building of approximately 5,300 square feet to house the department's Porterville local office.			
Construct and equip parking lots in:			
Bakersfield	–	–	20,000
Chico	–	–	13,600
Eureka	–	–	34,900
Fullerton	–	–	10,550
Indio	–	–	8,000

General Activities

The proposed Capital Outlay program includes the modernization of elevators in the Los Angeles State Building and site acquisition for a microwave radio vault.

The present elevators were installed in 1932 and lack some modern safety features. Conversion of 1 elevator to automatic operation would provide service to tenants after normal working hours. Acquisition of a site for a radio vault is necessary for extension of the State's microwave system to the northern part of the State.

New state office buildings are being constructed under the authority of the State Building Construction Act of 1955 and are financed through issuance of trust certificates by the State Public Works Board. The anticipated expenditures are shown in the appendix section.

Six minor construction projects are proposed: Alterations and improvements to the Fresno Office Building; installation of an automatic sprinkler system in a portion of the Capitol grounds; improvement of the lighting and ventilation of Office Building No. 1; 2d phase of the installation of lines for disposal of water used in air-conditioning systems; construction of 2 microwave radio vaults to extend the State's microwave system; and construction of a vault in the Archives Building for the storage of records.

STATE BUILDING PROGRAM

PROPOSED 1961-62 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Elevator modernization, Los Angeles State Building	–	–	$100,000
To provide automatic floor levelers and convert 1 elevator to automatic operation.			
Acquisition of site for microwave radio vault	–	–	15,000
To extend state-owned microwave system to the northern part of the State.			
Minor Projects:[c]			
Alterations and improvements to Fresno Office Building	–	–	50,000
Install automatic sprinkler system for part of Capitol grounds	–	–	40,000
Install lines for surplus well water—phase II	–	–	49,000
Improve lighting and ventilation, Office Building No. 1, Sacramento	–	–	30,000
Construct vault, Archives Building	–	–	14,000
Construct microwave radio vaults	–	–	50,000

ESTIMATED 1959-60 AND 1960-61 EXPENDITURES[b]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Acquisition of site, planning and site development, Governor's Mansion	–	$150,000	–
Los Angeles State Building, alterations and improvements	–	1,008,000	–
Remodel fifth floor, Capitol Annex	–	74,000	–
Expansion of Treasurer's vault	–	193,500	–
Equip Los Angeles Office Building	–	91,000	–
Equip Fresno State Building	–	55,000	–
Acquisition of State Compensation Insurance Building, San Francisco *State Construction Program Fund*	$1,867	–	–
Alterations and improvements to existing state buildings, San Francisco *State Construction Program Fund*	500,000	89,684	–
Elevator modernization, Office Building No. 1, Sacramento *State Construction Program Fund*	57,320	797	–

State Fair and Exposition

Chapter 1071, Statutes of 1957, appropriated $3,747,843 in 1957-58 and a like amount in 1958-59 from the General Fund together with the proceeds from the sale of present facilities, and Chapter 1072, Statutes of 1957 authorized the State Public Works Board to issue either certificates or revenue bonds in the amount of $6,500,000 annually for a period of 2 years, to finance the construction of buildings and facilities for a new State Fair.

The availability of Chapter 1071, Statutes of 1957, was extended to June 30, 1963, by Item 323.1 of the Budget Act of 1960. This budget does not anticipate expenditures of any funds from these sources on the new fair site in the 1961-62 fiscal year.

Sixth District Agricultural Association

The Museum of Science and Industry is located in Exposition Park, in Los Angeles, and contains permanent and special temporary exhibits in the fields of industry and science with particular emphasis on the resources of California.

In 1960-61 a new science wing was completed. In the new wing there will be halls of physics, mathematics, electronics, health, chemistry, the mechanical arts, and related science topics. These exhibits are being created by top designers and are sponsored by leading private industries. The first exhibit of the story of mathematics was opened to the public in 1960. During the latter part of 1960-61 fiscal year an exhibit addition is to be constructed to display permanent and changing exhibits demonstrating the public peaceful uses of atomic energy. The exhibits are to be made possible through federal participation. In addition, the association is renovating a major portion of the National Guard Armory, which is owned by the association, to provide for exhibits on the space age. This Space Age Museum was authorized by the Legislature in 1959 and is being developed by the association with major participation from leading industries and other private sources.

Minor projects for 1961-62 fiscal year include (1) improving the fire fighting water supply along State Drive as recommended by the Los Angeles Fire Department and the State Fire Marshal as minimum requirements to protect public property in Exposition Park; (2) alterations and improvements to the exterior of the old museum structure in accordance with the Master Plan for the Cultural Area; and (3) refurbishing and improving certain permanent exhibits in Industry and Agricultural Hall. The water supply project is to be accomplished through a joint exercise of powers agreement with the County of Los Angeles which will pay 40 percent of the total cost of $35,000. The county share is $13,800 and the state share is $21,700.

District Agricultural Associations

DISTRICT FAIR CONSTRUCTION PROGRAM

The detailed expenditure of funds available for Capital Outlay at district and county agricultural fairs and citrus fruit fairs are included in this statement for the purpose of showing the total program for capital improvements at fairs in one place. The amount budgeted for capital outlay at county agricultural fairs and citrus fairs is reported in Local Assistance for Other Purposes. The Capital Outlay Programs of the State Fair and Exposition and the Sixth District Agricultural Association are not included in this section but are shown immediately preceding this section.

The 1961-62 expenditures for capital outlay at district and county agricultural fairs and citrus fruit fairs will be met from the continuing appropriation made by Business and Professions Code Section 19630, the allocation of which is approved by the Public Works Board.

The projects shown for the 1960-61 and 1961-62 fiscal years for each fair are those included in the recommended 5-year program for fairs.

ACTUAL 1959-60, ESTIMATED 1960-61 AND PROPOSED 1961-62 EXPENDITURES[1]

DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS

This statewide traffic law enforcement agency functions through a Sacramento headquarters, with field offices strategically located on major highways throughout the State. The department operates approximately 1,600 mobile units with approximately 2,600 uniformed officers. Its jurisdiction is principally limited to streets and highways outside incorporated areas.

This budget provides for the construction of a zone office building in Fresno to replace inadequate leased facilities and the relocation of the Merced office due to freeway relocation.

STATE BUILDING PROGRAM

PROPOSED 1961-62 EXPENDITURES[k]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Construct zone and area office building—Fresno	–	–	$240,000
Highway Patrol presently occupies 2 separate facilities which are poorly located.			
Construct area office building—Merced	–	–	148,000
To construct new office building. This is necessary due to relocation of freeway. Division of Highways land has been made available.			

ESTIMATED 1959-60 AND 1960-61 EXPENDITURES[k]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Purchase of site—Fresno	–	$30,000	–
Construct cafeteria—Sacramento headquarters building	–	333,106	–
Working drawings—Merced	–	11,000	–
Working drawings—Fresno zone and area office	–	10,000	–
Incorporation with city sewer district at academy	–	120,450	–
Minor projects:			
Construct safety fencing at academy	–	48,000	–
Alterations and improvements to motorcycle storage area	–	15,000	–
Repair training academy road network	–	10,000	–
Construct walls around police range	–	20,000	–
Construct skid pan—emergency vehicle operations course	–	15,000	–
Construct carports—San Francisco office building	–	27,500	–
Alteration and improvement projects under $5,000	–	13,325	–
Purchase site for Merced office	–	15,000	–
Construct Sacramento automotive shop and stores building	–	69,800	–
Equip Sacramento automotive shop and stores building	—$55 [e]	1,464	–
Construct headquarters building—Sacramento	–	1,184,500	–
Purchase site for Alta substation	–	10,000	–
Working drawings for Alta substation	–	6,000	–
Working drawings for Sacramento headquarters	30,000	–	–
Construct valley zone office building—Sacramento	—8,500 [e]	–	–
Construct high speed driver course at academy	—4,000 [e]	–	–
Enlarge accident investigation area at academy	33,000	–	–
Improve parking area—San Francisco	3,700	500	–
TOTAL EXPENDITURES, CAPITAL OUTLAY *(Motor Vehicle Fund)*	$54,145	$1,940,645	$388,000

State Construction Program Fund [d]	*7,489,573*	*630,912*	*3,344,070*

GENERAL ANALYSIS

The Department of Mental Hygiene currently operates 8 hospitals for mentally ill patients, 4 hospitals for mentally retarded patients, 2 hospitals housing both mentally ill and mentally retarded patients, and 2 training and research institutes in conjunction with the University of California. These facilities are distributed throughout the State. In addition provision was made in the 1957-58 Capital Outlay Budget to bring utility connections to a site acquired for a new hospital for the mentally ill in the San Fernando Valley.

The Langley Porter Neuropsychiatric Institute which was established for teaching and research, and the necessary clinical provisions connected with these functions is operated by the department in conjunction with the University of California Medical School at San Francisco. A similar facility, the Neuropsychiatric Institute, a part of the Los Angeles Medical School of the University of California, was activated in December, 1960, and will be operating at its rated bed capacity of 188 by May, 1961. With the 117 bed capacity of the Langley Porter Institute, a total institute capacity of 305 beds will be available.

On June 30, 1960, 36,498 beds for the mentally ill were available which exceeded by 490 the actual population of 36,008. This marks the first time that capacity has been greater than population and is the result of the combination of 2 factors. These are: (1) the activation of new ward facilities—notably at Metropolitan and Patton; and (2) a continuing reduction in the hospitalization rate for mentally ill from 303.2 per 100,000 population in 1950 to 232.4 in 1960. By June 30, 1961, 36,376 beds will be available for an estimated population of 36,427, which will again establish overcrowding to the extent of an estimated 51 patients. The loss in capacity of 122 is due to remodeling and modernization projects now in progress or funded and scheduled deactivation projects. The tables that follow set forth in detail actual and estimated populations and indicate the latest estimates of capacity resulting from presently funded projects.

Additional mentally retarded patients are admitted as bed capacity and related treatment facilities become available, and a moderate amount of overcrowding occurs in order to fully utilize available resources. As of June 30, 1960, 11,431 beds were available. Ward adjustments proposed at DeWitt and Modesto will reduce this capacity to 11,335 by June 30, 1961. No change in the number of beds for this purpose is anticipated in 1961-62. The tables that follow include population and capacity estimates for the mentally retarded.

Several major projects are proposed in this budget, chief of which are the construction of wards and treatment units at Sonoma State Hospital for severely handicapped patients, an addition to units A and B, Cottage 12 at Stockton State Hospital, and a canteen at Camarillo State Hospital. Other projects at the various hospitals provide for necessary remodeling, service facilities, and equipment for units nearing completion. In addition, appropriations are proposed for master planning new facilities at DeWitt and Modesto State Hospitals. These projects are explained in more detail in the budgets of the various hospitals. Essential minor construction projects are included to correct deficiencies and to improve physical plants. These projects are also detailed in the individual budgets.

---

[d] Expenditures from bond funds not included in budget totals.

[e] Unexpended balances previously reported as expended in a prior year.

Neuropsychiatric Institute at University of California, Los Angeles

This institute, constructed as a wing of the Medical School at the University of California at Los Angeles, operates a research, training, and treatment center. The facility, with a rated bed capacity of 188, was activated in December 1960 with the first patient admissions on January 3, 1961. Minor construction projects totaling $10,000 are included to correct deficiencies and to improve the physical plant.

Atascadero State Hospital

This hospital for the mentally ill had a rated bed capacity of 1,531 on June 30, 1960. No additional beds are under construction or funded and no expansion is proposed in the 1961-62 fiscal year. The major construction program proposed for the 1961-62 fiscal year provides for alterations and improvements to provide for and improve security features of the facility. Minor construction projects totaling $56,450 are included to correct deficiencies and improve the physical plant.

Camarillo State Hospital

This hospital for the mentally ill had a rated bed capacity of 6,242 as of June 30, 1960. Projects to be completed during the 1960-61 fiscal year will result in an increase of 38 beds. Ward remodeling scheduled for completion in 1961-62 will further increase bed capacity by 25 beds, bringing the capacity to 6,305 on June 30, 1962. The major construction program for the 1961-62 fiscal year provides for the construction and equipping of a canteen. Minor construction projects totaling $136,910 are included to correct deficiencies and to improve the physical plant.

DeWitt State Hospital

This hospital for the mentally ill and the mentally retarded had a rated bed capacity of 2,778 beds on June 30, 1960. The deactivation of the 500-series ward buildings, involving 363 beds, and reclassification adjustments including 7 more beds will result in a decrease of 370 beds, leaving a capacity of 2,408 on June 30, 1961. No additional beds are under construction or funded. The major construction program proposed for the 1961-62 fiscal year provides for master planning for a new facility. Minor construction projects totaling $67,725 are included to correct deficiencies and to improve the physical plant.

Napa State Hospital

This hospital for the mentally ill had a rated capacity of 5,042 on June 30, 1960. The activation of a juvenile unit during the 1960-61 fiscal year will add 216 beds. Ward remodeling during the 1961-62 fiscal year will result in a decrease of 34 beds while the deactivation of the U-ward at the Ranch will cause a further decrease of 61 beds. The resultant bed capacity on June 30, 1962, will be 5,163. Major construction proposed for the 1961-62 fiscal year provides for remodeling and modernizing the serving areas, south ward group. Minor construction projects totaling $64,550 are included to correct deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM			
PROPOSED 1961-62 EXPENDITURES [a]			
Remodel serving areas, south ward group—Phase II	–	–	$137,070
Equip serving areas	–	–	12,000
This project provides for structural alterations, relocation of existing equipment and the installation of additional equipment necessary to connect 2 existing food preparation and dining room buildings to cafeteria-type service, with a serving pantry. All related electrical and mechanical work is included.			
Minor Projects: [c]			
Remodel for research laboratory	–	–	22,600
Install wall guards	–	–	5,000
Install ward door checks	–	–	6,000
Construct grounds equipment storage building	–	–	6,000
Construct addition to drainage culvert	–	–	5,000
Alteration and improvement projects under $5,000	–	–	19,950

Stockton State Hospital

This hospital for the mentally ill had a rated bed capacity of 3,697 on June 30, 1960. No adjustments in this capacity are anticipated during the 1960-61 fiscal year. The alterations to cottage F project, scheduled for completion in the 1961-62 fiscal year, will result in a decrease of 20 beds. Major construction proposed for the 1961-62 fiscal year provides for an examination and treatment addition to units A and B, cottage 12 and related equipment. Minor construction projects totaling $85,400 are included to correct deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1961-62 EXPENDITURES [a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Construct addition to units A and B, cottage 12	–	–	$99,000
Equip addition to units A and B, cottage 12	–	–	10,000

This project provides for an addition at units A and B to serve as examination and treatment facilities not now provided for patients located at the annex. Required alterations to units A and B, related equipment, electrical, and mechanical work are included.

---

Fairview State Hospital

This is a new hospital for the care and treatment of the mentally retarded with the first patients having been received in January of 1959. The rated bed capacity of this facility as of June 30, 1960 was 1,946. No adjustments in this capacity are anticipated during the 1960-61 and 1961-62 fiscal years. During the 1963-64 fiscal year 676 additional beds already funded will be activated.

Minor construction projects totaling $75,900 are included to correct deficiencies and to improve the physical plant.

MILITARY DEPARTMENT

GENERAL ANALYSIS

The Capital Outlay program of the Military Department comprises the construction of armories, warehouses, rifle ranges, and other facilities essential to the organization, training, and morale of the California National Guard and the California Air National Guard. The long-range construction program would provide armories and other facilities to house and train all units.

Since the 1951-52 fiscal year the Federal Government under Public Law 783, 81st Congress, has participated in the construction of armories on a cost-sharing basis. Federal funds have been made available on the basis of up to 75 percent of qualifying phases of the construction.

In addition to federal participation in the construction of armories, certain facilities such as motor vehicle storage buildings, warehouses, airplane hangers, and shop buildings primarily for the care and maintenance of federal equipment issued for state use are financed entirely from federal funds, except for the cost of planning and supervision of construction which is provided by the State.

Proposed for the 1961-62 Capital Outlay program is the construction of a food service facility for Air National Guard Base located at Ontario. Minor projects include repairs to the various existing armories.

STATE BUILDING PROGRAM

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
PROPOSED 1961-62 EXPENDITURES[a]			
Construct Air National Guard Base food service facilities, Ontario	–	–	$139,500
This project will provide adequate feeding facilities for the Air National Guard personnel in this unit.

DEPARTMENT OF MOTOR VEHICLES

GENERAL ANALYSIS

This department, headquartered in Sacramento, functions through a network of field offices located in all population centers throughout the State. During the budget year the department will register and collect the taxes and fees on approximately 9,286,000 vehicles, and issue new and renewed drivers' licenses to about 2,399,800 applicants.

Continued population growth during recent years has caused many of the present facilities to be inadequate. This department's capital outlay program provides for state-owned buildings where it has been determined that adequate privately owned leasing facilities are not available for the department to provide satisfactory services to the people in the area.

Capital outlay expenditures provide for purchases of additional parcels for Sacramento headquarters office building Number 2 parking area, expansion of the Yuba City office parking lot, and construction of buildings in North Hollywood, Santa Ana, San Bernardino, Pasadena, and Stockton. Funds for acquisition of sites for all construction items have been authorized in prior budgets.

STATE BUILDING PROGRAM

PROPOSED 1961-62 EXPENDITURES[k]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Purchase of additional parcels for headquarters parking area—Sacramento	–	–	$460,000
This property to be used to provide additional off-street parking facilities for new headquarters building.			
Purchase of lot to augment parking area—Yuba City	–	–	17,500
The present parking area has only 17 stalls. This is inadequate to handle normal traffic volume for this office.			
Construct office building—North Hollywood	–	–	300,000
The present leased facilities are inadequate for the present office staff. The parking area is inadequate and cannot accommodate the volume of daily traffic to the office.			
Construct office building—Santa Ana	–	–	237,000
The present leased facilities are inadequate for the present office staff. The parking lot is inadequate for the volume of daily traffic to this office.			
Construct office building—San Bernardino	–	–	348,400
This department is presently occupying leased quarters pending completion of a state-owned facility. The department's original quarters were sold in 1958 to the Division of Highways as they were inadequate and the property was urgently needed by Highways. The present quarters were intended only as an interim location, and are inadequate for extended occupancy.			
Construct office building—Pasadena	–	–	303,200
The present leased facilities are inadequate for the present staff of employees. The off-street parking is insufficient to handle the volume of daily traffic to the office.			
Construct office building—Stockton	–	–	174,000
Off-street parking facilities are not available at the existing leased location. Searches indicate that it is not possible to obtain adequate rental facilities.			
Minor Projects:			
Construction of garage or carport on parking lot—Oakland	–	–	5,000
Construction of inspection shed—Eureka	–	–	5,000
Preliminary plans for remodeling of headquarters building Number 1—Sacramento	–	–	5,000
Construction of curbs, gutters and sidewalks—Fresno	–	–	16,800
Revamp lighting system, first floor—Los Angeles	–	–	20,000
Alteration of office—Los Angeles	–	–	45,000

ESTIMATED 1959-60 AND 1960-61 EXPENDITURES[k]

DEPARTMENT OF FISH AND GAME

GENERAL ANALYSIS

The proposed 1961-62 Capital Outlay Budget provides for projects in the amount of $409,250. The major projects include funds for planning, site investigation, and acquisition of a site for a departmental bioassay laboratory required in the department's water pollution control work. In addition funds are provided for the complete rehabilitation of the Hot Creek Hatchery consisting of rebuilding spawning facilities, replacement of pond system, and the reconstruction of water supply facilities.

Minor projects provide for the continuation of the program of establishing fish screens in various locations to protect upstream and downstream migration of anadromous fishes; the strengthening of the Bigelow Flow maintenance dam which is located in Tuolumne County; architectural fee to design a prototype for a 65 foot patrol boat to ultimately replace 3 existing patrol vessels; and the remodeling of office space and conference room at the Terminal Island facility of Marine Resources Operation.

WILDLIFE CONSERVATION PROGRAM

PROPOSED 1961-62 EXPENDITURES[m]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Purchase land for bioassay laboratory	–	–	$60,000
Funds are provided for planning, site investigation, and site acquisition for a departmental bioassay laboratory. There are no comparable facilities, private or public, where the department's needs for bioassay work related to the water pollution control program can be filled. Construction funds will be provided in a subsequent budget.			
Rehabilitate Hot Creek Hatchery	–	–	312,500
Rehabilitation consists of reconstruction of all water supply facilities, replacement of pond system, rebuilding spawning facilities, and miscellaneous drainage and fencing work. Facilities were originally constructed in 1938 and in recent years the department has experienced difficulty with cement structures. Several methods of repair have been attempted to no avail.			
Minor Projects:			
Region I—Inland Fisheries:			
Yreka Screen Shop:			
Fish screens, perforated plate, following locations	–	–	1,000
East Fork Scott River No. 1			
East Fork Scott River No. 2			
Bogue Ditch, Etna Creek			
Grider Creek			
Pack Ditch, Grider Creek			
Red Bluff Screen Shop:			
Fish Screens, Perforated Plate, Following Location:			
Dixon Ditch, Thomes Creek	–	–	2,250
Region IV—Inland Fisheries:			
Bigelow Flow Maintenance Dam (Tuolumne County) structural strengthening	–	–	13,000
Region V—Wildlife Protection:			
Architectural fees to design patrol boat	–	–	10,000
Marine Resources Operations:			
Terminal Island—Biostatistics:			
Remodel office space and conference room	–	–	10,500

ESTIMATED 1959-60 AND 1960-61 EXPENDITURES[m]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Purchase of building site from Federal Bureau of Reclamation	–	$1,000	–
Construct additional rearing facilities at San Joaquin Hatchery	–	102,000	–
Construct shop and garage at Mojave River Hatchery	–	60,000	–
Remodel hatchery structure at Mt. Shasta Hatchery	–	70,000	–
Minor Projects:			
Region 1—Headquarters:			
Devil's Garden Unit:			
Construct storage building	–	2,420	–
Crystal Lake Hatchery:			
Construct garage	$1,450	–	–
Cedar Creek Hatchery:			
Staff housing additions	–	8,800	–
Mt. Shasta Hatchery:			
Replace domestic water system	6,990	–	–
Remodel shop	111	–	–
Red Bluff Screen Shop:			
Repair ladder at Ward Dam Diversion, Mill Creek, Tehama County	–	5,000	–
Fish screens, perforated plate, various locations	3,423	17,952	–
Yreka Screen Shop:			
Fish screens, perforated plate, various locations	11,732	10,718	–

Wildlife Conservation Board

Continuation of the acquisition, construction, and improvements of wildlife conservation projects is planned. The $9,000,000 appropriated by Chapter 1327, Statutes of 1947, the $3,000,000 in revenue provided by Chapter 1401, Statutes of 1951, and the revenue of $750,000 each fiscal year provided by subsequent legislation such as Chapter 1313, Statutes of 1955, and Chapter 1828, Statutes of 1959, has been allocated to projects by the Wildlife Conservation Board. The budget reflects the actual and estimated expenditure of funds previously allocated to specific projects by the Wildlife Conservation Board, and estimated expenditures from revenue.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
WILDLIFE CONSERVATION PROGRAM			
PROPOSED 1961-62 EXPENDITURES [n]			
Fish hatchery and stocking projects	–	–	$50,000
For construction and equipping of facilities for fish hatching and stocking.			
Warm water and other fish projects	–	–	589,742
For the acquisition and development of additional warm water fish lakes in various parts of the State.			
Flow maintenance and stream improvement projects	–	–	50,000
For the construction of small dams to provide stream flow during summer months and for stream clearance. This will improve the fishing on many miles of streams.			
Fish screen and ladder projects	–	–	125,000
To prevent loss of fish through water diversions and to permit passage of fish over stream obstructions.			
Waterfowl projects	–	–	53,206
For the acquisition and development of waterfowl management areas to provide for duck depredation control and public hunting.			
General projects	–	–	598,767
For the preservation and restoration of wildlife and to provide roads, trails, and parking areas to assist in access to ocean beaches and fishing and hunting areas.			
Special projects	–	–	5,000
For projects evaluation, land acquisition, and engineering studies of potential projects by the Wildlife Conservation Board staff.			
ESTIMATED 1959-60 AND 1960-61 EXPENDITURES [n]			
Fish hatchery and stocking projects	$2,500	$50,000	–
For construction and equipping of facilities for fish hatching and stocking.

Division of Beaches and Parks

This is the first budget year following a 5-year program initiated by the 1956 Legislature and augmented by subsequent Legislatures. The total capital outlay program composed of acquisition and development for the 5-year period approximated $52,000,000. Diminishing revenues from oil royalties required the deferral of certain projects. Some projects are before the courts as a result of eminent domain proceedings while others will be under active negotiation. Provision has been made to extend those active appropriations, which will revert June 30, 1961, for an additional year where pending negotiations and eminent domain actions will be completed in 1961-62.

This budget proposes a continuing acquisition and development program to meet critical deficiencies in the recreational resources of the State.

The proposed acquisition program for the budget year consists of projects essential for solving existing development expansion problems (Carpinteria, Hearst San Simeon, San Mateo Beaches, MacKerricher Beach) and for providing additional areas for needed public facilities where loss to adverse developments is imminent (San Jacinto, Golden Gate Project, Natural Bridges, Twin Lakes). Also included are funds to cover excessive awards resulting from court action involving current or pending cases funded by 1956 and subsequent appropriations.

The major construction program proposed is directed towards increasing the basic public use facilities. The budget provides 813 camp units, 575 picnic units and 2,126 parking spaces together with the necessary service facilities such as roads, walkways, water, electric and sanitary facilities with sewage disposal. It is estimated that the projects included in this year's construction budget will result in an additional annual operating cost of about $300,000 which will be offset by an increase in service fees.

Funding of all 1961-62 expenditures is proposed from the General Fund in anticipation of legislation which would abolish the State Beach and Park Fund; whereas, expenditures shown for 1959-60 and 1960-61 are from the State Beach and Park Fund.

REAL PROPERTY ACQUISITION [s]

PROPOSED 1961-62 EXPENDITURES
New Appropriations

Augmentation—acquisition in progress—statewide	–	–	$525,000
All funds including savings appropriated by Chapter 1 of 1956 will revert leaving no funds available to augment funds obligated in condemnation in the event of excessive awards.			
Carpinteria Beach State Park	–	–	240,000
This is for acquisition of 16 lots which are scattered through the project effectively blocking utilization of property previously acquired for public use.			
Golden Gate Project	–	–	80,000
To complete acquisition of 130 acres of surplus military land at Fort Baker in Marin County. Funds appropriated under the Budget Act of 1960 are insufficient.			
Hearst San Simeon State Historical Monument	–	–	28,000
For acquisition of approximately 9 acres of land immediately adjacent to lower parking area and visitor staying area to provide more appropriate facilities for proper administration and visitor comfort.			

---

[d] Expenditures from bond funds not included in budget totals.

[1] A nonrevenue fund. Neither the revenue nor the expenditures are included in the overall budget totals.

[s] Appropriations reported for the 1959-60 and the 1960-61 fiscal years are from the State Beach and Park Fund. Appropriations reported for the 1961-62 fiscal year are from the General Fund.

Division of Beaches and Parks—Continued				
REAL PROPERTY ACQUISITION—Continued				
PROPOSED 1961-62 EXPENDITURES—Continued				
New Appropriations—Continued				
MacKerricher Beach State Park		–	–	$25,000
For acquisition of a private road easement which effectively bisects the park, interfering with proper development and administration of the unit.				
Natural Bridges State Park		–	–	60,000
For acquisition of approximately 25 acres contiguous to the existing park. This land will complete a geographic unit of a drainage which is ideal for placement of public use facilities at this popular park.				
Mt. San Jacinto State Park		–	–	535,000
Continued acquisition of 977 acres of forested property immediately adjacent to existing park and recent partial acquisition authorized under Chapter 1, 1956. This property is the only tract of private land contiguous to the park which has terrain suitable to large installations of public facilities both overnight and day use.				
San Mateo Beaches State Park		–	–	120,000
To continue the acquisition program by purchasing city lots and acreage at any of the San Mateo beaches within the approved plans.				
Twin Lakes Beach State Park		–	–	100,000
To continue acquisition of approximately 40 properties, both city lots and acreage, which remain unacquired within the approved project boundary. Continued acquisition is required in order to remove inholdings which are preventing proper development, operation and public use of the project.				
Expenditures From Appropriations Provided by 1959 Legislative Session

Totals, Acquisition Appropriation, Budget Act of 1956 (Adjusted) [17]	$29,282,130			

---

[12] Augmented $15,000 from savings.

[13] Augmented $15,000 from savings.

[14] Augmented $5,000 from savings.

[15] Budget Act of 1958, Item 427.5 transfers $300,000 of the original $500,000 appropriation to the Department of Water Resources.

[16] Chapter 1713, Statutes of 1959, reappropriates the unexpended balance set forth for Thornton and Miramontes Beach acquisition in Item 400.1 of Budget Act of 1956 for acquisition at Francis-Dunes, Montara, Pomponis, and Pescadero Beaches.

[17] Reconciliation of this total to the original appropriation follows:

Budget Act of 1956, Items 400, 400.1, and 400.3	$29,366,045
Tranfers from Item 400(h) (Columbia Historic) to Development	—250,000
Reversion of Item 400(gg) (Henry Cowell Redwoods) Budget Act of 1959, Section 10)	—60,000
Transfer from Item 400.3 (Reservoir Areas) to the Department of Water Resources	—300,000
Augmentations from savings (transfers to savings not reflected)	526,085
Budget Act of 1956, Items 400, 400.1 and 400.3 (adjusted)	$29,282,130

[s] Appropriations reported for the 1959-60 and 1960-61 fiscal years are from the State Beach and Park Fund. Appropriations reported for the 1961-62 fiscal year are from the General Fund.

* Expenditures for Riders' and Hikers' Trails are shown in a separate section.

[18] Chapter 287, Statutes of 1959, redefined areas to be acquired at Mount Tamalpais.

DEPARTMENT OF NATURAL RESOURCES—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Division of Beaches and Parks—Continued			
MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT			
PROPOSED 1961-62 EXPENDITURES[8]			
Bolsa Chica Beach State Park:			
Roads and parking	–	–	$94,000
Utilities—water system	–	–	33,290
Office and contact station	–	–	5,000
This is the first stage of a continuing development at a very popular beach. Parking will be provided for 435 cars and a water main will be constructed at that time.			
Brannan Island State Park:			
Boating facilities	–	–	32,200
Roads and parking	–	–	30,980
Utilities—water system	–	–	12,830
Utilities—sewage	–	–	6,000
Utilities—electric	–	–	2,766
Sanitary facilities	–	–	31,500
Camp units (45)	–	–	9,000
Grading and landscaping	–	–	3,500
This is a part of a continuing development at this popular river park. The project includes boat access ramps, parking, camp units, and 3 comfort stations.			
Columbia Historic State Park:			
Utilities—water system	–	–	124,875
Historic building restoration	–	–	60,000
The current water storage of only 126,000 gallons is completely inadequate for this park. This project will increase the storage by 500,000 gallons which should be satisfactory for most emergencies.			
Funds are requested for historic building restoration to continue the restoration program in accordance with the master plan.			
Doheny Beach State Park:			
Erosion control	–	–	52,350
The Corps of Engineers has found that over the years the shore line along Doheny Beach is retreating. This project provides one-third of the cost which is the Division of Beaches and Parks share in the construction of a groin and for replenishment of the beach as required.			
Hearst San Simeon State Historical Monument:			
Visitor center	–	–	95,000
The first phase of the visitor center is being completed from funds appropriated in the 1960-61 fiscal year. Additional funds are requested to complete the audio-visual portion of the orientation building.			
Hendy Woods State Park:			
Camp units (92)	–	–	17,664
Picnic units (25)	–	–	2,405
Roads and parking	–	–	99,040
Utilities—water system	–	–	49,223
Utilities—electric	–	–	6,300
Grading and landscaping	–	–	4,570
Sanitary facilities	–	–	34,000
Office and contact station	–	–	3,500
Utility and shop buildings	–	–	23,650
Residence and garage	–	–	36,000
Area cleanup	–	–	5,600
Trails and footbridges	–	–	315
Office building	–	–	11,500
The funds requested are needed to make the park accessible, serve the public need, provide for sanitation and safety and to protect the natural resources. The first stage of development includes a complete operating park unit.			

---

[8] Appropriations reported for the 1959-60 and 1960-61 fiscal years are from the State Beach and Park Fund. Appropriations reported for the 1961-62 fiscal year are from the General Fund.

DEPARTMENT OF NATURAL RESOURCES—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Division of Beaches and Parks—Continued			
MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT—Continued			
PROPOSED 1961-62 EXPENDITURES—Continued			
Leo Carrillo Beach State Park:			
Roads and parking	–	–	$107,050
Sanitary facilities	–	–	52,000
Camp units (40)	–	–	6,000
Residence and garage	–	–	40,000
This request will complete the campground area for this park and will provide a total of 140 camp units and furnish parking for the south beach.			
McGrath Beach State Park:			
Roads and parking	–	–	120,600
Utilities—water system	–	–	66,300
Utilities—electric	–	–	6,000
Sanitary facilities	–	–	120,000
Office building	–	–	8,400
Camp units (75)	–	–	9,000
This is the first phase of a continuing development program which will add 75 camp units and help alleviate the shortage of camping facilities in this section of the Southern California coastline.			
Pismo Beach State Park:			
Sanitary facilities	–	–	20,000
Roads and parking	–	–	70,530
This will complete the roads and parking and comfort stations for a 100-unit campground. Funds for the first phase of the project were provided in the 1959-60 fiscal year.			
Plumas-Eureka State Park:			
Roads and parking	–	–	49,000
Camp units (150)	–	–	24,750
Sanitary facilities	–	–	72,000
Utilities—water system	–	–	45,720
Utilities—electric	–	–	2,400
Historic building restoration	–	–	29,100
Area clean-up	–	–	20,000
This is the first phase of the development of this park which will consist of constructing 150 camp units together with roads and parking, sanitary facilities and water system required to service them. Also included is the second stage of restoration of the historic Plumas-Eureka Mill.			
San Buenaventura Beach State Park:			
Roads and parking	–	–	143,390
Grading and landscaping	–	–	42,950
Utilities—electric	–	–	1,500
Picnic units (300)	–	–	45,000
Fencing	–	–	17,730
Sanitary facilities	–	–	61,000
Utilities—water system	–	–	49,680
This request will complete the major portion of development, forming a well planned unit designed to handle intensive use.			
Salton Sea State Park:			
Roads and parking	–	–	79,920
Boating facilities	–	–	7,380
Grading and landscaping	–	–	5,000
These expenditures will complete the present partially funded Mecca Beach campground roads and parking and will provide another boat access to Salton Sea.			
San Mateo Beaches State Park:			
Roads and parking	–	–	46,060
Picnic units (200)	–	–	30,000
Office and contact station	–	–	8,800
Sanitary facilities	–	–	20,000
Utilities—water system	–	–	4,700
Utilities—sewage	–	–	6,140
Utilities—electric	–	–	650
Fencing	–	–	4,580
Grading and landscaping	–	–	19,500
This proposed development will be the first phase of a program of continuing development for this park. The estimated attendance for the San Gregorio and Half Moon Bay units of this park, during the 1959 season, was 550,000 visitors.			

DEPARTMENT OF NATURAL RESOURCES—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Division of Beaches and Parks—Continued			
MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT—Continued			
PROPOSED 1961-62 EXPENDITURES—Continued			
Sunset Beach State Park:			
Camp units (65)	–	–	$13,000
Roads and parking	–	–	18,250
Sanitary facilities	–	–	37,000
Utilities—electric	–	–	1,845
Utilities—water system	–	–	9,640
Grading and landscaping	–	–	2,500
This development will add 65 camp units to the facilities of this park. This is one of the few beach parks fully justifying camping facilities as it has plenty of upland area suitable for development.			
San Elijo Beach State Park:			
Sanitary facilities	–	–	135,000
Office and contact station	–	–	5,000
Utility and shop building (2)	–	–	24,000
Lifeguard facilities	–	–	10,500
Contingencies and engineering	–	–	34,900
Utilities—water system	–	–	22,700
Utilities—sewage	–	–	145,900
Roads and parking	–	–	244,600
Utilities—electric	–	–	1,000
Stairways to beach	–	–	9,000
There is a pressing need for more camp units along the southern coastline. This development will tend to alleviate this need by providing a 250 campground unit.			
San Clemente Beach State Park:			
Sanitary facilities	–	–	14,000
Picnic units	–	–	20,000
Roads and parking	–	–	23,800
Utilities—water system	–	–	4,480
Utilities—sewage	–	–	3,000
Utilities—electric	–	–	530
Expansion of camping facilities on Southern California beaches is one of the pressing needs. This will tend to alleviate the situation.			
Woodson Bridge State Park:			
Camp units—46	–	–	11,500
Sanitary facilities	–	–	36,000
Picnic units—50	–	–	7,500
Roads and parking	–	–	43,750
Utilities—water system	–	–	30,838
Utilities—electric	–	–	10,560
Office and contact station	–	–	12,000
This is an initial development which includes 46 camp units and 50 picnic units. Public demands and needs more than justify the proposed development.			
ESTIMATED 1959-60 AND 1960-61 EXPENDITURES[s]			
Calaveras Big Trees State Park:			
Camp units	$7,279	$4,220	–
Roads and parking	140	28,438	–
Sanitary facilities	–	29,410	–
Utilities—electric	–	4,620	–

RIDERS' AND HIKERS' TRAILS

Analysis

The Riding and Hiking Trail, authorized by Chapter 112, Statutes of 1946, was to be a 3,000-mile statewide loop. This was later amended to authorize secondary trails after completion of the statewide loop. Chapter 1536, Statutes of 1955, authorized lateral trails concurrently with the statewide loop to accelerate the program and provide for more effective use.

ACQUISITION, DEVELOPMENT AND IMPROVEMENT OF STATE PARK IN SAN FRANCISCO

Analysis

This project includes the acquisition and development of a site for a state park to be located in the City of San Francisco. Budget Act of 1956, Item 400.2, appropriated $2,000,000 for this purpose. Budget Act of 1958, Item 417, transferred $276,00 from this appropriation to augment an appropriation made fo the acquisition and restoration of historic ships.

TOTAL EXPENDITURES (State Park in San Francisco)	$12,000	$1,338,000	–

REDWOOD HIGHWAY RELOCATION

Analysis

This project provides funds for acquisition of real property, construction and other costs related to the relocation of the highway through and in the vicinity of the Humboldt Redwoods State Park (U.S. 101). The funds proposed for the 1959-60 and 1960-61 fiscal year expenditures are for development of certain needed access facilities to the state park from funds appropriated in prior years.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

Division of Forestry

The capital outlay program for the 1961-62 fiscal year includes funds for the acquisition of a presently leased site plus additional land to serve as a buffer strip at the Iron Mine Conservation Camp and the acquisition of sites for 2 additional conservation camps. It is proposed to purchase land for the Placer Ranger Unit Headquarters located at Auburn, and funds are provided to continue the program of acquiring sites for strategically located fire control stations and lookouts.

Major construction projects include: the construction of the District V Headquarters at Monterey, which will be used jointly by the Division of Beaches and Parks; the modernization of the Butte Ranger Unit located at Oroville to permit replacement of an office and warehouse; the construction of a barracks and messhall at the Orange County Headquarters; and the replacement of messhall and barracks facilities at the Santa Cruz Ranger Unit.

The continuing Conservation Camp Program provides for the initial phase in the construction of a conservation camp to be located in Sonoma County; the replacement of deteriorated facilities at the Rainbow Conservation Camp in San Diego County; the remodeling of existing facilities at the California Men's Colony at San Luis Obispo County to provide an additional camp; and necessary work tools and equipment to work the men to be available from the Lassen Conservation Center located at Susanville and the men to be available from the 2 branch centers in Humboldt and Tuolumne Counties. The necessary equipment and tools for the Mono-Inyo branch center are being purchased by and reported in the Department of Corrections.

Minor projects provide $247,000 in construction projects suitable for conservation camp inmate labor; funds for the construction of barracks and messhall facilities at 5 locations; various water developments; seed processing facilities at Davis nursery; warehouse and equipment facilities at 5 locations; miscellaneous radio facilities; and additions to 5 employee residences.

STATE BUILDING PROGRAM

PROPOSED 1961-62 EXPENDITURES[a]

Site acquisition for conservation camps	–	–	$55,000
Purchase of 3 sites. Funds are provided for the purchase of the presently leased site plus additional land to serve as a buffer strip at the Iron Mine Conservation Camp. The purchase of sites for 2 new conservation camps is also contemplated as a part of the continuing camp program.			
Site acquisition for county headquarters	–	–	35,000
Placer Ranger Unit Headquarters in Placer County. Present site is not adequate to expand and is poorly located because road network access has been limited by proposed reservoir development.			
Site acquisition for Lookouts and Forest Fire Stations: Various locations	–	–	38,000
To provide funds for continuation of the program of acquiring strategically located fire control stations and lookout sites.			
Engineering, planning and inspection services	–	–	132.917
General Fund			
To provide 8 technical positions, a survey crew, 3 clerical positions, and operating expenses required in connection with the division's Capital Outlay program.			
Construct District V Headquarters—Monterey	–	–	636,610
To replace inadequate office space now being leased by the division. The new office will be jointly shared with the Division of Beaches and Parks. Present lease expires July 31, 1962, and can be renewed to July 31, 1965. The division has been unable to locate facilities to lease that would provide adequate space for operations in the Monterey area.			
Construct Oroville Ranger Unit (Butte County) office and warehouse	–	–	137,064
Equip Oroville Ranger Unit office and warehouse	–	–	7,700
To replace existing facilities which do not warrant remodeling due to age and condition. The office was constructed in 1940 by division personnel and is too small to provide sufficient office space for existing staff. The existing warehouse was originally an office building and is totally inadequate for warehouse purposes. At the present time a portion of the unit's material is being stored in a garage 20 miles from the station.			
Construct Orange County Ranger Unit messhall and barracks	–	–	126,550
Equip Orange County Ranger Unit messhall and barracks	–	–	6,304
To replace existing messhall and barracks which are inadequate due to size and age. They were constructed in 1935 by WPA labor. In recent years it has been necessary for the overflow of personnel to use a condemned building on the rear of the headquarters site for a barracks.			
Construct Santa Cruz Ranger Unit messhall and barracks	–	–	96,625
Equip Santa Cruz Ranger Unit messhall and barracks	–	–	3,420
To replace existing messhall and barracks originally constructed in 1935. Major rehabilitation and expansion for this ranger unit located at Felton would be necessary to provide adequate facilities. Existing structure does not warrant such restoration.

PROPOSED 1961-62 EXPENDITURES—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Construct Sonoma Conservation Camp—1st phase	–	–	$171,125
Equip Sonoma Conservation Camp—1st phase	–	–	134,721
To provide working drawings and site development for an 80-man conservation camp in Sonoma County to house Department of Corrections inmates. Inmates will be used for conservation projects and will be available for forest fire fighting.			
Construct Rainbow Conservation Camp	–	–	434,400
Equip Rainbow Conservation Camp	–	–	54,091
To replace existing barracks, recreation building, messhall, equipment building, shop and warehouse, and oil and gas house at Rainbow Conservation Camp, San Diego County. Facilities to be replaced are inadequate and in need of replacement. Existing structures do not justify the expenditure of funds for remodeling.			
Construct California Men's Colony Conservation Camp	–	–	30,000
Equip California Men's Colony Conservation Camp	–	–	195,127
Funds are provided to remodel interiors of existing buildings adjacent to the California Men's Colony, San Luis Obispo County, to establish a conservation camp.			
Equip 3 conservation centers (forestry work crews)	–	–	495,171
To provide necessary work tools and equipment to workmen to be available from the Lassen Conservation Center located at Susanville and the 2 branch centers in Humboldt and Tuolumne Counties. Funds for construction of the centers were made available in the Department of Corrections 1959-60 and 1960-61 budgets with completion estimated in the early part of the 1962-63 fiscal year. Due to special type of equipment approximately 6 months ordering time is necessary.

Division of Small Craft Harbors

CONSTRUCTION OF HARBOR FACILITIES BY DIVISION OF SMALL CRAFT HARBORS

Section 5823 of the Public Resources Code authorizes the Division of Small Craft Harbors to "prepare plans for, and acquire, construct, develop, and improve, small craft harbors, facilities in connection therewith, and connecting waterways." It is contemplated that this authorization will be used only when there is no local responsible agency to construct and operate a harbor, and where the need is great from the standpoint of safety. Such harbors are commonly known as harbors of refuge.

In the 1961-62 fiscal year the agency proposes execution of the initial phase of an estimated $4,000,000 harbor project at Shelter Cove in Humboldt County. This project was approved by Chapter 1875, Statutes of 1959. Shelter Cove is 39 nautical miles north of the Noyo River and 54 miles south of Humboldt Bay. The cove lies under the southern face of Point Delgada and affords some shelter in northwesterly weather, but the cove is exposed and dangerous with south and west winds. Landings can be made, with caution in favorable weather on the single beach along the northern shore of the cove. A county road connects with U.S. Highway 101 at Garberville, 24 miles east. A county airstrip is located on the point and plans have been made for improving and lengthening the present runway. Limited supply facilities are in existence at Shelter Cove to provide for the demands of transient craft using the cove.

The legislation requires that construction funds for this project be made available in the amount of $460,000 contingent upon the execution of an agreement that the County of Humboldt will take over the Shelter Cove project within a 3-year period. The county is to assume total responsibility of maintenance, operation and further development of this harbor project on the date the total amount appropriated is expended, or at the termination date of the availability of the appropriation, whichever is earlier. The agreement will provide for the repayment by the County of Humboldt of the money expended by the State, such repayment to start not more than 6 years from the date the money is expended, or from the termination date of the availability of the appropriation, whichever is earlier, including interest at 3 percent, and extending not more than 20 years from said earlier date.

GENERAL ANALYSIS

The California Olympic Commission was established by Chapter 124, Statutes of 1955, which became effective on June 18, 1955, with the awarding of the VIII Olympic Winter Games to Squaw Valley, by the International Olympic Committee. The commission is composed of 5 members appointed by the Governor. The duties of the commission were to provide facilities for the 1960 Winter Games with the funds made available by the State; to encourage and assist participation in these games by persons from all parts of the world; to co-operate to the fullest extent with the government of the United States and with other persons, corporations and agencies concerned with staging the winter games in California in 1960; and to engage in such other activities as might be necessary or desirable to make the holding of the games in California a success.

Chapter 1069, Statutes of 1957, provided that all facilities constructed by the California Olympic Commission would be transferred to the Division of Beaches and Parks, Department of Natural Resources, for inclusion in the state park system as soon as practicable after the completion of the games which was done effective April 1, 1960.

The commission negotiated a master contract with the Organizing Committee, VIII Olympic Winter Games, Squaw Valley, California, U.S.A., 1960, Incorporated, the organization appointed by the United States National Olympic Committee and authorized by the International Olympic Committee to stage the games.

By the enactment of Public Law 365, 85th Congress in 1958 and H.R. 7454 in 1959, the Congress of the United States authorized the advancement to the Organizing Committee of $3,500,000 for construction of an ice arena on U.S. Government land which is occupied by the commission under a 30-year-term Special Use Permit, and also authorized the expenditure of up to $900,000 in federal funds for the lending of military support to the staging of the VIII Olympic Winter Games. These funds were used effectively to assist with the completion of the project.

The games were staged February 18-28, 1960.

During the 1960-61 fiscal year the commission is engaged in terminating its fiscal affairs.

DEPARTMENT OF PUBLIC HEALTH

The Department of Public Health, in co-operation with local health departments, is responsible for the prevention of disease and the provision of a healthful environment for the people of California.

Additional space is required to provide for present needs, normal expansion, and special project research. Of primary need, is expansion of the Division of Laboratories facilities; it provides laboratory services to the department and local health departments without laboratories; and also more advanced services to local areas with laboratories. In addition to the overcrowding within the existing state building, 16,680 square feet of office space is also rented.

The proposed Capital Outlay program includes the acquisition of a small parcel of land contiguous to the Public Health Building in Berkeley, construction of additions to the building and the related alterations to the existing structure.

The additions to the Public Health Building in Berkeley are proposed for financing through the issuance of trust certificates by the State Public Works Board. The anticipated expenditure is shown in the appendix section.

GENERAL ANALYSIS

The proposed expenditure program for highways is related to allocations of Federal Aid subventions and increased rates and fees for motor vehicle fuel and diesel fuel tax and motor vehicle registration and weight fees, which expired in the 1959-60 fiscal year, but were extended by the 1959 Legislature.

Recapitulation of Proposed Expenditures and Obligations for Construction of State Highways for 1961-62 Fiscal Year, Showing Allocation of Construction Funds by County Group

EXPENDITURE CATEGORY	NORTHERN COUNTY GROUP	SOUTHERN COUNTY GROUP	TOTAL
Major construction and improvement projects	$131,004,000	$154,068,000	$285,072,000

HIGHWAY PROPERTIES RENTAL FUND

Chapter 2157, Statutes of 1959 (Section 104.6 of the Streets and Highways Code). The department is authorized to lease any lands which are held for state highways purposes and to maintain and care for such property in order to secure rent therefrom. All rent so received shall be deposited in the Highway Properties Rental Fund, except that any rent required under the California Toll Bridge Authority Act of any bond indenture executed under said act to be deposited in some other fund shall be deposited in such other fund and all rents received from property acquired for the National System of Interstate Highways shall be deposited in the State Highway Fund.

FUND CONDITION	ACTUAL 1959-60	ESTIMATED 1960-61	ESTIMATED 1961-62
Accumulated Surplus, July 1	–	$1,952,815	$3,039,420
Revenue:			
Rental collections	$1,952,815	3,039,420	2,626,000
Total Resources	$1,952,815	$4,992.235	$5,665.420
Less Disbursements:			
Counties	–	–	$729,461
Transfers to the State Highway Fund	–	$1,952.815	2,309,959
Accumulated Surplus, June 30	$1,952,815	$3,039,420	$2,626,000

---

[a] A nonrevenue fund, neither receipts nor expenditures are included in the overall budget totals. Disbursements by the Division of Highways accounted as an abatement of acquisition expenditures by the division.

DIVISION OF HIGHWAYS—Continued

Statement No. 3—Detail of Major Project Allocations for Construction of Highways and Bridges for the 1960-61 Fiscal Year, Compared to Budget Allocations

County	Route	Description	Approx. mileage	Estimated cost: Original	Estimated cost: Revised as of 10-1-60	Difference
		NORTHERN GROUP OF COUNTIES				
Alameda	5	At intersections of Foothill Boulevard with 159th Avenue, Carolyn Street, with 162d Avenue, and with Miramar Avenue; signals, lighting, and channelization	–	–	$19,017	$19,017[14]
		(Contributed funds)	–	–	13,261	13,261
Alameda	5	Sycamore Avenue to 0.3 mile south Gresel Street; grade and pave	4.1	$690,000	820,000	130,000[6]
Alameda	5	On Mission Boulevard in the vicinity of Highland Avenue; reconstruct shoulders	1.1	8,000,000	9,400	9,400[16]
Alameda	5	San Pablo Avenue to Broadway; grade, pave, and structures	1.1	8,000,000	4,045,215	—3,954,785[1]
Alameda	5	MacArthur Freeway—0.3 mile west Grand Avenue to 14th Avenue; grade, pave, and structures	1.7	5,000,000	5,000,000	–
Alameda	14	At intersection of San Pablo with Bancroft Way; signals	–	–	3,000	3,000[14]
Alameda	69	Hegenberger Road to Fallon Street; grade, pave, and structures	5.6	4,800,000	4,800,000	–
Alameda	69	0.2 mile east of Fallon Street to El Cerrito Overhead (portions); median barriers	5.5	360,000	360,000	360,000[13]
Alameda	69	Fifth Avenue Overhead to Linden Street; landscape	1.5	35,000	53,777	18,777[6]
Alameda	69	At intersection of the Cypress Street Off-ramp with Eighth Street; signals	–	–	1,305	1,305[14]
Alameda	69, 7	0.3 mile south of El Cerrito Overhead to 0.3 mile south of Jefferson Avenue; landscape	2.6	280,000	280,000	–
Alameda	75	Caldecott Tunnel—additional 2-lane bore (Formerly Broadway Tunnel)	1.5	10,000,000	12,500,000	2,500,000[7]
Alameda	105	At intersection of East 14th Street with 148th Avenue; lighting	–	–	1,341	1,341[13]
Alameda	105	At intersection of Jackson Street with Watkins Street in Hayward; signals and lighting	–	–	5,400	5,400[14]
Alameda	105	In the vicinity of Soto Road; drainage facilities	–	–	4,950	4,950[10]
Alameda	107	Approximately 1,200 feet west of Mayhews Landing Road in Newark; culvert	–	–	10,000	10,000[10]
Alameda	226	At the intersection of Encinal Avenue with Grand Street; signals	–	–	5,750	5,750[14]
Alpine	34, 23	0.8 mile southwest of Picketts to 1.5 miles east of Picketts; grade and pave	2.1	–	410,000	410,000[9]
Amador	34	At the intersection of Route 34 with Argonaut Lane approximately 1 mile northwest of Jackson; lighting	–	–	400	400[13]
		(Contributed funds)	–	–	200	200
Amador	34	Dry Creek Bridge No. 26-07; bridge and approaches	–	110,000	116,966	6,966[7]
Amador	34	1.6 mile southwest of Pine Grove to 0.2 mile east of Pine Grove; grade and pave	2.0	–	351,000	351,000[9]
Butte	3	20th Street to 1st Street in Chico; pave and curbs	1.3	200,000	200,000	–
		(Contributed funds)	–	–	6,431	6,431
Butte	3	Big Chico Creek to 0.3 mile north of Lindo Channel; functional planting	1.8	10,000	8,291	—1,709[1]
Butte	3	At intersection of Route 3 with Wilson Street and with Hazel Street in Gridley; signals and channelization	–	–	12,400	12,400[16]
Calaveras	24	Angels Camp to east of Murphys; grade and pave	8.8	–	1,305,000	1,305,000[9]
Colusa	7	Widening between the south city limit of Williams and Maxwell	9.2	–	123,000	123,000[9]
Colusa	15	On Market Street, Bridge Street to 10th Street in Colusa; surface	–	–	10,600	10,600[16]
Colusa	88	Main Street in Grimes to Sycamore; grade and pave	6.1	250,000	432,000	182,000[6]
Contra Costa	7	Ridge Road to Carquinez Bridge; functional planting	8.0	25,000	15,435	—9,565[1]
Contra Costa, Sacramento	11	On the San Joaquin River Bridge at Antioch; surface	–	–	6,000	6,000[21]

Santa Barbara	80	Milpas Street, Route 2 to Mason Street; widen	0.2	–	35,500	35,500 [11]
Santa Barbara	149, 56	At the intersections of Ocean Avenue with G Street, with H Street, and with I Street; signals, lighting and channelization	–	–	41,200	41,200 [14]
Santa Barbara	149, 56	East city limit of Lompoc to Santa Ynez River (portions); grade and pave	1.4	210,000	181,245	—28,755 [1]
Santa Barbara	149	Route 2 (Buellton) to Solvang (portions); grade and pave	2.3	–	160,000	160,000 [9]
Tulare	4	Dixley to Tulare Airport (portions); grade, pave, and structures	13.3	3,600,000	3,600,000	–
Tulare	132	Construct bridge approaches and a pedestrian walkover at Sand Creek Bridge	–	–	20,464	20,464 [24]
Ventura	2	0.6 mile east of Las Posas to 1 mile east of Central Avenue; grade, pave, and structures	1.3	–	504,000	504,000 [19]
Ventura	2	2.1 miles west of Newbury Park to Conejo Grade Summit; surface	0.7	–	43,000	43,000 [16]
Ventura	2, 60	On Route 2 at the Ditch Road and Callegoas Road Overcrossing and on Route 60 at the Pleasant Valley Road, Wood Road and Dempsey Road Overcrossings; functional planting	–	–	22,000	22,000 [17, 20]
Ventura	2, 138	Ventura Freeway—near Palm Street to Mile 2.0 (D) on Route 2 and Route 2 Freeway to Prospect Street on Route 138; grade, pave, and structures	2.9	6,500,000	6,500,000	–
Ventura	79	Intersection of Telegraph Road with North Brent Street; drainage improvement and widen	–	–	3,761	3,761 [10, 11]
		Totals, Southern Group of Counties	–	$143,969,000	$198,985,381	$55,016,381
		Totals, Northern Group of Counties	–	$113,550,000	$142,058,490	$28,508,490
		Totals, Southern Group of Counties	–	143,969,000	198,985,381	55,016,381
		TOTALS, MAJOR PROJECT ALLOCATIONS		$257,519,000	$341,043,871	$83,524,871

REASONS FOR REVISIONS

[1] Savings—funds in excess of project requirements.
[2] Project deferred.
[3] Decrease due to change in scope of work.
[4] Decrease, project or portion of project financed from other funds.
[5] Additional funds to cover increases in project costs.
[6] Additional funds required because of revision of design standards or scope of work.
[7] Additional funds required because of low budget estimate or higher construction costs.
[8] Additional project; transfer from prior budget.
[9] Additional project to improve deficient roadway or structure.
[10] Additional project to improve drainage.
[11] Additional project to improve traffic service.
[12] Additional project to relieve traffic congestion.
[13] Additional project to improve traffic safety.
[14] Additional project to install or revise traffic regulatory or safety devices.
[15] Additional project to replace a deteriorated or destroyed structure.
[16] Additional project to repair a deteriorated roadway or structure.
[17] Additional project to provide for roadway delineation.
[18] Additional project to restore or reconstruct roadway at slipout.
[19] Additional project for freeway or expressway construction.
[20] Additional project for erosion control and/or restoration.
[21] Additional project to stabilize slide area or remove underground water.
[22] Additional project to place roadway in acceptable condition for relinquishment.
[23] Additional project to construct weighing facilities or loadometer stations.
[24] Additional project to alleviate hazardous conditions.
[25] Additional project to acquire material site for use on construction.
[26] Additional project to comply with Coast Guard regulations.
[27] Additional project to facilitate highway maintenance.
[28] Additional project to comply with legislative action.

Statement No. 4—Detail of Major Project Allocations for Construction of Highways and Bridges for the 1959-60 Fiscal Year, Compared to Budget Allocations

County	Route	Description	Approximate Mileage	Estimated Cost Original	Estimated Cost Revised as of 11-1-59	Expenditures and Contract Obligations 6-30-60	Difference
		NORTHERN GROUP OF COUNTIES					
Alameda	5	San Pablo underpass; pave and drainage	–	$25,000			
Alameda	5, 69	Routes 5 and 69 west and north of distribution structure; pave and drainage	–	72,000			
Alameda	5, 69	Near the San Francisco-Oakland Bay Bridge distribution structure and the San Pablo Avenue overcrossing; pave and drainage	–		$92,680	$76,651	—$16,029[1]
Alameda	5	Greenville to Mountain House Road; pave	6.9	200,000	150,763	135,573	—15,190[1]
Alameda	5	At the intersection of Route 5 with Vasco Road near Livermore; acceleration and deceleration lanes	–	–	18,000	14,537	—3,463[1]
Alameda	5	At intersection of Mission Boulevard with Nursery Road in Fremont; channelization	–	–	–	10,648	10,648[12]
Alameda	5	Distribution structure to Grand Avenue (portions); grade, pave, and structures	1.7	10,000,000	10,000,000	7,525,703	—2,474,297[1]
Alameda	5	At the intersections of Foothill Blvd. (Route 5) with Main Street, with "C" Street, with "B" Street and with "A" Street in the City of Hayward; modify traffic signals. (State's share)	–	–	3,500	4,061	561[7]
Alameda	5, 69	Bay Bridge to distribution structure, landscape	1.8	130,000	130,000	66,364	—63,636[8]
Alameda	14	On San Pablo Avenue (Route 14) between MacArthur Blvd. and Park Avenue in the City of Emeryville; modify traffic signals and highway lighting. (State's share)	–	–	13,800	11,618	—2,182[1]
Alameda	14, 206	At the intersection of San Pablo Avenue, with Addison Street and on Ashby Avenue, Grove Street to College Avenue in Berkeley; signals and interconnection	–	–	–	9,500	9,500[13]
Alameda	69	On Farnsworth Street-Floresta Blvd.-Purdue Street to Monterey Street, structure and approaches. (State's share)	0.4	160,000	160,000	138,388	—21,612[1]
		(Contributed funds)	–	–	–	11,444	11,444
Alameda	69	0.6 mile south of Tennyson Road to 0.3 mile north of Jackson Street; functional planting	1.8	80,000	84,114	81,167	—2,947[1]
Alameda	69	At Alguire Road in Fremont; improve drainage	–	–	–	3,628	3,628[10]
Alameda	69	Washington Avenue to 0.2 mile south of High Street; median barrier rail	6.8	306,000	306,000	214,940	—91,060[1]
Alameda, Contra Costa	69, 7	0.3 mile south of El Cerrito overhead to 0.2 mile south of Jefferson; grade, pave, and structure	2.3	1,300,000	1,282,913	1,282,913	–
Alameda, Contra Costa	75	Broadway Low Level Tunnel; paint interior	–	55,000	47,423	46,553	—870[1]
Alameda	105	At San Lorenzo Creek; bridge and approaches; Mattox Road and Hampton Road to intersection with East 14th Street; reconstruct	–	–	30,500	24,909	—5,591[1]
		(Contributed funds)	–	–	409,244	304,884	—104,360
Alameda	226	Webster Street Tube; parallel 2-lane tube	0.8	7,000,000	17,362,831	17,362,831	–
		(Contributed funds)	–	–	19,536	19,536	–
Alameda	226	Intersections of Otis Drive with Mound Street and with Pearl Street; storm drain system	–	–	13,200	10,281	—2,919[1]
Alameda	227	Park Boulevard to south of Lincoln Avenue; landscape	1.4	25,000	19,009	17,030	—1,979[1]
Alameda	227	Lincoln Avenue to 0.5 mile south of Carson Street; grade, pave and structures	1.6	1,273,000	782,143	482,143	—300,000[4]
		(Contributed funds)	–	–	156,392	306,392	150,000
Alameda	228, 5	Route 69 to Center Street; landscape	3.8	110,000	90,480	90,480	–
Alpine, El Dorado	23	Picketts to Grass Lake (Luther Pass); grade, pave and structures	3.9	655,000	720,000	720,000	–
Amador	65	At Martell Railroad Crossing; truck stopping lanes	–	–	–	6,000	6,000[13]
Amador, Alpine	34	Summit of Carson Spur to 0.2 mile east of Amador-Alpine County line; grade and pave	2.2	430,000	430,000	430,000	–

REASONS FOR REVISIONS

[1] Savings—funds in excess of project requirements.
[2] Project deferred.
[3] Decrease due to change in scope of work.
[4] Decrease, project or portion of project financed from other funds.
[5] Additional funds to cover increases in project costs.
[6] Additional funds required because of revision of design standards or scope of work.
[7] Additional funds required because of low budget estimate or higher construction costs.
[8] Additional project to alleviate hazardous conditions.
[9] Additional project to improve deficient roadway or structure.
[10] Additional project to improve drainage.
[11] Additional project to improve traffic service.
[12] Additional project to relieve traffic congestion.
[13] Additional project to improve traffic safety.
[14] Additional project to install or revise traffic regulatory or safety devices.
[15] Additional project to replace a deteriorated or destroyed structure.
[16] Additional project to repair a deteriorated roadway or structure.
[17] Additional project to provide for roadway delineation.
[18] Additional project to restore or reconstruct roadway at slipout.
[19] Additional project for freeway or expressway construction.
[20] Additional project for erosion control and/or restoration.
[21] Additional project to stabilize slide area or remove underground water.
[22] Additional project to place roadway in acceptable condition for relinquishment.
[23] Additional project to construct weighing facilities or loadometer stations.
[24] Additional project to repair damage occasioned by highway construction.
[25] Additional project to acquire material site for use on construction.
[26] Additional project to comply with Coast Guard regulations.
[27] Additional project to comply with legislative action.

Statement No. 5—Expenditures for Maintenance by Routes for the Fiscal Year July 1, 1959 to June 30, 1960

(Includes Maintenance to Toll Bridges Under Section 188.3 of Streets and Highways Code)

ROUTE	AMOUNT
1. Golden Gate Bridge to Oregon line via Crescent City and Smith River	$1,437,470
2. San Francisco to Mexican line near Tia Juana, Orcutt to Route 2 and Harrison to Route 2	2,532,748
3. Sacramento to Oregon line via Marysville and Yreka	962,665
4. Sacramento to Los Angeles	1,554,640
5. Route 65 near Mokelumne Hill to Santa Cruz via Stockton and near Hayward to San Francisco-Oakland Bay Bridge (Pier E-23, Station 273+16)	528,123
6. Sacramento to Route 7 south of Davis and Napa to Route 7 near Davis	195,216
7. Route 69 in Albany to Route 3 near Red Bluff	516,502
8. Ignacio to Route 7 near Cordelia via Napa	65,639
9. Route 79 near Saticoy to San Bernardino via San Fernando	401,431
10. Route 2 near San Lucas to Sequoia National Park line via Coalinga, Hanford and Visalia	229,741
11. Route 75 near Antioch to Nevada line near Lake Tahoe via Sacramento and Placerville	727,291
12. Old Spanish Lighthouse, Point Loma to El Centro via San Diego	243,472
13. Route 4 at Salida to Route 23 via Sonora and Long Barn	187,882
14. Oakland to Route 7 in Richmond at Cutting Boulevard	37,061
15. Route 56 near Fort Bragg to Route 37 near Emigrant Gap via Willits, Williams and Colusa	428,951
16. Route 1 to Lakeport	40,906
17. Route 3 south of Roseville to Nevada City	119,899
18. Merced to Yosemite National Park near El Portal	81,768
19. Route 174 at Santa Ana to Beaumont via Pomona and Riverside, and Route 9 near Claremont to Pomona	184,145
20. Route 1 near Arcata to Lassen National Park via Weaverville and Redding	568,633
21. Route 3 near Richvale to Route 29 via Quincy and Beckwourth Pass	347,779
22. Route 56 near Castorville to Route 32 via San Juan Bautista and Hollister	53,173
23. Los Angeles to Route 11 near Meyers Station via Independence	877,271
24. Lodi to Nevada State line via Angels Camp and Woodfords	198,529
25. Route 37 near Colfax to Route 83 near Sattley via Grass Valley and Downieville	278,374
26. Los Angeles (Aliso Street) to Calexico via Pomona and Colton and a connection from near Colton to San Bernardino including a cutoff two miles west of Brawley	854,112
27. El Centro to Yuma	73.766
28. Redding to Nevada line via Alturas and Cedarville	306,718
29. Route 35 near Peanut to Nevada line near Purdy via Red Bluff	499,896
31. San Bernardino to Nevada line near Calada via Barstow	300,916
32. Watsonville to Route 4 near Califa via Gilroy and Pacheco Pass	125,498
33. Cambria to Famosa via Paso Robles and Cholame Pass	125,712
34. Route 4 near Arno to Route 23 at Picketts Junction via Jackson	160,115
35. Route 1 near Alton to Route 20 near Douglas City	250,905
36. Mount Pleasant Ranch to Downieville	645
37. Auburn to Route 38 via Emigrant Gap	586,869
38. Route 11 near May's Junction to Nevada line via Truckee	337,457
39. Tahoe City to Nevada line at Crystal Bay	60,995
40. Route 13 to Route 76 near Benton Station via Big Oak Flat and Buck Meadows. Route 23 north of Mono Lake to Nevada State line	183,055
41. Route 5 near Tracy to Kings River Canyon via Fresno and General Grant Grove	239,251
42. Route 5 in Los Gatos to Governor's Camp in Redwood Park	52,030
43. Newport Beach to Victorville via Santa Ana Canyon, Baldwin Lake and around Big Bear Lake	651,207
44. Boulder Creek to Governor's Camp in California Redwood Park	9,117
45. Route 3 near Biggs to Route 7 near Willows	40,409
46. Route 3 near Klamath River Bridge to Route 1 near Klamath via Weitchpec	283,467
47. Orland to Route 29 near Deer Creek Meadows via Chico	134,971
48. Route 1 near Cloverdale to Route 56 at mouth of Navarro River	134,339
49. Route 8 near Napa to Route 15 via Calistoga and Lower Lake	122,473
50. Route 15 to Sacramento via Rumsey and Woodland	157,202
51. Sebastopol to Route 8 near Sears Point via Santa Rosa	47,891
52. Route 1 to Tiburon	9,233
53. Route 7 near Fairfield to Route 4 near Lodi via Rio Vista	125,125
54. Route 11 near Perkins to Drytown	25,270
55. San Francisco to Route 5 (Skyline Boulevard)	109,952
56. Coast Route from Route 2 near Las Cruces to San Francisco; Route 1 near Sausalito to Fernbridge, and connection with Route 1 near Leggett Valley	1,447,402
57. Route 2 near Santa Maria to Route 23 near Freeman via Bakersfield and Walker Pass	234,432
58. Route 2 near Santa Margarita to the Arizona line near Topok via Bakersfield, Mojave, and Barstow and a connection from near Needles to Arizona line	501,667
59. Route 4 near Gorman to Route 43 via Lake Arrowhead	198,260
60. Route 2 near El Rio to Route 2 south of San Juan Capistrano	424,440
61. Route 162 near Avenue 36 in Los Angeles to Route 59 via Glendale and Wrightwood	264,872
62. Route 171 in Buena Park to Route 2 near La Habra; Route 26 in West Covina to Route 61 via San Gabriel Canyon	94,992
63. Big Pine to Nevada line via Oasis	52,047
64. Route 2 near San Juan Capistrano to Arizona line via Lake Elsinore, Indio and Blythe and between Mecca and Shaver's Summit	315,859
65. Auburn to Mariposa via Jackson (Mother Lode)	226,250
66. Route 5 near Mossdale to Route 13 near Oakdale	26,095
67. Route 2 near San Benito River Bridge to Route 56 near Watsonville	16,960
68. San Francisco to Route 2 near Ford Road (Bay Shore) including the Bay Bridge (Pier E-23, 273+16)	636,472
69. Route 1 near San Rafael to Point San Quentin; San Jose to the Richmond-San Rafael Bridge Toll Plaza; Spur to Route 5 near Warm Springs; Spur to Route 69 in Albany	573,452
70. Ukiah to Mendocino State Hospital line	2,674
71. Route 1 near Crescent City to Oregon line	16,033
72. Weed to Oregon line near Calor	88,935
73. Route 29 to Oregon line near New Pine Creek via Alturas	222,802

Statement No. 6—Comparison of Revised Revenue Estimates for the 1960-61 Fiscal Year With Budget Estimates Submitted to the 1960 Session of the Legislature

ESTIMATED REVENUES AND RECEIPTS	1960-61 BUDGET 1960 SESSION	REVISED ESTIMATES	DIFFERENCES
STATE HIGHWAY FUND			
State Funds:			
Apportionment from State Revenues Collected by Other Agencies:			
Transfers from Highway Users Tax Fund	$339,781,354	$346,571,772	$6,790,418
Revenues:			
Supervision of Outdoor Advertising:			
License fees	$46,000	$46,000	–
Permits and penalties	81,000	81,000	–
Totals, Supervision of Outdoor Advertising	$127,000	$127,000	–
Martinez-Benicia ferry tolls	125,000	125,000	–
Investment earnings	1,000,000	3,000,000	$2,000,000
Miscellaneous	–	500,000	500,000
Totals, State Funds	$341,033,354	$350,323,772	$9,290,418
Federal and Other Funds:			
Federal Aid Subventions:			
For state highways	$219,320,707	$219,320,707	–
For county highways	8,388,160	8,352,716	—$35,444
Totals, Federal Aid Subventions	$227,708,867	$227,673,423	—$35,444
Miscellaneous Contributions:			
For state highways	–	$8,854,173	$8,854,173
For county and other agencies—emergency damage repairs	–	52,610	52,610
For county highways—federal and secondary	–	704,543	704,543
Totals, Miscellaneous Contributions	–	$9,611,326	$9,611,326
Reimbursements—work for other agencies	–	1,334,852	1,334,852
Totals, Federal and Other Funds	$227,708,867	$238,619,601	$10,910,734
TOTALS, REVENUE AND RECEIPTS, STATE HIGHWAY FUND	$568,742,221	$588,943,373	$20,201,152

AERONAUTICS COMMISSION

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

The 1960-61 Capital Outlay program for the Aeronautics Commission provided for the acquisition of Blue Canyon Emergency Airport, located in Placer County adjacent to U.S. Highway 40. The acquisition involves a total of 75 acres which includes the actual runway area and approach zones to inhibit encroachment.

STATE BUILDING PROGRAM

ESTIMATED 1959-60 AND 1960-61 EXPENDITURES[P]

	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Purchase of emergency airport site	–	$3,500	–
TOTAL EXPENDITURES, CAPITAL OUTLAY	–	$3,500	–

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

Veterans' Home of California

The Veterans' Home, a 2,412-bed facility is located in Napa County. It is a home for aged and disabled, honorably discharged former members of the armed forces. The site of the home is on a hillside with both single and 2-story buildings and a 4-story hospital. Most of the structures of the institution have been replaced in recent years or are in good condition. The construction program proposed for 1961-62 will provide equipment for the previously funded hospital alteration and medical treatment center projects, and $41,900 to correct deficiencies and to improve the physical plant.

SUMMARY OF POPULATION AND CAPACITY—ANNUAL AVERAGE POPULATION

TYPE OF CAPACITY	ACTUAL 1959-60	ESTIMATED 1960-61	ESTIMATED 1961-62
Population	1,816	1,825	1,825
TOTAL CAPACITY	2,412	2,412	2,412
Additional construction required[1]	—596	—587	—587
Bed Capacity:			
Domiciliary	1,531	1,531	1,531
Intermediate—long-term	418	418	418
Hospital	449	449	449
Receiving	14	14	14

The Capital Outlay budget presents the expenditures for the California Water Facilities Program and for construction of department facilities under the State Building Program. The capital outlay expenditures for the California Water Development Program include the cost of the construction and acquisition phases of the state water facility projects, the state contributions to federal-state projects, and state financial assistance to local projects.

A general explanation of the state projects under the California Water Development Program is presented in the State Operations budget on page 645 with a description of the significant units of each project and a timetable of design, acquisition, construction, and operation. The timetable is based on the best current estimates of project emphasis and production potential. Each expenditure for state projects in the Capital Outlay budget relates directly to the timetable. The timetable indicates the beginning and progress of all projects that are active during the current and budget years.

FEDERAL-STATE PROJECTS

SEA WATER CONVERSION PLANT

The plant is to be built by the Federal Government at Point Loma, San Diego County. It will be the multiflash distillation type, having a capacity of 1,000,000 gallons per day. Steam to operate the distillation plant will be provided by an oil-fired steam boiler. Distilled water produced by the plant will be cooled to a temperature of 80° F., and purchased by the City of San Diego at the plant boundary. San Diego will build a pipeline to a city reservoir approximately 3 miles away and will provide pumping equipment for conveying the water to the reservoir. The site for the plant was selected and designs and specifications were nearly completed in 1959-60. Construction will begin in 1960-61 and should be completed early in 1961-62.

BLACK BUTTE AND NEW HOGAN DAMS

Contracts have been negotiated with the U.S. Department of Interior for state participation in the construction and operation of the Black Butte and New Hogan projects. While these projects are primarily flood control facilities, certain conservation features are also involved, and the department is committed to reimburse the Federal Government for those costs of construction, operation, and maintenance allocated to purposes of irrigation. Funds for this purpose have been made available in Item 425.4 of the Budget Act of 1958, and Item 385 of the Budget Act of 1959.

The Corps of Engineers started construction on the Black Butte Dam and Reservoir in June 1960. The project, located in Glenn and Tehama Counties, is scheduled for completion November 30, 1962. The State's share in this project has been set at 39.9 percent of the total cost of construction, or approximately $7,300,000, for which it will receive the right to all water conservation benefits in addition to the flood control provided by the project without reimbursement. Water conserved by this project will be utilized for service in the local areas as the demand there grows; the surplus will be used as a source of supply for the Delta Pool.

New Hogan Dam and Reservoir, situated on the Calaveras River in Calaveras County, is a similar project. Construction is tentatively scheduled to begin November 15, 1960, with completion July 31, 1964. The state share of the cost is expected to be $6,440,000, the conservational features being estimated at 36.2 percent of the total costs of construction.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
Black Butte on Stony Creek	–	$7,300,000	–
New Hogan on Calaveras Creek	–	6,440,000	–
Total, Black Butte and New Hogan Dams	–	$13,740,000	–
TOTALS, FEDERAL-STATE PROJECTS	$5,853	$15,026,347	$28,040

DEPARTMENT OF WATER RESOURCES—Continued

CALIFORNIA WATER FACILITIES PROGRAM—Continued

STATE FINANCIAL ASSISTANCE FOR LOCAL PROJECTS

LOANS AND GRANTS FOR LOCAL PROJECTS

To assist local agencies in the financing of water projects, the Legislature enacted Chapter 2052, Statutes of 1957, entitled "State Financial Assistance for Local Projects." The Davis-Grunsky Act, Chapter 1752, Statutes of 1959, amended and added to this program and appropriated $15,000,000 for a loan and grant fund. Chapter 1762/59 provides for a program of state financial assistance to local projects of $130,000,000.

This program provides state financial assistance to public agencies for development of needed and economically justified local water projects. To encourage public agencies to develop the public recreational potential of these projects, the program also provides for state grants for cost properly allocated to the incidental recreational and fish and wildlife benefits of the project.

In administering this program, the department prescribes procedures and gives information to interested agencies pertaining to applications, receives and processes applications, makes findings of feasibility based on complete engineering, economic, and financial analyses of project reports prepared by applicants and reports to the Legislature on each application.

Under the Davis-Grunsky Act the Department of Water Resources, with prior approval of the California Water Commission, can make loans up to $4,000,000 and grants up to $300,000. Larger loans and grants may be made only after approval by the Legislature. The department has received 13 preliminary and 2 formal applications for loans, and 15 preliminary and 3 formal applications for grants totaling $21,382,950.

UNALLOCATED FUNDS FOR PROJECT PLANNING, INCREASED COST OF CONSTRUCTION, MISCELLANEOUS REPAIRS AND IMPROVEMENTS, AND STATE COLLEGE DORMITORIES AND PARKING

SUMMARY

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62
TOTAL EXPENDITURES, CAPITAL OUTLAY	$450,000	$650,000	$600,000
General Fund	*100,000*	*500,000*	*600,000*
State Construction Program Fund [d]	*350,000*	*150,000*	–

GENERAL ANALYSIS

Lump sum appropriations for project planning and miscellaneous repairs have been provided from which allocations to agencies are made as needed. The expenditures from such allocations are included in the individual agency budgets. That part which has not been allocated but which is estimated to be needed for further allocations, is included here as an expenditure.

Funds for preparation of complete project planning are proposed to continue the presently authorized procedures for securing sound cost estimates for subsequently budgeted projects.

Expenditures from available appropriations are estimated for allocation to state agencies upon approval of the State Public Works Board as prescribed by law for increased cost of construction when the lowest bid on a project is in excess of the available funds for such project. Savings from completed projects are transferred to this fund and are available by law for such allocations.

Funds are proposed for miscellaneous repairs and improvements to be allocated to agencies upon subsequent determination of requirements.

Funds are provided for state college dormitory and parking facilities to be allocated by the Department of Finance upon approval of the State Public Works Board.

Part III. Local Assistance Section

SUBVENTIONS

For Education:

Apportionments for Public Schools
Child Care Centers
Contribution to Teachers' Retirement Fund
Free Textbooks
School Building Construction
Debt Service on Public School Building Bonds
National Defense Education
School Lunch Program
Special Milk Program
Vocational Education—Reimbursements to School Districts
Study Grants to Counties for Master Plans of School District Organization

For Public Health:

Assistance to Local Agencies for Mental Health Services
Assistance to Counties for Care of Crippled Children
Assistance to Counties for Tuberculosis Sanitoria
Assistance to Counties Without Local Health Departments
Assistance to Local Health Departments
Assistance to Local Agencies for Gnat Control
Assistance to Local Agencies for Mosquito Control
Assistance to Local Agencies for the Treatment of Physically Handicapped Childre
Assistance to Local and Nonprofit Agencies for Hospital Construction

For Public Works:

Local Roads and Highways
Flood Control—Department of Water Resources and Reclamation Board
Beach Erosion Control
Grade Crossing Protection Works
Storm and Flood Damage Repair
Earthquake Damage Repair
Veterans Housing
Loans to Local Agencies for Small Craft Harbors
Debt Service on Small Craft Harbor Bonds

For Social Welfare:

Aid to the Needy Blind
Aid to Potentially Self-supporting Blind
Aid to Needy Children
Aid to Needy Disabled
Old Age Security
Medical Assistance for the Aged
County Administration of Assistance Programs
Administrative Assistance for County Welfare Departments
County Administration of Child Welfare Services
Grants for Community Services for Older Citizens
Local Inspection of Homes and Agencies Caring for Aged and Children
Reimbursement to Counties for Administration and Cost of Care of Adoptions

SUBVENTIONS—Continued

For Other Purposes:

- Salaries of Superior Court Judges
- Contributions to Judges' Retirement Fund
- County Veterans Service Officers
- Salaries of County Agricultural Commissioners
- Workmen's Compensation for Disaster Service Workers
- Assistance to Counties for Maintenance of Juvenile Homes and Camps
- Assistance to Counties for Construction of Juvenile Homes and Camps
- Assistance to Cities and Counties for Peace Officers' Standards and Training
- Assistance to County Agricultural Fairs and Citrus Fruit Fairs
- Grants to Soil Conservation Districts

SHARED REVENUES

For General Government:

- Apportionment of Liquor License Fees
- Apportionment of Motor Vehicle License Fees
- Apportionment of Highways Property Rental Receipts

Apportionment of Federal Receipts:

- Flood Control Lands
- Forest Reserves
- Grazing Lands
- Potash Lease Rentals

For County Roads:

- Apportionment of Motor Vehicle Fuel Tax
- Apportionment of Motor Vehicle Registration and Weight Fees

For County Airports:

- Apportionment of Motor Vehicle Fuel Tax

For City Streets:

- Apportionment of Motor Vehicle Fuel Tax

SUBVENTIONS FOR EDUCATION—Continued

Apportionments for Public Schools

SUBVENTION EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	ESTIMATED 1961-62
TOTAL EXPENDITURES			
General Fund	$634,535,889	$677,221,552	$718,656,350
State School Fund	3,863,428	3,100,000	3,085,000
California Water Fund	1,928	10,130	15,000
Totals	$638,401,245	$680,331,682	$721,756,350

GENERAL ANALYSIS

This section of the budget provides for apportionments to local school districts of (1) $201.10 per pupil in average daily attendance in the preceding fiscal year for support of kindergarten, elementary, secondary, and technical schools in the public school system; (2) $35 per pupil enrolled in automobile driver training instruction for reimbursement of the actual cost of motor vehicle operation instruction; (3) a special allowance for school districts where there is a large increase in pupils due to state construction projects—"project-connected pupils," and (4) support of newly formed junior college districts.

Article IX, Section 6, of the Constitution provides that the Legislature shall add to the State School Fund revenues to provide for an apportionment each fiscal year of not less than $180 per pupil in average daily attendance in the kindergarten, elementary, secondary, and technical schools in the public school system during the next preceding fiscal year. This apportionment per pupil was increased by the Legislature from $180 to $193.37 by Chapter 1073, Statutes of 1957; and from $193.37 to $201.10 by Chapter 1251, Statutes of 1959.

The $201.10 per pupil in average daily attendance is for categories of aid to support the public school system, as follows:

Purpose	Amount per A. D. A.	Education Code Section
Basic and equalization aid	$173.78	17303f
County school service fund		
a. Direct services	1.60	17303f
b. Other purposes	3.06	17303b
Pupil transportation	4.00	17303c
Special education	7.64	17303d
Growth	11.02	17303e
Total	$201.10	

The State School Fund receives annually approximately $3,000,000 from rentals, interest on investments and oil royalties on state school lands; in 1961-62 these amounts in the State School Fund must be augmented by $711,222,200 to provide for the payment of $201.10 per pupil in average daily attendance.

Automobile driver training expenses incurred by school districts are reimbursable from the State School Fund as authorized by Education Code Section 18251, in an amount equal to actual cost, but not in excess of $35 per pupil instructed in automobile driver training during the preceding fiscal year. This will require an estimated transfer from the General Fund to the State School Fund of $4,249,000 in 1961-62. Section 773 of the Vehicle Code imposes a fee in addition to fines for moving traffic violations for the purpose of reimbursing the General Fund of the State for the expenses of providing this driver training.

Apportionments for support of newly formed junior college districts were authorized by Chapter 2058, Statutes of 1959 to eliminate double local taxation on such districts during the first year of organization. It is estimated that 5 new junior college districts will be established during 1961-62 requiring a state payment of $3,185,150.

The average daily attendance upon which apportionments are based is as follows:

Average Daily Attendance:

	1958-59	1959-60	1960-61
Elementary Grades, Kindergarten Through 8:			
Regular classes	2,188,120	2,335,566	2,446,700

Child Care Centers

EXPENDITURES *(General Fund)*	$4,751,912	$5,157,913	$5,125,851

GENERAL ANALYSIS

Objectives

Child care centers are established to provide care and supervision of children when it is necessary for the parent to work and the parent qualifies on the basis of need. The centers are administered under the provisions of Sections 16601 through 16645.27 of the Education Code.

Program and Performance

To carry out this program the State furnishes two-thirds of the cost, or about $0.26 per hour per child, for the maintenance and operation of the centers. The balance of the cost, or about $0.13 per hour, is paid from fees collected from those persons utilizing the program.

The Child Care Center Program was established on a temporary basis by the 1943 Legislature and was made a permanent program by the 1957 General Session of the Legislature.

Section 16622 of the Education Code provides that if, during any fiscal year there is apportioned to the Child Care Center Fund more or less than the amount to which the fund was entitled, the Superintendent of Public Instruction during the next or any succeeding year shall withhold from, or add to, the apportionment during the next or any succeeding fiscal year the amount of such excess or deficiency. During the 1959-60 fiscal year the centers had 18,921,635 hours of attendance for a total apportionment cost of $4,930,180. The cost of the program for 1959-60 exceeded the appropriation by $178,268. Provision for this anticipated deficit was made in the 1960-61 Budget.

The following table illustrates the increasing enrollment activities of this subvention:

	Actual 1957-58	Actual 1958-59	Actual 1959-60	Estimated 1960-61	Estimated 1961-62
Enrollment hours	17,595,000	18,202,673	18,921,635	19,152,479	19,714,810
Change from prior year	1,286,000	607,673	718,962	230,844	562,331
	(7.9%)	(3.5%)	(3.9%)	(1.2%)	(2.9%)
Total apportionments	$4,604,048	$4,593,310	$4,930,180	$4,979,645	$5,125,851
Change from prior year	$439,867	—$10,738	$336,870	$49,465	$146,206
	(10.6%)	(—0.2%)	(7.3%)	(1%)	(2.9%)

The 1961-62 Budget assumes an enrollment increase of 2 percent over the revised 1960-61 enrollment estimate, and also includes the provision of $46,613 to provide for 179,280 enrollment hours in the child care centers for physically handicapped and mentally retarded children authorized by Chapter 2096, Statutes of 1959. A report will be submitted by the Superintendent of Public Instruction to the Legislature at the commencement of the 1961 Regular Session on the pilot child care centers for physically handicapped children.

The administrative costs of this program are carried in the budget of the Administrative Services Bureau, Division of Public School Administration, Department of Education.

Contributions to Teachers' Retirement Fund				
TOTAL EXPENDITURES *(General Fund)*	$40,254,000	$38,700,000	$41,236,000	$2,536,000 (6.6%)

GENERAL ANALYSIS

The State Teachers' Retirement System will contain 253,420 active members, with an additional retired roll of 24,633 members on June 30, 1962. Since July 1, 1944, members' contributions have been on a full reserve basis. State contributions are appropriated in amounts required to liquidate the amount of maturing liabilities not funded from the members' accumulated reserve and the contributions of employers, rather than as the liabilities accrue. Since July 1956 the members' contributions are fixed in percentages of salary which on the average will provide for accumulation of funds sufficient to pay for one-half the cost of the member's benefit for such service. The district payment since July 1956 has been 3 percent of the teacher payroll in the district (with a maximum limitation of an amount equal to $0.05 per $100 assessed valuation) plus $12 per teacher. Before 1956 only the $12 per teacher payment was made by the district.

The State finances expenditures not funded by the contributions of employing agencies and members. The State's contributions to the Teachers' Retirement Fund and the Retirement Annuity Fund are used to finance the major portion of expenditures for retirement allowances. The major portion of such allowances is payable for prior service which is funded entirely from contributions of the State and the employing districts. Subventions to local retirement systems and a portion of death benefits from the Retirement Annuity Fund are also provided from state contributions.

The subventions to local systems consist of payments of amounts equal to the allowances which would have been payable had the retired members involved been entitled to benefits from the state system alone. The payments are made on the basis of the amounts withheld from local members in the preceding year, and are reduced by one-half of the benefit payable on account of service after 1944 on which no Retirement Annuity Fund contributions have been paid.

Chapter 2060, Statutes of 1959, added a program of monthly benefits for survivors of active members who die while in service. These benefits are payable upon such death as they occur after September 30, 1959. Currently the benefits are being financed from a reserve of contributions credited on account for service rendered prior to July 1, 1944.

ANALYSIS OF EXPENDITURES

GENERAL ANALYSIS

Objectives

The textbook program, under the authority of Section 7, Article 9, of the Constitution, provides for the publishing and purchasing of textbooks approved by the State Board of Education, and distribution to make them available to pupils in the elementary grades of the public schools within the State.

Program and Performance

The 1961-62 program does not provide for the printing of any new adoptions. Provision is made for the reprinting or purchasing of previous adoptions on various subjects as detailed in the following schedule:

Reprints and Purchases of Previous Adoptions:

Subject	Number of Copies	Cost
Arithmetic	898,000	$411,050
Civics	15,000	22,500
Conservation	200,000	320,000
Health	45,000	54,000
History and Geography	436,000	444,450
Language	724,000	580,700
Music	97,000	91,100
Reading [a]	3,037,143	3,237,326
Science	53,000	64,460
Spelling	1,880,000	360.168
Teachers' manuals	50.000	100,000
Braille editions	1,800	30,000
Large Print editions	2,500	50,000
Totals, Printing and Purchase of Textbooks	7,439,443	$5,765,754

Royalty payments are made in the year the books are distributed, rather than when printed. No royalty payments are provided for purchased books as the purchase prices represent the total costs. Royalty payments will be made in the 1961-62 fiscal year in the following subject areas:

Royalties on 1961-62 estimated distribution:

Subject	Estimated Number of Copies	Estimated Cost
Arithmetic	1,112,500	$190,850
Civics	45,000	17,100
Conservation	180,000	–
Handwriting	470,000	9,000
Health	386,000	162,382
History and geography	822,500	431,360
Language	323,000	150,999
Music	414,100	114,396
Reading	8,185,200	1,106,830
Science	1,434,500	138,727
Spelling	1,987,000	117,300
Total Royalties	15,359,800	$2,438,944

Insufficient funds were provided in the 1960-61 fiscal year to allow the complete purchase in sufficient quantity of reading textbooks adopted by the State Board of Education. It was therefore necessary to defer the purchase of reading textbooks totaling $1,552,923 needed for distribution in 1961-62. This amount is included in the 1961-62 Budget proposal.

The publishers, of the reading books offered on a purchase basis, submitted alternate bids that came within the language limitation of Item 361, Budget Act of 1960.

For the 1961-62 fiscal year, 2 stockclerk positions and 1.2 positions of temporary help are proposed new to handle the increased workload related to the increased number of textbook shipments anticipated in 1961-62.

School Building Construction

SUMMARY

	ACTUAL 1959-60	ESTIMATED 1960-61	ESTIMATED 1961-62
TOTAL EXPENDITURES *(State School Construction Fund)*	–	–	–

GENERAL ANALYSIS

The State Allocation Board apportions funds to local school districts from the State School Construction Fund if a state construction project causes population increases in the area. A district is eligible for an apportionment if the number of project children and indirect project children in school attendance is at least 25 and is at least 5 percent of the school district average attendance. Each school district to which an apportionment is made shall repay the principal amount within a period of 30 years per Section 7634, Chapter 2383, Statutes of 1957 in accordance with the requirements of the State Project Area School Construction Law.

GENERAL ANALYSIS

Objectives

The proceeds from state bond sales are loaned to impoverished school districts of the State of California for the purpose of providing school facilities. The school districts of the State that received loans repay over a period of years. The bonds that have been sold constitute valid and legally binding general obligations of the State of California.

Program and Performance

The school building loan program was first authorized in 1949 and has been supplemented by subsequent constitutional and statutory authorizations for the purpose of providing urgently needed public school facilities. The actual debt service experience to date is presented in the following tabulation:

Fiscal Year	Debt Service Total	District Repayment and Other Financing	General Fund Net Cost	Accumulative Total Bonds Issued for Program
1950-51	$1,700,084	$882,216	$817,868	$150,000,000
1951-52	4,951,125	2,590,110	2,361,015	225,000,000
1952-53	9,711,250	4,106,193	5,605,057	275,000,000
1953-54	13,009,500	6,501,912	6,507,588	325,000,000
1954-55	15,815,000	8,952,805	6,862,195	355,000,000
1955-56	18,345,977	9,688,236	8,657,741	415,000,000
1956-57	19,638,340	12,234,594	7,403,746	480,000,000
1957-58	24,776,116	14,924,583	9,851,533	565,000,000
1958-59	28,977,634	15,701,508	13,276,126	615,000,000
1959-60	33,313,500	17,130,252	16,183,248	715,000,000
1960-61 (estimated)	40,520,687	19,338,535	21,182,152	835,000,000
1961-62 (estimated)	46,325,250	20,159,500	26,165,750	960,000,000

The amount to be repaid by the school districts is determined each year by the relationship between the assessed valuation of the district and the amount the district must raise by local property taxes for payment on its bonded debt. Provisions for deferment of annual repayment was authorized by Chapter 1880, Statutes of 1957 and was amended by Chapter 4, Statutes of 1958 and by Chapter 533, Statutes of 1959. The district repayments are affected to a significant extent by the use of deferment authorizations as indicated by the following data with a resultant effect upon the cost to the General Fund as computed by fiscal year:

Fiscal Year	Total Deferred Payments
1957-58	$974,524
1958-59	2,787,825
1959-60	5,445,560
1960-61 (estimate)	8,905,004
1961-62 (estimate)	13,200,000

The period for repayment of deferred amounts was extended by statute from 30 years to 40 years. After this time has elapsed any unpaid deferred balance is to be canceled.

Authorized bonds have been sold to the extent of $740,000,000 as of November 30, 1960, and additional bond sales are scheduled in the amount of $95,000,000 prior to June 30, 1961 under authority of Chapter 98, Statutes of 1958, First Extraordinary Session. It is anticipated that additional bond sales will be authorized during the 1961-62 fiscal year totaling $125,000,000 under authority of Chapter 75, Statutes of 1960, First Extraordinary Session.

As of June 30, 1960, 12 districts have repaid loans financed from the State's general obligation bonds. It is estimated that 11 additional loans will be repaid during the 1960-61 fiscal year.

During the first 10 years of this program the annual debt service payments have totaled $170,238,526 for the bonds issued and sold and it has been necessary for the General Fund to pay a total of $77,526,117 during this period that could not be financed from district repayments and other financing.

During the next 10 years it is anticipated that the requirements for school district financing will further increase the need for supplemental financing from the State's General Fund. The projected school enrollment population trends, increased cost for high school facilities as compared with elementary school facilities, increased interest costs for borrowing as compared with bond interest costs in the early part of this program will contribute toward increasing levels of expenditures in this program.

The rate of apportionment has been increased from time to time to meet the increasing need for school facilities. At the 1960 session of the legislature the rate of apportionment was increased from $8,000,000 per month to $10,000,000 per month, and a further provision was contained in Chapter 75, Statutes of 1960, First Extraordinary Session, that the legislature may by concurrent resolution adopted after January 1, 1961 increase the rate of monthly apportionment from 10 million per month to 12 million per month to be financed from funds provided by the State School Building Aid Bond Law of 1960.

National Defense Education

SUMMARY

SUBVENTION EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	ESTIMATED 1961-62	CHANGE FROM 1960-61
TOTAL EXPENDITURES *(Federal funds)* [a]				
Title 3a—Improvement of Instruction	$3,478,787	$3,036,547	$2,547,649	—$488,898 (—16.1%)
Title 5—Improvement of Guidance	1,009,226	1,102,568	1,097,094	—5,474 (—0.5%)
Totals *(Federal funds)* [a]	$4,488,013	$4,139,115	$3,644,743	—$494,372 (—11.9%)

GENERAL ANALYSIS

The National Defense Education Act of 1958 was enacted by Congress (Public Law 85-864) to provide financial assistance to states and their subdivisions in order to ensure trained manpower of sufficient quality and quantity to meet the national defense needs of the country. The total program is discussed in the State Operations Section of the budget, National Defense Education. These titles, providing for reimbursements to local school districts, are administered by The State Department of Education.

Before a state can participate in the provisions of the National Defense Education programs, it must prepare and have approved by the United States Commissioner of Education a state plan for each program title which becomes the state's contract with the federal government. Federal funds are then released to the state in accordance with the approved state plan and on the basis of state allocations determined by the United States commissioner under a formula prescribed in the act.

TITLE 3a—IMPROVEMENT OF INSTRUCTION

Objectives

Title 3a of the National Defense Education Act is concerned with the improvement of instruction in the fields of science, mathematics and modern foreign languages.

Program and Performance

Under Title 3a of the act, school districts and offices of county superintendents of schools file applications for funds for the purchase of equipment, materials, and minor remodeling with the State Department of Education and certify that local matching funds are available. The State Department of Education reviews the applications in terms of the State Plan, and approves or disapproves. Upon approval by the State Department of Education, the local agency is authorized to proceed with the purchases as outlined in their project proposal and file a claim for reimbursement of one-half of the expenditure from federal funds.

The large amount of general purpose audio-visual equipment purchased with Title 3a funds has strengthened instruction in the 3 subject areas financed through the National Defense Education program, and has also improved the quality of learning experience in all areas of the curriculum.

Federal funds available for this title are matched by local school district expenditures and no General Fund appropriation is required.

Reimbursements to school districts *(Federal funds)* [a]	$3,478,787	$3,036,547	$2,547,649	—$488,898

---

[a] Neither the receipts nor expenditures of federal funds are included in the overall budget totals.

[b] A loan of $30,000,000 was advanced from the California Water Fund during the 1959-60 fiscal year to the State School Building Aid Fund and this loan will be repaid in full during the 1960-61 fiscal year.

National Defense Education—Continued

TITLE 5—IMPROVEMENT OF GUIDANCE

Objectives

Title 5 of the National Defense Education Act is concerned with the establishment of programs of testing and guidance for the identification and encouragement of able students.

Program and Performance

This title provides federal funds for reimbursement to local school districts for the establishment and maintenance of programs in guidance, counseling and testing in public secondary schools.

School districts file applications for these federal funds with the State Department of Education where the applications are reviewed in terms of the State Plan for Title 5. Upon approval by the department the local district is authorized to proceed with its program as outlined in its project proposal. Following the expenditure of funds by the local district, a claim is filed with the State Department of Education and the district is reimbursed for the expenditure.

Existing state and local expenditures meet the matching requirement of this title and no General Fund appropriation is required.

TOTAL EXPENDITURES *(Federal funds)* a	$5,174,112	$5,000,000	$5,000,000

GENERAL ANALYSIS

Under the Federal School Lunch Act, federal funds are distributed to school districts offering approved lunches to children on a partially reimbursed basis. During the 1959-60 fiscal year, 3,321 schools participated, an increase of 132 schools over the previous year. Surplus food commodities donated by the Federal Government during 1959-60 amounted to $9,677,751 or an increase of $2,751,261 over the $6,926,490 donated in 1958-59. These surplus food commodities were distributed by the State Educational Agency for Surplus Property. Handling charges for this service, amounting to $695,033, were reimbursed by the school districts to the Surplus Property Revolving Fund.

Special Milk Program

TOTAL EXPENDITURES *(Federal funds)* a	$7,327,109	$7,800,000	$7,800,000	

GENERAL ANALYSIS

This program is sponsored by the Federal Government under the Agricultural Adjustment Act of 1949, which encourages school pupils to consume surplus milk. During the 1959-60 fiscal year over 15,000,000 gallons of milk were consumed or an increase of approximately 508,897 gallons over the 14,491,103 gallons consumed in the previous year. The increased amount shown in the budget year is based on the estimated consumption for which federal funds are available.

This program, as well as the School Lunch Program, is administered through the Division of Public School Administration of the Department of Education.

Totals b	$2,300,119	$2,181,245	$2,141,006	—$40,239 (—1.8%)

GENERAL ANALYSIS

Objectives

The purpose of vocational education is to provide training to develop skills; attitudes and working habits and to impart knowledge and information needed by workers to enter and make progress in employment on a useful and productive basis.

Program and Performance

The vocational education program for California is based on a plan, co-operatively approved and financed by local school districts, the State Department of Education, and the United States Office of Education.

The available funds are expended for supervision and teacher training at the state level and as reimbursements to those local districts which meet the established qualifications of the approved program. These reimbursements are based on the excess costs to the school districts of meeting the prescribed standards.

In accepting federal aid for vocational education, the State has provided appropriations to match, in part, federal grants-in-aid contained in federal vocational education legislation. After the deduction of state operating costs, the remaining balances of state and federal funds for supervision and teacher training costs are distributed to public secondary school districts maintaining approved courses in vocational instruction in agriculture, homemaking, business education and industrial occupations.

The available funds have been allocated to programs at the local level as follows:

	Actual 1959-60	Estimated 1960-61	Estimated 1961-62
Agriculture	$356,415	$322,642	$321,074

SUBVENTION EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	ESTIMATED 1961-62

Study Grants to Counties for Master Plans of School District Organization

EXPENDITURES *(General Fund)*	–	–	$200,000

GENERAL ANALYSIS

To encourage the consolidation of school districts into more economical units of sufficient size to operate a comprehensive educational program, Chapter 1950, Statutes of 1959, was enacted requiring all counties to prepare school district master plans for submission to the State Board of Education prior to September 15, 1963. These master plans shall provide for the inclusion of all territory of the county into unified school districts.

This subvention will grant funds to the counties concerned to defray the costs of preparing the master plans and to encourage the compliance with the requirements of Sections 3551-3587 of the Education Code. Legislation is anticipated at the 1961 Regular Session to permit the State to offer financial assistance to counties for this purpose.

If any county does not submit master plans by the appointed time, the Department of Education is directed, in accordance with the provisions of the Education Code, to prepare the master plans and submit them to the board for approval prior to September 15, 1965.

Assistance to Local Agencies for Mental Health Services

TOTAL EXPENDITURES *(General Fund)*	$1,204,241	$2,844,775	$3,130,500

GENERAL ANALYSIS

Financial assistance to local governments may be granted under Section 9034 and pursuant to Section 9030 of the Welfare and Institutions Code for the establishment and development of mental health services, including services to the mentally retarded, through locally administered and locally controlled community mental health programs. It is designed to augment and promote the improvement and, if necessary, the expansion of existing local psychiatric services in general hospitals or clinics that help to conserve the mental health of the people of California. The Department of Mental Hygiene is responsible for the administration of this program.

The program was initiated in January 1958. Actual development of the program was slower than anticipated resulting in an unexpended balance of $1,280,948 in 1959-60, during which period only 12 local jurisdictions participated. It is anticipated that 19 jurisdictions will participate in 1960-61 and 35 in 1961-62, which will require the full amount of currently appropriated funds and an increase of $285,725 in 1961-62.

Noncounty resident care	21,878	50,000	50,000
Federal Funds [a]			
Treatment	126,944	–	–
Totals	$4,309,102	$5,910,000	$6,630,000

GENERAL ANALYSIS

This budget provides funds for a state program for handicapped children, which is administered under the provisions of Sections 249 to 271 of the Health and Safety Code. The code provides that whenever the parent or guardian of the child is unable to finance necessary care, a designated agency of the county shall request the State to furnish such services. Further, Section 270 makes it mandatory that each county appropriate at least 1/10 mill on each dollar of assessed property valuation to finance the program.

The budget formula for distribution of these funds is as follows:

a. Treatment:

After the county has spent the 1/10 mill, the State will provide funds sufficient to bring the program up to $20,000, or 3/10 mill, whichever is greater. Treatment costs beyond that point will be shared in the ratio of $2 of state funds to $1 of county funds.

b. Administrative Allowance:

The State will contribute two-thirds of the cost of administration of each independent county program, made in accordance with an approved budget, but not to exceed $6\frac{2}{3}$ percent of the expenditures in the prior year.

c. Diagnosis and Noncounty Resident Care:

The State finances the cost of diagnosis for all children believed to have a condition eligible for treatment and the cost of treatment when the county of residence cannot be established.

Services rendered include necessary medical examinations and consultations, medical and surgical procedures, office and hospital visits, hospitalization, convalescent home care, rehabilitation services, and appliances such as artificial limbs, braces, hearing aids, etc.

Eligible medical conditions for this program are those which are remediable. During the past year 59,900 children received services in the following general categories:

Condition	*Number receivin service*
a. Require plastic or orthodontic reconstruction	7,150
b. Lead to loss of vision or hearing	21,400
c. Rheumatic or congenital heart disease	6,600
d. Other disabling deformities	24,750

Services are provided under strict medical specialist directio through a panel of physicians and surgeons who meet the specialist requirements established by the medical profession. Car is purchased according to an established fee schedule from physicians and on a per diem basis from participating hospitals Program services are rendered by approximately 3,600 pane physicians and in 150 approved hospitals located in most counties in the State.

Normal program growth, particularly in the Southern California area, will result in an increase in program of $720,000

The budget contemplates 3 changes in program:

a. It is proposed that all counties with a population ove 200,000, operate the program on an independent basi rather than having an option to operate on a dependen basis. Although this represents an increase of $40,000 i the administrative allowance, local operation will provid more efficient and effective use of treatment and diagnosti funds resulting in no appropriation increase.

b. It is proposed that the administrative allowance limitatio be changed from $6\frac{2}{3}$ percent of prior year net treatmen expenditures to $6\frac{2}{3}$ percent of prior year gross treatmen and diagnostic expenditures. The major difference betwee net and gross treatment expenditures is the patient an insurance company payments. This proposal will provid greater incentive for the counties to collect these payment so that no increase in appropriation is required.

c. Clinic fees have not been changed for many years althoug the general price level has increased; an adequate panel o clinic physicians can be obtained only by increasing clini fees from $50 to $75 per day. Savings resulting from a adequate panel will offset the rate increase.

SUBVENTIONS FOR PUBLIC HEALTH—Continued

SUBVENTION EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	ESTIMATED 1961-62

Assistance to Counties for Tuberculosis Sanatoria

TOTAL EXPENDITURES *(General Fund)*	$4,564,060	$4,763,890	$4,962,475

GENERAL ANALYSIS

Section 3298 of the Health and Safety Code provides for state grants-in-aid to counties for the treatment and care of persons suffering from tuberculosis. Decreased patient-days result from improved techniques of early case finding and treatment, decreased incidence of disease, and decreased bed occupancies. The latter is shown in the following table:

	ACTUAL					ESTIMATED	
	1955-56	1956-57	1957-58	1958-59	1959-60	1960-61	1961-62
Patient-days	1,822,007	1,646,621	1,432,232	1,303,552	1,232,870	1,168,000	1,109,600

Section 3300 of the Health and Safety Code provides a subsidy of $2.60 per patient-day for the first 36,500 patient-days of care, $2.30 per patient-day for the second 36,500 patient-days, and $1.75 for all additional days plus an additional amount specified in each budget act. The Budget Act of 1960 provided a supplemental amount of $1.76 to each category.

A supplemental amount of $2.21, an increase of $0.45 over the Budget Act of 1960, is proposed for the 1961-62 fiscal year, based on the increased cost of care experienced by local sanatoria. This increase in supplemental aid accounts for the increase in estimated expenditures in the light of decreasing incidence of the disease.

Section 3295 of the Health and Safety Code provides for the care of persons suffering from tuberculosis who violate the quarantine or isolation orders of a county health officer. An agreement has been made with the Department of Corrections to care for these persons at the Medical Facility at Vacaville and the Institution for Women at Corona. Included in the budget request is $57,000 to reimburse the Department of Corrections for an average occupancy of 26 beds.

Assistance to Counties Without Local Health Departments

TOTAL EXPENDITURES *(General Fund)*	$196,590	$291,531	$326,550

GENERAL ANALYSIS

Section 1157 of the Health and Safety Code permits the Department of Public Health to furnish local public health services to those counties without recognized local health departments which contribute a minimum of 55 cents per capita. This program now includes Alpine, Amador, Calaveras, El Dorado, Lake, Mariposa, Modoc, Mono, Nevada, Sierra, and Trinity Counties. Tehama County has requested services effective July 1, 1961. Additional staff of 2 sanitarians and 2 nurses are proposed to handle the increased workload of furnishing services to Tehama County.

GENERAL ANALYSIS

These federal and state funds may be allocated to qualified health departments under the provisions of Section 1100 of the Health and Safety Code to provide effective local public health services. State funds are allocated to local health departments in accordance with Section 1141 of the Health and Safety Code.

The 1961-62 amount is calculated on a July 1, 1961, population estimate of 16,396,000. The General Fund provision is based on a formula of 60 cents per capita per county, or $16,000 per county, whichever is the lesser, as a basic amount, plus 20.064963 cents per capita. Because of the limitation on funds available, the 1961-62 per capita allocation was reduced from the 20.735401 cents used in the 1960-61 budget. After allocations for special local demonstration and investigation projects, the balance of the federal funds is distributed in the same ratio as state funds.

TOTAL EXPENDITURES *(General Fund)*	$186,633	$196,715	$196,715

GENERAL ANALYSIS

Assistance is provided to local governmental agencies for control of mosquito-borne diseases in two ways:

a. Subsidy is provided for reporting of mosquito incidence.
b. Research is conducted in field laboratories to determine the most effective and economical methods of mosquito control.

The 1961-62 Budget proposes that 2 professional positions, which are presently authorized on a temporary basis, be authorized on a permanent basis.

SUBVENTIONS FOR PUBLIC HEALTH—Continued

Assistance to Local Agencies for Treatment of Physically Handicapped Children

SUBVENTION EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	ESTIMATED 1961-62
TOTAL EXPENDITURES *(General Fund)*	$1,093,102	$1,439,220	$1,600,000

GENERAL ANALYSIS

This is a joint program sponsored by the Department of Public Health, the Department of Education, local school districts, and local health departments throughout the State. Treatment for children with complicated medical diagnoses such as cerebral palsy, poliomyelitis, muscular dystrophy, amputation, and multiple sclerosis are provided by therapists in special school facilities. The therapy units are built and equipped by the school district; the physical and occupational therapists, and medical supervision have been provided through the Department of Public Health. Assignment of therapists has been based on the number of children with cerebral palsy requiring treatment. Children with other disabling conditions have received treatment on a "time available" basis. Poliomyelitis was added as an eligible condition during the past year when the National Foundation discontinued provision of this type of therapy.

Special classrooms and therapy units are established by a school district (or a combination of school districts) for 12 children. Physical and occupational therapists are assigned on the basis of number of cases needing treatment and number of treatments prescribed. During the current year over 260,000 treatments are anticipated to be given to more than 8,000 children. These treatment centers are located in 53 schools in 30 counties.

This budget provides funds for the department to employ these therapists, or enter into contracts for local health departments to employ them; such personnel will be transferred to local payrolls as soon as feasible. The 1961-62 Budget provides funds for 242 therapists for existing workload plus authorization for 15 additional therapists to meet the anticipated workload increase.

GENERAL ANALYSIS

Section 435.3 of the Health and Safety Code provides that the State may participate in the federal hospital construction program. Hospitals include nursing homes, diagnostic and treatment and rehabilitation centers, and chronic disease hospitals. Allocations are made pursuant to Section 435.6 of the Health and Safety Code to nonprofit as well as governmental hospitals.

TOTAL EXPENDITURES *(General Fund)*	$14,272,914	$16,073,630	$17,594,500

GENERAL ANALYSIS

Major Federal-State Flood Control Projects—Department of Water Resources

Chapters 1, 2, 3, and 4 of Part 6, Division 6 of the State Water Code provide that the State will pay for lands and relocation of improvements in connection with federal flood control projects which have been adopted and authorized by the Legislature.

This reallocation schedule provides for the continuation of 10 currently authorized projects and 2 projects in Riverside and Ventura Counties requiring funds for the first time.

Watershed Protection Projects—Department of Water Resources

This program is known as Public Law 566, Act of 1954 (amended by Public Law 1018, Eighty-fourth Congress, Second Session, 1956) entitled "Watershed Protection and Flood Prevention Act of 1954." The act provides for the construction of works of improvement for the purposes of flood prevention and the agricultural phases of conservation, development, utilization, and disposal of water. In any watershed or subwatershed areas the projects shall be limited to 250,000 acres and shall not include structures having a capacity of more than 5,000 acre-feet for flood prevention, or a capacity of more than 25,000 acre-feet for all purposes. This group of 6 projects represents those which are administered at the federal level by the Department of Agriculture. One project at Walnut Creek is based on the Public Law 46 Pilot Plant Program while the remaining group is based on subsequent legislation.

Small Flood Control Projects—Department of Water Resources

Public Law 685 authorizes the Secretary of the Army to allot from appropriations heretofore or hereafter made for flood control not to exceed $10,000,000 in any one fiscal year, for the entire United States, for the construction of small flood control projects not specifically authorized by Congress, provided that not more than $400,000 be allotted for this purpose at any single locality from the appropriations for any one fiscal year. One such project will be active during 1960-61.

Sacramento-San Joaquin River Drainage Basin Projects—Reclamation Board

Through the State Reclamation Board, the State co-operates with the Federal Government in the construction of flood control projects in the Sacramento-San Joaquin River drainage basin. The extent of state participation is determined by the several acts adopting and approving specific projects and for which appropriations to meet the State's cost are made as necessary. Generally such participation consists of the acquisition of rights-of-way, easements, flowage rights, and the cost of replacement or relocation of permanent improvements as necessitated by the construction of the flood control works.

The 1961-62 budget proposes a continuation of the Sacramento River Flood Control Project, the Lower San Joaquin River Flood Control Project, and the Calaveras River and Littlejohn Creek and tributaries.

Total expenditures for 1961-62 are estimated to be $7,027,000 of which $872,000 is prior year appropriations. The appropriation requested is $6,155,000.

Totals	—$75,524	$823,500	$279,300

Beach erosion control in California is the responsibility of the Department of Water Resources as defined in Sections 330 to 339, inclusive, of the Water Code which provides for study of beach erosion problems, co-operation with all federal, state and local agencies in planning and construction within the availability of funds. It is further provided that it is the policy of the State to bear one-half of the costs of local public agency participation required by authorized federal projects, including construction costs and costs of lands, easements and rights-of-way. Advances by the State for the federal share of the cost of beach erosion control projects is permitted under Section 338 of the Water Code. Such advances are returned to the State upon completion of a project or a severable portion of a project.

Totals	$1,162,202	$1,452,336	—$31,569

GENERAL ANALYSIS

FLOOD RELIEF LAW OF 1956: Chapter 9, Statutes of 1956 (First Extraordinary Session) appropriated $24,900,000; $14,500,000 from the General Fund and $10,400,000 from the State Lands Act Fund. The amount appropriated from the General Fund was subject to allocation by the State Public Works Board to provide assistance to local agencies, including any city, city and county, county, or public district, for repair and restoration of public property damaged or destroyed by storm and flood during the months of December 1955 and January and February 1956. The amount appropriated from the State Lands Act Fund was for loans to local agencies for the completion of any of the repair projects for which the agencies were unable to meet their share of the cost. The 1957 Legislature appropriated an additional $1,200,000 from the General Fund to complete the financing of the program and the 1958 Legislature extended the availability of the appropriation until June 30, 1960. To date, the General Fund appropriation has been encumbered to the extent of $14,756,189 and the State Lands Act Fund appropriation to the extent of $190,946. The program is now in its final stage and the funds encumbered will suffice to complete it.

FLOOD RELIEF FOR 1958 AND 1960: Item 446.7 of the Budget Act of 1958 appropriated $15,000,000 from the California Water Fund (formerly Investment Fund) to provide financial assistance to local agencies for the repair and restoration of public real property damaged by storm or flood during the period between January 1, 1958, and July 1, 1958. The 1959 Legislature extended the availability of the appropriation to June 30, 1960, and the 1960 Legislature further extended the appropriation without regard to fiscal years and made it available to provide financial assistance to local agencies to repair storm damage occurring between January 1, 1960, and July 1, 1960, as well as to complete the 1958 program. To date, commitments incurred or to be incurred are estimated at $7,580,000 for the 1958 repair program and $1,920,000 for the 1960 program; which amounts, it is believed, will be sufficient to complete the programs.

Totals	$722,750	$7,140,000	$4,092,000

GENERAL ANALYSIS

The Division of Small Craft Harbors and the Small Craft Harbors Commission were created by Division 5.7 of Part I, Public Resources Code. The powers of the division are executed by the chief of the division acting under the supervision and direction of the Director of Natural Resources. The commission establishes the general policies. The division has as part of its mission the program of developing small craft harbors and maintaining or improving the waterways of the State. At the present time, the agency is functioning in the area of assistance to cities, counties, or harbor districts in the planning of small craft harbors and waterways development. The assistance may be in the form of engineering advice, surveys, and site inspection. During the final planning stages in which preliminary plans are developed into contract plans and specifications this assistance would take the form of planning loans and engineering consultation. The agency may also provide construction loans to those local jurisdictions that can properly qualify. Financial assistance to local jurisdictions whether for planning or construction is on a loan basis.

As a part of the long-range program, it is contemplated that the division will also construct harbor facilities as a state development in areas where the need is great and where complete development of the project is beyond the financial capability of a local agency. The first phase of an estimated $4,000,000 harbor project at Shelter Cove in Humboldt County was provided by Chapter 1875, Statutes of 1959. This program is reported in the Capital Outlay section of this budget. Although other harbors of refuge have been proposed, the commission considers that Shelter Cove should be developed first because of its location. Other suggested harbor of refuge areas are Dana Point, Bolinas and Bodega Bay.

The Small Craft Harbors Commission has been authorized to make expenditures from any funds available from the sale of bonds authorized by the Harbor Development Bond Law of 1958. It is provided in this law that loans might be made to cities, cities and counties, counties, and districts having power to acquire, construct, and operate small craft harbors. While the bonds which are authorized by this law are general obligation bonds, it was contemplated that the bonds would be self-liquidating.

FEASIBILITY AND PLANNING STUDY LOANS[c]

PROJECT DETAIL

Section 5827 of the Public Resources Code authorizes the Division of Small Craft Harbors to make planning loans to cities, counties or districts having power to acquire, construct and operate small craft harbors. Such loans as are made must be repaid within 10 years and repayment must include a charge estimated to equal the revenue which the State would have derived by investing the total deferred payment at the interest rate prevailing for legal state investments.

The 1961-62 fiscal year program proposes the continuation of the planning loans. It is estimated that approximately $20,000 in the loan requests will be received by the commission in 1961-62.

Bolinas, Marin County Harbor of refuge, boat berthage and launching facilities.	–	–	$10,000
Eureka, Humboldt County Improvement of existing harbor facilities and necessary surveys Eureka Marina. Loan to City of Eureka.	$10,000	–	–
Moss Landing, Monterey County Provide berthing spaces, parking space, launching ramp and concession area. Loan to Moss Landing Harbor District.	10,000	–	–
Needles, San Bernardino County Necessary dredging and jetty construction; also provide berthing and launching facilities. Loan to City of Needles.	10,000	–	–

CONSTRUCTION LOANS[d]

Section 5827 of the Public Resources Code authorizes the Division of Small Craft Harbors to make construction loans to cities, counties, or districts having power to acquire, construct, and operate small craft harbors. The division may loan money for acquisition, construction, improvement, maintenance, or operation of small craft harbors and related facilities. In addition, the division may concern itself with connecting waterways. The division is charged with the responsibility of determining that a project is feasible. The commission functions as the policy body in establishing the policies and standards to be used in making loans.

A brief statement of the present policies and standards follows:

1. All planning shall have been completed and copies of such plans and reports submitted to the division for approval.
2. The feasibility study shall indicate a favorable benefit-cost ratio.
3. All property to be used in connection with the project shall be owned or fully controlled by the requesting public agency; or an agreement-to-sell by the owner at a stated reasonable price shall be obtained prior to final approval of the loan.
4. A repayment agreement approved by the governing body of the requesting public agency shall be submitted with the application indicating the proposed method of loan repayment.
5. If the loan does not cover the entire cost of the project, a financing plan shall be submitted indicating sources of construction funds other than the loan being applied for, and the proposed method of retiring the loan and meeting other financial obligations of the project.
6. An operating plan shall be submitted indicating how the harbor will be operated and maintained on completion of construction.
7. Personnel of the division will inspect periodically the construction area to check on progress and to discuss the work with the local agency's inspection staff.

Section 5882 of the Public Resources Code provides that the Legislature shall make a specific appropriation of funds allocated from the Small Craft Harbors Revolving Fund for any authorized purpose with the exception of planning loans. The program reported herein does not require specific appropriation as it is furnished from a $5,000,000 appropriation from the California Water Fund made by Item 421.5, Budget Act of 1958. In addition to the state funds, federal and local funds will be used to meet the total estimated costs. In addition, allocations are also anticipated from the Small Craft Harbor Bond Fund. Initial sale of $3,000,000 from this fund was executed. It is anticipated an additional $7,000,000 will be sold early in the 1961-62 fiscal year, thus exhausting the fund.

GENERAL ANALYSIS

State bond sale proceeds are available as provided in the Harbor Development Bond Law of 1958. It is provided in this law that loans might be made to cities, cities and counties, counties, and districts having power to acquire, construct, and operate small craft harbors. While the bonds which are authorized by this law are general obligation bonds it was contemplated that the bonds would be self-liquidating. At the present time it will be necessary for the General Fund to meet a substantial portion of the interest cost of the issue. Principal repayments and interest income from loans made out of the bond sale proceeds will initially be inadequate to cover bond service charges; therefore, the repayments would be General Fund obligations.

---

[b] A nonrevenue fund. Neither the revenue nor the expenditures are included in the budget totals.
[e] Cash disbursements will not require an additional sale of bonds until 1961-62 fiscal year.

GENERAL ANALYSIS

This is a public assistance program financed by county, State, and Federal Governments to assist persons who, because of loss or impairment of sight, are unable to provide themselves with the necessities of life, and who meet certain additional eligibility requirements. The Social Security Act amendments of 1956 increased the federal participation in categorical aid payments resulting in an increase in the maximum monthly grant to $99 effective October 1, 1956. Amendments enacted by the 1957 Legislature increased the maximum monthly grant by $11 to cover special needs and provided for medical vendor payments on behalf of recipients. Further amendments enacted by the 1959 Legislature, effective January 1, 1960, increased the basic grant to $104 and the maximum grant to $115. Social Security Act amendments of 1960 increased federal participation in the medical care program an average of six dollars. This increase is reflected in the current and budget year totals.

Legislation effective January 1, 1962, is proposed by the Governor (1) removing the legal obligations of responsible relatives to support the blind person when an undue burden is imposed and (2) increasing the grant by permitting increases based upon cost of living, by making the full scope of the assistance standard available to recipients whose income now is insufficient to provide the standard and by removing the provision for special treatment of the first $11 income. For the 1961-62 budget, charges to the State General Fund will be increased by $36,200 by reason of the responsible relatives provision and $755,300 by reason of the grant increase provisions. The combined increase to the State General Fund will be $791,500.

TOTAL EXPENDITURES *(General Fund)*	$354,248	$401,100	$403,300

GENERAL ANALYSIS

This is a public assistance program in the form of financial help paid by the county and State Governments to persons who, because of loss or impairment of sight, are unable to fully provide themselves with the necessities of life but are working on a plan for self-support. This program is administered by county welfare departments and supervised by the State Department of Social Welfare. The Federal Government does not participate in this program. Increases in federal participation in categorical aid payments resulted in an increase in the maximum monthly payment to $99 effective October 1, 1956. Amendments enacted by the 1957 Legislature increased the maximum monthly grant by $11 to cover special needs and provided for medical vendor payments on behalf of recipients. Further amendments enacted by the 1959 Legislature, effective January 1, 1960, increased the basic grant to $104 and the maximum grant to $115.

GENERAL ANALYSIS

This is a public assistance program financed by county, state, and federal governments. The primary purpose of the program is to provide family security and financial assistance for needy children who are deprived of parental support or care. The program is designed to keep children in a setting of their own family and to enable parents to continue responsibility for the family living plan. If it is not possible for a child to live with his own family, the program aims to provide the best substitute care in the home of a relative, in a foster home, or in a children's institution. The program is administered by county welfare departments and supervised by the State Department of Social Welfare. On October 1, 1956, grants were increased an average of $2 per individual as a result of 1956 amendments to the Social Security Act. Amendments enacted by the 1957 Legislature increased the maximum monthly payments to one-child families, and provided for medical vendor payments on behalf of recipients.

Legislation effective January 1, 1962, is proposed by the Governor increasing the maximum amount payable per child in foster care in accord with the increased charges of operators of foster care facilities.

The increased cost to the State General Fund will be $324,000 in the 1961-62 budget year.

---

[a] Grants from the Federal Government and expenditures therefrom are not included in the overall budget totals.

Totals	$7,992,096	$13,261,800	$19,129,100

GENERAL ANALYSIS

This is a public assistance program financed by county, state and federal governments for needy prsons who are permanently and totally disabled. The program was established by the 1957 Legislature effective October 1, 1957. The Social Security Act amendments of 1958 increased the federal participation in categorical aid payments resulting in an increase in the maximum monthly grant to $106, less income.

Amendments enacted by the 1959 Legislature made available attendant care to recipients in this category effective January 1, 1960, but limited monthly expenditures in this program to an annual average of $98 per case. The amendments also provided for medical vendor payments in behalf of recipients effective October 1, 1959.

Legislation effective January 1, 1962, is proposed by the Governor (1) removing the legal obligation of responsible relatives to support the disabled person when an undue burden is imposed, (2) increasing allowable scope of needs for services related to the recipients' disability, and (3) providing a moderate liberalization in the definition of disability to cover persons whose health conditions are such that ultimate eligibility under the present restricted definition is certain in the near future.

For the 1961-62 Budget, charges to the State General Fund would be increased $18,000 by reason of the responsible relatives provision, $171,800 by reason of the grant increase provisions and $469.300 by reason of the change in the definition of disability. The adoption of these 3 measures jointly will increase the State General Fund expenditures by $675,600 or $17,300 more than the sum of the separate measures due to their joint impact on the projected caseload which was used to estimate the cost of each measure.

Totals	$251,717,479	$273,711,700	$279,586,500

GENERAL ANALYSIS

This is a public assistance program financed by county, state and federal governments for needy persons 65 years and over who meet certain other requirements such as residence, property, etc. The Social Security Act amendments of 1958 increased the federal participation in categorical aid payments resulting in an increase in the maximum monthly grant to $90 on October 1, 1958. Amendments enacted by the 1957 Legislature increased the maximum monthly grant by $16 to cover special needs and provided for medical vendor payments on behalf of recipients effective October 1, 1957. Further amendments enacted by the 1959 Legislature, effective January 1, 1960, increased the basic grant to $95 and the maximum grant to $115.

Legislation effective January 1, 1962, is proposed by the Governor (1) removing the legal obligation of responsible relatives to support the aged person when an undue burden is imposed and (2) increasing the grant by permitting increases based upon cost of living and by making the full scope of the assistance standard available to recipients whose income now is insufficient to provide the standard. Adoption of a proposed program of medical assistance for the aged who are not recipients of Old Age Security would cause a decrease in expenditures in the Old Age Security Program.

For the 1961-62 budget, charges to the State General Fund will be increased by $1,481,300 by reason of the responsible relatives provision, $9,621,000 by reason of the grant increase provision and will be reduced $1,991,000 if the program of medical assistance for the aged is adopted. The adoption of these 3 measures jointly will increase the State General Fund expenditures by $8,763,200 or $348,100 less than their separate costs due to their joint impact on the projected caseload which was used to estimate the cost of each measure.

GENERAL ANALYSIS

Medical Assistance for the Aged

Legislation effective January 1, 1962, is proposed by the Governor to match federal funds for the medical care of aged persons who are not recipients of Old Age Security and who cannot provide for their needed medical care. Such matching expenditures in part will consist of county funds now being used and in part from the proposed legislative authorization to use the unencumbered balance in the Medical Care Premium Deposit Fund. No appropriation for subvention purposes is necessary during the budget year but the future cost is estimated at approximately $14,000,000 a year against the State General Fund.

County Administration of Assistance Programs

GENERAL ANALYSIS

The cost of local administration of the aged, blind, children, and disabled programs is borne by the county and the Federal Government. Federal funds for county administration are received by the State and forewarded to the counties on the basis of estimates prepared by the State Department of Social Welfare subject to adjustment upon receipt and audit of the counties' statements of expenditures.

Total	–	–	$1,311,000

GENERAL ANALYSIS

Legislation effective July 1, 1961, is proposed by the Governor: (1) to provide funds for support of local projects, planned and evaluated to concentrate specific effort on restoring or rehabilitating families to full or partial independence and dealing with difficult family problems in the aid to needy children caseload; (2) to expand in-service training opportunities for public assistance personnel of county welfare agencies; and (3) to increase the supply of trained public assistance personnel available to county welfare departments by providing scholarships or educational leave stipends to persons contracting to work as public assistance employees of County Welfare Departments. The cost to the State General Fund is estimated at $721,000 applied as follows:

a. For local projects	$611,600
b. For in-service training	13,200
c. For educational leaves and scholarships	96,200

Reimbursement to Counties for Administration and Cost of Care of Adoptions

TOTAL EXPENDITURES (*General Fund*)	$2,099,824	$2,559,726	$3,045,828

GENERAL ANALYSIS

The State Department of Social Welfare may license county adoption agencies to accept relinquishments and make adoptive placements of children and to investigate and report on petitions for adoption filed independently. Licensed county agencies are reimbursed by the State for all administrative costs pursuant to Section 1641 of the Welfare and Institutions Code. Fees received from adoptive parents (up to $300) are abated to the cost of administration.

The cost of care for children committed to the State Department of Social Welfare or a public adoption agency pursuant to Section 226 (c) of the Civil Code is reimbursed by the State.

Provision is made in the estimate for 1961-62 to license 3 additional counties for the acceptance of relinquishments.

Relinquishment Adoptions, Children Accepted—Licensed Counties:			
Total	3,527	3,485	4,017

Salaries of Superior Court Judges

TOTAL EXPENDITURES *(General Fund)*	$2,836,161	$3,579,275	$3,583,900

GENERAL ANALYSIS

Under the provisions of Section 68206 of the Government Code, the State contributes toward the salary of each judge of the superior courts in accordance with the population of the county as determined by Section 68207 of the Government Code.

The amount budgeted is to provide the State's share of salaries of the 303 judges authorized by existing law.

Included in the total is 1 authorized position not yet established in San Joaquin County which is contingent upon action of the board of supervisors as provided by Section 69598 of the Government Code.

The following statement shows the contribution by the Stat and by the county toward the salary of each judge as provide under Section 68202 of the Government Code and Item 275(b) Chapter 11, Statutes of 1960:

Population of county	*State's share*	*County's share*	*Total salary*
250,000 or more	11,500	9,500	21,00
100,000 or more but less than 250,000	13,500	7,500	21,00
40,000 or more but less than 100,000	11,400	7,500	18,90
40,000 or less	13,400	5,500	18,90

TOTAL EXPENDITURES *(General Fund)*	$349,218	$350,000	$500,000	$150,000 (42.9%)

GENERAL ANALYSIS

Pursuant to Sections 970-973 of the Military and Veterans Code, the State may reimburse the counties for part of the cost of county services maintained for assistance to veterans and the dependents of deceased veterans in presenting and pursuing such claims as the veterans may have against the United States arising out of war service and in establishing the veteran's right to any privilege, preference, care or compensation provided for by the laws of the United States or of this State. The amount paid each county, conditioned upon the observance of certain standards and regulations, is determined by the California Veterans' Board except that the payment toward the salary of the county service officer shall not exceed $75 per month. Payments are also made for partial cost of assistants' salaries and operating expenses. All counties except Alameda, Alpine, Los Angeles, San Francisco and Sutter have established county veterans service officers.

It is anticipated that Los Angeles and Alameda Counties will enter the program during the 1961-62 fiscal year.

Assistance to Counties for Maintenance of Juvenile Homes and Camps

SUMMARY

	1959-60	1960-61	1961-62	Change from 1960-61
TOTAL EXPENDITURES *(General Fund)*	$1,773,626	$2,365,820	$2,726,550	$360,730 (15.2%)
Number of camps (end of year)	32	37	39	
Average number of wards	1,724	2,140	2,450	

GENERAL ANALYSIS

Under the provisions of Sections 950 through 960 of the Welfare and Institutions Code, the board of supervisors of any county may establish juvenile homes, ranches or camps. Wards are committed by the juvenile courts to these facilities in lieu of commitment to the Youth Authority.

Certain standards prescribed by the Youth Authority must be met by the counties before they are entitled to receive any state funds. Reimbursement to counties are made for one-hal of operating costs, but not in excess of $95 per month per child There is no limit as to the number of camps for which any on county may be reimbursed.

It is estimated that counties will be reimbursed for an averag population of 2,450 boys and girls during the 1961-62 fiscal yea with a total of 39 camps in operation at the end of the year.

EXPENDITURES

	1959-60	1960-61	1961-62

Assistance to Counties for Construction of Juvenile Homes and Camps

	1959-60	1960-61	1961-62	Change from 1960-61
TOTAL EXPENDITURES *(General Fund)*	$2,417,984	$902,844	$967,500	$64,656 (7.2%

GENERAL ANALYSIS

Pursuant to Sections 962 through 966 of the Welfare and Institutions Code, the State may reimburse counties for one-half of the cost of construction of juvenile homes, ranch camps or forestry camps not to exceed $3,000 per bed unit. Construction includes only construction of new buildings (including related site development and utilities) and initial equipment of such buildings. This program is administered by the Department of the Youth Authority.

The original appropriation made for this purpose was available for 3 years while subsequent budget acts have been made available for a period of 2 years with not more than a specified portion of the appropriation available in the first year. The appropriation requested in 1961-62 is also proposed to extend years through the 1962-63 fiscal year. This, together with t unexpended balance of the funds provided by the Budget Act 1960, will provide for a total program of $1,147,500 with n more than $967,500 being expended in 1961-62. This takes in account a realistic construction time for these facilities a allows the State to make commitments to counties for a plannin and construction time of more than 1 year.

Under this program a total of 1,680 beds will have been bui from the time of the inception of this program in 1958- through the period of availability of the 1961-62 appropriatio

Grants to Soil Conservation Districts

SUBVENTION EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	ESTIMATED 1961-62	CHANGE FROM 1960-61
TOTAL EXPENDITURES *(State Lands Act Fund)*	$30,236	$193,994	$100,000	—$93,994 (—48.5%)

GENERAL ANALYSIS

Section 6816.1 of the Public Resources Code authorizes the State Soil Conservation Commission to make grants in the amount of $100,000 annually to soil conservation districts organized pursuant to Division 9 of the Public Resources Code, to assist such districts in carrying out any work they are authorized to undertake whenever the commission determines that such work is necessary for the welfare of the people of the State. Unused funds of previous years are carried forward over a 3-year period.

The projects must advance the conservation, use, and management of soil and water resources on croplands, forest, range and watershed lands within soil conservation districts.

The projects fall within the following general categories:

SUBVENTION EXPENDITURES	ACTUAL 1959-60	ESTIMATED 1960-61	ESTIMATED 1961-62	CHANGE FROM 1960-61
CONSTRUCTION The major portion of grants fall into the construction category. Projects consist of channel realignment and lining, riprap of stream banks, construction of drainage facilities and miscellaneous other construction and planting projects	$31,065	$127,375	$44,100	
PLANNING Grants are made to districts for preliminary plans prior to actual construction of projects. In many areas studies are made to determine the feasibility of a project	2,500	49,750	46,200	
DEMONSTRATION The basic justification for these projects is to illustrate proper methods in soil conservation work	–	10,130	–

   - Teachers' Retirement Funds
   - Legislators' Retirement Fund
   - State Employees' Retirement Fund
4. FEDERAL, TRUST, AND AGENCY FUNDS
   - Department of Employment
5. DISTRICT, COUNTY, AND CITRUS FRUIT FAIRS

CLASSIFICATION OF FUNDS IN THE STATE TREASURY

The budget totals of revenues and expenditures reflect the activities of many separate funds. See Schedule 5 for complete list of these funds. They are segregated into the following classifications:

GENERAL FUND—Consists of money received into the State Treasury not required by law to be credited to any other fund, to be used for general purposes of State Government.

SPECIAL FUNDS—Funds created to receive certain revenues or to finance particular activities which are for general purposes of State Government or are for activities subject to the regulatory or police powers of the State.

OTHER FUNDS—See Schedule 5 for list of funds which are not included in the budget totals. They consist of moneys which were derived from sources other than general or special taxes, licenses, fees or other state revenues. There are receipts from the Federal Government, funds created for accounting purposes, receipts from sale of lands, or moneys held in trust. Funds not included in the budget totals are segregated into the following classifications:

Working Capital and Revolving Funds—Funds created to finance services for governmental agencies for which charges are made at cost to maintain a fixed accountability. The charges are reflected as expenditures in the budget at the agency receiving the commodity or service.

Public Service and Enterprise Funds—Activities operated under state control for the benefit of the public. Funds are derived from charges to those who use the service and no support is derived from taxes, licenses or other state revenues. These functions are not subject to the regulatory or police powers of the State.

Bond Funds—To hold proceeds from the sale of bonds and to finance projects for which the bonds were authorized. The cost to the State is charged at the time interest payments are made and when the bonds are redeemed.

Retirement Funds—Moneys held in trust by the State for retirement benefit payments.

Debt Service Funds—Moneys held by the State to be used for payment of interest or for redemption of bonds.

Trust and Agency Funds—Funds holding moneys in trust pending disbursement to trustors, moneys received from the Federal Government to be expended for specific purposes, and other funds which do not derive their sources from taxes or other state revenues, or are in the nature of transistory funds created for the convenience of accounting receipts or disbursements which are not necessarily revenues or expenditures.

TREASURY FUNDS FOR WHICH NO DETAILED TRANSACTIONS ARE REPORTED IN THE BUDGET

Ballot Paper Revolving Fund: The fund is used by the Secretary of State to purchase paper for sale to counties and municipalities for their use for election ballots.

Old Age and Survivors Insurance Revolving Fund: The fund is used by the State Employees' Retirement System to clear employer and employee contributions under the Federal Old Age and Survivors Insurance Program from public agencies included in the agreement between the State and the Federal Government.

State Payroll Revolving Fund: The fund is used by the State Controller for payment of salaries through the Central Payroll System.

India Basin Sinking Fund: Moneys are transferred from the San Francisco Harbor Improvement Fund and interest is earned on investment of these moneys to provide for payment of interest and redemption of the San Francisco Harbor Bonds.

San Francisco Seawall Sinking Fund No. 2: Moneys are transferred from the San Francisco Harbor Improvement Fund and interest is earned on investment of these moneys to provide for payment of interest and redemption of the San Francisco Harbor Bonds.

San Francisco Seawall Sinking Fund No. 3: Moneys are transferred from the San Francisco Harbor Improvement Fund and interest is earned on investment of these moneys to provide for payment of interest and redemption of the San Francisco Harbor Bonds.

San Francisco Seawall Sinking Fund No. 4: Moneys are transferred from the San Francisco Harbor Improvement Fund and interest is earned on investment of these moneys to provide for payment of interest and redemption of the San Francisco Harbor Bonds.

School Land Fund: A nonexpendable endowment fund for public school purposes. Revenues consist of payment of principal and purchase price on sale of school lands. The interest received on the investment of this fund is deposited in the School Fund.

Special Deposit Fund: Accumulation of numerous trust funds deposited by state and private agencies for a specific purpose. This fund also contains unclaimed checks and deposits pending either payment to the proper persons or transfer to the General Fund. The transactions of this fund are so numerous and so indefinite that no attempt is made to estimate the volume that will flow through the fund.

State Park Contingent Fund: Receives moneys from gifts, bequests, from municipal or county appropriations, or donations, for improvements, additions, or administration of the state park system. The amounts received are disbursed in accordance with the provisions of the donations.

Surplus Money Investment Fund: Excess money in those funds which do not have other provision for investment may be transferred to this fund, the pooled resources are invested and the interest earned is prorated to the contributing funds.

Tax-deeded Land Rental Trust Fund: Receipts are derived from leases made by the State Controller covering property deeded to the State for taxes. The rentals are paid semiannually to the county in which the property is located for distribution to the taxing agencies.

Treasury Trust Deposits: Provides for the State Treasurer's Central Banking System.

Unclaimed Property Fund: This fund accounts for all unclaimed moneys held by the State.

Condemnation Deposits Fund: Contains deposits held in trust pending settlement of court cases in condemnation proceedings.

CHANGE IN NET AVAILABLE BUDGET ASSETS	$589,224	—$264,714	—$924,760	—$660,046

GENERAL ANALYSIS

Objectives

The Correctional Industries program of the Department of Corrections was established to provide a balanced and diversified work program enabling inmates to acquire the good work habits and occupational skills necessary for successful adjustment in order that they might be returned to free society as useful citizens. This program plays a significant role in the elimination of inmate idleness which would otherwise contribute to the causes of both mental and physical degeneration.

Another objective of the Correctional Industries program is to develop work programs which will contribute to the rehabilitation of prisoners with minimum competition with private industry and free labor.

Program and Performance

The Correctional Industries Commission, representing organized labor, industry, agriculture, and the general public, is the policymaking body for this activity. It is empowered to recommend productive industrial and agricultural enterprises for the prisons. This includes determining the advisability and suitability of establishing, expanding, diminishing, or discontinuing any industrial or agricultural enterprise involving a gross annual production of not more than the maximum determined by the formula established by the Legislature.

The Correctional Industries program includes 25 industrial and 15 agricultural enterprises which have been established in all the correctional institutions of the department except the Medical Facility. About 3,100 men or approximately 14.5 percent of the total prison population will be employed during the 1961-62 fiscal year. Activities include industrial operations such as the license plate factory at Folsom and the cotton textile mill at San Quentin.

Equipment has been ordered for the paper converting and container enterprises approved for Soledad. It is anticipated that the container industry will begin actual operations in January, 1961.

The paper converting unit should be in full production by June 30, 1961.

Buildings for the shoe and knitting mill enterprises approved for the California Men's Colony at Los Padres are scheduled for completion in April, 1961. Installation of equipment should begin July 1, 1961, and should be completed by April 1, 1962. Approximately 215 inmates will be employed in the combined operation of these enterprises, 100 making shoes, 100 in the knitting mill, and 15 in administration, accounting, and storekeeping.

Several new styles of furniture and completely new office suites have been designed and are now in production. These as well as other products, will be sold only to tax-supported agencies. Redesign work on other items is continually in progress. Production of the 1963 issue of motor vehicle license plates is progressing on the basis of 2 shifts per day.

Sales of products resulting from the employment of men in this work program totaled $6,745,613 during the 1959-60 fiscal year. The major portion of all items produced are used or consumed by wards of the State.

New positions proposed on a workload basis include 1 textile products factory foreman at the Deuel Vocational Institution; 1 correctional industries manager II, 1 general accountant II, 1 accounting technician III, 1 storekeeper II, 1 shoe factory superintendent and 2 foremen for the shoe factory, and 1 superintendent and 2 foremen for the knitting mill at the California Men's Colony; and 1 textile overseer and 6 foremen for the cotton textile mill at San Quentin.

GENERAL ANALYSIS

Objectives

The Inmate Welfare Fund is a trust fund held in the State Treasury and administered by the Director of Corrections for the benefit, education, and welfare of inmates in institutions under the jurisdiction of the Department of Corrections. The fund was established by Section 5006 of the Penal Code in 1945. The primary source of revenue for the fund is profits from the sale of items to inmates at canteens maintained in each institution under the Department of Corrections. Other revenue is derived from sale of handicraft items, donations, and other miscellaneous sources. Funds so received are deposited in the State Treasury and allotted to the various institutions through departmental budgetary procedures. These allotments provide funds for the operation of the canteens and hobby shops and for the purchase of athletic and recreational equipment and supplies such as books, television sets, small games, and rental of motion picture films.

Program and Performance

The gross revenue for the Inmate Welfare Fund is in excess of $1,500,000 annually. Of this revenue, 92 percent is used in operating the canteens, handicraft shops and meeting administrative expenses. The remaining 8 percent is available for the recreation and welfare of the inmates including the purchase and repair of television sets, film rentals, fiction books for the libraries, all athletic and recreational supplies not a part of the organized athletic or education program, and the cost of the inmate newspaper. The current major program of the Inmate Welfare Fund is the establishment of the initial complement of merchandise, supplies and equipment at the Men's Colony—East Facility.

INDUSTRIES FOR THE BLIND MANUFACTURING FUND

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62

GENERAL ANALYSIS

Objectives

The Industries for the Blind operates 3 subsidized production centers located at Los Angeles, Oakland, and San Diego. These centers offer factory employment to blind, partially sighted and physically handicapped persons enabling them to contribute to their own support.

Program and Performance

The manufacture of such items as brooms, mattresses, mops, pillowcases and other textile items, surgical wrappers, rugs, brushes, plastic articles and rubber mats constitutes the main production program together with the fabrication and assembly of many products on a subcontract basis.

The administrative and physical plant operating expenses are a direct charge against the General Fund and manufacturing activities are financed from working capital supplied by the Industries for the Blind Manufacturing Fund into which the proceeds from the sale of the products are deposited. For many years, these centers were considered as separate entities with little direct central administration. The goal is now toward development of a strong central administration to co-ordinate the activities of the centers and provide adequate administrative control over the program.

The program is administered by a central office headquarters staff under the general direction of the Chief, Division of Special Schools and Services of the Department of Education.

During the 1959-60 fiscal year 283 or 190 full-time equivalent blind or otherwise physically handicapped workers were employed in the 3 centers, and the payroll for these workers was $467,431. The program for 1961-62 is based on the employment of 355 or 238 full-time equivalent workers with a payroll of $574,252.

Sales for the 3 centers amounted to $2,129,846 and the cost of goods sold, including salaries and wages, amounted to $2,186,029. The operations and adjustments resulted in a loss of $72,808. The financial transactions of the Manufacturing Fund for these centers, excluding administrative costs borne by the General Fund are summarized in the table below.

A marketing survey, completed under the direction of a management consulting firm, recommended a change in the marketing program with increased emphasis on commercial outlets and subcontract work. Sales and marketing specialists have recently been employed to further the sales program and carry out the recommendations of the survey. Quality control supervisors employed during 1959-60 have resulted in improved quality of the products produced by the centers and better management control of factors affecting the pricing structure of manufactured products.

These and other management actions are directed to a more economical program in terms of State support and to a better opportunity for the blind workers to have steady productive employment at a reasonable rate of compensation.

Summary of Operations

	1955-56	1956-57	1957-58	1958-59	1959-60	Change from prior year

STATE EDUCATIONAL AGENCY FOR SURPLUS PROPERTY

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1959-60	ESTIMATED 1960-61	PROPOSED 1961-62	CHANGE FROM 1960-61
SUMMARY				
TOTAL EXPENDITURES				
Support *(Surplus Property Revolving Fund)*	$2,399,564	$2,864,370	$3,090,278	$225,908 (7.9%)
Personnel man-years	225.7	256.3	279.1	22.8

GENERAL ANALYSIS

Objectives

The State Educational Agency for Surplus Property is authorized to co-operate with the Federal Government and its agencies in securing federal surplus property, including surplus foods, for distribution to eligible institutions.

Program and Performance

Surplus property of all federal agencies is made available to schools and other institutions through this agency. All expenses of procuring, handling and distributing such property are paid by the agency and recovered by nominal service charges. Any excess service charges are refunded to the participating agencies after the close of each fiscal year. Reserves are maintained to meet any unliquidated obligations.

The increasing importance of this agency's operations is indicated by the following tabulation:

Year	*Fair value of property distributed*
1953-54	$12,590,000
1954-55	13,983,511
1955-56	17,083,736
1956-57	20,216,696
1957-58	21,656,349
1958-59	27,928,933
1959-60	33,123,054
1960-61 (est.)	37,000,000
1961-62 (est.)	40,700,000

The level of expenditures budgeted for the agency is determined by the availability of surplus hardware and food, as well as requests from interested participating agencies. In general terms, the work program includes the screening of available property; warehousing that which is received; processing and repairing where required; and distributing and checking for compliance. The work force required has increased in proportion to the workload as measured in terms of service and handling charges made. Such increase is shown in the following table, with the number of positions given being equivalent full-time positions, including temporary help and overtime:

Year	*Service and handling charges*	*Service charges as a percent of fair value*	*Work force*	*Average service charges per man-year*
1953-54	$1,331,252	10.6	113.2	$11,760

1960-61 (est.)	3,111,000	8.4	256.3	12,138
1961-62 (est.)	3,422,000	8.4	279.1	12,261

A total of 11 additional positions of temporary help have been temporarily approved in the 1960-61 fiscal year to handle the increased volume of materials over that anticipated in the 1960-61 Governor's Budget.

These 11 positions are shown as proposed new in the 1961-62 fiscal year. In addition to these positions, 23 full-time equivalent positions are proposed to meet the estimated 10 percent increase in workload over 1960-61.
